#	Article	IF	CITATIONS
1	Genomeâ€wide association analysis links multiple psychiatric liability genes to oscillatory brain activity. Human Brain Mapping, 2018, 39, 4183-4195.	3.6	50
2	Heritability and molecularâ€genetic basis of resting <scp>EEG</scp> activity: A genomeâ€wide association study. Psychophysiology, 2014, 51, 1225-1245.	2.4	46
3	Causal Network Modeling of the Determinants of Drinking Behavior in Comorbid Alcohol Use and Anxiety Disorder. Alcoholism: Clinical and Experimental Research, 2019, 43, 91-97.	2.4	33
4	Does electroencephalogram phase variability account for reduced P3 brain potential in externalizing disorders?. Clinical Neurophysiology, 2014, 125, 2007-2015.	1.5	20
5	Oneâ€year developmental stability and covariance among oddball, novelty, go/noâ€go, and flanker eventâ€related potentials in adolescence: A monozygotic twin study. Psychophysiology, 2016, 53, 991-1007.	2.4	19
6	Largeâ€scale collaboration in ENIGMAâ€EEG: A perspective on the metaâ€analytic approach to link neurological and psychiatric liability genes to electrophysiological brain activity. Brain and Behavior, 2021, 11, e02188.	2.2	18
7	Association between <scp>P</scp> 3 eventâ€related potential amplitude and externalizing disorders: A timeâ€domain and timeâ€frequency investigation of 29â€yearâ€old adults. Psychophysiology, 2013, 50, 595-609	.2.4	16
8	Using a co-twin control design to evaluate alternative trait measures as indices of liability for substance use disorders. International Journal of Psychophysiology, 2020, 148, 75-83.	1.0	9
9	Reduced premovement positivity during the stimulusâ€response interval precedes errors: Using singleâ€trial and regression ERPs to understand performance deficits in ADHD. Psychophysiology, 2019, 56, e13392.	2.4	7
10	Reprint of: Using a co-twin control design to evaluate alternative trait measures as indices of liability for substance use disorders. International Journal of Psychophysiology, 2021, 163, 58-66.	1.0	0
