#	ARTICLE	IF	CITATIONS
1	Evolution of fluoroquinolone-resistant <i>Escherichia coli</i> in the gut after ciprofloxacin treatment. <i>International Journal of Medical Microbiology</i> , 2022, 312, 151548.	1.5	1
2	Spontaneous and postsurgical/traumatic <i>Klebsiella pneumoniae</i> meningitis: two distinct clinico-microbiological entities. <i>International Journal of Infectious Diseases</i> , 2022, 114, 185-191.	1.5	3
3	Temocillin as an alternative treatment for acute bacterial cholangitis: a retrospective microbiology susceptibility-based study of 140 episodes. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2021, 40, 1773-1777.	1.3	2
4	Early primary toxoplasmosis transmitted by liver graft: A case report. <i>Infectious Diseases Now</i> , 2021, 51, 315-316.	0.7	1
5	Isoniazid-mono-resistant tuberculosis in France: Risk factors, treatment outcomes and adverse events. <i>International Journal of Infectious Diseases</i> , 2021, 107, 86-91.	1.5	11
6	Activity of the combination of colistin and fosfomycin against NDM-1-producing <i>Escherichia coli</i> with variable levels of susceptibility to colistin and fosfomycin in a murine model of peritonitis. <i>Journal of Antimicrobial Chemotherapy</i> , 2021, 77, 155-163.	1.3	3
7	More complications in cervical than in non-cervical spine tuberculosis. <i>Infectious Diseases</i> , 2020, 52, 170-176.	1.4	5
8	Novel Chromosomal Mutations Responsible for Fosfomycin Resistance in <i>Escherichia coli</i> . <i>Frontiers in Microbiology</i> , 2020, 11, 575031.	1.5	10
9	A nomogram to predict the risk of unfavourable outcome in COVID-19: a retrospective cohort of 279 hospitalized patients in Paris area. <i>Annals of Medicine</i> , 2020, 52, 367-375.	1.5	28
10	Dimercaptosuccinic acid in combination with carbapenems against isogenic strains of <i>Escherichia coli</i> producing or not producing a metallo- β -lactamase in vitro and in murine peritonitis. <i>Journal of Antimicrobial Chemotherapy</i> , 2020, 75, 3593-3600.	1.3	5
11	Post-discharge persistent symptoms and health-related quality of life after hospitalization for COVID-19. <i>Journal of Infection</i> , 2020, 81, e4-e6.	1.7	767
12	Mortality in <i>Escherichia coli</i> bloodstream infections: antibiotic resistance still does not make it. <i>Journal of Antimicrobial Chemotherapy</i> , 2020, 75, 2334-2343.	1.3	41
13	Different kinetics of infectious processes in vertebral osteomyelitis of pyogenic or tuberculous origin explain different timing of surgery. <i>Infectious Diseases</i> , 2020, 52, 563-570.	1.4	0
14	Analysis of Paradoxical Efficacy of Carbapenems against Carbapenemase-Producing <i>Escherichia coli</i> in a Murine Model of Lethal Peritonitis. <i>Antimicrobial Agents and Chemotherapy</i> , 2020, 64, .	1.4	7
15	Applicability of the CURB-65 pneumonia severity score for outpatient treatment of COVID-19. <i>Journal of Infection</i> , 2020, 81, e96-e98.	1.7	53
16	Pyogenic liver abscess in liver transplant recipient: A warning signal for the risk of recurrence and retransplantation. <i>Transplant Infectious Disease</i> , 2020, 22, e13360.	0.7	6
17	Metagenomic Characterization of Gut Microbiota of Carriers of Extended-Spectrum Beta-Lactamase or Carbapenemase-Producing Enterobacteriaceae Following Treatment with Oral Antibiotics and Fecal Microbiota Transplantation: Results from a Multicenter Randomized Trial. <i>Microorganisms</i> , 2020, 8, 941.	1.6	21
18	Expression of CTX-M-15 limits the efficacy of ceftolozane/tazobactam against <i>Escherichia coli</i> in a high-inoculum murine peritonitis model. <i>Clinical Microbiology and Infection</i> , 2020, 26, 1416.e5-1416.e9.	2.8	5

