#	ARTICLE	IF	CITATIONS
1	Do Incentives Crowd Out Motivation? A Feasibility Study of a Community Vector-Control Campaign in Peru. <i>Behavioral Medicine</i> , 2023, 49, 53-61.	1.0	0
2	Gender gaps in cognitive and noncognitive skills among adolescents in India. <i>Journal of Economic Behavior and Organization</i> , 2022, 193, 66-97.	1.0	7
3	The Asian Games, air pollution and birth outcomes in South China: An instrumental variable approach. <i>Economics and Human Biology</i> , 2022, 44, 101078.	0.7	1
4	Endogenous inclusion in the Demographic and Health Survey anthropometric sample: Implications for studying height within households. <i>Journal of Development Economics</i> , 2022, 155, 102783.	2.1	8
5	Same environment, stratified impacts? Air pollution, extreme temperatures, and birth weight in South China. <i>Social Science Research</i> , 2022, 105, 102691.	1.1	4
6	You are what your parents expect: Height and local reference points. <i>Journal of Econometrics</i> , 2022, , 105269.	3.5	1
7	Health and development from preconception to 20 years of age and human capital. <i>Lancet, The</i> , 2022, 399, 1730-1740.	6.3	37
8	The causal effects of parents' schooling on children's schooling in urban China. <i>Journal of Comparative Economics</i> , 2021, 49, 258-276.	1.1	4
9	Effects of responsive caregiving and learning opportunities during pre-school ages on the association of early adversities and adolescent human capital: an analysis of birth cohorts in two middle-income countries. <i>The Lancet Child and Adolescent Health</i> , 2021, 5, 37-46.	2.7	42
10	Assessment of an adolescent-girl-focused nutritional educational intervention within a girls' empowerment programme: a cluster randomised evaluation in Zambia. <i>Public Health Nutrition</i> , 2021, 24, 651-664.	1.1	4
11	The principles of Nurturing Care promote human capital and mitigate adversities from preconception through adolescence. <i>BMJ Global Health</i> , 2021, 6, e004436.	2.0	46
12	The effect of gender targeting of food transfers on child nutritional status: experimental evidence from the Bolivian amazon. <i>Journal of Development Effectiveness</i> , 2021, 13, 276-291.	0.4	4
13	Hospital nurse staffing and patient outcomes in Chile: a multilevel cross-sectional study. <i>The Lancet Global Health</i> , 2021, 9, e1145-e1153.	2.9	38
14	Global estimates of the implications of COVID-19-related preprimary school closures for children's instructional access, development, learning, and economic wellbeing. <i>Child Development</i> , 2021, 92, e883-e899.	1.7	55
15	Genetic risks, adolescent health, and schooling attainment. <i>Health Economics (United Kingdom)</i> , 2021, 30, 2905-2920.	0.8	3
16	Measuring and forecasting progress in education: what about early childhood?. <i>Npj Science of Learning</i> , 2021, 6, 27.	1.5	5
17	Impact of the Juntos Conditional Cash Transfer Program on Nutritional and Cognitive Outcomes in Peru: Comparison between Younger and Older Initial Exposure. <i>Economic Development and Cultural Change</i> , 2020, 68, 865-897.	0.8	9
18	The Impact of a National Early Childhood Development Program on Future Schooling Attainment: Evidence from Integrated Child Development Services in India. <i>Economic Development and Cultural Change</i> , 2020, 69, 291-316.	0.8	14

#	ARTICLE	IF	CITATIONS
19	Impact of the NREGS on Children's Intellectual Human Capital. <i>Journal of Development Studies</i> , 2020, 56, 929-945.	1.2	10
20	Relationship between early-life nutrition and ages at menarche and first pregnancy, and childbirth rates of young adults: Evidence from APCAPS in India. <i>Maternal and Child Nutrition</i> , 2020, 16, e12854.	1.4	5
21	Are Household Expenditures on Food Groups Associated with Children's Future Heights in Ethiopia, India, Peru, and Vietnam?. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 4739.	1.2	2
22	Group Sessions or Home Visits for Early Childhood Development in India: A Cluster RCT. <i>Pediatrics</i> , 2020, 146, .	1.0	51
