Version: 2024-04-17

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
48	Persistent 7-tesla phase rim predicts poor outcome in new multiple sclerosis patient lesions. <i>Journal of Clinical Investigation</i> , 2016 , 126, 2597-609	15.9	116
47	Brain network connectivity assessed using graph theory in frontotemporal dementia. <i>Neurology</i> , 2013 , 81, 134-43	6.5	99
46	Impaired functional integration in multiple sclerosis: a graph theory study. <i>Brain Structure and Function</i> , 2016 , 221, 115-31	4	90
45	Prediction of a multiple sclerosis diagnosis in patients with clinically isolated syndrome using the 2016 MAGNIMS and 2010 McDonald criteria: a retrospective study. <i>Lancet Neurology</i> , 2018 , 17, 133-142	24.1	66
44	Brain plasticity in Parkinson disease with freezing of gait induced by action observation training. <i>Journal of Neurology</i> , 2017 , 264, 88-101	5.5	60
43	Leptomeningeal gadolinium enhancement across the spectrum of chronic neuroinflammatory diseases. <i>Neurology</i> , 2017 , 88, 1439-1444	6.5	59
42	Disrupted brain connectome in semantic variant of primary progressive aphasia. <i>Neurobiology of Aging</i> , 2014 , 35, 2646-2655	5.6	59
41	Brain network connectivity differs in early-onset neurodegenerative dementia. <i>Neurology</i> , 2017 , 89, 1766-1772	5.3	53
40	Brain and cord imaging features in neuromyelitis optica spectrum disorders. <i>Annals of Neurology</i> , 2019 , 85, 371-384	9.4	42
39	Abnormal adaptation over time of motor network recruitment in multiple sclerosis patients with fatigue. <i>Multiple Sclerosis Journal</i> , 2016 , 22, 1144-53	5	37
38	Functional MR imaging correlates of neuropsychological impairment in primary-progressive multiple sclerosis. <i>American Journal of Neuroradiology</i> , 2010 , 31, 1240-6	4.4	30
37	Differential cerebellar functional interactions during an interference task across multiple sclerosis phenotypes. <i>Radiology</i> , 2012 , 265, 864-73	20.5	30
36	Cognitive reserve, cognition, and regional brain damage in MS: A 2-year longitudinal study. <i>Multiple Sclerosis Journal</i> , 2019 , 25, 372-381	5	26
35	Clinically relevant cranio-caudal patterns of cervical cord atrophy evolution in MS. <i>Neurology</i> , 2019 , 93, e1852-e1866	6.5	22
34	Brain reserve against physical disability progression over 5 years in multiple sclerosis. <i>Neurology</i> , 2016 , 86, 2006-9	6.5	21
33	Functional and structural plasticity following action observation training in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2019 , 25, 1472-1487	5	17
32	Axonal degeneration as substrate of fractional anisotropy abnormalities in multiple sclerosis cortex. <i>Brain</i> , 2019 , 142, 1921-1937	11.2	16

