citing authors

#	ARTICLE	IF	CITATIONS
1	Application of Coastal Landforms to Active Tectonic Studies. , 2022, , 443-476.		3
2	Evolution of co-seismic off-fault damage towards pulverisation. Earth and Planetary Science Letters, 2022, 579, 117353.	1.8	8
3	Shallow distributed faulting in the Imperial Valley, California, USA. Geology, 2022, 50, 626-630.	2.0	1
4	The late Holocene history of Lake Cahuilla: Two thousand years of repeated fillings within the Salton Trough, Imperial Valley, California. Quaternary Science Reviews, 2022, 282, 107456.	1.4	8
5	Joint earthquake ruptures of the San Andreas and San Jacinto faults, California, USA. Geology, 2022, 50, 387-391.	2.0	6
6	Acceleration of Late Pleistocene activity of a Central European fault driven by ice loading. Earth and Planetary Science Letters, 2022, 591, 117596.	1.8	8
7	Tectonic Geomorphology of Mountain Fronts. , 2021, , 376-376.		0
8	Evidence of hydrothermal fluid circulation driving elemental mass redistribution in an active fault zone. Journal of Structural Geology, 2021, 144, 104269.	1.0	5
9	Recency of Faulting and Subsurface Architecture of the San Diego Bay Pull-Apart Basin, California, USA. Frontiers in Earth Science, 2021, 9, .	0.8	2
10	Large Holocene ruptures on the Cañada David detachment, Baja California, Mexico; implications for the seismogenesis of low-angle normal faults. Earth and Planetary Science Letters, 2021, 570, 117070.	1.8	6
11	Faulting and Folding of the Transgressive Surface Offshore Ventura Records Deformational Events in the Holocene. Frontiers in Earth Science, 2021, 9, .	0.8	0
12	Late Quaternary transpressional earthquakes on a long-lived intraplate fault: A case study of the Southern Yangsan Fault, SE Korea. Quaternary International, 2020, 553, 132-143.	0.7	25
13	Time-invariant Late Quaternary Slip Rates Along the Agua Blanca Fault, Northern Baja California, Mexico. Tectonics, 2020, 39, e2019TC005788.	1.3	6
14	Correcting MIS5e and 5a sea-level estimates for tectonic uplift, an example from southern California. Quaternary Science Reviews, 2020, 248, 106571.	1.4	11
15	Three-Dimensional Structure, Ground Rupture Hazards, and Static Stress Models for Complex Nonplanar Thrust Faults in the Ventura Basin, Southern California. Journal of Geophysical Research: Solid Earth, 2020, 125, e2020JB019539.	1.4	6
16	Characterizing the uppermost 100m structure of the San Jacinto fault zone southeast of Anza, California, through joint analysis of geological, topographic, seismic and resistivity data. Geophysical Journal International, 2020, 222, 781-794.	1.0	16
17	An analysis of the factors that control fault zone architecture and the importance of fault orientation relative to regional stress. Bulletin of the Geological Society of America, 2020, 132, 2084-2104.	1.6	14
18	Damage zone heterogeneity on seismogenic faults in crystalline rock; a field study of the Borrego Fault, Baja California. Journal of Structural Geology, 2020, 137, 104016.	1.0	38

#	ARTICLE	IF	CITATIONS
19	Refining the spatial and temporal signatures of creep and co-seismic slip along the southern San Andreas Fault using very high resolution UAS imagery and SfM-derived topography, Coachella Valley, California. <i>Geomorphology</i> , 2020, 357, 107064.	1.1	14
20	Slow Slip Event On the Southern San Andreas Fault Triggered by the 2017 $M_w$ 8.2 Chiapas (Mexico) Earthquake. <i>Journal of Geophysical Research: Solid Earth</i> , 2019, 124, 9956-9975.	1.4	46
21	Late-Holocene Rupture History of the Rose Canyon Fault in Old Town, San Diego: Implications for Cascading Earthquakes on the Newport-Inglewood-Rose Canyon Fault System. <i>Bulletin of the Seismological Society of America</i> , 2019, 109, 855-874.	1.1	5
22	Shorelines in the Desert: Mapping Fish Trap Features along the Southwest Coast of Ancient Lake Cahuilla, California. <i>Advances in Archaeological Practice</i> , 2019, 7, 325-336.	0.5	1
23	Dynamic Rupture Scenarios in the Brawley Seismic Zone, Salton Trough, Southern California. <i>Journal of Geophysical Research: Solid Earth</i> , 2019, 124, 3680-3707.	1.4	16
