#	ARTICLE	IF	CITATIONS
1	Psychosocial Working Conditions and Subsequent Sickness Absence—Effects of Pain and Common Mental Disorders in a Population-Based Swedish Twin Sample. <i>Journal of Occupational and Environmental Medicine</i> , 2022, 64, 451-457.	0.9	3
2	Work incapacity and psychiatric patient care following attempted suicide — a cohort study of 65 097 Swedish twins. <i>Psychological Medicine</i> , 2022, , 1-7.	2.7	0
3	Sick leave and disability pension in a cohort of TMD-patients — The Swedish National Registry Studies for Surgically Treated TMD (SWEREG-TMD). <i>BMC Public Health</i> , 2022, 22, 916.	1.2	8
4	Psychosocial working conditions, pain, mental disorders, and disability pension. <i>Archives of Environmental and Occupational Health</i> , 2021, 76, 233-240.	0.7	2
5	Sleep duration and mortality — Influence of age and occupational group in retired individuals. <i>Sleep Medicine</i> , 2021, 80, 199-203.	0.8	5
6	The predictive role of sickness absence spell durations in associations with inpatient- and specialized outpatient care among a population-based Swedish twin sample. <i>BMC Health Services Research</i> , 2021, 21, 315.	0.9	1
7	Effects of age on psychosocial working conditions and future labour market marginalisation: a cohort study of 56,867 Swedish twins. <i>International Archives of Occupational and Environmental Health</i> , 2021, , 1.	1.1	2
8	The role of sickness absence diagnosis for the risk of future inpatient- or specialized outpatient care in a Swedish population-based twin sample. <i>BMC Public Health</i> , 2021, 21, 957.	1.2	1
9	Sustainable Working Life in a Swedish Twin Cohort—A Definition Paper with Sample Overview. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 5817.	1.2	8
10	Diagnosis-Specific Work Disability before and after Lumbar Spine Decompression Surgery—A Register Study from Sweden. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 8937.	1.2	0
11	The role of familial confounding in the associations of physical activity, smoking and alcohol consumption with early exit from the labour market. <i>Preventive Medicine</i> , 2021, 150, 106717.	1.6	2
12	Role of social benefits for future long-term sickness absence, disability pension and unemployment among individuals on sickness absence due to mental diagnoses: a competing risk approach. <i>International Archives of Occupational and Environmental Health</i> , 2021, , 1.	1.1	0
13	Associations of sitting time with leisure—time physical inactivity, education, and body mass index change. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020, 30, 322-331.	1.3	7
14	Life events as predictors for disability pension due to musculoskeletal diagnoses: a cohort study of Finnish twins. <i>International Archives of Occupational and Environmental Health</i> , 2020, 93, 469-478.	1.1	1
15	A Life Course Study of Genetic and Environmental Influences on Work Incapacity. <i>Twin Research and Human Genetics</i> , 2020, 23, 16-22.	0.3	8
16	Health behaviours and psychosocial working conditions as predictors of disability pension due to different diagnoses: a population-based study. <i>BMC Public Health</i> , 2020, 20, 1507.	1.2	6
17	Adverse outcomes of chronic widespread pain and common mental disorders in individuals with sickness absence — a prospective study of Swedish twins. <i>BMC Public Health</i> , 2020, 20, 1301.	1.2	11
18	Sick leave due to back pain, common mental disorders and disability pension: Common genetic liability. <i>European Journal of Pain</i> , 2020, 24, 1892-1901.	1.4	7

#	ARTICLE	IF	CITATIONS
19	Shared liability to pain, common mental disorders, and long-term work disability differs among women and men. <i>Pain</i> , 2020, 161, 1005-1011.	2.0	5
20	Sickness absence and disability pension in relation to first childbirth and in nulliparous women according to occupational groups: a cohort study of 492,504 women in Sweden. <i>BMC Public Health</i> , 2020, 20, 686.	1.2	5
21	Night work, mortality, and the link to occupational group and sex. <i>Scandinavian Journal of Work, Environment and Health</i> , 2020, 46, 508-515.	1.7	16
22	Childbirth, morbidity, sickness absence and disability pension: a population-based longitudinal cohort study in Sweden. <i>BMJ Open</i> , 2020, 10, e037726.	0.8	0
23	Childbirth, morbidity, sickness absence and disability pension: a population-based longitudinal cohort study in Sweden. <i>BMJ Open</i> , 2020, 10, e037726.	0.8	3
24	Determinants of work disability following lumbar spine decompression surgery. <i>Scandinavian Journal of Public Health</i> , 2019, 47, 281-292.	1.2	3
