#	ARTICLE	IF	CITATIONS
1	Error Disclosure Climate and Safety Climate Trajectories: the Mediating Role of Counterfactual Sharing. <i>Journal of Business and Psychology</i> , 2023, 38, 907-924.	2.5	2
2	Self-Reported Cognitive Function and Mental Health Diagnoses among Former Professional American-Style Football Players. <i>Journal of Neurotrauma</i> , 2020, 37, 1021-1028.	1.7	17
3	The Football Playersâ€™ Health Study at Harvard University: Design and objectives. <i>American Journal of Industrial Medicine</i> , 2019, 62, 643-654.	1.0	15
4	Exposure to American Football and Neuropsychiatric Health in Former National Football League Players: Findings From the Football Players Health Study. <i>American Journal of Sports Medicine</i> , 2019, 47, 2871-2880.	1.9	61
5	Association of Concussion Symptoms With Testosterone Levels and Erectile Dysfunction in Former Professional US-Style Football Players. <i>JAMA Neurology</i> , 2019, 76, 1428.	4.5	28
6	Mortality Among Professional American-Style Football Players and Professional American Baseball Players. <i>JAMA Network Open</i> , 2019, 2, e194223.	2.8	63
7	Defining Exposures in Professional Football: Professional American-Style Football Players as an Occupational Cohort. <i>Orthopaedic Journal of Sports Medicine</i> , 2019, 7, 232596711982921.	0.8	12
8	The impact of weather, road surface, timeâ€‘ofâ€‘day, and light conditions on severity of bicycleâ€‘motor vehicle crash injuries. <i>American Journal of Industrial Medicine</i> , 2018, 61, 556-565.	1.0	20
9	The characteristics of asymmetric pedestrian behavior: A preliminary study using passive smartphone location data. <i>Transactions in GIS</i> , 2018, 22, 616-634.	1.0	21
10	Investigating the association between streetscapes and human walking activities using Google Street View and human trajectory data. <i>Transactions in GIS</i> , 2018, 22, 1029-1044.	1.0	60
11	The role of intersection and street design on severity of bicycle-motor vehicle crashes. <i>Injury Prevention</i> , 2017, 23, 179-185.	1.2	27
12	Effect of weather on pedestrian trip count and duration: City-scale evaluations using mobile phone application data. <i>Preventive Medicine Reports</i> , 2017, 8, 30-37.	0.8	35
13	Age-related differences in fatal intersection crashes in the United States. <i>Accident Analysis and Prevention</i> , 2017, 99, 20-29.	3.0	89
14	Circumstances of fall-related injuries by age and gender among community-dwelling adults in the United States. <i>PLoS ONE</i> , 2017, 12, e0176561.	1.1	102
15	Falls and Fall-Related Injuries among Community-Dwelling Adults in the United States. <i>PLoS ONE</i> , 2016, 11, e0150939.	1.1	205
16	One to Many: Opportunities to Understanding Collective Behaviors in Urban Environments Through Individualâ€™s Passively-Collected Locative Data. <i>Lecture Notes in Computer Science</i> , 2016, , 482-493.	1.0	1
17	Association Between Sedentary Work and BMI in a U.S. National Longitudinal Survey. <i>American Journal of Preventive Medicine</i> , 2015, 49, e117-e123.	1.6	31
18	Editorial: emerging issues in sociotechnical systems thinking and workplace safety. <i>Ergonomics</i> , 2015, 58, 543-547.	1.1	18

#	ARTICLE	IF	CITATIONS
19	Leisure-Time Physical Activity, Falls, and Fall Injuries in Middle-Aged Adults. <i>American Journal of Preventive Medicine</i> , 2015, 49, 888-901.	1.6	38
20	A structural equation modelling approach examining the pathways between safety climate, behaviour performance and workplace slipping. <i>Occupational and Environmental Medicine</i> , 2015, 72, 476-481.	1.3	11
21	Sociotechnical approaches to workplace safety: Research needs and opportunities. <i>Ergonomics</i> , 2015, 58, 650-658.	1.1	35
22	The direct cost burden of 13years of disabling workplace injuries in the U.S. (1998â€“2010): Findings from the Liberty Mutual Workplace Safety Index. <i>Journal of Safety Research</i> , 2015, 55, 53-62.	1.7	20
23	Preventing Slips and Falls through Leisure-Time Physical Activity: Findings from a Study of Limited-Service Restaurants. <i>PLoS ONE</i> , 2014, 9, e110248.	1.1	5
