#	Article	IF	CITATIONS
1	Stochastic response of a class of self-excited systems with Caputo-type fractional derivative driven by Gaussian white noise. Chaos, Solitons and Fractals, 2015, 77, 190-204.	5.1	44
2	Stochastic bifurcations in the nonlinear vibroimpact system with fractional derivative under random excitation. Communications in Nonlinear Science and Numerical Simulation, 2017, 42, 62-72.	3.3	33
3	Stochastic analysis of monostable vibration energy harvesters with fractional derivative damping under Gaussian white noise excitation. Nonlinear Dynamics, 2018, 94, 639-648.	5.2	32
4	Stationary response of nonlinear system with Caputo-type fractional derivative damping under Gaussian white noise excitation. Nonlinear Dynamics, 2015, 79, 139-146.	5.2	25
5	Stochastic responses of a viscoelastic-impact system under additive and multiplicative random excitations. Communications in Nonlinear Science and Numerical Simulation, 2016, 35, 166-176.	3.3	22
6	Stochastic stationary responses of a viscoelastic system with impacts under additive Gaussian white noise excitation. Physica A: Statistical Mechanics and Its Applications, 2015, 431, 128-139.	2.6	16
7	Probabilistic response of a fractional-order hybrid vibration energy harvester driven by random excitation. Chaos, 2021, 31, 013111.	2.5	12
8	Stochastic Averaging for the Piezoelectric Energy Harvesting System With Fractional Derivative Element. IEEE Access, 2020, 8, 59883-59890.	4.2	11
9	Stationary response analysis of vibro-impact system with a unilateral nonzero offset barrier and viscoelastic damping under random excitations. Nonlinear Dynamics, 2016, 86, 891-909.	5.2	10
10	Stochastic response of an energy harvesting system with viscoelastic element under Gaussian white noise excitation. Chaos, Solitons and Fractals, 2021, 151, 111231.	5.1	9
11	Stochastic response of van der Pol oscillator with two kinds of fractional derivatives under Gaussian white noise excitation. Chinese Physics B, 2016, 25, 020201.	1.4	8
12	Bifurcation Analysis of a Vibro-Impact Viscoelastic Oscillator with Fractional Derivative Element. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2018, 28, 1850170.	1.7	8
13	Response of strongly nonlinear vibro-impact system with fractional derivative damping under Gaussian white noise excitation. Nonlinear Dynamics, 2016, 85, 1955-1964.	5.2	7
14	Bifurcation Analysis of an Energy Harvesting System with Fractional Order Damping Driven by Colored Noise. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2021, 31, .	1.7	7
15	Stochastic P-bifurcations of a noisy nonlinear system with fractional derivative element. Acta Mechanica Sinica/Lixue Xuebao, 2021, 37, 507-515.	3.4	6
16	Stochastic Bifurcations of a Fractional-Order Vibro-Impact System Driven by Additive and Multiplicative Gaussian White Noises. Complexity, 2019, 2019, 1-10.	1.6	5
17	Stochastic bifurcation analysis of a friction-damped system with impact and fractional derivative damping. Nonlinear Dynamics, 2021, 105, 3131-3138.	5.2	5
18	Stochastic Bifurcations of a Fractional-Order Vibro-Impact Oscillator Subjected to Colored Noise Excitation. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2021, 31, 2150177.	1.7	2