25	Associations between adolescent social phobia, sickness absence and unemployment: a prospective study of twins in Sweden. <i>European Journal of Public Health</i> , 2019, 29, 931-936.	0.1	5
26	The association between part-time and temporary employment and sickness absence: a prospective Swedish twin study. <i>European Journal of Public Health</i> , 2019, 29, 147-153.	0.1	9
27	The longitudinal integrated database for health insurance and labour market studies (LISA) and its use in medical research. <i>European Journal of Epidemiology</i> , 2019, 34, 423-437.	2.5	559
28	Changes in prescription of antidepressants and disability pension due to back pain, compared with other musculoskeletal and other somatic diagnoses: a cohort study in Sweden. <i>BMJ Open</i> , 2019, 9, e029836.	0.8	1
29	Sickness absence and disability pension before and after first childbirth and in nulliparous women: longitudinal analyses of three cohorts in Sweden. <i>BMJ Open</i> , 2019, 9, e031593.	0.8	8
30	Transitioning from sickness absence to disability pension – the impact of poor health behaviours: a prospective Swedish twin cohort study. <i>BMJ Open</i> , 2019, 9, e031889.	0.8	7
31	Health, work and demographic factors associated with a lower risk of work disability and unemployment in employees with lower back, neck and shoulder pain. <i>BMC Musculoskeletal Disorders</i> , 2019, 20, 622.	0.8	20
32	Sickness absence and disability pension before and after first childbirth and in nulliparous women by numerical gender segregation of occupations: A Swedish population-based longitudinal cohort study. <i>PLoS ONE</i> , 2019, 14, e0226198.	1.1	5
33	Number of Pain Locations as a Predictor of Cause-Specific Disability Pension in Sweden-Do Common Mental Disorders Play a Role?. <i>Journal of Occupational and Environmental Medicine</i> , 2019, 61, 646-652.	0.9	5
34	Work-disability in low back pain patients with or without surgery, and the role of social insurance regulation changes in Sweden. <i>European Journal of Public Health</i> , 2019, 29, 524-530.	0.1	3
35	Adverse outcomes of sick leave due to mental disorders: A prospective study of discordant twin pairs. <i>Scandinavian Journal of Public Health</i> , 2019, 47, 127-136.	1.2	14
36	Work-Home Interference, Perceived Total Workload, and the Risk of Future Sickness Absence Due to Stress-Related Mental Diagnoses Among Women and Men: a Prospective Twin Study. <i>International Journal of Behavioral Medicine</i> , 2018, 25, 103-111.	0.8	24

#	ARTICLE	IF	CITATIONS
37	Night work as a risk factor for future cause-specific disability pension: A prospective twin cohort study in Sweden. <i>Chronobiology International</i> , 2018, 35, 249-260.	0.9	7
38	Time pressure and sleep problems due to thoughts about work as risk factors for future sickness absence. <i>International Archives of Occupational and Environmental Health</i> , 2018, 91, 1051-1059.	1.1	9
39	Course and characteristics of work disability 3 years before and after lumbar spine decompression surgery – a national population-based study. <i>Scientific Reports</i> , 2018, 8, 11811.	1.6	5
40	Leisure-time physical inactivity and association with body mass index: a Finnish Twin Study with a 35-year follow-up. <i>International Journal of Epidemiology</i> , 2017, 46, 116-127.	0.9	26
41	Association between long-term smoking and leisure-time physical inactivity: a cohort study among Finnish twins with a 35-year follow-up. <i>International Journal of Public Health</i> , 2017, 62, 819-829.	1.0	7
42	Night work as a risk factor of future disability pension due to musculoskeletal diagnoses: a prospective cohort study of Swedish twins. <i>European Journal of Public Health</i> , 2017, 27, 659-664.	0.1	8
43	Sleep Duration, Mortality, and Heredity – A Prospective Twin Study. <i>Sleep</i> , 2017, 40, .	0.6	13
44	Night work and prostate cancer in men: a Swedish prospective cohort study. <i>BMJ Open</i> , 2017, 7, e015751.	0.8	22
45	Internalizing and externalizing problems in childhood and adolescence as predictors of work incapacity in young adulthood. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2017, 52, 1159-1168.	1.6	62
46	An Underlying Common Factor, Influenced by Genetics and Unique Environment, Explains the Covariation Between Major Depressive Disorder, Generalized Anxiety Disorder, and Burnout: A Swedish Twin Study. <i>Twin Research and Human Genetics</i> , 2016, 19, 619-627.	0.3	20
47	Sickness presence in the Swedish Police in 2007 and in 2010: Associations with demographic factors, job characteristics, and health. <i>Work</i> , 2016, 54, 379-387.	0.6	11
