

Brian J Bartholmai

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1357719/brian-j-bartholmai-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
112	Lung vessel volume evaluated with CALIPER software is an independent predictor of mortality in COVID-19 patients: a multicentric retrospective analysis.. <i>European Radiology</i> , 2022 , 1	8	
111	Validation of the BRODERS classifier (Benign aggressive nodule Evaluation using Radiomic Stratification), a novel HRCT-based radiomic classifier for indeterminate pulmonary nodules. <i>European Respiratory Journal</i> , 2021 , 57,	13.6	4
110	Vessel-related structures predict UIP pathology in those with a non-IPF pattern on CT. <i>European Radiology</i> , 2021 , 31, 7295-7302	8	1
109	Evaluation of Computer-Aided Nodule Assessment and Risk Yield (CANARY) in Korean patients for prediction of invasiveness of ground-glass opacity nodule. <i>PLoS ONE</i> , 2021 , 16, e0253204	3.7	
108	Lung mass density prediction using machine learning based on ultrasound surface wave elastography and pulmonary function testing. <i>Journal of the Acoustical Society of America</i> , 2021 , 149, 1318	2.2	4
107	Immune signatures underlying post-acute COVID-19 lung sequelae. <i>Science Immunology</i> , 2021 , 6, eabk1749	7.4	16
106	Implications of the updated Lung CT Screening Reporting and Data System (Lung-RADS version 1.1) for lung cancer screening. <i>Journal of Thoracic Disease</i> , 2020 , 12, 6966-6977	2.6	12
105	Cicatrical organizing pneumonia: a clinicopathologic and radiologic study on a cohort diagnosed by surgical lung biopsy at a single institution. <i>Human Pathology</i> , 2020 , 101, 58-63	3.7	1
104	COVID-19: The Importance of Multidisciplinary Approach. <i>Academic Radiology</i> , 2020 , 27, 1327-1328	4.3	4
103	Do we need to see to believe?-radiomics for lung nodule classification and lung cancer risk stratification. <i>Journal of Thoracic Disease</i> , 2020 , 12, 3303-3316	2.6	9
102	Predicting lung mass density of patients with interstitial lung disease and healthy subjects using deep neural network and lung ultrasound surface wave elastography. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , 2020 , 104, 103682	4.1	6
101	Stratification of long-term outcome in stable idiopathic pulmonary fibrosis by combining longitudinal computed tomography and forced vital capacity. <i>European Radiology</i> , 2020 , 30, 2669-2679	8	11
100	Pulmonary Low Attenuation Areas on CT in ANCA-associated Vasculitis: A quantitative and semi-quantitative analysis correlated with pulmonary function testing for obstructive airway disease. <i>Sarcoidosis Vasculitis and Diffuse Lung Diseases</i> , 2020 , 37, e2020016	1.1	1
99	Putting artificial intelligence (AI) on the spot: machine learning evaluation of pulmonary nodules. <i>Journal of Thoracic Disease</i> , 2020 , 12, 6954-6965	2.6	6
98	Automated Computed Tomography analysis in the assessment of Idiopathic Pulmonary Fibrosis severity and progression. <i>European Journal of Radiology</i> , 2020 , 124, 108852	4.7	13
97	Artificial Intelligence in Radiology: A Call for Thoughtful Application. <i>Clinical and Translational Science</i> , 2020 , 13, 216-218	4.9	8
96	Quantitative CT Analysis of Diffuse Lung Disease. <i>Radiographics</i> , 2020 , 40, 28-43	5.4	41

95	Automated CT Analysis of Major Forms of Interstitial Lung Disease. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	3
94	Automated computed tomography quantification of fibrosis predicts prognosis in combined pulmonary fibrosis and emphysema in a real-world setting: a single-centre, retrospective study. <i>Respiratory Research</i> , 2020 , 21, 275	7.3	5
93	Combined pulmonary fibrosis and emphysema as a clinicoradiologic entity: Characterization of presenting lung fibrosis and implications for survival. <i>Respiratory Medicine</i> , 2019 , 146, 106-112	4.6	19
