List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1492234/-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

55
papers

795
citations

#	Paper	IF	Citations
55	Hydro-climatic Characteristics of Yarlung Zangbo River Basin since the Last Glacial Maximum. <i>Advances in Atmospheric Sciences</i> , 2022 , 39, 415-426	2.9	0
54	Spatial Distribution of Debris Flow-prone Catchments in Hengduan Mountainous Area in Southwestern China. <i>Advances in Science, Technology and Innovation</i> , 2022 , 63-66	0.3	
53	Two megafloods in the middle reach of Yarlung Tsangpo River since Last-glacial period: Evidence from giant bars. <i>Global and Planetary Change</i> , 2022 , 208, 103726	4.2	0
52	Quantitative multi-hazard risk assessment to buildings in the Jiuzhaigou valley, a world natural heritage site in Western China. <i>Geomatics, Natural Hazards and Risk</i> , 2022 , 13, 193-221	3.6	3
51	Broad valleys and barrier dams in upstream Brahmaputra efficiently retain Tibetan-sourced sediments: Evidence from palaeoflood records. <i>Quaternary Science Reviews</i> , 2022 , 285, 107538	3.9	0
50	Spatial distribution of debris flow-prone catchments in Hengduan mountainous area in southwestern China. <i>Arabian Journal of Geosciences</i> , 2021 , 14, 1	1.8	1
49	Landscape change in response to multiperiod glacial debris flows in Peilong catchment, southeastern Tibet. <i>Journal of Mountain Science</i> , 2021 , 18, 567-582	2.1	0
48	Quantitative Analysis of the Effects of an Earthquake on Rainfall Thresholds for Triggering Debris-Flow Events. <i>Frontiers in Earth Science</i> , 2021 , 9,	3.5	1
47	Effects of bed longitudinal inflexion and sediment porosity on basal entrainment mechanism: insights from laboratory debris flows. <i>Landslides</i> , 2021 , 18, 3041-3062	6.6	0
46	Landslide Inventory along a National Highway Corridor in the Hissar-Allay Mountains, Central Tajikistan. <i>GeoHazards</i> , 2021 , 2, 212-227	2.3	2
45	Geomorphic effects of recurrent outburst superfloods in the Yigong River on the southeastern margin of Tibet. <i>Scientific Reports</i> , 2021 , 11, 15577	4.9	0
44	A grid-based physical model to analyze the stability of slope unit. <i>Geomorphology</i> , 2021 , 391, 107887	4.3	
43	A hydrology-process based method for correlating debris flow density to rainfall parameters and its application on debris flow prediction. <i>Journal of Hydrology</i> , 2020 , 589, 125124	6	2
42	Morpho-sedimentary and stratigraphic characteristics of the 2000 Yigong River landslide dam outburst flood deposits, eastern Tibetan Plateau. <i>Geomorphology</i> , 2020 , 367, 107293	4.3	4
41	Experimental study of debris-flow entrainment over stepped-gradient beds incorporating bed sediment porosity. <i>Engineering Geology</i> , 2020 , 274, 105708	6	1
40	Topographical and geological variation of effective rainfall for debris-flow occurrence from a large-scale perspective. <i>Geomorphology</i> , 2020 , 358, 107134	4.3	6
39	A physics-based model to derive rainfall intensity-duration threshold for debris flow. <i>Geomorphology</i> , 2020 , 351, 106930	4.3	13

