

Vittorio Gentile

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1337579/vittorio-gentile-publications-by-citations.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
50	Tissue transglutaminase and apoptosis: sense and antisense transfection studies with human neuroblastoma cells. <i>Molecular and Cellular Biology</i> , 1994 , 14, 6584-96	4.8	253
49	Expression of tissue transglutaminase in Balb-C 3T3 fibroblasts: effects on cellular morphology and adhesion. <i>Journal of Cell Biology</i> , 1992 , 119, 463-74	7.3	212
48	Tissue transglutaminase-catalyzed formation of high-molecular-weight aggregates in vitro is favored with long polyglutamine domains: a possible mechanism contributing to CAG-triplet diseases. <i>Archives of Biochemistry and Biophysics</i> , 1998 , 352, 314-21	4.1	100
47	Lack of `tissue` transglutaminase protein cross-linking leads to leakage of macromolecules from dying cells: relationship to development of autoimmunity in MRLlpr/lpr mice. <i>Cell Death and Differentiation</i> , 1997 , 4, 463-72	12.7	73
46	Isolation and characterization of the human tissue transglutaminase gene promoter. <i>Journal of Biological Chemistry</i> , 1995 , 270, 9748-56	5.4	69
45	Transglutaminase-mediated modifications of the rat sperm surface in vitro. <i>Science</i> , 1984 , 226, 852-5	33.3	68
44	The importance of the GTP-binding protein tissue transglutaminase in the regulation of cell cycle progression. <i>FEBS Letters</i> , 1995 , 370, 27-31	3.8	67
43	Cross linking of polyglutamine domains catalyzed by tissue transglutaminase is greatly favored with pathological-length repeats: does transglutaminase activity play a role in (CAG)(n)/Q(n)-expansion diseases?. <i>Neurochemistry International</i> , 2002 , 40, 53-67	4.4	65
42	Pathogenesis of inclusion bodies in (CAG)n/Qn-expansion diseases with special reference to the role of tissue transglutaminase and to selective vulnerability. <i>Journal of Neurochemistry</i> , 1999 , 72, 889-99	6	55
41	The human tissue transglutaminase gene maps on chromosome 20q12 by in situ fluorescence hybridization. <i>Genomics</i> , 1994 , 20, 295-7	4.3	40
40	Cereal dietary proteins with sites for cross-linking by transglutaminase. <i>Phytochemistry</i> , 1990 , 29, 2801-2804	32	
39	Transglutaminases - possible drug targets in human diseases. <i>CNS and Neurological Disorders</i> , 2004 , 3, 99-104		29
38	Transglutaminase-catalyzed modifications of SV-IV, a major protein secreted from the rat seminal vesicle epithelium. <i>International Journal of Peptide and Protein Research</i> , 1990 , 35, 117-22		27
37	Changes in tissue transglutaminase activity and expression during retinoic acid-induced growth arrest and apoptosis in primary cultures of human epithelial prostate cells. <i>Journal of Clinical Endocrinology and Metabolism</i> , 1999 , 84, 1463-9	5.6	27
36	Localization of the human prostate transglutaminase (type IV) gene (TGM4) to chromosome 3p21.33-p22 by fluorescence in situ hybridization. <i>Genomics</i> , 1995 , 27, 219-20	4.3	26
35	Amines protect in vitro the celiac small intestine from the damaging activity of gliadin peptides. <i>Gastroenterology</i> , 1990 , 99, 1668-74	13.3	24
34	tTGase/G alpha h protein expression inhibits adenylate cyclase activity in Balb-C 3T3 fibroblasts membranes. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 1997 , 1357, 115-22	4.9	23