92	Spirometric assessment of emphysema presence and severity as measured by quantitative CT and CT-based radiomics in COPD. <i>Respiratory Research</i> , 2019 , 20, 101	7.3	17
91	Experimental and quantitative imaging techniques in interstitial lung disease. <i>Thorax</i> , 2019 , 74, 611-619	7.3	28
90	Lung US Surface Wave Elastography in Interstitial Lung Disease Staging. <i>Radiology</i> , 2019 , 291, 479-484	20.5	20
89	Automated Parenchymal Pattern Analysis of Treatment Responses in Pulmonary Alveolar Proteinosis. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2019 , 199, 1151-1152	10.2	4
88	Assessment of Interstitial Lung Disease Using Lung Ultrasound Surface Wave Elastography: A Novel Technique With Clinicoradiologic Correlates. <i>Journal of Thoracic Imaging</i> , 2019 , 34, 313-319	5.6	25
87	Computed Tomography-Based Score Indicative of Lung Cancer Aggression (SILA) Predicts the Degree of Histologic Tissue Invasion and Patient Survival in Lung Adenocarcinoma Spectrum. <i>Journal of Thoracic Oncology</i> , 2019 , 14, 1419-1429	8.9	12
86	Longitudinal prediction of outcome in idiopathic pulmonary fibrosis using automated CT analysis. <i>European Respiratory Journal</i> , 2019 , 54,	13.6	11
85	Sex Differences in the Diameter of Extra-parenchymal Airways in a Large Cohort of Healthy Adult Non-smokers. <i>FASEB Journal</i> , 2019 , 33, 735.1	0.9	
84	A quantitative method for measuring the changes of lung surface wave speed for assessing disease progression of interstitial lung disease. <i>Ultrasound in Medicine and Biology</i> , 2019 , 45, 741-748	3.5	4
83	Quantitative analysis of lung sounds for monitoring idiopathic pulmonary fibrosis: a prospective pilot study. <i>European Respiratory Journal</i> , 2019 , 53,	13.6	6
82	Breathe New Life Into Your Chest CT Exams: Using Advanced Acquisition and Postprocessing Techniques. <i>Current Problems in Diagnostic Radiology</i> , 2019 , 48, 152-160	1.6	2
81	Predicting outcomes in rheumatoid arthritis related interstitial lung disease. <i>European Respiratory Journal</i> , 2019 , 53,	13.6	66
80	Predicting Outcomes in Idiopathic Pulmonary Fibrosis Using Automated Computed Tomographic Analysis. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2018 , 198, 767-776	10.2	80
79	Serial automated quantitative CT analysis in idiopathic pulmonary fibrosis: functional correlations and comparison with changes in visual CT scores. <i>European Radiology</i> , 2018 , 28, 1318-1327	8	33
78	Assessing the inter-observer variability of Computer-Aided Nodule Assessment and Risk Yield (CANARY) to characterize lung adenocarcinomas. <i>PLoS ONE</i> , 2018 , 13, e0198118	3.7	6

77	Statin as a novel pharmacotherapy of pulmonary alveolar proteinosis. <i>Nature Communications</i> , 2018 , 9, 3127	17.4	35
76	Likelihood of pulmonary hypertension in patients with idiopathic pulmonary fibrosis and emphysema. <i>Respirology</i> , 2018 , 23, 593-599	3.6	19
75	An Ultrasound Surface Wave Technique for Assessing Skin and Lung Diseases. <i>Ultrasound in Medicine and Biology</i> , 2018 , 44, 321-331	3.5	36
74	Short-term Automated Quantification of Radiologic Changes in the Characterization of Idiopathic Pulmonary Fibrosis Versus Nonspecific Interstitial Pneumonia and Prediction of Long-term Survival. <i>Journal of Thoracic Imaging</i> , 2018 , 33, 124-131	5.6	10
73	Computer Aided Nodule Analysis and Risk Yield (CANARY) characterization of adenocarcinoma: radiologic biopsy, risk stratification and future directions. <i>Translational Lung Cancer Research</i> , 2018 , 7, 313-326	4.4	3
72	Effect of Recombinant Human Pentraxin 2 vs Placebo on Change in Forced Vital Capacity in Patients With Idiopathic Pulmonary Fibrosis: A Randomized Clinical Trial. <i>JAMA - Journal of the American Medical Association</i> , 2018 , 319, 2299-2307	27.4	107
