

Brittany Haws

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1527805/brittany-haws-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
59	Radiation exposure and reduction in the operating room: Perspectives and future directions in spine surgery. <i>World Journal of Orthopedics</i> , 2017 , 8, 524-530	2.2	38
58	Impact of body mass index on surgical outcomes, narcotics consumption, and hospital costs following anterior cervical discectomy and fusion. <i>Journal of Neurosurgery: Spine</i> , 2018 , 28, 160-166	2.8	29
57	The Patient-Reported Outcomes Measurement Information System in spine surgery: a systematic review. <i>Journal of Neurosurgery: Spine</i> , 2019 , 30, 405-413	2.8	25
56	Predictive Factors of Postoperative Dysphagia in Single-Level Anterior Cervical Discectomy and Fusion. <i>Spine</i> , 2019 , 44, E400-E407	3.3	23
55	Comparison of Stand-alone Lateral Lumbar Interbody Fusion Versus Open Laminectomy and Posterolateral Instrumented Fusion in the Treatment of Adjacent Segment Disease Following Previous Lumbar Fusion Surgery. <i>Spine</i> , 2019 , 44, E1461-E1469	3.3	22
54	Validity of PROMIS in minimally invasive transforaminal lumbar interbody fusion: a preliminary evaluation. <i>Journal of Neurosurgery: Spine</i> , 2018 , 29, 28-33	2.8	19
53	Patient Perceptions of Minimally Invasive Versus Open Spine Surgery. <i>Clinical Spine Surgery</i> , 2018 , 31, E184-E192	1.8	18
52	PROMIS Physical Function for prediction of postoperative pain, narcotics consumption, and patient-reported outcomes following minimally invasive transforaminal lumbar interbody fusion. <i>Journal of Neurosurgery: Spine</i> , 2019 , 1-7	2.8	15
51	Comparison of Postoperative Outcomes Between Primary MIS TLIF and MIS TLIF With Revision Decompression. <i>Spine</i> , 2019 , 44, 150-156	3.3	15
50	Authorship Trends in Spine Publications From 2000 to 2015. <i>Spine</i> , 2018 , 43, 1225-1230	3.3	14
49	PROMIS Physical Function Score Strongly Correlates With Legacy Outcome Measures in Minimally Invasive Lumbar Microdiscectomy. <i>Spine</i> , 2019 , 44, 442-446	3.3	14
48	Impact of local steroid application on dysphagia following an anterior cervical discectomy and fusion: results of a prospective, randomized single-blind trial. <i>Journal of Neurosurgery: Spine</i> , 2018 , 29, 10-17	2.8	13
47	Sex Differences for Anterior Cervical Fusion: Complications and Length of Stay. <i>Spine</i> , 2018 , 43, 1025-1030	3.3	13
46	PHQ-9 Score Predicts Postoperative Outcomes Following Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Clinical Spine Surgery</i> , 2019 , 32, 444-448	1.8	12
45	Evaluating the Concurrent Validity of PROMIS Physical Function in Anterior Cervical Discectomy and Fusion. <i>Clinical Spine Surgery</i> , 2019 , 32, 449-453	1.8	10
44	Static Versus Expandable Devices Provide Similar Clinical Outcomes Following Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>HSS Journal</i> , 2020 , 16, 46-53	2	10
43	Misclassification of Pelvic Ring Injuries in the National Trauma Data Bank. <i>Journal of Orthopaedic Trauma</i> , 2015 , 29, 460-2	3.1	9