31	Dynamic gray matter volume changes in pediatric multiple sclerosis: A 3.5 year MRI study. <i>Neurology</i> , 2019 , 92, e1709-e1723	6.5	15
30	Tracking brain damage in progressive supranuclear palsy: a longitudinal MRI study. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2018 , 89, 696-701	5.5	14
29	Diagnosis of multiple sclerosis: a multicentre study to compare revised McDonald-2010 and Filippi-2010 criteria. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2018 , 89, 316-318	5.5	14
28	Reading, writing, and reserve: Literacy activities are linked to hippocampal volume and memory in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2016 , 22, 1621-1625	5	14
27	Working memory network dysfunction in relapse-onset multiple sclerosis phenotypes: A clinical-imaging evaluation. <i>Multiple Sclerosis Journal</i> , 2017 , 23, 577-587	5	13
26	Mesial temporal lobe and subcortical grey matter volumes differentially predict memory across stages of multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2018 , 24, 675-678	5	13
25	Clinical Relevance of Multiparametric MRI Assessment of Cervical Cord Damage in Multiple Sclerosis. <i>Radiology</i> , 2020 , 296, 605-615	20.5	12
24	Progression of white matter damage in progressive supranuclear palsy with predominant parkinsonism. <i>Parkinsonism and Related Disorders</i> , 2018 , 49, 95-99	3.6	10
23	Imaging correlates of hand motor performance in multiple sclerosis: A multiparametric structural and functional MRI study. <i>Multiple Sclerosis Journal</i> , 2020 , 26, 233-244	5	9
22	Deep Learning on Conventional Magnetic Resonance Imaging Improves the Diagnosis of Multiple Sclerosis Mimics. <i>Investigative Radiology</i> , 2021 , 56, 252-260	10.1	8
21	Resting state network functional connectivity abnormalities in systemic lupus erythematosus: correlations with neuropsychiatric impairment. <i>Molecular Psychiatry</i> , 2021 , 26, 3634-3645	15.1	8
20	Action observation training promotes motor improvement and modulates functional network dynamic connectivity in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2021 , 27, 139-146	5	8
19	Cognitive impairment in benign multiple sclerosis: a multiparametric structural and functional MRI study. <i>Journal of Neurology</i> , 2020 , 267, 3508-3517	5.5	6
18	The "vegetarian brain": chatting with monkeys and pigs?. <i>Brain Structure and Function</i> , 2013 , 218, 1211-214		6
17	Slowly Expanding Lesions Predict 9-Year Multiple Sclerosis Disease Progression.. <i>Neurology: Neuroimmunology and NeuroInflammation</i> , 2022 , 9,	9.1	6
16	Neurite density explains cortical T1-weighted/T2-weighted ratio in multiple sclerosis. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2021 , 92, 790-792	5.5	6
15	Fatigue in multiple sclerosis patients with different clinical phenotypes: a clinical and magnetic resonance imaging study. <i>European Journal of Neurology</i> , 2020 , 27, 2549-2560	6	5
14	Network Damage Predicts Clinical Worsening in Multiple Sclerosis: A 6.4-Year Study. <i>Neurology: Neuroimmunology and NeuroInflammation</i> , 2021 , 8,	9.1	5

13	Association of Gray Matter Atrophy Patterns With Clinical Phenotype and Progression in Multiple Sclerosis. <i>Neurology</i> , 2021 , 96, e1561-e1573	6.5	5
12	Clinical predictivity of thalamic sub-regional connectivity in clinically isolated syndrome: a 7-year study. <i>Molecular Psychiatry</i> , 2021 , 26, 2163-2174	15.1	4
11	Performance of the 2017 and 2010 Revised McDonald Criteria in Predicting MS Diagnosis After a Clinically Isolated Syndrome: A MAGNIMS Study. <i>Neurology</i> , 2021 ,	6.5	4
10	MRI correlates of clinical disability and hand-motor performance in multiple sclerosis phenotypes. <i>Multiple Sclerosis Journal</i> , 2021 , 27, 1205-1221	5	3
9	Mapping face encoding using functional MRI in multiple sclerosis across disease phenotypes. <i>Brain Imaging and Behavior</i> , 2017 , 11, 1238-1247	4.1	2
8	Dysregulation of multisensory processing stands out from an early stage of migraine: a study in pediatric patients. <i>Journal of Neurology</i> , 2020 , 267, 760-769	5.5	2
7	Neural correlates of visuospatial processing in migraine: does the pain network help?. <i>Molecular Psychiatry</i> , 2021 ,	15.1	2
6	Association of Age at Onset With Gray Matter Volume and White Matter Microstructural Abnormalities in People With Multiple Sclerosis. <i>Neurology</i> , 2021 , 97, e2007-e2019	6.5	1
5	Unraveling the substrates of cognitive impairment in multiple sclerosis: A multiparametric structural and functional magnetic resonance imaging study. <i>European Journal of Neurology</i> , 2021 , 28, 3749-3759	6	1
4	MRI of Transcallosal White Matter Helps to Predict Motor Impairment in Multiple Sclerosis. <i>Radiology</i> , 2021 , 210922	20.5	0
3	Differential association of cortical, subcortical and spinal cord damage with multiple sclerosis disability milestones: A multiparametric MRI study. <i>Multiple Sclerosis Journal</i> , 2021 , 13524585211020296	5	0
2	The association between cognition and motor performance is beyond structural damage in relapsing-remitting multiple sclerosis.. <i>Journal of Neurology</i> , 2022 , 1	5.5	0
1	The role of cerebellar damage in explaining disability and cognition in multiple sclerosis phenotypes: a multiparametric MRI study.. <i>Journal of Neurology</i> , 2022 , 1	5.5	0