#	ARTICLE	IF	CITATIONS
19	Immunoglobulin Abnormalities in Gaucher Disease: an Analysis of 278 Patients Included in the French Gaucher Disease Registry. <i>International Journal of Molecular Sciences</i> , 2020, 21, 1247.	1.8	16
20	Management of acute community-acquired bacterial meningitis (excluding newborns). Short text. <i>MÃ©decine Et Maladies Infectieuses</i> , 2019, 49, 367-398.	5.1	17
21	Lyme borreliosis and other tick-borne diseases. Guidelines from the French scientific societies. <i>MÃ©decine Et Maladies Infectieuses</i> , 2019, 49, 296-317.	5.1	17
22	The inoculum effect of <i>Escherichia coli</i> expressing <i>mcr-1</i> or not on colistin activity in a murine model of peritonitis. <i>Clinical Microbiology and Infection</i> , 2019, 25, 1563.e5-1563.e8.	2.8	7
23	Temocillin breakpoints in pyelonephritis: evaluation in a murine model due to ESBL-producing <i>Escherichia coli</i> clinical isolates. <i>Journal of Antimicrobial Chemotherapy</i> , 2019, 74, 1323-1326.	1.3	6
24	Acute cholangitis: Diagnosis and management. <i>Journal of Visceral Surgery</i> , 2019, 156, 515-525.	0.4	52
25	Unexpected Activity of Oral Fosfomycin against Resistant Strains of <i>Escherichia coli</i> in Murine Pyelonephritis. <i>Antimicrobial Agents and Chemotherapy</i> , 2019, 63, .	1.4	7
26	Lyme borreliosis and other tick-borne diseases. Guidelines from the French scientific societies (II). Biological diagnosis, treatment, persistent symptoms after documented or suspected Lyme borreliosis. <i>MÃ©decine Et Maladies Infectieuses</i> , 2019, 49, 335-346.	5.1	41
27	Lyme borreliosis and other tick-borne diseases. Guidelines from the French Scientific Societies (I): prevention, epidemiology, diagnosis. <i>MÃ©decine Et Maladies Infectieuses</i> , 2019, 49, 318-334.	5.1	55
28	Monoclonal gammopathies and hypergammaglobulemia in Gaucher disease: An analysis from the French Gaucher disease registry. <i>Molecular Genetics and Metabolism</i> , 2019, 126, S107.	0.5	0
29	Travel-related health events and their risk factors in HIV-infected sub-Saharan migrants living in France and visiting their native country: The ANRS VIHVO cohort study. <i>Travel Medicine and Infectious Disease</i> , 2019, 29, 40-47.	1.5	5
30	A 5-day course of oral antibiotics followed by faecal transplantation to eradicate carriage of multidrug-resistant Enterobacteriaceae: a randomized clinical trial. <i>Clinical Microbiology and Infection</i> , 2019, 25, 830-838.	2.8	106
31	Surgery is safe and effective when indicated in the acute phase of hematogenous pyogenic vertebral osteomyelitis. <i>Infectious Diseases</i> , 2019, 51, 268-276.	1.4	9
32	Angiocholites: diagnostic et prise en charge. <i>Journal De Chirurgie ViscÃ©rale</i> , 2019, 156, 552-563.	0.0	1
33	Prediction of the intestinal resistome by a three-dimensional structure-based method. <i>Nature Microbiology</i> , 2019, 4, 112-123.	5.9	129
34	Flagellate erythema in systemic sclerosis: A case report. <i>JAAD Case Reports</i> , 2018, 4, 239-241.	0.4	2
35	Ceftriaxone promotes the emergence of AmpC-overproducing Enterobacteriaceae in gut microbiota from hospitalized patients. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2018, 37, 417-421.	1.3	23
36	Effect of a Red Blood Cell Transfusion on Biological Markers Used to Determine the Cause of Anemia: A Prospective Study. <i>American Journal of Medicine</i> , 2018, 131, 319-322.	0.6	3

#	ARTICLE	IF	CITATIONS
37	Pharmacokinetics and Pharmacodynamics of Temocillin. <i>Clinical Pharmacokinetics</i> , 2018, 57, 287-296.	1.6	42
38	Hypervirulent <i>Klebsiella pneumoniae</i> in Cryptogenic Liver Abscesses, Paris, France. <i>Emerging Infectious Diseases</i> , 2018, 24, 221-229.	2.0	47