71	Development and validation of a radiological diagnosis model for hypersensitivity pneumonitis. <i>European Respiratory Journal</i> , 2018 , 52,	13.6	32
70	Novel high-resolution computed tomography-based radiomic classifier for screen-identified pulmonary nodules in the National Lung Screening Trial. <i>PLoS ONE</i> , 2018 , 13, e0196910	3.7	17
69	Syntactic and semantic errors in radiology reports associated with speech recognition software. <i>Health Informatics Journal</i> , 2017 , 23, 3-13	3	17
68	Chronic hypersensitivity pneumonitis: identification of key prognostic determinants using automated CT analysis. <i>BMC Pulmonary Medicine</i> , 2017 , 17, 81	3.5	34
67	Comparison of Total Lung Capacity Determined by Plethysmography With Computed Tomographic Segmentation Using CALIPER. <i>Journal of Thoracic Imaging</i> , 2017 , 32, 101-106	5.6	8
66	Mortality prediction in idiopathic pulmonary fibrosis: evaluation of computer-based CT analysis with conventional severity measures. <i>European Respiratory Journal</i> , 2017 , 49,	13.6	119
65	Mycophenolate mofetil for scleroderma-related interstitial lung disease: A real world experience. <i>PLoS ONE</i> , 2017 , 12, e0177107	3.7	12
64	Assessment of interstitial lung disease using lung ultrasound surface wave elastography 2017 ,		4
63	Evaluation of visual and computer-based CT analysis for the identification of functional patterns of obstruction and restriction in hypersensitivity pneumonitis. <i>Respirology</i> , 2017 , 22, 1585-1591	3.6	17
62	Unclassifiable-interstitial lung disease: Outcome prediction using CT and functional indices. <i>Respiratory Medicine</i> , 2017 , 130, 43-51	4.6	29
61	Correlation of pulmonary function and usual interstitial pneumonia computed tomography patterns in idiopathic pulmonary fibrosis. <i>Respiratory Medicine</i> , 2017 , 129, 152-157	4.6	10
60	Functional and prognostic effects when emphysema complicates idiopathic pulmonary fibrosis. <i>European Respiratory Journal</i> , 2017 , 50,	13.6	50

59	Novel Assessment of Interstitial Lung Disease Using the "Computer-Aided Lung Informatics for Pathology Evaluation and Rating" (CALIPER) Software System in Idiopathic Inflammatory Myopathies. <i>Lung</i> , 2017 , 195, 545-552	2.9	9
58	Computer-Aided Nodule Assessment and Risk Yield (CANARY) may facilitate non-invasive prediction of EGFR mutation status in lung adenocarcinomas. <i>Scientific Reports</i> , 2017 , 7, 17620	4.9	7
57	Quantitative assessment of scleroderma using ultrasound surface wave elastography 2017 ,		1
56	Automated Quantitative Computed Tomography Versus Visual Computed Tomography Scoring in Idiopathic Pulmonary Fibrosis: Validation Against Pulmonary Function. <i>Journal of Thoracic Imaging</i> , 2016 , 31, 304-11	5.6	99
55	Recombinant human pentraxin-2 therapy in patients with idiopathic pulmonary fibrosis: safety, pharmacokinetics and exploratory efficacy. <i>European Respiratory Journal</i> , 2016 , 47, 889-97	13.6	54
54	Appreciating the shades of gray: a case for Computer-Aided Nodule Assessment and Risk Yield (CANARY)-based risk stratification of lung adenocarcinomas. <i>Journal of Thoracic Disease</i> , 2016 , 8, E1438-E1440 ¹	2.6	1
53	Evaluation of computer-based computer tomography stratification against outcome models in connective tissue disease-related interstitial lung disease: a patient outcome study. <i>BMC Medicine</i> , 2016 , 14, 190	11.4	46
52	Computer-Aided Nodule Assessment and Risk Yield Risk Management of Adenocarcinoma: The Future of Imaging?. <i>Seminars in Thoracic and Cardiovascular Surgery</i> , 2016 , 28, 120-6	1.7	8
51	Sensitivity of Thoracic Digital Tomosynthesis (DTS) for the Identification of Lung Nodules. <i>Journal of Digital Imaging</i> , 2016 , 29, 141-7	5.3	7
50	Predictors of idiopathic pulmonary fibrosis in absence of radiologic honeycombing: A cross sectional analysis in ILD patients undergoing lung tissue sampling. <i>Respiratory Medicine</i> , 2016 , 118, 88-95 ^{4.6}	4.6	38