48	Association between education and future leisure-time physical inactivity: a study of Finnish twins over a 35-year follow-up. <i>BMC Public Health</i> , 2016, 16, 720.	1.2	17
49	Genetic and Environmental Influences on Disability Pension Due To Mental Diagnoses: Limited Importance of Major Depression, Generalized Anxiety, and Chronic Fatigue. <i>Twin Research and Human Genetics</i> , 2016, 19, 10-16.	0.3	9
50	Genetic and environmental influences on the association between performance-based self-esteem and exhaustion: A study of the self-worth notion of burnout. <i>Scandinavian Journal of Psychology</i> , 2016, 57, 419-426.	0.8	5
51	Occurrence of sickness absence and disability pension in relation to childbirth: A 16-year follow-up study of 6323 Swedish twins. <i>Scandinavian Journal of Public Health</i> , 2016, 44, 98-105.	1.2	12
52	Stability and change of body mass index as a predictor of disability pension. <i>Scandinavian Journal of Public Health</i> , 2016, 44, 369-376.	1.2	10
53	High Job Demands, Job Strain, and Iso-Strain Are Risk Factors for Sick Leave due to Mental Disorders. <i>Journal of Occupational and Environmental Medicine</i> , 2015, 57, 858-865.	0.9	51
54	Childbirth, hospitalisation and sickness absence: a study of female twins. <i>BMJ Open</i> , 2015, 5, e006033-e006033.	0.8	12

#	ARTICLE	IF	CITATIONS
55	Night work and breast cancer in women: a Swedish cohort study. <i>BMJ Open</i> , 2015, 5, e008127-e008127.	0.8	75
56	Heritability of endometriosis. <i>Fertility and Sterility</i> , 2015, 104, 947-952.	0.5	125
57	The actions of the social insurance agency regarding long-term sickness absentees before and after a medical assessment – a study of 384 case files. <i>Disability and Rehabilitation</i> , 2015, 37, 1683-1691.	0.9	5
58	Associations between Childbirth, Hospitalization and Disability Pension: A Cohort Study of Female Twins. <i>PLoS ONE</i> , 2014, 9, e101566.	1.1	12
59	Genetic and Environmental Influences on Performance-based Self-esteem in a Population-based Cohort of Swedish Twins. <i>Self and Identity</i> , 2014, 13, 243-256.	1.0	3
60	The Covariation Between Burnout and Sick Leave Due to Mental Disorders Is Explained by a Shared Genetic Liability: A Prospective Swedish Twin Study With a Five-Year Follow-up. <i>Twin Research and Human Genetics</i> , 2014, 17, 535-544.	0.3	12
61	The role of familial factors in the associations between sickness absence and disability pension or mortality. <i>European Journal of Public Health</i> , 2014, 24, 106-110.	0.1	8
62	Single and additive effects of health behaviours on the risk for disability pensions among Swedish twins. <i>European Journal of Public Health</i> , 2014, 24, 643-648.	0.1	20
63	Work – Home Interference and Burnout. <i>Journal of Occupational and Environmental Medicine</i> , 2014, 56, 361-366.	0.9	19
64	Physical work load and psychological stress of daily activities as predictors of disability pension due to musculoskeletal disorders. <i>Scandinavian Journal of Public Health</i> , 2014, 42, 370-376.	1.2	20
65	Part-time Work or Social Benefits as Predictors for Disability Pension: a Prospective Study of Swedish Twins. <i>International Journal of Behavioral Medicine</i> , 2014, 21, 329-336.	0.8	13
66	Stressful and Traumatic Life Events are Associated with Burnout – A Cross-Sectional Twin Study. <i>International Journal of Behavioral Medicine</i> , 2014, 21, 899-907.	0.8	27
67	Associations between prognosed future work capacity among long-term sickness absentees and their actual work incapacity two years later. <i>Work</i> , 2014, 49, 245-255.	0.6	1
68	A prospective twin cohort study of disability pensions due to musculoskeletal diagnoses in relation to stability and change in pain. <i>Pain</i> , 2013, 154, 1966-1972.	2.0	19
69	A prospective cohort study of disability pension due to mental diagnoses: the importance of health factors and behaviors. <i>BMC Public Health</i> , 2013, 13, 621.	1.2	17
70	Associations between scores of psychosomatic health symptoms and health-related quality of life in children and adolescents. <i>Health and Quality of Life Outcomes</i> , 2013, 11, 176.	1.0	33
71	Register-based data of psychosocial working conditions and occupational groups as predictors of disability pension due to musculoskeletal diagnoses: a prospective cohort study of 24 543 Swedish twins. <i>BMC Musculoskeletal Disorders</i> , 2013, 14, 268.	0.8	24
72	The Importance of Genetic and Shared Environmental Factors for the Associations between Job Demands, Control, Support and Burnout. <i>PLoS ONE</i> , 2013, 8, e75387.	1.1	8

#	ARTICLE	IF	CITATIONS
73	Psychosocial working conditions, occupational groups, and risk of disability pension due to mental diagnoses: a cohort study of 43 000 Swedish twins. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 351-360.	1.7	49
