citing authors

#	ARTICLE	IF	CITATIONS
1	Infants aged 12 months use the gender feature in determiners to anticipate upcoming words: an eye-tracking study. <i>Journal of Child Language</i> , 2023, 50, 841-859.	0.8	3
2	Atypical ERP responses to audiovisual speech integration and sensory responsiveness in infants at risk for autism spectrum disorder. <i>Infancy</i> , 2022, 27, 369-388.	0.9	5
3	Visual Implicit Learning Abilities in Infants at Familial Risk for Language and Learning Impairments. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 1877.	1.2	3
4	Dysfunctions in Infants'™ Statistical Learning are Related to Parental Autistic Traits. <i>Journal of Autism and Developmental Disorders</i> , 2021, 51, 4621-4631.	1.7	4
5	Early developmental trajectories of expressive vocabulary and gesture production in a longitudinal cohort of Italian infants at high risk for Autism Spectrum Disorder. <i>Autism Research</i> , 2021, 14, 1421-1433.	2.1	11
6	Effects of COVID-19 Lockdown on the Emotional and Behavioral Profiles of Preschool Italian Children with and without Familial Risk for Neurodevelopmental Disorders. <i>Brain Sciences</i> , 2021, 11, 477.	1.1	22
7	Detection without further processing or processing without automatic detection? Differential ERP responses to lexical-semantic processing in toddlers at high clinical risk for autism and language disorder. <i>Cortex</i> , 2021, 141, 465-481.	1.1	2
8	A Pilot Study Evaluating the Effects of Early Intervention for Italian Siblings of Children with Autism Spectrum Disorder. <i>Brain Sciences</i> , 2021, 11, 1381.	1.1	0
9	The (a)typical burden of COVID-19 pandemic scenario in Autism Spectrum Disorder. <i>Scientific Reports</i> , 2021, 11, 22655.	1.6	6
10	Impact of Early Rhythmic Training on Language Acquisition and Electrophysiological Functioning Underlying Auditory Processing: Feasibility and Preliminary Findings in Typically Developing Infants. <i>Brain Sciences</i> , 2021, 11, 1546.	1.1	6
11	The Mediation Role of Dynamic Multisensory Processing Using Molecular Genetic Data in Dyslexia. <i>Brain Sciences</i> , 2020, 10, 993.	1.1	8
12	Infants'™ Learning of Rule-Based Visual Sequences Predicts Language Outcome at 2 Years. <i>Frontiers in Psychology</i> , 2020, 11, 281.	1.1	6
13	EEG Effective Source Projections Are More Bilaterally Symmetric in Infants Than in Adults. <i>Frontiers in Human Neuroscience</i> , 2020, 14, 82.	1.0	9
14	The influence of DCDC2 risk genetic variants on reading: Testing main and haplotypic effects. <i>Neuropsychologia</i> , 2019, 130, 52-58.	0.7	9
15	Oscillatory gamma activity mediates the pathway from socioeconomic status to language acquisition in infancy. , 2019, 57, 101384.		24
16	Postnatal maternal symptoms of depression and child emotion dysregulation: The mediation role of infant EEG alpha asymmetry. , 2019, 57, 101321.		3
17	Reduced left-lateralized pattern of event-related EEG oscillations in infants at familial risk for language and learning impairment. <i>NeuroImage: Clinical</i> , 2019, 22, 101778.	1.4	38
18	Paternal'™but Not Maternal'™Autistic Traits Predict Frontal EEG Alpha Asymmetry in Infants with Later Symptoms of Autism. <i>Brain Sciences</i> , 2019, 9, 342.	1.1	12

#	ARTICLE	IF	CITATIONS
19	Distinct ERP profiles for auditory processing in infants at-risk for autism and language impairment. <i>Scientific Reports</i> , 2018, 8, 715.	1.6	36
20	From CNTNAP2 to Early Expressive Language in Infancy: The Mediation Role of Rapid Auditory Processing. <i>Cerebral Cortex</i> , 2018, 28, 2100-2108.	1.6	15
21	A common genetic variant in <i>FOXP2</i> is associated with language-based learning (dis)abilities: Evidence from two Italian independent samples. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2017, 174, 578-586.	1.1	18
22	ERP responses to lexical-semantic processing in typically developing toddlers, in adults, and in toddlers at risk for language and learning impairment. <i>Neuropsychologia</i> , 2017, 103, 115-130.	0.7	7
23	Working memory mediates the effects of gestational age at birth on expressive language development in children. <i>Neuropsychology</i> , 2017, 31, 475-485.	1.0	13
24	Auditory discrimination predicts linguistic outcome in Italian infants with and without familial risk for language learning impairment. <i>Developmental Cognitive Neuroscience</i> , 2016, 20, 23-34.	1.9	47
25	GRIN2B predicts attention problems among disadvantaged children. <i>European Child and Adolescent Psychiatry</i> , 2015, 24, 827-836.	2.8	18
26	The role of DCDC2 genetic variants and low socioeconomic status in vulnerability to attention problems. <i>European Child and Adolescent Psychiatry</i> , 2015, 24, 309-318.	2.8	13
27	GRIN2B mediates susceptibility to intelligence quotient and cognitive impairments in developmental dyslexia. <i>Psychiatric Genetics</i> , 2015, 25, 9-20.	0.6	32
28	Putative Risk Factors in Developmental Dyslexia. <i>Journal of Learning Disabilities</i> , 2015, 48, 120-129.	1.5	13
29	KIAA0319 and ROBO1: evidence on association with reading and pleiotropic effects on language and mathematics abilities in developmental dyslexia. <i>Journal of Human Genetics</i> , 2014, 59, 189-197.	1.1	52
30	Variants in SNAP25 are targets of natural selection and influence verbal performances in women. <i>Cellular and Molecular Life Sciences</i> , 2012, 69, 1705-1715.	2.4	10
31	Pleiotropic Effects of DCDC2 and DYX1C1 Genes on Language and Mathematics Traits in Nuclear Families of Developmental Dyslexia. <i>Behavior Genetics</i> , 2011, 41, 67-76.	1.4	43