38	Energy Dissipation of Debris Flows over Stepped Gradients and Erodible Beds in Open Channel. <i>Journal of Hydraulic Engineering</i> , 2020 , 146, 06020008	1.8	1
37	Investments against flash floods and their effectiveness in China in 2000–2015. <i>International Journal of Disaster Risk Reduction</i> , 2019 , 38, 101193	4.5	5
36	Assessment of debris-flow potential dangers in the Jiuzhaigou Valley following the August 8, 2017, Jiuzhaigou earthquake, western China. <i>Engineering Geology</i> , 2019 , 256, 57-66	6	33
35	Landslides and dammed lakes triggered by the 2017 Ms6.9 Milin earthquake in the Tsangpo gorge. <i>Landslides</i> , 2019 , 16, 993-1001	6.6	28
34	Outburst floods in China: A review. <i>Earth-Science Reviews</i> , 2019 , 197, 102895	10.2	23
33	Quantitative assessment of the impact of earthquake-induced geohazards on natural landscapes in Jiuzhaigou Valley. <i>Journal of Mountain Science</i> , 2019 , 16, 441-452	2.1	13
32	Comprehensive Evaluation of Satellite-Based Precipitation at Sub-Daily Time Scales Over a High-Profile Watershed with Complex Terrain. <i>Earth and Space Science</i> , 2019 , 6, 2347-2361	3.1	4
31	Debris flow entrainment rates in non-uniform channels with convex and concave slopes. <i>Journal of Hydraulic Research/De Recherches Hydrauliques</i> , 2018 , 56, 156-167	1.9	6
30	A depth-averaged two-phase model for debris flows over fixed beds. <i>International Journal of Sediment Research</i> , 2018 , 33, 462-477	3	12
29	The establishment and influence of Baimakou paleo-dam in an upstream reach of the Yangtze River, southeastern margin of the Tibetan Plateau. <i>Geomorphology</i> , 2018 , 321, 167-173	4.3	15
28	A depth-averaged two-phase model for debris flows over erodible beds. <i>Earth Surface Processes and Landforms</i> , 2018 , 43, 817-839	3.7	28
27	Assessment of prospective hazards resulting from the 2017 earthquake at the world heritage site Jiuzhaigou Valley, Sichuan, China. <i>Journal of Mountain Science</i> , 2018 , 15, 779-792	2.1	34
26	A debris-flow impact pressure model combining material characteristics and flow dynamic parameters. <i>Journal of Mountain Science</i> , 2018 , 15, 2721-2729	2.1	4
25	Rainfall occurrence and its relation to flood damage in China from 2000 to 2015. <i>Journal of Mountain Science</i> , 2018 , 15, 2492-2504	2.1	14
24	New understandings of the June 24th 2017 Xinmo Landslide, Maoxian, Sichuan, China. <i>Landslides</i> , 2018 , 15, 2465-2474	6.6	22
23	A quasi single-phase model for debris flows and its comparison with a two-phase model. <i>Journal of Mountain Science</i> , 2018 , 15, 1071-1089	2.1	9
22	Rainfall intensity–duration threshold and erosion competence of debris flows in four areas affected by the 2008 Wenchuan earthquake. <i>Geomorphology</i> , 2017 , 282, 85-95	4.3	30
21	Characteristics and triggering mechanism of Xinmo landslide on 24 June 2017 in Sichuan, China. <i>Journal of Mountain Science</i> , 2017 , 14, 1689-1700	2.1	59

20	The properties of dilute debris flow and hyper-concentrated flow in different flow regimes in open channels. <i>Journal of Mountain Science</i> , 2017 , 14, 1728-1738	2.1	1
19	Investigation of vertical velocity distribution in debris flows by PIV measurement. <i>Geomatics, Natural Hazards and Risk</i> , 2017 , 8, 1631-1642	3.6	4
18	Experimental study of entrainment behavior of debris flow over channel inflexion points. <i>Journal of Mountain Science</i> , 2016 , 13, 971-984	2.1	4
17	A Hydrologically Based Model for Delineating Hazard Zones in the Valleys of Debris Flow Basins 2016 ,		1
16	Age and extent of a giant glacial-dammed lake at Yarlung Tsangpo gorge in the Tibetan Plateau. <i>Geomorphology</i> , 2015 , 246, 370-376	4.3	38
15	Comparison of rheometric devices for measuring the rheological parameters of debris flow slurry. <i>Journal of Mountain Science</i> , 2015 , 12, 1125-1134	2.1	8
14	Modelling roll waves with shallow water equations and turbulent closure. <i>Journal of Hydraulic Research/De Recherches Hydrauliques</i> , 2015 , 53, 161-177	1.9	32
13	Determination of the suspension competence of debris flows based on particle size analysis. <i>International Journal of Sediment Research</i> , 2014 , 29, 73-81	3	5
12	Susceptibility mapping of landslides in Beichuan County using cluster and MLC methods. <i>Natural Hazards</i> , 2014 , 70, 755-766	3	17
11	Comparison of debris-flow volume and activity under different formation conditions. <i>Natural Hazards</i> , 2013 , 67, 261-273	3	22
10	Characteristics of clustering debris flows in Wenchuan earthquake zone. <i>Journal of Mountain Science</i> , 2013 , 10, 953-961	2.1	12
9	Measuring internal velocity of debris flows by temporally correlated shear forces. <i>Journal of Earth Science (Wuhan, China)</i> , 2012 , 23, 373-380	2.2	5
8	Prediction of debris-flow danger area by combining hydrological and inundation simulation methods. <i>Journal of Mountain Science</i> , 2011 , 8, 1-9	2.1	48
7	Measuring the internal velocity of debris flows using impact pressure detecting in the flume experiment. <i>Journal of Mountain Science</i> , 2011 , 8, 109-116	2.1	21
6	Real-time measurement and preliminary analysis of debris-flow impact force at Jiangjia Ravine, China. <i>Earth Surface Processes and Landforms</i> , 2011 , 36, 1268-1278	3.7	98
5	Characteristic rainfall for warning of debris flows. <i>Journal of Mountain Science</i> , 2010 , 7, 207-214	2.1	20
4	Annual risk assessment on high-frequency debris-flow fans. <i>Natural Hazards</i> , 2009 , 49, 469-477	3	7
3	Hack's law of debris-flow basins. <i>International Journal of Sediment Research</i> , 2009 , 24, 74-87	3	2