74	Disability pension due to musculoskeletal diagnoses: importance of work-related factors in a prospective cohort study of Finnish twins. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 343-350.	1.7	26
75	Genetic Susceptibility to Sickness Absence is Similar Among Women and Men: Findings From a Swedish Twin Cohort. <i>Twin Research and Human Genetics</i> , 2012, 15, 642-648.	0.3	39
76	Disability Pension Among Swedish Twins—Prevalence Over 16 Years and Associations With Sociodemographic Factors in 1992. <i>Journal of Occupational and Environmental Medicine</i> , 2012, 54, 10-16.	0.9	20
77	Effects of Work and Lifestyle on Risk for Future Disability Pension Due to Low Back Diagnoses. <i>Journal of Occupational and Environmental Medicine</i> , 2012, 54, 1330-1336.	0.9	17
78	Sickness presenteeism is more than an alternative to sickness absence: results from the population-based SLOSH study. <i>International Archives of Occupational and Environmental Health</i> , 2012, 85, 905-914.	1.1	58
79	Associations between sickness absence and harassment, threats, violence, or discrimination: A cross-sectional study of the Swedish Police. <i>Work</i> , 2012, 42, 83-92.	0.6	28
80	Genetic susceptibility to burnout in a Swedish twin cohort. <i>European Journal of Epidemiology</i> , 2012, 27, 225-231.	2.5	31
81	Health-Related and Sociodemographic Risk Factors for Disability Pension due to Low Back Disorders. <i>Journal of Occupational and Environmental Medicine</i> , 2011, 53, 488-496.	0.9	23
82	Disability, sickness, and unemployment benefits among long-term sickness absentees five years before, during, and after a multidisciplinary medical assessment. <i>Journal of Multidisciplinary Healthcare</i> , 2011, 4, 25.	1.1	12
83	Sickness Presenteeism Among Swedish Police Officers. <i>Journal of Occupational Rehabilitation</i> , 2011, 21, 17-22.	1.2	77
84	Stability and change in health behaviours as predictors for disability pension: a prospective cohort study of Swedish twins. <i>BMC Public Health</i> , 2011, 11, 678.	1.2	36
85	Health-related risk factors for disability pensions due to musculoskeletal diagnoses: A 30-year Finnish twin cohort study. <i>Scandinavian Journal of Public Health</i> , 2011, 39, 839-848.	1.2	38
86	Genetic Liability to Disability Pension in Women and Men: A Prospective Population-Based Twin Study. <i>PLoS ONE</i> , 2011, 6, e23143.	1.1	63
87	Are self-report of disability pension and long-term sickness absence accurate? Comparisons of self-reported interview data with national register data in a Swedish twin cohort. <i>BMC Public Health</i> , 2010, 10, 763.	1.2	56
88	Does multidisciplinary assessment of long-term sickness absentees result in modification of sick-listing diagnoses?. <i>Scandinavian Journal of Public Health</i> , 2010, 38, 657-663.	1.2	8
89	Self-reported Health among Employees in Relation to Sex Segregation at Work Sites. <i>Journal of Occupational Health</i> , 2009, 51, 223-231.	1.0	11
90	Genetic and Environmental Mediation of the Associations Between Self-rated Health and Cognitive Abilities. <i>Experimental Aging Research</i> , 2009, 35, 178-201.	0.6	12

#	ARTICLE	IF	CITATIONS
91	Multidisciplinary investigations recognize high prevalence of co-morbidity of psychiatric and somatic diagnoses in long-term sickness absentees. Scandinavian Journal of Public Health, 2009, 37, 35-42.	1.2	17
92	Sickness absence among women and men in the police: A systematic literature review. Scandinavian Journal of Public Health, 2009, 37, 310-319.	1.2	24
93	Outcome of multidisciplinary investigations of long-term sickness absentees. Disability and Rehabilitation, 2009, 31, 131-137.	0.9	10
94	No Evidence of Sex Differences in Heritability of Irritable Bowel Syndrome in Swedish Twins. Twin Research and Human Genetics, 2008, 11, 197-203.	0.3	14
95	A prospective study of health, life-style and psychosocial predictors of self-rated health. European Journal of Epidemiology, 2006, 21, 767-776.	2.5	96
96	Self-Rated Health in a Longitudinal Perspective: A 9-Year Follow-Up Twin Study. Journals of Gerontology - Series B Psychological Sciences and Social Sciences, 2005, 60, S331-S340.	2.4	40
97	The Swedish Twin Registry in the Third Millennium. Twin Research and Human Genetics, 2002, 5, 427-432.	1.5	110
98	Age and Sex Differences in Genetic and Environmental Factors for Self-Rated Health. Journals of Gerontology - Series B Psychological Sciences and Social Sciences, 2001, 56, S171-S178.	2.4	42
99	The Swedish Twin Registry in the Third Millennium. , 0, .		16
