#	ARTICLE	IF	CITATIONS
1	A game theoretic model of the behavioural gaming that takes place at the EMS - ED interface. <i>European Journal of Operational Research</i> , 2023, 305, 1236-1258.	3.5	1
2	Emergency services utilization in Jakarta (Indonesia): a cross-sectional study of patients attending hospital emergency departments. <i>BMC Health Services Research</i> , 2022, 22, 639.	0.9	6
3	The development and application of a chairside oral health risk and need stratification tool in general dental services. <i>Journal of Dentistry</i> , 2022, 123, 104206.	1.7	2
4	Resource optimization for cancer pathways with aggregate diagnostic demand: a perishable inventory approach. <i>IMA Journal of Management Mathematics</i> , 2021, 32, 221-236.	1.1	3
5	Clinical pathway modelling: a literature review. <i>Health Systems</i> , 2021, 10, 1-23.	0.9	46
6	Covid-19 transmission modelling of students returning home from university. <i>Health Systems</i> , 2021, 10, 31-40.	0.9	11
7	Factors influencing the delivery of cancer pathways: a summary of the literature. <i>Journal of Health Organization and Management</i> , 2021, 35, 121-139.	0.6	4
8	Examining the diagnostic pathway for lung cancer patients in Wales using discrete event simulation. <i>Translational Lung Cancer Research</i> , 2021, 10, 1368-1382.	1.3	5
9	Modified Needleman's Wunsch algorithm for clinical pathway clustering. <i>Journal of Biomedical Informatics</i> , 2021, 115, 103668.	2.5	10
10	Needs-led human resource planning for Sierra Leone in support of oral health. <i>Human Resources for Health</i> , 2021, 19, 106.	1.1	5
11	A survey of OR/MS models on care planning for frail and elderly patients. <i>Operations Research for Health Care</i> , 2021, 31, 100325.	0.8	4
12	A review of implementation of behavioural aspects in the application of OR in healthcare. <i>Journal of the Operational Research Society</i> , 2020, 71, 1055-1072.	2.1	25
13	Server behaviours in healthcare queueing systems. <i>Journal of the Operational Research Society</i> , 2020, 71, 1124-1136.	2.1	2
14	Special issue on healthcare behavioural OR. <i>Journal of the Operational Research Society</i> , 2020, 71, 1053-1054.	2.1	2
15	A conservative index heuristic for routing problems with multiple heterogeneous service facilities. <i>Mathematical Methods of Operations Research</i> , 2020, 92, 511-543.	0.4	0
16	Constructing operating theatre schedules using partitioned graph colouring techniques. <i>Health Systems</i> , 2020, 10, 1-12.	0.9	5
17	Modeling of the collections process in the blood supply chain: A literature review. <i>IIE Transactions on Healthcare Systems Engineering</i> , 2020, 10, 200-211.	1.2	13
18	Ciw: An open-source discrete event simulation library. <i>Journal of Simulation</i> , 2019, 13, 68-82.	1.0	20

#	ARTICLE	IF	CITATIONS
19	Determining patient outcomes from patient letters: A comparison of text analysis approaches. Journal of the Operational Research Society, 2019, 70, 1425-1439.	2.1	0
20	Near real-time bed modelling feasibility study. Journal of Simulation, 2019, , 1-12.	1.0	4
21	Predicting adolescent social networks to stop smoking in secondary schools. European Journal of Operational Research, 2018, 265, 263-276.	3.5	10
22	Modelling deadlock in open restricted queueing networks. European Journal of Operational Research, 2018, 266, 609-621.	3.5	11
23	Measuring harm and informing quality improvement in the Welsh NHS: the longitudinal Welsh national adverse events study. Health Services and Delivery Research, 2017, 5, 1-190.	1.4	7
24	Containment of socially optimal policies in multiple-facility Markovian queueing systems. Journal of the Operational Research Society, 2016, 67, 629-643.	2.1	6
25	Modelling of psoriasis patient flows for the reconfiguration of secondary care services and treatments. Health Systems, 2016, 5, 13-20.	0.9	1
26	Alternative scenarios: harnessing mid-level providers and evidence-based practice in primary dental care in England through operational research. Human Resources for Health, 2015, 13, 78.	1.1	27
27	Combining discrete-event simulation and system dynamics in a healthcare setting: A composite model for Chlamydia infection. European Journal of Operational Research, 2014, 237, 196-206.	3.5	101
28	Selfish routing in public services. European Journal of Operational Research, 2013, 230, 122-132.	3.5	23
29	Cost-effective workforce planning: optimising the dental team skill-mix for England. Journal of Enterprise Information Management, 2013, 26, 91-108.	4.4	27
30	Optimising the use of resources within the district nursing service: a case study. Health Systems, 2013, 2, 43-52.	0.9	4
31	Modelling emergency medical services with phase-type distributions. Health Systems, 2012, 1, 58-68.	0.9	14
32	Simulation in health-care: lessons from other sectors. Operational Research, 2012, 12, 45-55.	1.3	49
33	On the Peter Principle: An agent based investigation into the consequential effects of social networks and behavioural factors. Physica A: Statistical Mechanics and Its Applications, 2012, 391, 2898-2910.	1.2	9
34	Small world network models of the dynamics of HIV infection. Annals of Operations Research, 2010, 178, 173-200.	2.6	26
35	Modelling the size and skill-mix of hospital nursing teams. Journal of the Operational Research Society, 2010, 61, 768-779.	2.1	47
36	An analysis of the academic literature on simulation and modelling in health care. Journal of Simulation, 2009, 3, 130-140.	1.0	338

#	ARTICLE	IF	CITATIONS
37	Simulation model to investigate flexible workload management for healthcare and servicescape environment. , 2009, , .		13
38	Incorporating Human Behavior in Healthcare Simulation Models. , 2006, , .		10
39	A review and comparison of classification algorithms for medical decision making. Health Policy, 2005, 71, 315-331.	1.4	128
40	Combining data mining tools with health care models for improved understanding of health processes and resource utilisation. Clinical and Investigative Medicine, 2005, 28, 338-41.	0.3	9
41	A framework for operational modelling of hospital resources. Health Care Management Science, 2002, 5, 165-173.	1.5	204
42	Modelling changes in healthcare demand through geographic data extrapolation. Health Systems, 0, , 1-17.	0.9	0
43	Modelling lung cancer diagnostic pathways using discrete event simulation. Journal of Simulation, 0, , 1-11.	1.0	3