24	Duration of slip-resistant shoe usage and the rate of slipping in limited-service restaurants: results from a prospective and crossover study. <i>Ergonomics</i> , 2014, 57, 1919-1926.	1.1	21
25	Internet and telephonic IVR mixed-mode survey for longitudinal studies: choice, retention, and data equivalency. <i>Annals of Epidemiology</i> , 2014, 24, 72-74.	0.9	7
26	The impact of shift starting time on sleep duration, sleep quality, and alertness prior to injury in the Peopleâ€™s Republic of China. <i>Chronobiology International</i> , 2014, 31, 1201-1208.	0.9	7
27	The effects of rest breaks, work shift start time, and sleep on the onset of severe injury among workers in the Peopleâ€™s Republic of China. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 146-155.	1.7	30
28	Does obesity contribute to non-fatal occupational injury? Evidence from the National Longitudinal Survey of Youth. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 268-275.	1.7	28
29	Perception of slipperiness and prospective risk of slipping at work. <i>Occupational and Environmental Medicine</i> , 2013, 70, 35-40.	1.3	17
30	Factors associated with use of slip-resistant shoes in US limited-service restaurant workers. <i>Injury Prevention</i> , 2012, 18, 176-181.	1.2	7
31	Supervisor vs. employee safety perceptions and association with future injury in US limited-service restaurant workers. <i>Accident Analysis and Prevention</i> , 2012, 47, 45-51.	3.0	27
32	Management commitment to safety vs. employee perceived safety training and association with future injury. <i>Accident Analysis and Prevention</i> , 2012, 47, 94-101.	3.0	36
33	A case-crossover study of work-related acute traumatic hand injuries in the Peopleâ€™s Republic of China. <i>Scandinavian Journal of Work, Environment and Health</i> , 2012, 38, 163-170.	1.7	16
34	The effect of rest breaks on time to injury â€“ a study on work-related ladder-fall injuries in the United States. <i>Scandinavian Journal of Work, Environment and Health</i> , 2012, 38, 560-567.	1.7	29
35	A comparison of workplace safety perceptions among financial decision-makers of medium- vs. large-size companies. <i>Accident Analysis and Prevention</i> , 2011, 43, 1-10.	3.0	21
36	The link between fatigue and safety. <i>Accident Analysis and Prevention</i> , 2011, 43, 498-515.	3.0	535

#	ARTICLE	IF	CITATIONS
37	Future directions in fatigue and safety research. <i>Accident Analysis and Prevention</i> , 2011, 43, 495-497.	3.0	69
38	Research needs and opportunities for reducing the adverse safety consequences of fatigue. <i>Accident Analysis and Prevention</i> , 2011, 43, 591-594.	3.0	34
39	A prospective study of floor surface, shoes, floor cleaning and slipping in US limited-service restaurant workers. <i>Occupational and Environmental Medicine</i> , 2011, 68, 279-285.	1.3	66
40	Rushing, distraction, walking on contaminated floors and risk of slipping in limited-service restaurants: a case-crossover study. <i>Occupational and Environmental Medicine</i> , 2011, 68, 575-581.	1.3	16
41	Work-related falls from ladders – a follow-back study of US emergency department cases. <i>Scandinavian Journal of Work, Environment and Health</i> , 2011, 37, 525-532.	1.7	26
42	Corporate financial decision makers' perceptions of their company's safety performance, programs and personnel: Do company size and industry injury risk matter?. <i>Work</i> , 2010, 37, 3-13.	0.6	3
43	Patterns of work-related traumatic hand injury among hospitalised workers in the People's Republic of China. <i>Injury Prevention</i> , 2010, 16, 42-49.	1.2	29
44	Factors associated with worker slipping in limited-service restaurants. <i>Injury Prevention</i> , 2010, 16, 36-41.	1.2	15
45	Workers'™ Experience of Slipping in U.S. Limited-Service Restaurants. <i>Journal of Occupational and Environmental Hygiene</i> , 2010, 7, 491-500.	0.4	26
46	Work-Related Fatalities in the People's Republic of China. <i>Journal of Occupational and Environmental Hygiene</i> , 2009, 6, 446-453.	0.4	19