49	The effects of changes in utilization and technological advancements of cross-sectional imaging on radiologist workload. <i>Academic Radiology</i> , 2015 , 22, 1191-8	4.3	132
48	Noninvasive Computed Tomography-based Risk Stratification of Lung Adenocarcinomas in the National Lung Screening Trial. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2015 , 192, 737-44 ^{19.2}	19.2	38
47	Pulmonary nodule characterization, including computer analysis and quantitative features. <i>Journal of Thoracic Imaging</i> , 2015 , 30, 139-56	5.6	36
46	Clinical utility of quantitative imaging. <i>Academic Radiology</i> , 2015 , 22, 33-49	4.3	53
45	Methods and challenges in quantitative imaging biomarker development. <i>Academic Radiology</i> , 2015 , 22, 25-32	4.3	58
44	Syntactic and Semantic Errors in Radiology Reports Associated With Speech Recognition Software. <i>Studies in Health Technology and Informatics</i> , 2015 , 216, 922	0.5	7
43	Active relearning for robust supervised training of emphysema patterns. <i>Journal of Digital Imaging</i> , 2014 , 27, 548-55	5.3	1
42	Automated quantification of radiological patterns predicts survival in idiopathic pulmonary fibrosis. <i>European Respiratory Journal</i> , 2014 , 43, 204-12	13.6	129

41	Noninvasive risk stratification of lung adenocarcinoma using quantitative computed tomography. <i>Journal of Thoracic Oncology</i> , 2014 , 9, 1698-703	8.9	27
40	Correlation of regional emphysema and lung cancer: a lung tissue research consortium-based study. <i>Journal of Thoracic Oncology</i> , 2014 , 9, 639-45	8.9	35
39	Quantitative stratification of diffuse parenchymal lung diseases. <i>PLoS ONE</i> , 2014 , 9, e93229	3.7	22
38	Laterality errors in radiology reports generated with and without voice recognition software: frequency and clinical significance. <i>Journal of the American College of Radiology</i> , 2013 , 10, 538-43	3.5	9
37	Noninvasive characterization of the histopathologic features of pulmonary nodules of the lung adenocarcinoma spectrum using computer-aided nodule assessment and risk yield (CANARY)--a pilot study. <i>Journal of Thoracic Oncology</i> , 2013 , 8, 452-60	8.9	53
36	Quantitative computed tomography imaging of interstitial lung diseases. <i>Journal of Thoracic Imaging</i> , 2013 , 28, 298-307	5.6	89
35	Detail-on-demand visualization for lean understanding of lung abnormalities. <i>Studies in Health Technology and Informatics</i> , 2012 , 173, 362-8	0.5	1
34	Imaging informatics: challenges in multi-site imaging trials. <i>Journal of Digital Imaging</i> , 2011 , 24, 151-9	5.3	2
33	Intrathoracic tracheal volume and collapsibility on inspiratory and end-expiratory ct scans correlations with lung volume and pulmonary function in 85 smokers. <i>Academic Radiology</i> , 2011 , 18, 299-305	4.3	24
32	The relationship between small pulmonary vascular alteration and aortic atherosclerosis in chronic obstructive pulmonary disease: quantitative CT analysis. <i>Academic Radiology</i> , 2011 , 18, 40-6	4.3	37
31	Kurtosis and skewness of density histograms on inspiratory and expiratory CT scans in smokers. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2011 , 8, 13-20	2	16
30	Referenceless stratification of parenchymal lung abnormalities. <i>Lecture Notes in Computer Science</i> , 2011 , 14, 223-30	0.9	3
29	Iodixanol versus low-osmolar contrast media for prevention of contrast induced nephropathy: meta-analysis of randomized, controlled trials. <i>Circulation: Cardiovascular Interventions</i> , 2010 , 3, 351-8	6	71
28	Are airflow obstruction and radiographic evidence of emphysema risk factors for lung cancer? A nested case-control study using quantitative emphysema analysis. <i>Chest</i> , 2010 , 138, 1295-302	5.3	75
27	Airway count and emphysema assessed by chest CT imaging predicts clinical outcome in smokers. <i>Chest</i> , 2010 , 138, 880-7	5.3	60
