#	ARTICLE	IF	CITATIONS
1	Malaises et hypoglycémies après chirurgie bariatrique. , 2021, , 577-583.		0
2	Glucose Abnormalities and Inappropriate Weight Gain Predict Negative Pregnancy Outcomes After Gastric Bypass Surgery. Obesity Surgery, 2021, 31, 3123-3129.	2.1	7
3	A MOOC About Bariatric Surgery Improves Knowledge and Promotes Patients's™ Soft Skills. Obesity Surgery, 2020, 30, 1600-1604.	2.1	6
4	Diabetes Remission and Relapse After Bariatric Surgery: a Nationwide Population-Based Study. Obesity Surgery, 2020, 30, 4810-4820.	2.1	11
5	International consensus on the diagnosis and management of dumping syndrome. Nature Reviews Endocrinology, 2020, 16, 448-466.	9.6	127
6	Weight Loss Trajectories After Bariatric Surgery for Obesity: Mathematical Model and Proof-of-Concept Study. JMIR Medical Informatics, 2020, 8, e13672.	2.6	10
7	Grossesses après chirurgie bariatrique: recommandations pour la pratique clinique (groupe) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 50 297	0.5	3
8	Clinical Practice Guidelines for Childbearing Female Candidates for Bariatric Surgery, Pregnancy, and Post-partum Management After Bariatric Surgery. Obesity Surgery, 2019, 29, 3722-3734.	2.1	80
9	A Case Report of Myotonic Disease and Gastric Bypass and a Literature Review. Obesity Surgery, 2019, 29, 2355-2356.	2.1	0
10	An Application May Help Improve Protein Consumption after Bariatric Surgery. Obesity Surgery, 2019, 29, 1982-1983.	2.1	1
11	Grossesses après chirurgie bariatrique : recommandations pour la pratique clinique. Obesite, 2019, 14, 163-177.	0.1	0
12	Diagnosis and management of patients with significantly abnormal glycaemic profiles during pregnancy after bariatric surgery: PRESAGE (Pregnancy with significantly abnormal glycaemic) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 297	0.0	0
13	Fast screening of eating disorders among patients with bipolar disorder: Validation of the French version of BEDS questionnaire. Revue Europeenne De Psychologie Appliquee, 2017, 67, 61-65.	0.8	3
14	Dépistage des dysglycémies gestationnelles après chirurgie bariatrique. Medecine Des Maladies Metaboliques, 2017, 11, 525-529.	0.1	1
15	Hypoglycaemia after gastric bypass: mechanisms and treatment. Diabetes, Obesity and Metabolism, 2016, 18, 217-223.	4.4	35
16	Gastric Bypass in Older Patients: Complications, Weight Loss, and Resolution of Comorbidities at 2 Years in a Matched Controlled Study. Obesity Surgery, 2016, 26, 1806-1813.	2.1	16
17	Impact of Carbohydrate Content and Glycemic Load on Postprandial Glucose After Roux-en-Y Gastric Bypass. Obesity Surgery, 2016, 26, 1487-1492.	2.1	5
18	Glucose Profiles in Pregnant Women After a Gastric Bypass. Obesity Surgery, 2016, 26, 2150-2155.	2.1	35

#	ARTICLE	IF	CITATIONS
19	Ä-cell pancreatic dysfunction plays a role in hyperglycemic peaks observed after gastric bypass surgery of obese patients. <i>Surgery for Obesity and Related Diseases</i> , 2016, 12, 795-802.	1.2	7
20	Post-prandial hypoglycemia results from a non-glucose-dependent inappropriate insulin secretion in Roux-en-Y gastric bypassed patients. <i>Metabolism: Clinical and Experimental</i> , 2016, 65, 18-26.	3.4	23
21	Increased risk of OGTT-induced hypoglycemia after gastric bypass in severely obese patients with normal glucose tolerance. <i>Surgery for Obesity and Related Diseases</i> , 2015, 11, 573-577.	1.2	30