24	A case study of a precariously balanced rock, its partially exhumed corestone platform, and encasing saprock and soil. <i>Catena</i> , 2019, 172, 719-737.	2.2	2
25	Late Quaternary slip rates for the southern Elsinore fault in the Coyote Mountains, southern California from analysis of alluvial fan landforms and clast provenance, soils, and U-series ages of pedogenic carbonate. <i>Geomorphology</i> , 2019, 326, 68-89.	1.1	8
26	Morphotectonics in a low tectonic rate area: Analysis of the southern Portuguese Atlantic coastal region. <i>Geomorphology</i> , 2019, 326, 132-151.	1.1	16
27	Coastal flooding and the 1861-2 California storm season. <i>Marine Geology</i> , 2018, 400, 49-59.	0.9	11
28	Micro-scale damage characterized within part of a dismembered positive flower structure, San Jacinto fault, southern California, USA. <i>Journal of Structural Geology</i> , 2018, 112, 53-68.	1.0	5
29	Variable slip-rate and slip-per-event on a plate boundary fault: The Dead Sea fault in northern Israel. <i>Tectonophysics</i> , 2018, 722, 210-226.	0.9	27
30	Dates of the Two Most Recent Surface Ruptures on the Southernmost San Andreas Fault Recalculated by Precise Dating of Lake Cahuilla Dry Periods. <i>Bulletin of the Seismological Society of America</i> , 2018, 108, 2634-2649.	1.1	22
31	The Age and Origin of Small Offsets at Van Matre Ranch along the San Andreas Fault in the Carrizo Plain, California. <i>Bulletin of the Seismological Society of America</i> , 2018, 108, 639-653.	1.1	18
32	Lateral slip rate of Alhama de Murcia fault (SE Iberian Peninsula) based on a morphotectonic analysis: Comparison with paleoseismological data. <i>Quaternary International</i> , 2017, 451, 87-100.	0.7	21
33	Paleoseismic Evidence for the 21 April 1918 $M_w$ 6.9 Surface Rupture of the Northern Clark Strand of the Central San Jacinto Fault, California. <i>Bulletin of the Seismological Society of America</i> , 2017, 107, 1027-1032.	1.1	4
34	Large Transverse Range Earthquakes Cause Coastal Upheaval near Ventura, Southern California. <i>Bulletin of the Seismological Society of America</i> , 2016, 106, 2706-2720.	1.1	26
35	Refining seismic parameters in low seismicity areas by 3D trenching: The Alhama de Murcia fault, SE Iberia. <i>Tectonophysics</i> , 2016, 680, 122-128.	0.9	12
36	Holocene geologic slip rate for the Banning strand of the southern San Andreas Fault, southern California. <i>Journal of Geophysical Research: Solid Earth</i> , 2015, 120, 5639-5663.	1.4	23

#	ARTICLE	IF	CITATIONS
37	Geologic and structural controls on rupture zone fabric: A field-based study of the 2010 Mw 7.2 El Mayor-Cucapah earthquake surface rupture. , 2015, 11, 899-920.		52
38	Short-term variations in slip rate and size of prehistoric earthquakes during the past 2000 years on the northern San Jacinto fault zone, a major plate-boundary structure in southern California. Lithosphere, 2015, 7, 211-234.	0.6	40
39	Reassessment of the 1892 Laguna Salada Earthquake: Fault Kinematics and Rupture Patterns. Bulletin of the Seismological Society of America, 2015, 105, 2885-2893.	1.1	17
40	A 21-Event, 4,000-Year History of Surface Ruptures in the Anza Seismic Gap, San Jacinto Fault, and Implications for Long-term Earthquake Production on a Major Plate Boundary Fault. Pure and Applied Geophysics, 2015, 172, 1143-1165.	0.8	82
41	Probing large intraplate earthquakes at the west flank of the Andes. Geology, 2014, 42, 1083-1086.	2.0	54
42	Global Positioning System Constraints on Active Crustal Deformation in Central Panama. Seismological Research Letters, 2014, 85, 278-283.	0.8	7
43	Structure and Seismic Hazard of the Ventura Avenue Anticline and Ventura Fault, California: Prospect for Large, Multisegment Ruptures in the Western Transverse Ranges. Bulletin of the Seismological Society of America, 2014, 104, 1070-1087.	1.1	50
