|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Game-theoretical model for the sustainable use of thermal water resources: the case of Ischia volcanic Island (Italy). Environmental Geochemistry and Health, 2022, 44, 2021-2035.                                                                                                                                                                                             | 1.8 | 3         |
| 2  | Hydraulic properties of ignimbrites: matrix and fracture permeabilities in two pyroclastic flow deposits from Cimino-Vico volcanoes (Italy). Bulletin of Engineering Geology and the Environment, 2022, 81, 1.                                                                                                                                                                 | 1.6 | 5         |
| 3  | Groundwater flow in the Ischia volcanic island (Italy) and its implications for thermal water abstraction. Hydrogeology Journal, 2020, 28, 579-601.                                                                                                                                                                                                                            | 0.9 | 9         |
| 4  | Perspectives of Using Lignin as Additive to Improve the Permeability of In-Situ Soils for Barrier Materials in Landfills. Sustainability, 2020, 12, 5197.                                                                                                                                                                                                                      | 1.6 | 6         |
| 5  | Relationship Between Aquifer Pumping Response and Quality of Water Extracted from Wells in an Active Hydrothermal System: The Case of the Island of Ischia (Southern Italy). Water (Switzerland), 2020, 12, 2576.                                                                                                                                                              | 1.2 | 12        |
| 6  | Sustainable Yield of a Hydrothermal Area: From Theoretical Concepts to the Practical Approach. Ground Water, 2019, 57, 337-348.                                                                                                                                                                                                                                                | 0.7 | 4         |
| 7  | Hard-rock aquifer response to pumping and sustainable yield of wells in some areas of Mediterranean<br>Region. Geological Society Special Publication, 2019, 479, 147-160.                                                                                                                                                                                                     | 0.8 | 2         |
| 8  | Estimation of rock mass permeability using variation in hydraulic conductivity with depth: experiences in hard rocks of western Turkey. Bulletin of Engineering Geology and the Environment, 2018, 77, 1663-1671.                                                                                                                                                              | 1.6 | 23        |
| 9  | Reply to Comment on "Impact of groundwater withdrawals on the interaction of multi-layered aquifers in the Viterbo geothermal area (central Italy)― report published in Hydrogeology Journal (2013) 21:1339–1353, by Antonella Baiocchi, Francesca Lotti and Vincenzo Piscopo. Hydrogeology Journal. 2016. 24. 541-545.                                                        | 0.9 | 0         |
| 10 | A Multi-Scale Approach in Hydraulic Characterization of a Metamorphic Aquifer: What Can Be Inferred about the Groundwater Abstraction Possibilities. Water (Switzerland), 2015, 7, 4638-4656.                                                                                                                                                                                  | 1.2 | 8         |
| 11 | An Integrated Approach to Identify Water Resources for Human Consumption in an Area Affected by High Natural Arsenic Content. Water (Switzerland), 2015, 7, 5091-5114.                                                                                                                                                                                                         | 1.2 | 13        |
| 12 | Comparison of pumping at constant head and at a constant rate for determining the sustainable yield of a well. Environmental Earth Sciences, 2014, 72, 989-996.                                                                                                                                                                                                                | 1.3 | 5         |
| 13 | Impact of groundwater withdrawals on the interaction of multi-layered aquifers in the Viterbo geothermal area (central Italy). Hydrogeology Journal, 2013, 21, 1339-1353.                                                                                                                                                                                                      | 0.9 | 17        |
| 14 | Conceptual Hydrogeological Model and Groundwater Resource Estimation in a Complex Hydrothermal Area: The Case of the Viterbo Geothermal Area (Central Italy). Journal of Water Resource and Protection, 2012, 04, 231-247.                                                                                                                                                     | 0.3 | 15        |
| 15 | Comment on "A stratigraphic and geophysical approach to studying the deep-circulating groundwater and thermal springs, and their recharge areas, in Cimini Mountains–Viterbo area, central Italy― paper published in Hydrogeology Journal (2010) 18:1319–1341, by Ugo Chiocchini, Fabio Castaldi, Maurizio Barbieri. Valeria Eulilli. Hydrogeology Journal. 2011. 19. 945-947. | 0.9 | 1         |
| 16 | Influence of hydrostratigraphy and structural setting on the arsenic occurrence in groundwater of the Cimino-Vico volcanic area (central Italy). Hydrogeology Journal, 2009, 17, 901-914.                                                                                                                                                                                      | 0.9 | 66        |
| 17 | Experiment of pumping at constant-head: an alternative possibility to the sustainable yield of a well. Hydrogeology Journal, 2007, 15, 679-687.                                                                                                                                                                                                                                | 0.9 | 11        |