23	Nutrition, Adult Cognitive Skills, and Productivity: Results and Influence of the INCAP Longitudinal Study. <i>Food and Nutrition Bulletin</i> , 2020, 41, S41-S49.	0.5	6
24	The impact of the Adolescent Girls Empowerment Program (AGEP) on short and long term social, economic, education and fertility outcomes: a cluster randomized controlled trial in Zambia. <i>BMC Public Health</i> , 2020, 20, 349.	1.2	44
25	Anthropometric, cognitive, and schooling benefits of measles vaccination: Longitudinal cohort analysis in Ethiopia, India, and Vietnam. <i>Vaccine</i> , 2019, 37, 4336-4343.	1.7	30
26	Nutritional Status from 1 to 15 Years and Adolescent Learning for Boys and Girls in Ethiopia, India, Peru, and Vietnam. <i>Population Research and Policy Review</i> , 2019, 38, 899-931.	1.0	12
27	A behavioral design approach to improving a Chagas disease vector control campaign in Peru. <i>BMC Public Health</i> , 2019, 19, 1272.	1.2	15
28	The double burden of malnutrition among youth: Trajectories and inequalities in four emerging economies. <i>Economics and Human Biology</i> , 2019, 34, 80-91.	0.7	19
29	Early Childhood Teachers' Lives in Context: Implications for Professional Development in Under-Resourced Areas. <i>American Journal of Community Psychology</i> , 2019, 63, 270-285.	1.2	23
30	Experimental Impacts of the "Quality Preschool for Ghana" Interventions on Teacher Professional Well-being, Classroom Quality, and Children's School Readiness. <i>Journal of Research on Educational Effectiveness</i> , 2019, 12, 10-37.	0.9	58
31	The Contribution of Increased Equity to the Estimated Social Benefits from a Transfer Program: An Illustration from PROGRESA/Oportunidades. <i>World Bank Economic Review</i> , 2019, 33, 535-550.	1.4	8
32	Early-Life Nutrition Is Associated Positively with Schooling and Labor Market Outcomes and Negatively with Marriage Rates at Age 20-25 Years: Evidence from the Andhra Pradesh Children and Parents Study (APCAPS) in India. <i>Journal of Nutrition</i> , 2018, 148, 140-146.	1.3	21
33	Conditional cash transfers for primary education: Which children are left out?. <i>World Development</i> , 2018, 105, 1-12.	2.6	14
34	Adolescent mothers' anthropometrics and grandmothers' schooling predict infant anthropometrics in Ethiopia, India, Peru, and Vietnam. <i>Annals of the New York Academy of Sciences</i> , 2018, 1416, 86-106.	1.8	9
35	Birth weight and prepubertal body size predict menarcheal age in India, Peru, and Vietnam. <i>Annals of the New York Academy of Sciences</i> , 2018, 1416, 107-116.	1.8	11
36	Child stunting is associated with weaker human capital among native Amazonians. <i>American Journal of Human Biology</i> , 2018, 30, e23059.	0.8	11

#	ARTICLE	IF	CITATIONS
37	Investment in child and adolescent health and development: key messages from Disease Control Priorities , 3rd Edition. Lancet, The, 2018, 391, 687-699.	6.3	156
38	Do single-sex schools enhance studentsâ€™ STEM (science, technology, engineering, and mathematics) outcomes?. Economics of Education Review, 2018, 62, 35-47.	0.7	25
39	The effect of natural disaster on fertility, birth spacing, and child sex ratio: evidence from a major earthquake in India. Journal of Population Economics, 2018, 31, 267-293.	3.5	56
40	Benefits and Costs of the Population and Demography Targets for the Post-2015 Development Agenda. , 2018, , 375-398.		1
41	Increasing participation in a vector control campaign: a cluster randomised controlled evaluation of behavioural economic interventions in Peru. BMJ Global Health, 2018, 3, e000757.	2.0	8
42	You Are What Your Parents Think: Height and Local Reference Points. SSRN Electronic Journal, 2018, , .	0.4	2
43	Linear Growth through 12 Years is Weakly but Consistently Associated with Language and Math Achievement Scores at Age 12 Years in 4 Low- or Middle-Income Countries. Journal of Nutrition, 2018, 148, 1852-1859.	1.3	17
44	G20's Initiative for Early Childhood Development. Lancet, The, 2018, 392, 2695-2696.	6.3	13
45	Birth seasons and heights among girls and boys below 12 years of age: lasting effects and catch-up growth among native Amazonians in Bolivia. Annals of Human Biology, 2018, 45, 299-313.	0.4	7
