Ron Barron

List of Publications by Year
in descending order

52 papers	622 citations	623734 14 h-index	677142 22 g-index
52 all docs	52 docs citations	52 times ranked	474 citing authors

#	Article	IF	Citations
1	Numerical simulation of wind loading on ground-mounted solar panels at different flow configurations. Canadian Journal of Civil Engineering, 2014, 41, 728-738.	1.3	61
2	Spray-induced air motion in single and twin ultra-high injection diesel sprays. Fuel, 2014, 121, 284-297.	6.4	47
3	Numerical simulation of high-speed turbulent water jets in air. Journal of Hydraulic Research/De Recherches Hydrauliques, 2010, 48, 119-124.	1.7	37
4	Reynolds number effects in the near-field of a turbulent square jet. Experimental Thermal and Fluid Science, 2015, 61, 249-258.	2.7	37
5	Detached eddy simulation of flow past an isolated inclined solar panel. Journal of Fluids and Structures, 2014, 50, 217-230.	3.4	28
6	Turbulence Characteristics of Classical Hydraulic Jump Using DES. Journal of Hydraulic Engineering, 2018, 144, .	1.5	28
7	Turbulence structure of a counter-flowing wall jet. Physics of Fluids, 2019, 31, .	4.0	22
8	Simulation of jet impingement heat transfer onto a moving disc. International Journal of Heat and Mass Transfer, 2015, 80, 539-550.	4.8	19
9	Submerged Hydraulic Jump Study Using DES. Journal of Hydraulic Engineering, 2017, 143, .	1.5	19
10	DES evaluation of near-wake characteristics in a shallow flow. Journal of Fluids and Structures, 2014, 45, 153-163.	3.4	18
11	Round impinging jets with relatively large stand-off distance. Physics of Fluids, 2016, 28, .	4.0	18
12	Characteristics of flow past a slender, emergent cylinder in shallow open channels. Physics of Fluids, 2017, 29, .	4.0	17
13	Large eddy simulation of the near-field vortex dynamics in starting square jet transitioning into steady state. Physics of Fluids, 2016, 28, .	4.0	16
14	CFD Study of Effects of Geometry Variations on Flow in a Nozzle. Engineering Applications of Computational Fluid Mechanics, 2012, 6, 412-425.	3.1	15
15	Influence of bed proximity on the three-dimensional characteristics of the wake of a sharp-edged bluff body. Physics of Fluids, 2019, 31, .	4.0	15
16	Supercritical flow characteristics in smooth open channels with different aspect ratios. Physics of Fluids, 2020, 32, .	4.0	15
17	Newtonian flow theory for slender bodies in a dusty gas. Journal of Fluid Mechanics, 1981, 108, 147-157.	3.4	14
18	Reynolds Number Effects on the Near-Exit Region of Turbulent Jets. Journal of Hydraulic Engineering, 2010, 136, 633-641.	1.5	14

