

Paul Adams

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1467514/paul-adams-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

55
papers

7,130
citations

#	Paper	IF	Citations
55	The discovery of the sub-threshold currents M and Q/H in central neurons. <i>Brain Research</i> , 2016 , 1645, 38-41	3.7	2
54	Hebbian learning from higher-order correlations requires crosstalk minimization. <i>Biological Cybernetics</i> , 2014 , 108, 405-22	2.8	3
53	Hebbian crosstalk and input segregation. <i>Journal of Theoretical Biology</i> , 2013 , 337, 133-49	2.3	3
52	Hebbian crosstalk prevents nonlinear unsupervised learning. <i>Frontiers in Computational Neuroscience</i> , 2009 , 3, 11	3.5	8
51	Hebbian errors in learning: an analysis using the Oja model. <i>Journal of Theoretical Biology</i> , 2009 , 258, 489-501	2.3	16
50	Synaptic Darwinism and neocortical function. <i>Neurocomputing</i> , 2002 , 42, 197-214	5.4	36
49	A new interpretation of thalamocortical circuitry. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2002 , 357, 1767-79	5.8	12
48	Implications of synaptic digitisation and error for neocortical function. <i>Neurocomputing</i> , 2000 , 32-33, 673-678	5.4	4
47	Hebb and Darwin. <i>Journal of Theoretical Biology</i> , 1998 , 195, 419-38	2.3	69
46	Visualization of calcium influx through channels that shape the burst and tonic firing modes of thalamic relay cells. <i>Journal of Neurophysiology</i> , 1997 , 77, 2816-25	3.2	78
45	Regulation of M current by intracellular calcium in bullfrog sympathetic ganglion neurons. <i>Journal of Neuroscience</i> , 1994 , 14, 3487-99	6.6	57
44	Release of intracellular calcium and modulation of membrane currents by caffeine in bull-frog sympathetic neurones. <i>Journal of Physiology</i> , 1992 , 445, 515-35	3.9	93
43	Multiple kinetic states underlying macroscopic M-currents in bullfrog sympathetic neurons. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 1992 , 248, 207-14	4.4	18
42	The platonic neuron gets the hots. <i>Current Biology</i> , 1992 , 2, 625-7	6.3	19
41	Modulation of M-current by intracellular Ca ²⁺ . <i>Neuron</i> , 1991 , 6, 533-45	13.9	88
40	N-methyl-D-aspartate receptors contribute to excitatory postsynaptic potentials of cat lateral geniculate neurons recorded in thalamic slices. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1990 , 87, 4548-52	11.5	136
39	Subcellular calcium transients visualized by confocal microscopy in a voltage-clamped vertebrate neuron. <i>Science</i> , 1990 , 247, 858-62	33.3	323

38	A G Protein Mediates the Inhibition of the Voltage-Dependent Potassium M Current by Muscarine, LHRH, Substance P and UTP in Bullfrog Sympathetic Neurons. <i>European Journal of Neuroscience</i> , 1989 , 1, 529-542	3.5	45
37	Bradykinin inhibits a potassium M-like current in rat pheochromocytoma PC12 cells. <i>FEBS Letters</i> , 1989 , 255, 42-6	3.8	31
36	Peptides and Slow Synaptic Potentials. <i>Current Topics in Membranes and Transport</i> , 1987 , 3-29		
35	Spontaneous miniature outward currents in cultured bullfrog neurons. <i>Brain Research</i> , 1987 , 401, 331-9	3.7	42
34	Effects of phorbol dibutyrate on M currents and M current inhibition in bullfrog sympathetic neurons. <i>Cellular and Molecular Neurobiology</i> , 1987 , 7, 255-69	4.6	49
33	A method for the rapid exchange of solutions bathing excised membrane patches. <i>Biophysical Journal</i> , 1986 , 50, 987-92	2.9	79
32	Calcium-dependent current generating the afterhyperpolarization of hippocampal neurons. <i>Journal of Neurophysiology</i> , 1986 , 55, 1268-82	3.2	494
31	Two distinct Ca-dependent K currents in bullfrog sympathetic ganglion cells. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1985 , 82, 3040-4	11.5	332
30	Teleost luteinizing hormone-releasing hormone: action on bullfrog sympathetic ganglia is consistent with role as neurotransmitter. <i>Journal of Neuroscience</i> , 1984 , 4, 420-9	6.6	61
29	Substance P inhibits the M-current in bullfrog sympathetic neurones. <i>British Journal of Pharmacology</i> , 1983 , 79, 330-3	8.6	94
28	Ca-activated potassium current in vertebrate sympathetic neurons. <i>Cell Calcium</i> , 1983 , 4, 407-20	4	64
27	M-currents and other potassium currents in bullfrog sympathetic neurones. <i>Journal of Physiology</i> , 1982 , 330, 537-72	3.9	425
26	Synaptic inhibition of the M-current: slow excitatory post-synaptic potential mechanism in bullfrog sympathetic neurones. <i>Journal of Physiology</i> , 1982 , 332, 263-72	3.9	109
25	Voltage-sensitive K-currents in sympathetic neurons and their modulation by neurotransmitters. <i>Journal of the Autonomic Nervous System</i> , 1982 , 6, 23-35		49
24	Control of calcium current in rat sympathetic neurons by norepinephrine. <i>Brain Research</i> , 1982 , 244, 135-44	3.7	141
23	Voltage-clamp analysis of muscarinic excitation in hippocampal neurons. <i>Brain Research</i> , 1982 , 250, 71-92	3.7	915
22	Voltage-dependent conductances of vertebrate neurones. <i>Trends in Neurosciences</i> , 1982 , 5, 116-119	13.3	48
21	Intracellular Ca ²⁺ activates a fast voltage-sensitive K ⁺ current in vertebrate sympathetic neurones. <i>Nature</i> , 1982 , 296, 746-9	50.4	364