46	Exposure to improved nutrition from conception to age 2 years and adult cardiometabolic disease risk: a modelling study. The Lancet Global Health, 2018, 6, e875-e884.	2.9	53
47	Varied patterns of catch-up in child growth: Evidence from Young Lives. Social Science and Medicine, 2018, 214, 206-213.	1.8	11
48	Family structure and child development in Chile: A longitudinal analysis of household transitions involving fathers and grandparents. Demographic Research, 2018, 38, 1777-1814.	2.0	27
49	Big Numbers about Small Children: Estimating the Economic Benefits of Addressing Undernutrition. World Bank Research Observer, 2017, 32, lkw003.	3.3	16
50	Household food group expenditure patterns are associated with child anthropometry at ages 5, 8 and 12 years in Ethiopia, India, Peru and Vietnam. Economics and Human Biology, 2017, 26, 30-41.	0.7	36
51	Intergenerational Transmission of Poverty and Inequality: Parental Resources and Schooling Attainment and Childrenâ€™s Human Capital in Ethiopia, India, Peru, and Vietnam. Economic Development and Cultural Change, 2017, 65, 657-697.	0.8	38
52	Does household access to improved water and sanitation in infancy and childhood predict better vocabulary test performance in Ethiopian, Indian, Peruvian and Vietnamese cohort studies?. BMJ Open, 2017, 7, e013201.	0.8	17
53	Heterogeneity in predictive power of early childhood nutritional indicators for mid-childhood outcomes: Evidence from Vietnam. Economics and Human Biology, 2017, 26, 86-95.	0.7	8
54	Mothersâ€™ labor market choices and child development outcomes in Chile. SSM - Population Health, 2017, 3, 756-766.	1.3	13

#	ARTICLE	IF	CITATIONS
55	Parental preferences and allocations of investments in children's learning and health within families. <i>Social Science and Medicine</i> , 2017, 194, 76-86.	1.8	16
56	Technological priorities in rice production among smallholder farmers in Ghana. <i>Njas - Wageningen Journal of Life Sciences</i> , 2017, 83, 47-56.	7.9	19
57	Disparities in children's vocabulary and height in relation to household wealth and parental schooling: A longitudinal study in four low- and middle-income countries. <i>SSM - Population Health</i> , 2017, 3, 767-786.	1.3	26
58	Children with access to improved sanitation but not improved water are at lower risk of stunting compared to children without access: a cohort study in Ethiopia, India, Peru, and Vietnam. <i>BMC Public Health</i> , 2017, 17, 110.	1.2	66
59	Cluster randomized evaluation of Adolescent Girls Empowerment Programme (AGEP): study protocol. <i>BMC Public Health</i> , 2017, 17, 386.	1.2	26
60	Investing in the foundation of sustainable development: pathways to scale up for early childhood development. <i>Lancet, The</i> , 2017, 389, 103-118.	6.3	553
61	Prenatal care and child growth and schooling in four low- and medium-income countries. <i>PLoS ONE</i> , 2017, 12, e0171299.	1.1	19
62	The Human Capital and Productivity Benefits of Early Childhood Nutritional Interventions. , 2017, , 385-402.		18
63	Evidence of Impact of Interventions on Growth and Development during Early and Middle Childhood. , 2017, , 79-98.		34
64	The effect of early childhood stunting on children's cognitive achievements: Evidence from young lives Ethiopia. <i>Ethiopian Journal of Health Development</i> , 2017, 31, 75-84.	0.2	29
65	Early Childhood Nutrition Is Positively Associated with Adolescent Educational Outcomes: Evidence from the Andhra Pradesh Child and Parents Study (APCAPS). <i>Journal of Nutrition</i> , 2016, 146, 806-813.	1.3	25
66	Weight Status and Behavioral Problems among Very Young Children in Chile. <i>PLoS ONE</i> , 2016, 11, e0161380.	1.1	8
67	Catch-up growth and growth deficits: Nine-year annual panel child growth for native Amazonians in Bolivia. <i>Annals of Human Biology</i> , 2016, 43, 304-315.	0.4	18
68	Limited common origins of multiple adult health-related behaviors: Evidence from U.S. twins. <i>Social Science and Medicine</i> , 2016, 171, 67-83.	1.8	3