42	Postoperative Fever Evaluation Following Lumbar Fusion Procedures. <i>Neurospine</i> , 2018 , 15, 154-162	3.1	9
41	Variation in Spine Surgeon Selection Criteria Between Neurosurgery and Orthopedic Surgery Patients. <i>Clinical Spine Surgery</i> , 2018 , 31, E127-E132	1.8	8
40	Does Gender Influence Postoperative Outcomes in Minimally Invasive Transforaminal Lumbar Interbody Fusion?. <i>Clinical Spine Surgery</i> , 2019 , 32, E107-E111	1.8	7
39	Iliac Crest Bone Graft for Minimally Invasive Transforaminal Lumbar Interbody Fusion: A Prospective Analysis of Inpatient Pain, Narcotics Consumption, and Costs. <i>Spine</i> , 2018 , 43, 1307-1312	3.3	7
38	Risk Factors for Medical and Surgical Complications After Single-Level Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>International Journal of Spine Surgery</i> , 2020 , 14, 125-132	1.4	7
37	Is There a Seasonal Influence on Orthopaedic Surgical Wound Infection Rates?. <i>Journal of Surgical Orthopaedic Advances</i> , 2016 , 25, 172-175	0.3	7
36	The Impact of Comorbidity Burden on Complications, Length of Stay, and Direct Hospital Costs After Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Spine</i> , 2019 , 44, 363-368	3.3	6
35	Does Day of Surgery Affect Hospital Length of Stay and Charges Following Minimally Invasive Transforaminal Lumbar Interbody Fusion?. <i>Clinical Spine Surgery</i> , 2018 , 31, E291-E295	1.8	6
34	Swallowing Function Following Anterior Cervical Discectomy and Fusion With and Without Anterior Plating: A SWAL-QOL (Swallowing-Quality of Life) and Radiographic Assessment. <i>Neurospine</i> , 2019 , 16, 601-607	3.1	6
33	All Disclosure is Good Disclosure: Patient Awareness of the Sunshine Act and Perceptions of Surgeon-Industry Relationships. <i>Clinical Spine Surgery</i> , 2020 , 33, E96-E100	1.8	6
32	The Influence of Conflicts of Interest on Outcomes in the Lumbar Disc Arthroplasty Literature: A Systematic Review. <i>Spine</i> , 2019 , 44, 1162-1169	3.3	6
31	Sagittal Imbalance Does Not Influence Cup Anteversion in Total Hip Arthroplasty Dislocations. <i>Clinical Spine Surgery</i> , 2019 , 32, E31-E36	1.8	5
30	Assessing Online Patient Education Readability for Spine Surgery Procedures. <i>Clinical Spine Surgery</i> , 2018 , 31, E146-E151	1.8	5
29	Comparative analysis of anterior cervical discectomy and fusion in the inpatient versus outpatient surgical setting. <i>Journal of Neurosurgery: Spine</i> , 2019 , 1-6	2.8	5
28	The Effect of Preoperative Medications on Length of Stay, Inpatient Pain, and Narcotics Consumption After Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Clinical Spine Surgery</i> , 2019 , 32, E37-E42	1.8	4
27	Predictors of Citation Rate in the Spine Literature. <i>Clinical Spine Surgery</i> , 2020 , 33, 76-81	1.8	4
26	Impact of Iliac Crest Bone Grafting on Postoperative Outcomes and Complication Rates Following Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Neurospine</i> , 2019 , 16, 772-779	3.1	4
25	Comparison of Multilevel Anterior Cervical Discectomy and Fusion Performed in an Inpatient Versus Outpatient Setting. <i>Global Spine Journal</i> , 2019 , 9, 834-842	2.7	4

