#	ARTICLE	IF	CITATIONS
1	Cercariae (Trematoda, Digenea) in European freshwater snails - a checklist of records from over one hundred years. <i>Folia Malacologica</i> , 2011, 19, 165-189.	0.2	38
2	One hundred years of research on the natural infection of freshwater snails by trematode larvae in Europe. <i>Parasitology Research</i> , 2009, 105, 301-311.	1.6	35
3	Factors affecting trematode infection rates in freshwater mussels. <i>Hydrobiologia</i> , 2015, 742, 59-70.	2.0	35
4	The real threat of swimmers' itch in anthropogenic recreational water body of the Polish Lowland. <i>Parasitology Research</i> , 2016, 115, 3049-3056.	1.6	22
5	Symptoms of behavioural anapyrexia – Reverse fever as a defence response of snails to fluke invasion. <i>Journal of Invertebrate Pathology</i> , 2012, 109, 269-273.	3.2	20
6	Thermal preferences of wintering snails <i>Planorbium corneum</i> (L.) exposed to lipopolysaccharide and zymosan. <i>Journal of Invertebrate Pathology</i> , 2013, 112, 57-61.	3.2	16
7	<i>Potamopyrgus antipodarum</i> a potential defender against swimmer's itch in European recreational water bodies – experimental study. <i>PeerJ</i> , 2018, 6, e5045.	2.0	14
8	Agents of swimmer's itch – dangerous minority in the Digenea invasion of Lymnaeidae in water bodies and the first report of <i>Trichobilharzia regenti</i> in Poland. <i>Parasitology Research</i> , 2018, 117, 3695-3704.	1.6	13
9	The invasive Chinese pond mussel <i>Sinanodonta woodiana</i> (Lea, 1834) as a host for native symbionts in European waters. <i>Journal of Limnology</i> , 0, , .	1.1	11
10	Infection of <i>Potamopyrgus antipodarum</i> (Gray, 1843) (Gastropoda: Tateiidae) by trematodes in Poland, including the first record of aspidogastriid acquisition. <i>Journal of Invertebrate Pathology</i> , 2017, 150, 32-34.	3.2	11
11	<i>Cepaea nemoralis</i> (Gastropoda: Pulmonata) in Poland: patterns of variation in a range-expanding species. <i>Biological Journal of the Linnean Society</i> , 2019, 127, 1-11.	1.6	11
12	Ketoprofen-induced inhibition of symptoms of behavioural fever observed in wintering <i>Planorbium corneum</i> (L.) (Gastropoda: Planorbidae). <i>Journal of Molluscan Studies</i> , 2017, 83, 434-439.	1.2	10
13	Unionid clams and the zebra mussels on their shells (Bivalvia: Unionidae, Dreissenidae) as hosts for trematodes in lakes of the Polish lowland. <i>Folia Malacologica</i> , 2015, 23, 149-154.	0.2	9
14	Viral pyrogen affects thermoregulatory behavior of wintering <i>Planorbium corneum</i> (L.) snails (Mollusca: Gastropoda). <i>Journal of Thermal Biology</i> , 2013, 38, 543-547.	2.5	8
15	The chemotactic swimming behavior of bird schistosome miracidia in the presence of compatible and incompatible snail hosts. <i>PeerJ</i> , 2020, 8, e9487.	2.0	8
16	<i>Cepaea</i> spp. as a source of <i>Brachylaima mesostoma</i> (Digenea: Brachylaimidae) and <i>Brachylecithum</i> sp. (Digenea: Dicrocoeliidae) larvae in Poland. <i>Parasitology Research</i> , 2020, 119, 145-152.	1.6	7
17	Invaders as Diluents of the Cercarial Dermatitis Etiological Agent. <i>Pathogens</i> , 2021, 10, 740.	2.8	7
18	A morphological study of <i>Diplodiscus subclavatus</i> (Pallas, 1760) (Trematoda: Diplodiscidae) adults from the accidental host, <i>Viviparus contectus</i> (Millet, 1813) (Caenogastropoda: Viviparidae). <i>Acta Parasitologica</i> , 2016, 61, 859-862.	1.1	3

#	ARTICLE	IF	CITATIONS
19	Different thermal conditions of lakes affect host-parasite systems: A case study of <i>Viviparus conctectus</i> (Millet, 1813) and digenean trematodes. <i>Freshwater Biology</i> , 2020, 65, 417-425.	2.4	3
20	Can <i>Potamopyrgus antipodarum</i> (Gastropoda) affect the prevalence of <i>Trichobilharzia szidati</i> in <i>Lymnaea stagnalis</i> populations?. <i>Knowledge and Management of Aquatic Ecosystems</i> , 2021, , 15.	1.1	3
21	Can Parasites Change Thermal Preferences of Hosts?. <i>Parasitology Research Monographs</i> , 2015, , 69-90.	0.3	3
22	Infestation of unionids native to Poland by <i>Dreissena polymorpha</i> (Pallas, 1771) in littoral zone of two lowland lakes. <i>Folia Malacologica</i> , 2018, 26, 177-182.	0.2	3
23	<i>Potamopyrgus antipodarum</i> (Gray, 1843) in Polish waters - its mitochondrial haplotype and role as intermediate host for trematodes. <i>Knowledge and Management of Aquatic Ecosystems</i> , 2020, , 48.	1.1	2
24	Thinking "outside the box" The effect of nontarget snails in the aquatic community on mollusc-borne diseases. <i>Science of the Total Environment</i> , 2022, 845, 157264.	8.0	2
25	The genus <i>Bilharziella</i> vs. other bird schistosomes in snail hosts from one of the major recreational lakes in Poland. <i>Knowledge and Management of Aquatic Ecosystems</i> , 2021, , 12.	1.1	1
26	No effects of waterproof marking on the behaviour and growth of <i>Physa acuta</i> Draparnaud, 1805 (Gastropoda: Hygrophila: Physidae) in the laboratory. <i>Folia Malacologica</i> , 2021, 29, 121-131.	0.2	1
27	Infestation of <i>Bivalvia</i> by <i>Dreissena polymorpha</i> (Pallas, 1771) in thermally polluted lakes. <i>Oceanological and Hydrobiological Studies</i> , 2019, 48, 85-89.	0.7	0
28	The Ponto-Caspian parasite <i>Plagioporus cf. skrjabini</i> reaches the River Rhine system in Central Europe: higher infestation in the native than in the introduced Danubian form of the gastropod <i>Theodoxus fluviatilis</i> . <i>Hydrobiologia</i> , 2021, 848, 2569-2578.	2.0	0
29	Life history strategies of <i>Cotylurus</i> spp. Szidat, 1928 (Trematoda, Strigeidae) in the molecular era - Evolutionary consequences and implications for taxonomy. <i>International Journal for Parasitology: Parasites and Wildlife</i> , 2022, 18, 201-211.	1.5	0