33	Possible role of the transglutaminases in the pathogenesis of Alzheimer's disease and other neurodegenerative diseases. <i>International Journal of Alzheimer's Disease</i> , 2011 , 2011, 865432	3.7	17
32	Transglutaminase-dependent formation of protein aggregates as possible biochemical mechanism for polyglutamine diseases. <i>Brain Research Bulletin</i> , 2001 , 56, 169-72	3.9	17
31	Role of the transglutaminase enzymes in the nervous system and their possible involvement in neurodegenerative diseases. <i>Current Medicinal Chemistry</i> , 2009 , 16, 4767-73	4.3	14
30	Tissue transglutaminase expression affects hypusine metabolism in BALB/c 3T3 cells. <i>FEBS Letters</i> , 1998 , 437, 34-8	3.8	14
29	Abnormal accumulation of tTGase products in muscle and erythrocytes of chorea-acanthocytosis patients. <i>Journal of Neuropathology and Experimental Neurology</i> , 2002 , 61, 841-8	3.1	14
28	Physio-pathological roles of transglutaminase-catalyzed reactions. <i>World Journal of Biological Chemistry</i> , 2010 , 1, 181-7	3.8	13
27	Cerebral polyamine metabolism: inhibition of spermidine biosynthesis by dicyclohexylamine. <i>Journal of Neurochemistry</i> , 1984 , 42, 321-5	6	11
26	B-lipotropin 61-76 and 61-91 fragments act as transglutaminase substrates in vitro. <i>Neuropeptides</i> , 1988 , 11, 89-92	3.3	8
25	Transglutaminase inhibition as a possible therapeutical approach to protect cells from death in neurodegenerative diseases. <i>Recent Patents on CNS Drug Discovery</i> , 2013 , 8, 161-8		8
24	Transglutaminase covalently incorporates amines into human immunodeficiency virus envelope glycoprotein gp120 in vitro. <i>International Journal of Peptide and Protein Research</i> , 1993 , 42, 204-6		7
23	Transglutaminase-catalyzed reactions responsible for the pathogenesis of celiac disease and neurodegenerative diseases: from basic biochemistry to clinic. <i>Current Medicinal Chemistry</i> , 2006 , 13, 1895-902	4.3	7
22	Tissue transglutaminase and coeliac disease pathogenesis: potential molecular mechanisms for other human diseases. <i>Neurochemistry International</i> , 2002 , 40, 79-83	4.4	7
21	Transglutaminase-catalyzed post-translational modifications of proteins in the nervous system and their possible involvement in neurodegenerative diseases. <i>CNS and Neurological Disorders - Drug Targets</i> , 2008 , 7, 370-5	2.6	6
20	Possible physiopathological effects of the transglutaminase activity on the molecular mechanisms responsible for human neurodegenerative diseases. <i>Recent Patents on CNS Drug Discovery</i> , 2014 , 9, 76-84		6
19	Molecular mechanisms responsible for the involvement of tissue transglutaminase in human diseases: Celiac Disease. <i>Frontiers in Bioscience - Landmark</i> , 2006 , 11, 249-55	2.8	5
18	Curcumin (Diferuloylmethane) Reduces Transglutaminase 2 Overexpression Induced by Retinoic Acid in Human Nervous Cell Lines. <i>NeuroImmunoModulation</i> , 2016 , 23, 188-193	2.5	4
17	Possible involvement of transglutaminase-catalyzed reactions in the physiopathology of neurodegenerative diseases. <i>Amino Acids</i> , 2013 , 44, 111-8	3.5	4
16	Role of transglutaminase-catalyzed reactions in the post-translational modifications of proteins responsible for immunological disorders. <i>Inflammation and Allergy: Drug Targets</i> , 2008 , 7, 24-9		4

15	Biochemical mechanisms for a possible involvement of the transglutaminase activity in the pathogenesis of the polyglutamine diseases: minireview article. <i>Amino Acids</i> , 2004 , 26, 431-4	3.5	3
14	Possible physiopathological roles of the transglutaminase activity in the etiopathogenesis of human neurodegenerative diseases. <i>Recent Patents on CNS Drug Discovery</i> , 2014 , 9, 101-9		3
13	Possible roles of transglutaminases in molecular mechanisms responsible for human neurodegenerative diseases. <i>AIMS Biophysics</i> , 2016 , 3, 529-545	0.8	3
12	Physiopathological roles of human transglutaminase 2. <i>Advances in Enzymology and Related Areas of Molecular Biology</i> , 2011 , 78, 47-95		2
11	Transglutaminases as possible therapeutic targets in neurodegenerative diseases. <i>Recent Patents on CNS Drug Discovery</i> , 2010 , 5, 195-202		2
10	Cell-biomaterial interactions: role of transglutaminase enzyme. <i>Journal of Materials Science: Materials in Medicine</i> , 1996 , 7, 707-711	4.5	2
9	Tissue transglutaminase expression in quail epiphyseal chondrocytes. <i>Cell Biology International</i> , 1999 , 23, 41-9	4.5	1
8	Transglutaminase activity as a possible therapeutical target in neurodegenerative diseases. <i>Recent Patents on CNS Drug Discovery</i> , 2013 , 8, 235-42		1
7	Pathophysiological roles of transglutaminase - catalyzed reactions in the pathogenesis of human diseases. <i>Inflammation and Allergy: Drug Targets</i> , 2012 , 11, 278-84		1
6	Transglutaminase inhibition: possible therapeutic mechanisms to protect cells from death in neurological disorders. <i>AIMS Molecular Science</i> , 2017 , 4, 399-414	0.9	1
5	Transglutaminase inhibition: A therapy to protect cells from death in neurodegeneration?. <i>World Journal of Biological Chemistry</i> , 2012 , 3, 184-6	3.8	1
4	Neuronutraceuticals Modulate Lipopolysaccharide- or Amyloid- β -42 Peptide-Induced Transglutaminase 2 Overexpression as a Marker of Neuroinflammation in Mouse Microglial Cells. <i>Applied Sciences (Switzerland)</i> , 2021 , 11, 5718	2.6	0
3	Spermine binding to subsynaptosomal fractions of rat brain cortex. <i>Neurochemical Research</i> , 1988 , 13, 369-76	4.6	
2	Possible pathophysiological roles of transglutaminase-catalyzed reactions in the pathogenesis of human neurodegenerative diseases. <i>AIMS Biophysics</i> , 2015 , 2, 441-457	0.8	
1	Transglutaminase inhibition: possible therapeutic mechanisms to protect cells from death in neurological disorders 2017 , 1, 026-038