39	Activity of fosfomycin alone or combined with temocillin in vitro and in a murine model of peritonitis due to KPC-3- or OXA-48-producing <i>Escherichia coli</i> . <i>Journal of Antimicrobial Chemotherapy</i> , 2018, 73, 3074-3080.	1.3	18
40	Increased mortality in patients aged 75 years or over with pyogenic vertebral osteomyelitis. <i>Infectious Diseases</i> , 2018, 50, 783-787.	1.4	3
41	Faecal microbiota transplantation with frozen capsules for relapsing <i>Clostridium difficile</i> infections: the first experience from 15 consecutive patients in France. <i>Journal of Hospital Infection</i> , 2018, 100, 148-151.	1.4	13
42	An outbreak of <i>Pneumocystis jirovecii</i> pneumonia among liver transplant recipients. <i>Transplant Infectious Disease</i> , 2018, 20, e12956.	0.7	11
43	Ecological impact of ciprofloxacin on commensal enterococci in healthy volunteers. <i>Journal of Antimicrobial Chemotherapy</i> , 2017, 72, 1574-1580.	1.3	19
44	Characteristics of and risk factors for severe neurological deficit in patients with pyogenic vertebral osteomyelitis. <i>Medicine (United States)</i> , 2017, 96, e6387.	0.4	50
45	Management of adult infectious encephalitis in metropolitan France. <i>Médecine Et Maladies Infectieuses</i> , 2017, 47, 206-220.	5.1	7
46	Biological cost of fosfomycin resistance in <i>Escherichia coli</i> in a murine model of urinary tract infection. <i>International Journal of Medical Microbiology</i> , 2017, 307, 452-459.	1.5	18
47	Cytomegalovirus-associated protein-losing enteropathy in a healthy man. <i>Médecine Et Maladies Infectieuses</i> , 2017, 47, 562-565.	5.1	6
48	Autochthonous Case of Eosinophilic Meningitis Caused by <i>Angiostrongylus cantonensis</i> , France, 2016. <i>Emerging Infectious Diseases</i> , 2017, 23, 1045-1046.	2.0	28
49	Activity of temocillin in a lethal murine model of infection of intra-abdominal origin due to KPC-producing <i>Escherichia coli</i> . <i>Journal of Antimicrobial Chemotherapy</i> , 2016, 71, 1899-1904.	1.3	22
50	Presentation and impact of catheter-associated thrombosis in patients with infected long-term central venous catheters: a prospective bicentric observational study. <i>Annals of Medicine</i> , 2016, 48, 182-189.	1.5	6
51	Prospective Cohort Study of the Relative Abundance of Extended-Spectrum-Beta-Lactamase-Producing <i>Escherichia coli</i> in the Gut of Patients Admitted to Hospitals. <i>Antimicrobial Agents and Chemotherapy</i> , 2016, 60, 6941-6944.	1.4	8
52	Medical complications following splenectomy. <i>Journal of Visceral Surgery</i> , 2016, 153, 277-286.	0.4	86
53	<i>qnrA6</i> genetic environment and quinolone resistance conferred on <i>Proteus mirabilis</i> . <i>Journal of Antimicrobial Chemotherapy</i> , 2016, 71, 903-908.	1.3	4
54	Costs associated with implementation of a strict policy for controlling spread of highly resistant microorganisms in France. <i>BMJ Open</i> , 2016, 6, e009029.	0.8	26

#	ARTICLE	IF	CITATIONS
55	Cefotaxime and Amoxicillin-Clavulanate Synergism against Extended-Spectrum- β -Lactamase-Producing <i>Escherichia coli</i> in a Murine Model of Urinary Tract Infection. <i>Antimicrobial Agents and Chemotherapy</i> , 2016, 60, 424-430.	1.4	10
56	Comparative dynamics of the emergence of fluoroquinolone resistance in staphylococci from the nasal microbiota of patients treated with fluoroquinolones according to their environment. <i>International Journal of Antimicrobial Agents</i> , 2015, 46, 653-659.	1.1	18
57	Characteristics of vertebral osteomyelitis after liver transplantation. <i>Clinical Microbiology and Infection</i> , 2015, 21, 573-577.	2.8	3
58	Activity of temocillin in a murine model of urinary tract infection due to <i>Escherichia coli</i> producing or not producing the ESBL CTX-M-15. <i>Journal of Antimicrobial Chemotherapy</i> , 2015, 70, 1466-1472.	1.3	29