24	Impact of local steroid application in a minimally invasive transforaminal lumbar interbody fusion: results of a prospective, randomized, single-blind trial. <i>Journal of Neurosurgery: Spine</i> , 2018 , 30, 222-227 ^{2.8}	3
23	Is the likelihood of dysphagia different in patients undergoing one-level versus two-level anterior cervical discectomy and fusion?. <i>Spine Journal</i> , 2020 , 20, 737-744	4 3
22	Postoperative Outcomes Based on American Society of Anesthesiologists Score After Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Clinical Spine Surgery</i> , 2020 , 33, E40-E42	1.8 2
21	Narcotic Consumption Following Minimally Invasive Lumbar Decompression: A Comparison Between Hospital and Ambulatory-Based Surgery Centers. <i>International Journal of Spine Surgery</i> , 2019 , 13, 162-168	1.4 2
20	Risk Factors Associated With Failure to Reach Minimal Clinically Important Difference in Patient-Reported Outcomes Following Anterior Cervical Discectomy and Fusion. <i>International Journal of Spine Surgery</i> , 2019 , 13, 262-269	1.4 2
19	Does the Day of the Week Affect Length of Stay and Hospital Charges Following Anterior Cervical Discectomy and Fusion?. <i>International Journal of Spine Surgery</i> , 2019 , 13, 296-301	1.4 2
18	Risk Factors for Medical and Surgical Complications after 1-2-Level Anterior Cervical Discectomy and Fusion Procedures. <i>International Journal of Spine Surgery</i> , 2020 , 14, 286-293	1.4 2
17	Diabetes Does Not Increase Complications, Length of Stay, or Hospital Costs After Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Clinical Spine Surgery</i> , 2020 , 33, E307-E311	1.8 2
16	Risk Factors for a Long Hospital Stay Following Minimally Invasive Lumbar Discectomy. <i>Clinical Spine Surgery</i> , 2019 , 32, E56-E59	1.8 2
15	Impact of the Number of Levels on Adverse Events and Length of Stay Following Posterior Lumbar Fusion Procedures. <i>Clinical Spine Surgery</i> , 2019 , 32, 120-124	1.8 1
14	Dysphagia Following Anterior Cervical Spine Surgery: Assessment Using an Abridged SWAL-QOL. <i>International Journal of Spine Surgery</i> , 2019 , 13, 102-109	1.4 1
13	American Society of Anesthesiologists Score is Not Predictive of Complication Incidence After Minimally Invasive Posterior Lumbar Spine Procedures. <i>International Journal of Spine Surgery</i> , 2020 , 14, 32-37	1.4 1
12	Patient Perceptions of Iliac Crest Bone Grafting in Minimally Invasive Transforaminal Lumbar Interbody Fusion. <i>Clinical Spine Surgery</i> , 2019 , 32, 430-434	1.8 1
11	Implementation and Evaluation of a Formal Virtual Medical Student Away Rotation in Orthopaedic Surgery During the COVID-19 Pandemic: A Single Institution Pilot Experience. <i>JBJS Open Access</i> , 2021 , 6,	3.1 1
10	Congenital Absence of the Patellar Tendon: A Report of 2 Cases. <i>JBJS Case Connector</i> , 2021 , 11,	0.4 1
9	Patient Perceptions of Physician Ownership in Spine Care. <i>Clinical Spine Surgery</i> , 2020 , 33, E369-E375	1.8 0
8	The Effect of Preoperative Symptom Duration on Postoperative Outcomes After a Tubular Lumbar Microdiscectomy. <i>Clinical Spine Surgery</i> , 2019 , 32, E27-E30	1.8 0
7	Biomaterials for Orthopaedic Diagnostics and Theranostics. <i>Current Opinion in Biomedical Engineering</i> , 2021 , 19, 100308-100308	4.4 0

6	P115. Evaluation of PROMIS physical function in anterior cervical discectomy and fusion. <i>Spine Journal</i> , 2019 , 19, S211	4
5	Isokinetic Strength Testing Following Intramedullary Nailing of Tibial Shaft Fractures Predicts Time to Recovery and Return of Muscle Strength in the Injured Extremity: A Prospective Case Series. <i>HSS Journal</i> , 2018 , 14, 266-270	2
4	Complication management in outpatient spine surgery. <i>Seminars in Spine Surgery</i> , 2018 , 30, 169-172	0.2
3	Criteria for level 1 and level 2 trauma codes: Are pelvic ring injuries undertriaged?. <i>World Journal of Orthopedics</i> , 2016 , 7, 481-6	2.2
2	The efficacy of electrical spinal fusion stimulators on fusion rates: a meta-analysis. <i>Current Orthopaedic Practice</i> , 2018 , 29, 316-321	0.4
1	Transition from hospital-based surgery. <i>Seminars in Spine Surgery</i> , 2018 , 30, 148-153	0.2