26	Collapsibility of lung volume by paired inspiratory and expiratory CT scans: correlations with lung function and mean lung density. <i>Academic Radiology</i> , 2010 , 17, 489-95	4.3	68
25	Gender influences Health-Related Quality of Life in IPF. <i>Respiratory Medicine</i> , 2010 , 104, 724-30	4.6	30
24	Relationship of emphysema and airway disease assessed by CT to exercise capacity in COPD. <i>Respiratory Medicine</i> , 2010 , 104, 1145-51	4.6	46

23	Incidence, prevalence, and clinical course of idiopathic pulmonary fibrosis: a population-based study. <i>Chest</i> , 2010 , 137, 129-37	5.3	332
22	Iron deposition and increased alveolar septal capillary density in nonfibrotic lung tissue are associated with pulmonary hypertension in idiopathic pulmonary fibrosis. <i>Respiratory Research</i> , 2010 , 11, 37	7.3	35
21	Optimizing non-local means for denoising low dose CT 2009 ,		14
20	Clinical significance of radiologic characterizations in COPD. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2009 , 6, 459-67	2	75
19	Mortality associated with nephropathy after radiographic contrast exposure. <i>Mayo Clinic Proceedings</i> , 2008 , 83, 1095-100	6.4	126
18	Sodium bicarbonate is associated with an increased incidence of contrast nephropathy: a retrospective cohort study of 7977 patients at mayo clinic. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2008 , 3, 10-8	6.9	94
17	Processing of CT images for analysis of diffuse lung disease in the lung tissue research consortium 2008 ,		6
16	Selection of appropriate computed tomographic image reconstruction algorithms for a quantitative multicenter trial of diffuse lung disease. <i>Journal of Computer Assisted Tomography</i> , 2008 , 32, 233-7	2.2	9
15	High resolution multidetector CT-aided tissue analysis and quantification of lung fibrosis. <i>Academic Radiology</i> , 2007 , 14, 772-87	4.3	93
14	Effect of automated image registration on radiologist interpretation. <i>Journal of Digital Imaging</i> , 2007 , 20, 105-13	5.3	5
13	3D MORPHOLOGICAL ANALYSIS OF LUNG PATHOLOGY 2007 ,		2
12	Nonlinear histogram binning for quantitative analysis of lung tissue fibrosis in high-resolution CT data 2007 ,		4
11	Optimization of CT image reconstruction algorithms for the lung tissue research consortium (LTRC) 2006 , 6143, 942		0
10	High resolution multidetector CT aided tissue analysis and quantification of lung fibrosis 2006 , 6143, 931		
9	ROC study of four LCD displays under typical medical center lighting conditions. <i>Journal of Digital Imaging</i> , 2006 , 19, 30-40	5.3	20
8	Parametric modeling for quantitative analysis of pulmonary structure to function relationships 2005 , 5744, 184		
7	Automated segmentation of the lungs from high resolution CT images for quantitative study of chronic obstructive pulmonary diseases 2005 , 5744, 5		1
6	SCAR R&D Symposium 2003: comparing the efficacy of 5-MP CRT versus 3-MP LCD in the evaluation of interstitial lung disease. <i>Journal of Digital Imaging</i> , 2004 , 17, 149-57	5.3	11

5	Reviews in radiology informatics: establishing a core informatics curriculum. <i>Journal of Digital Imaging</i> , 2004 , 17, 244-8	5-3	12
4	Understanding interpretive errors in radiologists learning computed tomography colonography. <i>Academic Radiology</i> , 2004 , 11, 750-6	4-3	43
3	Computer-aided detection and diagnosis at the start of the third millennium. <i>Journal of Digital Imaging</i> , 2002 , 15, 59-68	5-3	49
2	The electronic imaging technology specialist: the role of a new radiology subspecialty for the 21st century. <i>Journal of Digital Imaging</i> , 2002 , 15 Suppl 1, 184-8	5-3	7
1	Clinical correlations of immunophenotypic variations and the presence of trisomy 12 in B-cell chronic lymphocytic leukemia. <i>Cancer Genetics and Cytogenetics</i> , 1997 , 95, 173-7		21