59	Impact of fluoroquinolones on human microbiota. Focus on the emergence of antibiotic resistance. <i>Future Microbiology</i> , 2015, 10, 1241-1255.	1.0	41
60	Invasive actinomycosis: surrogate marker of a poor prognosis in immunocompromised patients. <i>International Journal of Infectious Diseases</i> , 2014, 29, 74-79.	1.5	21
61	Emergence of quinolone resistance in the microbiota of hospitalized patients treated or not with a fluoroquinolone. <i>Journal of Antimicrobial Chemotherapy</i> , 2014, 69, 3393-3400.	1.3	45
62	Behcet's disease in Budd-Chiari syndrome. <i>Orphanet Journal of Rare Diseases</i> , 2014, 9, 104.	1.2	57
63	<i>Escherichia coli</i> bacteraemia in adults: age-related differences in clinical and bacteriological characteristics, and outcome. <i>Epidemiology and Infection</i> , 2014, 142, 2672-2683.	1.0	18
64	Quinolone-resistant <i>Escherichia coli</i> from the faecal microbiota of healthy volunteers after ciprofloxacin exposure are highly adapted to a commensal lifestyle. <i>Journal of Antimicrobial Chemotherapy</i> , 2014, 69, 761-768.	1.3	16
65	Activity of fosfomycin alone or combined with ceftiofuran in vitro and in vivo in a murine model of urinary tract infection due to <i>Escherichia coli</i> harbouring CTX-M-15-type extended-spectrum β -lactamase. <i>International Journal of Antimicrobial Agents</i> , 2014, 43, 366-369.	1.1	16
66	Antimicrobial Treatment of Febrile Neutropenia: Pharmacokinetic-Pharmacodynamic Considerations. <i>Clinical Pharmacokinetics</i> , 2013, 52, 869-883.	1.6	16
67	Resolution of <i>Clostridium difficile</i> -Associated Diarrhea in Patients With Cancer Treated With Fidaxomicin or Vancomycin. <i>Journal of Clinical Oncology</i> , 2013, 31, 2493-2499.	0.8	93
68	Ciprofloxacin Treatment Failure in a Murine Model of Pyelonephritis Due to an AAC(6)-Ib-cr-Producing <i>Escherichia coli</i> Strain Susceptible to Ciprofloxacin <i>In Vitro</i> . <i>Antimicrobial Agents and Chemotherapy</i> , 2013, 57, 5830-5835.	1.4	34
69	Ceftiofuran as an Alternative to Carbapenems in a Murine Model of Urinary Tract Infection Due to <i>Escherichia coli</i> Harboring CTX-M-15-Type Extended-Spectrum β -Lactamase. <i>Antimicrobial Agents and Chemotherapy</i> , 2012, 56, 1376-1381.	1.4	41
70	Diversity of Individual Dynamic Patterns of Emergence of Resistance to Quinolones in <i>Escherichia coli</i> From the Fecal Flora of Healthy Volunteers Exposed to Ciprofloxacin. <i>Journal of Infectious Diseases</i> , 2012, 206, 1399-1406.	1.9	31
71	Three-Month Antibiotic Therapy for Early-Onset Postoperative Spinal Implant Infections. <i>Clinical Infectious Diseases</i> , 2012, 55, 1481-1487.	2.9	45
72	<i>Salmonella</i> Colindale osteomyelitis in an immunocompetent female patient. <i>Médecine Et Maladies Infectieuses</i> , 2012, 42, 36-37.	5.1	2

#	ARTICLE	IF	CITATIONS
73	Ferritinemia during type 1 Gaucher disease: Mechanisms and progression under treatment. <i>Blood Cells, Molecules, and Diseases</i> , 2012, 49, 53-57.	0.6	35
74	The French Gaucherâ€™s disease registry: clinical characteristics, complications and treatment of 562 patients. <i>Orphanet Journal of Rare Diseases</i> , 2012, 7, 77.	1.2	97
75	Clinical predictive values of extended-spectrum beta-lactamase carriage in patients admitted to medical wards. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2012, 31, 319-325.	1.3	33
76	Do Case Vignettes Accurately Reflect Antibiotic Prescription?. <i>Infection Control and Hospital Epidemiology</i> , 2011, 32, 1003-1009.	1.0	19
77	Tuberculous cerebral vasculitis: Retrospective study of 10 cases. <i>European Journal of Internal Medicine</i> , 2011, 22, e99-e104.	1.0	20
