

Marinella Gattone

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1300206/marinella-gattone-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	Global secondary prevention strategies to limit event recurrence after myocardial infarction: results of the GOSPEL study, a multicenter, randomized controlled trial from the Italian Cardiac Rehabilitation Network. <i>Archives of Internal Medicine</i> , 2008 , 168, 2194-204		258
9	Long-term physical training and left ventricular remodeling after anterior myocardial infarction: results of the Exercise in Anterior Myocardial Infarction (EAMI) trial. EAMI Study Group. <i>Journal of the American College of Cardiology</i> , 1993 , 22, 1821-9	15.1	124
8	Attenuation of unfavorable remodeling by exercise training in postinfarction patients with left ventricular dysfunction: results of the Exercise in Left Ventricular Dysfunction (ELVD) trial. <i>Circulation</i> , 1997 , 96, 1790-7	16.7	123
7	Chlamydia pneumoniae and cytomegalovirus seropositivity, inflammatory markers, and the risk of myocardial infarction at a young age. <i>American Heart Journal</i> , 2001 , 142, 633-40	4.9	55
6	Non-pharmacological control of plasma cholesterol levels. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2008 , 18, S1-16	4.5	40
5	Residual exertional ischemia and unfavorable left ventricular remodeling in patients with systolic dysfunction after anterior myocardial infarction. <i>Journal of the American College of Cardiology</i> , 1995 , 25, 1539-46	15.1	16
4	Interleukin 1 gene cluster, myocardial infarction at young age and inflammatory response of human mononuclear cells. <i>Immunological Investigations</i> , 2009 , 38, 203-19	2.9	15
3	Polymorphisms in the thrombopoietin gene are associated with risk of myocardial infarction at a young age. <i>Atherosclerosis</i> , 2001 , 154, 703-11	3.1	12
2	Global Secondary Prevention strategies to Limit event recurrence after myocardial infarction: the GOSPEL study. A trial from the Italian Cardiac Rehabilitation Network: rationale and design. <i>European Journal of Cardiovascular Prevention and Rehabilitation</i> , 2005 , 12, 555-561		11
1	Low plasma levels of brain natriuretic peptide in severe acute heart failure: merely a case?. <i>International Journal of Cardiology</i> , 2007 , 122, e18-20	3.2	1
