citing authors

#	ARTICLE	IF	CITATIONS
1	Are the Effects of Oral and Vaginal Contraceptives on Bone Formation in Young Women Mediated via the Growth Hormone-IGF-I Axis?. <i>Frontiers in Endocrinology</i> , 2020, 11, 334.	3.5	8
2	Indices of Resting Metabolic Rate Accurately Reflect Energy Deficiency in Exercising Women. <i>International Journal of Sport Nutrition and Exercise Metabolism</i> , 2020, 30, 14-24.	2.1	32
3	Comparison of Female Athlete Triad Coalition and RED-S risk assessment tools. <i>Journal of Sports Sciences</i> , 2019, 37, 2433-2442.	2.0	12
4	Energy Deficiency Suppresses Bone Turnover in Exercising Women With Menstrual Disturbances. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2019, 104, 3131-3145.	3.6	13
5	Geometric and $\rho$ -Densitometric Characteristics of Bones in Athletes with Stress Fracture and Menstrual Disturbances: A Systematic Review. <i>Sports Medicine</i> , 2019, 49, 1059-1078.	6.5	6
6	Nutritional Intervention Increases the Likelihood of Menses in Exercising Women with Menstrual Disturbances. <i>Medicine and Science in Sports and Exercise</i> , 2019, 51, 468-468.	0.4	0
7	Sensitivity And Specificity Of Resting Metabolic Rate Measures To Predict Exercise Associated Menstrual Disturbances. <i>Medicine and Science in Sports and Exercise</i> , 2019, 51, 469-469.	0.4	0
8	Iron status at opposite ends of the menstrual function spectrum. <i>Journal of Trace Elements in Medicine and Biology</i> , 2019, 51, 169-175.	3.0	10
9	Weight Gain, not Simple Resumption of Menses, Improves Bone Metabolism in Amenorrheic Exercising Women. <i>Medicine and Science in Sports and Exercise</i> , 2018, 50, 36-37.	0.4	0
10	Current Status of the Female Athlete Triad: Update and Future Directions. <i>Current Osteoporosis Reports</i> , 2017, 15, 577-587.	3.6	36
11	Food Versus Pharmacy: Assessment of Nutritional and Pharmacological Strategies to Improve Bone Health in Energy-Deficient Exercising Women. <i>Current Osteoporosis Reports</i> , 2017, 15, 459-472.	3.6	14
12	A summary of the influence of exogenous estrogen administration across the lifespan on the GH/IGF-1 axis and implications for bone health. <i>Growth Hormone and IGF Research</i> , 2017, 32, 2-13.	1.1	30
13	Reduced Lean Mass and Fat Mass Exacerbate Effects of Estrogen Deficiency on Bone. <i>Medicine and Science in Sports and Exercise</i> , 2017, 49, 402.	0.4	0
14	Low resting metabolic rate in exercise-associated amenorrhea is not due to a reduced proportion of highly active metabolic tissue compartments. <i>American Journal of Physiology - Endocrinology and Metabolism</i> , 2016, 311, E480-E487.	3.5	35
15	Cumulative Menstrual Status is an Important Determinant of Femoral Neck Geometry in Exercising Women. <i>Medicine and Science in Sports and Exercise</i> , 2016, 48, 491.	0.4	0
16	Current and past menstrual status is an important determinant of femoral neck geometry in exercising women. <i>Bone</i> , 2016, 88, 101-112.	2.9	12
17	The physiology of functional hypothalamic amenorrhea associated with energy deficiency in exercising women and in women with anorexia nervosa. <i>Hormone Molecular Biology and Clinical Investigation</i> , 2016, 25, 91-119.	0.7	47
18	Low Resting Metabolic Rate in Exercise-Associated Amenorrhea is not Due to a Reduced Proportion of Energetically Expensive Tissue Compartments. <i>Medicine and Science in Sports and Exercise</i> , 2016, 48, 1084.	0.4	0

#	ARTICLE	IF	CITATIONS
19	Unique Effects of Energy versus Estrogen Deficiency on Components of Bone Strength in Exercising Women. <i>Medicine and Science in Sports and Exercise</i> , 2016, 48, 490-491.	0.4	0
20	Leptin is a Predictor of Volumetric Bone Density in Exercising Women. <i>Medicine and Science in Sports and Exercise</i> , 2015, 47, 622.	0.4	0