20	Who do barium ions imitate acetylcholine?. <i>Brain Research</i> , 1981 , 206, 244-50	3.7	83
19	Acetylcholine receptor kinetics. <i>Journal of Membrane Biology</i> , 1981 , 58, 161-74	2.3	190
18	Quinacrine (mepacrine) action at frog end-plate. <i>Journal of Physiology</i> , 1980 , 306, 261-81	3.9	53
17	Muscarinic suppression of a novel voltage-sensitive K ⁺ current in a vertebrate neurone. <i>Nature</i> , 1980 , 283, 673-6	50.4	1158
16	Ion movements in endplate channels. <i>Brain Research Bulletin</i> , 1979 , 4, 147-8	3.9	2
15	Molecular aspects of synaptic transmission. <i>Trends in Neurosciences</i> , 1978 , 1, 141-143	13.3	
14	A comparison of current-voltage relations for full and partial agonists. <i>Journal of Physiology</i> , 1978 , 283, 621-44	3.9	43
13	Decamethonium both opens and blocks endplate channels. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1978 , 75, 2994-8	11.5	143
12	Voltage jump analysis of procaine action at frog end-plate. <i>Journal of Physiology</i> , 1977 , 268, 291-318	3.9	203
11	Relaxation experiments using bath-applied suberyldicholine. <i>Journal of Physiology</i> , 1977 , 268, 271-89	3.9	50
10	Biochemical aspects of development and ageing of human lumbar intervertebral discs. <i>Rheumatology</i> , 1977 , 16, 22-9	3.9	139
9	Interaction of a fluorescent probe with acetylcholine-activated synaptic membrane. <i>Nature</i> , 1977 , 269, 609-11	50.4	24
8	A comparison of the time course of excitation and inhibition by iontophoretic decamethonium in frog endplate. <i>British Journal of Pharmacology</i> , 1976 , 57, 59-65	8.6	5
7	Drug blockade of open end-plate channels. <i>Journal of Physiology</i> , 1976 , 260, 531-52	3.9	276
6	Voltage dependence of agonist responses at voltage-clamped frog endplates. <i>Pflugers Archiv European Journal of Physiology</i> , 1976 , 361, 145-51	4.6	27
5	Actions of gamma-aminobutyric acid on sympathetic ganglion cells. <i>Journal of Physiology</i> , 1975 , 250, 85-120	3.9	245
4	A study of desensitization using voltage clamp. <i>Pflugers Archiv European Journal of Physiology</i> , 1975 , 360, 135-44	4.6	96
3	An analysis of the dose-response curve at voltage-clamped frog-endplates. <i>Pflugers Archiv European Journal of Physiology</i> , 1975 , 360, 145-53	4.6	72

- 2 Drug interactions at the motor endplate. *Pflugers Archiv European Journal of Physiology*, **1975**, 360, 155-646 13
- 1 Modification by procaine of membrane and fluorescence changes induced by electrical stimulation of nerve and muscle fibres. *Biochemical and Biophysical Research Communications*, **1975**, 65, 196-204 3-4 1