22	Clinical symptoms, signs and tests for identification of impending and current water-loss dehydration in older people. <i>The Cochrane Library</i> , 2015, 2015, CD009647.	2.8	85
23	Hypoglycémie aprÃs bypass gastrique : mise au point au sujet des mÃcanismes et des traitements. <i>Medecine Des Maladies Metaboliques</i> , 2015, 9, 482-487.	0.1	0
24	Benefits and risks of bariatric surgery in patients aged more than 60 years. <i>Surgery for Obesity and Related Diseases</i> , 2014, , .	1.2	41
25	Validation of a new tool: The calorie intake tool, to easily estimate the energy intake of diseased aged patient. <i>Journal of Nutrition, Health and Aging</i> , 2014, 18, 857-860.	3.3	4
26	Early prediction of failure to lose weight after obesity surgery. <i>Surgery for Obesity and Related Diseases</i> , 2013, 9, 118-121.	1.2	30
27	Usefulness of Acarbose and Dietary Modifications to Limit Glycemic Variability Following Roux-en-Y Gastric Bypass as Assessed by Continuous Glucose Monitoring. <i>Diabetes Technology and Therapeutics</i> , 2012, 14, 736-740.	4.4	54
28	Comparative early outcomes of three laparoscopic bariatric procedures: sleeve gastrectomy, Roux-en-Y gastric bypass, and biliopancreatic diversion with duodenal switch. <i>Surgery for Obesity and Related Diseases</i> , 2012, 8, 250-254.	1.2	63
29	ObÃsitÃ© de la personne ÄgÃe. , 2012, , 272-279.		2
30	Besoins en eau et en Änergie. , 2012, , 47-50.		0
31	Post-bypass hypoglycaemia: A review of current findings. <i>Diabetes and Metabolism</i> , 2011, 37, 274-281.	2.9	51
32	High Glycemic Variability Assessed by Continuous Glucose Monitoring After Surgical Treatment of Obesity by Gastric Bypass. <i>Diabetes Technology and Therapeutics</i> , 2011, 13, 625-630.	4.4	57
33	Usefulness of Continuous Glucose Monitoring for the Diagnosis of Hypoglycemia after a Gastric Bypass in a Patient Previously Treated for Type 2 Diabetes. <i>Obesity Surgery</i> , 2010, 20, 126-129.	2.1	38
34	Modifications du mÃtabolisme ÄnergÃtique et de la composition corporelle au cours du vieillissement. , 2009, , 3-10.		0
35	Gastric Bypass is not Associated with Protein Malnutrition in Morbidly Obese Patients. <i>Obesity Surgery</i> , 2009, 19, 840-844.	2.1	23
36	Obesity in the elderly: Should we be using new diagnostic criteria?. <i>Journal of Nutrition, Health and Aging</i> , 2009, 13, 168-169.	3.3	20

#	ARTICLE	IF	CITATIONS
37	Carla Task Force on Sarcopenia: Propositions for clinical trials. <i>Journal of Nutrition, Health and Aging</i> , 2009, 13, 700-707.	3.3	62
38	A practical approach to estimate resting energy expenditure in frail elderly people. <i>Journal of Nutrition, Health and Aging</i> , 2008, 12, 277-280.	3.3	18
39	Influence of gender and body composition on hydration and body water spaces. <i>Clinical Nutrition</i> , 2008, 27, 740-746.	5.0	90
40	The prevalence of abnormal eating behaviour in a representative sample of the French diabetic population. <i>Diabetes and Metabolism</i> , 2008, 34, 581-586.	2.9	21
41	Is a Failure to Recognize an Increase in Food Intake a Key to Understanding Insulin-Induced Weight Gain?. <i>Diabetes Care</i> , 2008, 31, 448-450.	8.6	28
42	Comparison of different methods to assess body composition of weight loss in obese and diabetic patients. <i>Diabetes Research and Clinical Practice</i> , 2007, 77, 405-411.	2.8	41
