| #  | Article                                                                                                                                                                                                                                                                           | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Hetarylcoumarins: Synthesis and biological evaluation as potent $\hat{l}_{\pm}$ -glucosidase inhibitors. Bioorganic Chemistry, 2017, 73, 1-9.                                                                                                                                     | 4.1 | 33        |
| 2  | Hybrid Quinoline-Thiosemicarbazone Therapeutics as a New Treatment Opportunity for Alzheimer's<br>Disease‒Synthesis, In Vitro Cholinesterase Inhibitory Potential and Computational Modeling Analysis.<br>Molecules, 2021, 26, 6573.                                              | 3.8 | 24        |
| 3  | Synthesis of Novel N-Acylhydrazones and Their C-N/N-N Bond Conformational Characterization by NMR Spectroscopy. Molecules, 2021, 26, 4908.                                                                                                                                        | 3.8 | 21        |
| 4  | Potent Inhibitors of Cholinesterases: A Biochemical and In Silico Approach. Molecules, 2021, 26, 656.                                                                                                                                                                             | 3.8 | 19        |
| 5  | Synthesis of Sulfonamide Tethered (Hetero)aryl ethylidenes as Potential Inhibitors of P2X Receptors: A Promising Way for the Treatment of Pain and Inflammation. ACS Omega, 2021, 6, 25062-25075.                                                                                 | 3.5 | 12        |
| 6  | Design, synthesis, structure activity relationship and molecular docking studies of thiophene-2-carboxamide Schiff base derivatives of benzohydrazide as novel acetylcholinesterase and butyrylcholinesterase inhibitors. Journal of Molecular Structure, 2021, 1244, 130983.     | 3.6 | 12        |
| 7  | Exploiting oxadiazole-sulfonamide hybrids as new structural leads to combat diabetic complications via aldose reductase inhibition. Bioorganic Chemistry, 2020, 99, 103852.                                                                                                       | 4.1 | 10        |
| 8  | Determination of macronutrients, micronutrients, non-essential elements in milk based-infant formulas by atomic absorption and inductively coupled plasma-optical emission spectroscopy after microwave and ultrasound assisted digestion. Spectroscopy Letters, 2017, 50, 88-95. | 1.0 | 9         |
| 9  | (Benzylideneamino)triazole–Thione Derivatives of Flurbiprofen: An Efficient Microwave-Assisted<br>Synthesis and <i>In Vivo</i> Analgesic Potential. ACS Omega, 2021, 6, 31348-31357.                                                                                              | 3.5 | 5         |
| 10 | Crystal Structure and Quantum Chemical Studies of a Novel Push–Pull Enaminone:<br>3-Chloro-4-((4-bromophenyl)amino)pent-3-en-2-one. Journal of Chemical Crystallography, 2020, 50,<br>187-197.                                                                                    | 1,1 | 2         |