47	Etiology of Work-Related Electrical Injuries: A Narrative Analysis of Workers' Compensation Claims. <i>Journal of Occupational and Environmental Hygiene</i> , 2009, 6, 612-623.	0.4	28
48	Assessing slipperiness in fast-food restaurants in the USA using friction variation, friction level and perception rating. <i>Applied Ergonomics</i> , 2008, 39, 359-367.	1.7	24
49	A matched case-control study of circumstances of occupational same-level falls and risk of wrist, ankle and hip fracture in women over 45 years of age. <i>Ergonomics</i> , 2008, 51, 1960-1972.	1.1	31
50	Evaluation of a comprehensive slip, trip and fall prevention programme for hospital employees. <i>Ergonomics</i> , 2008, 51, 1906-1925.	1.1	113
51	Friction variation in common working areas of fast-food restaurants in the USA. <i>Ergonomics</i> , 2008, 51, 1998-2012.	1.1	21
52	The challenge of cross-cultural collaborative research: lessons learnt from a pilot case-crossover study of severe occupational hand trauma in the People's Republic of China. <i>Injury Prevention</i> , 2007, 13, 133-136.	1.2	9
53	Occupational physical demands and same-level falls resulting in fracture in female workers: an analysis of workers' compensation claims. <i>Injury Prevention</i> , 2007, 13, 32-36.	1.2	12
54	Corporate financial decision-makers'™ perceptions of workplace safety. <i>Accident Analysis and Prevention</i> , 2007, 39, 767-775.	3.0	37

#	ARTICLE	IF	CITATIONS
55	Survey of Acute Low Back Pain Management by Specialty Group and Practice Experience. Journal of Occupational and Environmental Medicine, 2006, 48, 723-732.	0.9	24
56	Work-related ladder fall fractures: Identification and diagnosis validation using narrative text. Accident Analysis and Prevention, 2006, 38, 973-980.	3.0	54
57	Objective and subjective measurements of slipperiness in fast-food restaurants in the USA and their comparison with the previous results obtained in Taiwan. Safety Science, 2006, 44, 891-903.	2.6	29
58	Blurring the distinctions between on and off the job injuries: similarities and differences in circumstances. Injury Prevention, 2006, 12, 236-241.	1.2	23
59	Factors Influencing Restaurant Worker Perception of Floor Slipperiness. Journal of Occupational and Environmental Hygiene, 2006, 3, 592-598.	0.4	24
60	Friction Variation in Assessing Slipperiness in Fast-Food Restaurants in the USA. Proceedings of the Human Factors and Ergonomics Society, 2006, 50, 2232-2236.	0.2	0
61	Brief report: Physicians' initial management of acute low back pain versus evidence-based guidelines. Journal of General Internal Medicine, 2005, 20, 1132-1135.	1.3	79
62	Injuries at Work in the US Adult Population: Contributions to the Total Injury Burden. American Journal of Public Health, 2005, 95, 1213-1219.	1.5	117
63	Welding related occupational eye injuries: a narrative analysis. Injury Prevention, 2005, 11, 174-179.	1.2	68
64	A systems analysis approach to solving office work system health and performance problems. Theoretical Issues in Ergonomics Science, 2004, 5, 181-197.	1.0	11
65	Using narrative text and coded data to develop hazard scenarios for occupational injury interventions. Injury Prevention, 2004, 10, 249-254.	1.2	63
66	Prevalence of low back pain in three occupational groups in Shanghai, People's Republic of China. Journal of Safety Research, 2004, 35, 23-28.	1.7	101
67	Assessing floor slipperiness in fast-food restaurants in Taiwan using objective and subjective measures. Applied Ergonomics, 2004, 35, 401-408.	1.7	59
68	Ergonomic Antecedents and Disabling Construction Injuries. Proceedings of the Human Factors and Ergonomics Society, 2002, 46, 1012-1016.	0.2	0
69	Disabling Occupational Injury in the US Construction Industry, 1996. Journal of Occupational and Environmental Medicine, 2002, 44, 1161-1168.	0.9	53
70	Measuring slipperiness—discussions on the state of the art and future research. , 2002, , 165-171.		1
71	Occupational slip, trip, and fall-related injuries—can the contribution of slipperiness be isolated?. , 2002, , 17-36.		0
