#	Article	IF	CITATIONS
1	Techniques to minimize excess luting agent in cement-retained implant restorations. Journal of Prosthetic Dentistry, 2002, 87, 112-114.	2.8	92
2	Limited evidence suggesting silver diamine fluoride may arrest dental caries in children. Journal of the American Dental Association, 2017, 148, 120-122.	1.5	14
3	Limited evidence suggests higher risk of dental implant failures in smokers than in nonsmokers. Journal of the American Dental Association, 2016, 147, 292-294.	1.5	4
4	Alveolar ridge preservation with bone graft may limit physiological ridge loss after tooth extraction. Journal of the American Dental Association, 2016, 147, 204-206.	1.5	3
5	Limited evidence suggests fluoride mouthrinse may reduce dental caries in children and adolescents. Journal of the American Dental Association, 2017, 148, 263-266.	1.5	3
6	Limited evidence suggests no difference in implant failure rates among people with or without diabetes. Journal of the American Dental Association, 2015, 146, 549-551.	1.5	2
7	Limited evidence indicates fluoride may prevent demineralized white lesions during orthodontic treatment. Journal of the American Dental Association, 2015, 146, 699-701.	1.5	2
8	Limited Evidence Suggests That Patients With Recurrent Aphthous Stomatitis May Benefit From Using Sodium Lauryl Sulfate-free Dentifrices. Journal of Evidence-based Dental Practice, 2019, 19, 101349.	1.5	2
9	Uncertainty of screening tools for obstructive sleep apnea in asymptomatic adults with treatments varying in effects. Journal of the American Dental Association, 2017, 148, 772-775.	1.5	1
10	Access flap surgery treatment for intrabony defects may result in improved clinical outcomes. Journal of the American Dental Association, 2014, 145, 376-377.	1.5	0
11	Insufficient evidence exists regarding the reduction of cervical dentin hypersensitivity with surgical root coverage procedures. Journal of the American Dental Association, 2015, 146, 638-640.	1.5	O