43	Biliopancreatic diversion with duodenal switch or gastric bypass for failed gastric banding: retrospective study from two institutions with preliminary results. <i>Surgery for Obesity and Related Diseases</i> , 2007, 3, 521-525.	1.2	75
44	Energy Requirements in Hospitalized Elderly People. <i>Journal of the American Geriatrics Society</i> , 2007, 55, 1085-1089.	2.6	57
45	Energy requirements in frail elderly people: A review of the literature. <i>Clinical Nutrition</i> , 2007, 26, 16-24.	5.0	96
46	Pharmacokinetics and drug toxicity in elderly patients: a case for geriatric core data in clinical trials. <i>Journal of Nutrition, Health and Aging</i> , 2007, 11, 261-4.	3.3	5
47	Nutritional risk score is not sensitive enough to predict weight loss in diseased elderly subjects. <i>Journal of Nutrition, Health and Aging</i> , 2007, 11, 389-92.	3.3	3
48	Resting energy expenditure is not increased in mildly hyperglycaemic obese diabetic patients. <i>British Journal of Nutrition</i> , 2006, 96, 945-948.	2.3	26
49	Influence of intensity of food restriction on skeletal muscle mitochondrial energy metabolism in rats. <i>American Journal of Physiology - Endocrinology and Metabolism</i> , 2006, 291, E460-E467.	3.5	21
50	Underreporting of Food Intake in Obese Diabetic and Nondiabetic Patients. <i>Diabetes Care</i> , 2006, 29, 2726-2727.	8.6	57
51	Hormonal regulation of mitochondrial energy production. <i>Current Opinion in Clinical Nutrition and Metabolic Care</i> , 2005, 8, 415-418.	2.5	11
52	The Importance of Good Hydration for Day-to-Day Health. <i>Nutrition Reviews</i> , 2005, 63, S6-S13.	5.8	67
53	Energy Requirements Are Not Greater in Elderly Patients Suffering from Pressure Ulcers. <i>Journal of the American Geriatrics Society</i> , 2005, 53, 478-482.	2.6	35
54	Dexamethasone impairs muscle energetics, studied by <sup>31</sup> P NMR, in rats. <i>Diabetologia</i> , 2005, 48, 328-335.	6.3	17

#	ARTICLE	IF	CITATIONS
55	Mitochondrial function, energy expenditure, aging and insulin resistance. <i>Diabetes and Metabolism</i> , 2005, 31, 5S67-5S73.	2.9	49
56	Composition corporelle. <i>Cahiers De Nutrition Et De Dietetique</i> , 2005, 40, 172-176.	0.3	0
57	Muscle fat oxidative capacity is not impaired by age but by physical inactivity: association with insulin sensitivity. <i>FASEB Journal</i> , 2004, 18, 737-739.	0.5	112
58	Effect of insulin treatment on the body composition of Type 2 diabetic patients. <i>Diabetic Medicine</i> , 2004, 21, 1298-1303.	2.3	27
59	Variation de l'Équilibre hydrique de la personne Âge. <i>Nutrition Clinique Et Metabolisme</i> , 2004, 18, 205-211.	0.5	1
60	Food restriction affects energy metabolism in rat liver mitochondria. <i>Biochimica Et Biophysica Acta - General Subjects</i> , 2004, 1670, 126-131.	2.4	48
61	Kinetics and control of oxidative phosphorylation in rat liver mitochondria after dexamethasone treatment. <i>Biochemical Journal</i> , 2004, 382, 491-499.	3.7	34
62	Validity of measuring knee-height as an estimate of height in diseased French elderly persons. <i>Journal of Nutrition, Health and Aging</i> , 2004, 8, 386-8.	3.3	25
63	Effects of changes in water compartments on physiology and metabolism. <i>European Journal of Clinical Nutrition</i> , 2003, 57, S2-S5.	2.9	36
64	Dexamethasone treatment specifically increases the basal proton conductance of rat liver mitochondria. <i>FEBS Letters</i> , 2003, 541, 75-79.	2.8	28