72	The role of friction in the measurement of slipperiness, Part 2. , 2002, , 135-163.		0

#	ARTICLE	IF	CITATIONS
73	The role of friction in the measurement of slipperiness, Part 2: Survey of friction measurement devices. <i>Ergonomics</i> , 2001, 44, 1233-1261.	1.1	136
74	Antecedent Factors and Disabling Occupational Morbidity—Insights from the New BLS Data. <i>AIHAJ: A Journal for the Science of Occupational and Environmental Health and Safety</i> , 2001, 62, 622-632.	0.4	29
75	Epidemiology of occupational acute traumatic hand injuries: a literature review. <i>Safety Science</i> , 2001, 38, 241-256.	2.6	75
76	Occupational slip, trip, and fall-related injuries can the contribution of slipperiness be isolated?. <i>Ergonomics</i> , 2001, 44, 1118-1137.	1.1	271
77	Measurement of slipperiness: fundamental concepts and definitions. <i>Ergonomics</i> , 2001, 44, 1102-1117.	1.1	84
78	Antecedent Factors and Disabling Occupational Morbidity—Insights from the New BLS Data. <i>AIHA Journal</i> , 2001, 62, 622-632.	0.4	27
79	Fatal Occupational Events in a Development Area in East China: 1991 to 1997. <i>Journal of Occupational Health</i> , 2000, 42, 276-280.	1.0	2
80	Fatal Occupational Injuries in the Construction Industry of a New Development Area in East China, 1991 to 1997. <i>AIHAJ: A Journal for the Science of Occupational and Environmental Health and Safety</i> , 2000, 61, 733-737.	0.4	6
81	Fatal Occupational Injuries in a New Development Area in the People's Republic of China. <i>Journal of Occupational and Environmental Medicine</i> , 2000, 42, 917-922.	0.9	28
82	Clinical Management and the Duration of Disability for Work-Related Low Back Pain. <i>Journal of Occupational and Environmental Medicine</i> , 2000, 42, 1178-1187.	0.9	77
83	Low back pain disability: Relative costs by antecedent and industry group. , 2000, 37, 558-571.		59
84	Risk Factors for Work-related Low Back Pain in the People's Republic of China. <i>International Journal of Occupational and Environmental Health</i> , 2000, 6, 26-33.	1.2	46
85	Fatal Occupational Injuries in the Construction Industry of a New Development Area in East China, 1991 to 1997. <i>AIHA Journal</i> , 2000, 61, 733-737.	0.4	4
86	Disabling Occupational Morbidity in the United States. <i>Journal of Occupational and Environmental Medicine</i> , 1999, 41, 60-69.	0.9	64
87	A Descriptive Study of U.S. OSHA Penalties and Inspection Frequency for Musculoskeletal Disorders in the Workplace. <i>AIHA Journal</i> , 1998, 59, 563-571.	0.4	4
88	Length of Disability and Cost of Work-Related Musculoskeletal Disorders of the Upper Extremity. <i>Journal of Occupational and Environmental Medicine</i> , 1998, 40, 261-269.	0.9	109
89	Advancing analytic epidemiologic studies of occupational injuries. <i>Safety Science</i> , 1997, 25, 29-43.	2.6	8
90	Methodological challenges to the study of occupational injury?An international epidemiology workshop. , 1997, 32, 103-105.		17

#	ARTICLE	IF	CITATIONS
91	Conceptual and definitional issues in occupational injury epidemiology. , 1997, 32, 106-115.		50
92	Advancing epidemiologic studies of occupational injury?Approaches and future directions. , 1997, 32, 180-183.		15
93	Low back pain (LBP) and lifting technique " A review. International Journal of Industrial Ergonomics, 1997, 19, 59-74.	1.5	69
94	Epidemiologic concerns for ergonomists: illustrations from the musculoskeletal disorder literature. Ergonomics, 1996, 39, 562-578.	1.1	24
95	Injury and illness in the American workplace: A comparison of data sources. , 1996, 30, 130-141.		101
96	Ergonomic challenges in conventional and advanced apparel manufacturing. International Journal of Human Factors in Manufacturing, 1992, 2, 39-54.	0.4	11
97	Occupational slip, trip, and fall-related injuries"can the contribution of slipperiness be isolated?. , 0, , 17-36.		1
98	The role of friction in the measurement of slipperiness, Part 2. , 0, , 135-164.		2
99	Measuring slipperiness"discussions on the state of the art and future research. , 0, , 165-172.		3
100	Measurement of slipperiness. , 0, , 1-16.		0