#	Article	IF	Citations
19	CFD analysis of the effect of nozzle stand-off distance on turbulent impinging jets. Canadian Journal of Civil Engineering, 2013, 40, 603-612.	1.3	13
20	Heat Transfer Due to an Impinging Jet in a Confined Space. Journal of Heat Transfer, 2014, 136, .	2.1	13
21	Conjugate analysis of wall conduction effects on the thermal characteristics of impinging jets. International Journal of Heat and Mass Transfer, 2018, 116, 259-272.	4.8	13
22	Effects of under-relaxation factors on turbulent flow simulations. International Journal for Numerical Methods in Fluids, 2003, 42, 923-928.	1.6	12
23	Numerical solution of transonic flows on a streamfunction co-ordinate system. International Journal for Numerical Methods in Fluids, 1989, 9, 1183-1193.	1.6	11
24	Characteristics of self-oscillating jets in a confined cavity. Physics of Fluids, 2020, 32, .	4.0	11
25	Hodograph transformations and solutions in variably inclined MHD plane flows. Journal of Engineering Mathematics, 1982, 16, 223-243.	1.2	10
26	Development of vortex structures in the wake of a sharp-edged bluff body. Physics of Fluids, 2017, 29, .	4.0	10
27	Characteristics of Flow Structures in the Wake of a Bed-Mounted Bluff Body in Shallow Open Channels. Journal of Fluids Engineering, Transactions of the ASME, 2015, 137, .	1.5	9
28	Characteristics of self-oscillating twin jets. Physics of Fluids, 2021, 33, .	4.0	9
29	A non-iterative technique for design of aerofoils in incompressible potential flow. Communications in Applied Numerical Methods, 1990, 6, 557-564.	0.5	8
30	Mean characteristics of fluid structures in shallow-wake flows. International Journal of Multiphase Flow, 2016, 82, 74-85.	3.4	8
31	CFD Analysis of Heat Transfer Due to Jet Impingement Onto a Heated Disc Bounded by a Cylindrical Wall. Heat Transfer Engineering, 2016, 37, 1507-1520.	1.9	6
32	Generation and characterization of fully developed state in open channel flow. Journal of Fluid Mechanics, 2022, 934, .	3.4	6
33	Axisymmetric potential flow calculations. Part 1: Analysis mode. Communications in Applied Numerical Methods, 1990, 6, 437-445.	0.5	5
34	The double von Mises transformation in the study of two-phase fluid flow over curved boundaries: Theory and analysis. International Journal for Numerical Methods in Fluids, 1992, 14, 883-905.	1.6	5
35	Analysis of the ground effect on development of flow structures around an inclined solar panel. Environmental Fluid Mechanics, 2020, 20, 1463-1489.	1.6	5
36	Numerical solution of transonic full-potential-equivalent equations in von Mises co-ordinates. International Journal for Numerical Methods in Fluids, 1992, 15, 925-952.	1.6	4

#	Article	IF	Citations
37	Effect of gap on the flow characteristics in the wake of a bluff body near a wall. International Journal of Computational Methods and Experimental Measurements, 2019, 7, 305-315.	0.2	4
38	Velocity–pressure coupling in finite difference formulations for the Navier–Stokes equations. International Journal for Numerical Methods in Fluids, 2011, 65, 1096-1114.	1.6	3
39	Reconsideration of the overlap region in smooth shallow open channel flows. Canadian Journal of Civil Engineering, 2017, 44, 161-173.	1.3	3
40	Closure to "Turbulence Characteristics of Classical Hydraulic Jump Using DES" by Vimaldoss Jesudhas, Ram Balachandar, Vesselina Roussinova, and Ron Barron. Journal of Hydraulic Engineering, 2020, 146, 07020012.	1.5	3
41	A new approach to the solution of the Navier-Stokes equations. International Journal for Numerical Methods in Fluids, 1987, 7, 1315-1324.	1.6	2
42	Shear-Driven Flow in a Porous Cavity. Journal of Fluids Engineering, Transactions of the ASME, 1989, 111, 433-438.	1.5	2
43	Axisymmetric potential flow calculations. Part 2: Design mode. Communications in Applied Numerical Methods, 1991, 7, 563-567.	0.5	2
44	STREAMFUNCTION COORDINATE FORMULATION FOR ONE-DIMENSIONAL UNSTEADY FLOW. Mathematical Models and Methods in Applied Sciences, 1995, 05, 401-414.	3.3	2
45	Particle image velocimetry evaluation of flow-altering countermeasures for local scour around a submerged circular cylinder. International Journal of Sediment Research, 2022, , .	3.5	2
46	Effect of free surface perturbation on fully developed smooth open channel flow. Journal of Hydraulic Research/De Recherches Hydrauliques, 2022, 60, 363-375.	1.7	1
47	Lifting aerofoil calculations using von Mises variables. Communications in Applied Numerical Methods, 1989, 5, 203-210.	0.5	0
48	Transonic flow computations using streamfunction and potential function. Communications in Numerical Methods in Engineering, 1995, 11, 585-595.	1.3	0
49	Cell-Centred Finite Difference Methodology for Solving Partial Differential Equations on an Unstructured Mesh. , 2011, , .		0
50	A Cell-Based Finite Difference Method for the Numerical Solution of PDEs. , 2011, , .		0
51	Numerical investigation of conjugate heat transfer in a straight cooling channel. AIP Conference Proceedings, 2020, , .	0.4	0
52	A mapped-stencil finite difference scheme for the convection-diffusion equation on an arbitrary mesh. AIP Conference Proceedings, 2020, , .	0.4	0