78	Impact of imiglucerase on the serum glycosylated-ferritin level in Gaucher disease. <i>Blood Cells, Molecules, and Diseases</i> , 2011, 46, 34-38.	0.6	19
79	Bacteraemia caused by third-generation cephalosporin-resistant <i>Escherichia coli</i> in France: prevalence, molecular epidemiology and clinical features. <i>Clinical Microbiology and Infection</i> , 2011, 17, 557-565.	2.8	65
80	Differences in daptomycin and vancomycin ex vivo behaviour can lead to false interpretation of negative blood cultures. <i>Clinical Microbiology and Infection</i> , 2011, 17, 1264-1267.	2.8	1
81	Physicians fail to consider <i>Pseudomonas aeruginosa</i> as a potential pathogen in medicine patients with bacteremia. <i>Journal of Infection</i> , 2011, 63, 99-101.	1.7	3
82	Arthrite septique destructrice Ã <i>Ureaplasma urealyticum</i> aprÃs un traitement par rituximab chez un patient atteint de lupus ÃrythÃmateux systÃmique. <i>Revue Du Rhumatisme (Edition Francaise)</i> , 2011, 78, 296-297.	0.0	0
83	Antibiotic use: knowledge and perceptions in two university hospitals. <i>Journal of Antimicrobial Chemotherapy</i> , 2011, 66, 936-940.	1.3	29
84	Flow Cytometry as a Tool To Determine the Effects of Cell Wall-Active Antibiotics on Vancomycin-Susceptible and -Resistant <i>Enterococcus faecalis</i> Strains. <i>Antimicrobial Agents and Chemotherapy</i> , 2011, 55, 395-398.	1.4	11
85	The <i>In Vitro</i> Contribution of Autolysins to Bacterial Killing Elicited by Amoxicillin Increases with Inoculum Size in <i>Enterococcus faecalis</i> . <i>Antimicrobial Agents and Chemotherapy</i> , 2011, 55, 910-912.	1.4	15
86	Host Factors and Portal of Entry Outweigh Bacterial Determinants To Predict the Severity of <i>Escherichia coli</i> Bacteremia. <i>Journal of Clinical Microbiology</i> , 2011, 49, 777-783.	1.8	123
87	Plasmidic qnrA3 Enhances <i>Escherichia coli</i> Fitness in Absence of Antibiotic Exposure. <i>PLoS ONE</i> , 2011, 6, e24552.	1.1	26
88	Broad-Range 16S rRNA PCR with Cerebrospinal Fluid May Be Unreliable for Management of Postoperative Aseptic Meningitis. <i>Journal of Clinical Microbiology</i> , 2010, 48, 3331-3333.	1.8	11
89	Independent Behavior of Commensal Flora for Carriage of Fluoroquinolone-Resistant Bacteria in Patients at Admission. <i>Antimicrobial Agents and Chemotherapy</i> , 2010, 54, 5193-5200.	1.4	27
90	Reduced Antibiotic Pressure for the Treatment of Acute Exacerbation of Chronic Obstructive Pulmonary Disease: Back to the Future. <i>Clinical Infectious Diseases</i> , 2010, 51, 150-152.	2.9	12

#	ARTICLE	IF	CITATIONS
91	R�sistance aux fluoroquinolones en 2010: quel impact pour la prescription en r�animation?. Reanimation: Journal De La Societe De Reanimation De Langue Francaise, 2010, 19, 347-353.	0.1	7
92	Ciprofloxacin Dosage and Emergence of Resistance in Human Commensal Bacteria. Journal of Infectious Diseases, 2009, 200, 390-398.	1.9	105
93	Contribution of the Autolysin AtlA to the Bactericidal Activity of Amoxicillin against Enterococcus faecalis JH2-2. Antimicrobial Agents and Chemotherapy, 2009, 53, 1667-1669.	1.4	10
94	Impact of Low-Level Resistance to Fluoroquinolones Due to <i>qnrA1</i> and <i>qnrS1</i> Genes or a <i>gyrA</i> Mutation on Ciprofloxacin Bactericidal Activity in a Murine Model of <i>Escherichia coli</i> Urinary Tract Infection. Antimicrobial Agents and Chemotherapy, 2009, 53, 4292-4297.	1.4	71
95	Bactericidal Activity of the Combination of Levofloxacin with Rifampin in Experimental Prosthetic Knee Infection in Rabbits Due to Methicillin-Susceptible <i>Staphylococcus aureus</i> . Antimicrobial Agents and Chemotherapy, 2009, 53, 2145-2148.	1.4	15
96	Risk factors for <i>Enterobacteriaceae</i> bacteremia after liver transplantation. Transplant International, 2008, 21, 755-763.	0.8	43