69	Stunting in Infancy Is Associated with Decreased Risk of High Body Mass Index for Age at 8 and 12 Years of Age. <i>Journal of Nutrition</i> , 2016, 146, 2296-2303.	1.3	8
70	The effects of community income inequality on health: Evidence from a randomized control trial in the Bolivian Amazon. <i>Social Science and Medicine</i> , 2016, 149, 66-75.	1.8	10
71	Early life height and weight production functions with endogenous energy and protein inputs. <i>Economics and Human Biology</i> , 2016, 22, 65-81.	0.7	29
72	Growth trajectories from conception through middle childhood and cognitive achievement at age 8 years: Evidence from four low- and middle-income countries. <i>SSM - Population Health</i> , 2016, 2, 43-54.	1.3	29

#	ARTICLE	IF	CITATIONS
73	Does pre-school improve cognitive abilities among children with early-life stunting? A longitudinal study for Peru. <i>International Journal of Educational Research</i> , 2016, 75, 102-114.	1.2	14
74	Twin Studies in Demography. , 2015, , 703-709.		0
75	Schooling has smaller or insignificant effects on adult health in the US than suggested by cross-sectional associations: New estimates using relatively large samples of identical twins. <i>Social Science and Medicine</i> , 2015, 127, 181-189.	1.8	56
76	Cross-sectional schooling-health associations misrepresented causal schooling effects on adult health and health-related behaviors: Evidence from the Chinese Adults Twins Survey. <i>Social Science and Medicine</i> , 2015, 127, 190-197.	1.8	25
77	Causal inferences: Identical twins help and clarity about necessary assumptions is critical. <i>Social Science and Medicine</i> , 2015, 127, 201-202.	1.8	13
78	Cohort Profile: The Malawi Longitudinal Study of Families and Health (MLSFH). <i>International Journal of Epidemiology</i> , 2015, 44, 394-404.	0.9	79
79	Cross-Sectional and Longitudinal Associations between Household Food Security and Child Anthropometry at Ages 5 and 8 Years in Ethiopia, India, Peru, and Vietnam. <i>Journal of Nutrition</i> , 2015, 145, 1924-1933.	1.3	46
80	Separating boys and girls and increasing weight? Assessing the impacts of single-sex schools through random assignment in Seoul. <i>Social Science and Medicine</i> , 2015, 134, 1-11.	1.8	14
81	Wealth Gradients in Early Childhood Cognitive Development in Five Latin American Countries. <i>Journal of Human Resources</i> , 2015, 50, 446-463.	1.9	117
82	Negative economic shocks and child schooling: Evidence from rural Malawi. <i>Development Southern Africa</i> , 2015, 32, 458-476.	1.1	12
83	Participation in the Juntos Conditional Cash Transfer Program in Peru Is Associated with Changes in Child Anthropometric Status but Not Language Development or School Achievement. <i>Journal of Nutrition</i> , 2015, 145, 2396-2405.	1.3	38
84	Perception of HIV risk and the quantity and quality of children: the case of rural Malawi. <i>Journal of Population Economics</i> , 2015, 28, 113-132.	3.5	8
85	Households across All Income Quintiles, Especially the Poorest, Increased Animal Source Food Expenditures Substantially during Recent Peruvian Economic Growth. <i>PLoS ONE</i> , 2014, 9, e110961.	1.1	14
86	Height-for-age z scores increase despite increasing height deficits among children in 5 developing countries , ,. <i>American Journal of Clinical Nutrition</i> , 2014, 100, 821-825.	2.2	74
87	Economic perspectives on integrating early child stimulation with nutritional interventions. <i>Annals of the New York Academy of Sciences</i> , 2014, 1308, 129-138.	1.8	26
88	Does parental absence reduce cognitive achievements? Evidence from rural China. <i>Journal of Development Economics</i> , 2014, 111, 181-195.	2.1	149
89	Growth faltering and recovery in children aged 1â€“8 years in four low- and middle-income countries: Young Lives. <i>Public Health Nutrition</i> , 2014, 17, 2131-2137.	1.1	93
90	Do more-schooled women have fewer children and delay childbearing? Evidence from a sample of US twins. <i>Journal of Population Economics</i> , 2014, 27, 1-31.	3.5	41

#	ARTICLE	IF	CITATIONS
