Evgeniia Striukova

List of Publications by Year
in descending order

25 papers	37 citations	1937685 4 h-index	1872680 6 g-index
25 all docs	25 docs citations	25 times ranked	15 citing authors

#	Article	IF	Citations
1	Prevalence of diseases and pathological conditions in young people under 45 years of age with abdominal obesity in Siberia. Bulletin of Siberian Medicine, 2022, 20, 39-48.	0.3	4
2	Association of lipid profile parameters, atherogenic index of plasma, anthropometric parameters with the severity of the COVID-19 course in Novosibirsk women. , 2022, 17, 20-27.	0.1	0
3	Blood Levels of Indicators of Lower Respiratory Tract Damage in Chronic Bronchitis in Patients with Abdominal Obesity. Diagnostics, 2022, 12, 299.	2.6	1
4	Basic Research in Atherosclerosis: Technologies of Personalized Medicine. Journal of Personalized Medicine, 2022, 12, 367.	2.5	0
5	The results of next-generation sequencing in men with borderline QT interval prolongation (pilot) Tj ETQq1 1 0.784314 rgBT /Overlock	0.5	0
6	Oxidative and antioxidant changes in blood of young people with premature coronary artery disease and abdominal obesity. Russian Journal of Cardiology, 2022, 27, 5055.	1.4	0
7	Polymorphisms in the CETP, APOC3 and APOE genes in men with unstable atherosclerotic plaques in the coronary arteries. Meta Gene, 2021, 27, 100847.	0.6	0
8	Biochemical, molecular genetic and clinical aspects of COVID-2019. Bulletin of Siberian Medicine, 2021, 20, 147-157.	0.3	2
9	Analysis of f5 gene polymorphism in men with coronary atherosclerosis using whole exome sequencing. , 2021, 17, 29-37.	0.1	0
10	Association of Matrix Metalloproteinases with Coronary Artery Calcification in Patients with CHD. Journal of Personalized Medicine, 2021, 11, 506.	2.5	6
11	Associations of Antioxidant Enzymes with the Concentration of Fatty Acids in the Blood of Men with Coronary Artery Atherosclerosis. Journal of Personalized Medicine, 2021, 11, 1281.	2.5	5
12	Non-alcoholic fatty liver disease and metabolic liver dysfunction in the new coronavirus infection COVID-19. The Siberian Scientific Medical Journal, 2021, 41, 68-75.	0.3	1
13	Proteomic Studies of Blood and Vascular Wall in Atherosclerosis. International Journal of Molecular Sciences, 2021, 22, 13267.	4.1	9
14	Comparison in the proteoms of atherosclerotic plaques at different stages of development in coronary atherosclerosis. Atherosclerosis, 2020, 315, e113.	0.8	0
15	Biomarkers of calcification associated with the presence of unstable atherosclerotic plaques in patients with coronary atherosclerosis. Atherosclerosis, 2020, 315, e127.	0.8	0
16	The elemental composition of the atherosclerotic lesion. Atherosclerosis, 2020, 315, e127-e128.	0.8	0
17	Effect of atorvastatin on the concentration of fractions and subfractions of TG- lipoproteins serum of mice in experimental lipemia. Atherosclerosis, 2020, 315, e94.	0.8	0
18	Gene polymorphisms of hemostasis indices in men with coronary atherosclerosis. Atherosclerosis, 2020, 315, e113.	0.8	0

#	Article	IF	Citations
19	Polymorphisms in F2, F7, and PAI1 genes in men with coronary atherosclerosis. Russian Journal of Cardiology, 2020, 25, 3721.	1.4	0
20	Association of some hemostasis and endothelial dysfunction factors with probability of presence of vulnerable atherosclerotic plaques in patients with coronary atherosclerosis. BMC Research Notes, 2019, 12, 336.	1.4	5
21	Association of endothelial dysfunction factors with the presence of unstable atherosclerotic plaques in the coronary arteries. Russian Journal of Cardiology, 2019, , 26-29.	1.4	4
22	The study of the complex oxidative and inflammatory biomarkers in patients with coronary atherosclerosis. Atherosclerosis, 2018, 275, e253.	0.8	0
23	Significant hemostasis and endothelial dysfunction blood biomarkers of unstable atherosclerotic plaques in coronary arteries. Atherosclerosis, 2018, 275, e146.	0.8	0
24	Study of biomarkers to predict unfavorable course of coronary atherosclerosis. Atherosclerosis, 2018, 275, e251.	0.8	0
25	ASSOCIATION OF COAGULATION FACTORS WITH THE PRESENCE OF UNSTABLE ATHEROSCLEROTIC PLAQUES IN THE CORONARY ARTERIES. Russian Journal of Cardiology, 2018, , 21-24.	1.4	0