65	Mitochondrial energy metabolism in a model of undernutrition induced by dexamethasone. <i>British Journal of Nutrition</i> , 2003, 90, 969-977.	2.3	32
66	Estimation of Calorie and Protein Intake in Aged Patients: Validation of a Method Based on Meal Portions Consumed. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2002, 57, M52-M56.	3.6	51
67	Factors affecting energy and macronutrient requirements in elderly people. <i>Public Health Nutrition</i> , 2001, 4, 561-568.	2.2	39
68	Chronic Cellular Dehydration in the Aged Patient. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2001, 56, M349-M352.	3.6	47
69	Bioelectrical Impedance Analysis Estimation of Water Compartments in Elderly Diseased Patients: The Source Study. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2001, 56, M344-M348.	3.6	46
70	Total energy expenditure in the elderly. <i>European Journal of Clinical Nutrition</i> , 2000, 54, S92-S103.	2.9	182
71	Physiology of aging with respect to gastrointestinal, circulatory and immune system changes and their significance for energy and protein metabolism. <i>European Journal of Clinical Nutrition</i> , 2000, 54, S21-S25.	2.9	72
72	Body Water Spaces and Cellular Hydration during Healthy Aging. <i>Annals of the New York Academy of Sciences</i> , 2000, 904, 474-483.	3.8	45

#	ARTICLE	IF	CITATIONS
73	Reproducibility of body composition and body water spaces measurements in healthy elderly individuals. <i>Journal of Nutrition, Health and Aging</i> , 2000, 4, 243-5.	3.3	5
74	Time-course effects of endurance training on fat oxidation in sedentary elderly people. <i>International Journal of Obesity</i> , 1999, 23, 706-714.	3.4	14
75	Intracellular hyperhydration induced by a 7-day endurance race. <i>European Journal of Applied Physiology and Occupational Physiology</i> , 1999, 80, 353-359.	1.2	50
76	Increased resting energy expenditure is related to plasmaTNF- $\alpha$ concentration in stable COPD patients. <i>Clinical Nutrition</i> , 1999, 18, 269-274.	5.0	63
77	Protein pulse feeding improves protein retention in elderly women. <i>American Journal of Clinical Nutrition</i> , 1999, 69, 1202-1208.	4.7	249
78	The effect of inactivity on dietary intake and energy homeostasis. <i>Proceedings of the Nutrition Society</i> , 1999, 58, 115-122.	1.0	10
79	Energy and substrate metabolism during a 42-day bed-rest in a head-down tilt position in humans. <i>European Journal of Applied Physiology</i> , 1998, 78, 308-314.	2.5	30
80	Bioelectrical impedance analysis measurements of total body water and extracellular water in healthy elderly subjects. <i>International Journal of Obesity</i> , 1998, 22, 537-543.	3.4	62
81	Energy and Water Metabolism, Body Composition, and Hormonal Changes Induced by 42 Days of Enforced Inactivity and Simulated Weightlessness <sup>1</sup> . <i>Journal of Clinical Endocrinology and Metabolism</i> , 1998, 83, 4289-4297.	3.6	84
82	Effects of 14 weeks of progressive endurance training on energy expenditure in elderly people. <i>British Journal of Nutrition</i> , 1998, 80, 511-519.	2.3	82
83	Effects of endurance training on the cardiovascular system and water compartments in elderly subjects. <i>Journal of Applied Physiology</i> , 1997, 83, 1300-1306.	2.5	35
84	Low-cost measurement of body composition with 18O-enriched water. <i>Diabète &amp; Métabolisme</i> , 1995, 21, 281-4.	0.3	4