44	Inferring a Thrust-Related Earthquake History from Secondary Faulting: A Long Rupture Record of La Laja Fault, San Juan, Argentina. Bulletin of the Seismological Society of America, 2014, 104, 269-284.	1.1	26
45	Interseismic Strain Localization in the San Jacinto Fault Zone. Pure and Applied Geophysics, 2014, 171, 2937-2954.	0.8	54
46	Southern San Andreas Fault Evaluation Field Activity: Approaches to Measuring Small Geomorphic Offsets--Challenges and Recommendations for Active Fault Studies. Seismological Research Letters, 2014, 85, 68-76.	0.8	50
47	Assembly of a large earthquake from a complex fault system: Surface rupture kinematics of the 4 April 2010 El Mayor-Cucapah (Mexico) Mw 7.2 earthquake. , 2014, 10, 797-827.		127
48	A Paleoseismic Record of Earthquakes for the Dead Sea Transform Fault between the First and Seventh Centuries C.E.: Nonperiodic Behavior of a Plate Boundary Fault. Bulletin of the Seismological Society of America, 2014, 104, 1329-1347.	1.1	32
49	A Statistical Framework for Calculating and Assessing Compositional Linear Trends Within Fault Zones: A Case Study of the NE Block of the Clark Segment, San Jacinto Fault, California, USA. Pure and Applied Geophysics, 2014, 171, 2919-2935.	0.8	2
50	Recognition of Pleistocene marine terraces in the southwest of Portugal (Iberian Peninsula): evidences of regional Quaternary uplift. Annals of Geophysics, 2014, 56, .	0.5	3
51	Timing and nature of alluvial fan and strath terrace formation in the Eastern Precordillera of Argentina. Quaternary Science Reviews, 2013, 80, 143-168.	1.4	23
52	Surface Rupture and Slip Distribution of the 1940 Imperial Valley Earthquake, Imperial Fault, Southern California: Implications for Rupture Segmentation and Dynamics. Bulletin of the Seismological Society of America, 2013, 103, 629-640.	1.1	73
53	Rupture exposed. Nature Geoscience, 2013, 6, 19-20.	5.4	2
54	Straightening of the Northern San Jacinto Fault, California, as Seen in the Fault-Structure Evolution of the San Jacinto Valley Stepover. Bulletin of the Seismological Society of America, 2013, 103, 2047-2061.	1.1	12

#	ARTICLE	IF	CITATIONS
55	Use of Soil Geomorphology in Fault Studies. AGU Reference Shelf, 2013, , 273-292.	0.6	11
56	Stable, rapid rate of slip since inception of the San Jacinto fault, California. Geophysical Research Letters, 2013, 40, 4209-4213.	1.5	29
57	Damage and seismic velocity structure of pulverized rocks near the San Andreas Fault. Journal of Geophysical Research: Solid Earth, 2013, 118, 2813-2831.	1.4	100
58	Evidence for Seven Surface Ruptures in the Past 1600 Years on the Claremont Fault at Mystic Lake, Northern San Jacinto Fault Zone, California. Bulletin of the Seismological Society of America, 2013, 103, 519-541.	1.1	32
59	Reversed-Polarity Secondary Deformation Structures Near Fault Stepovers. Journal of Applied Mechanics, Transactions ASME, 2012, 79, .	1.1	26
60	LiDAR and Field Observations of Slip Distribution for the Most Recent Surface Ruptures along the Central San Jacinto Fault. Bulletin of the Seismological Society of America, 2012, 102, 598-619.	1.1	98
61	Assessing the reliability of U-series and <sup>10</sup> Be dating techniques on alluvial fans in the Anza Borrego Desert, California. Quaternary Geochronology, 2012, 13, 26-41.	0.6	40
62	Fault zone architecture of the San Jacinto fault zone in Horse Canyon, southern California: A model for focused post-seismic fluid flow and heat transfer in the shallow crust. Earth and Planetary Science Letters, 2012, 329-330, 71-83.	1.8	45
63	Late Quaternary slip rate of the southern Elsinore fault, Southern California: Dating offset alluvial fans via <sup>230</sup> Th/U on pedogenic carbonate. Journal of Geophysical Research, 2011, 116, .	3.3	22
64	Characterization of pulverized granitoids in a shallow core along the San Andreas Fault, Littlerock, CA. Geophysical Journal International, 2011, 186, 401-417.	1.0	45
65	Neotectonics and Paleoseismology of the Limon and Pedro Miguel Faults in Panama: Earthquake Hazard to the Panama Canal. Bulletin of the Seismological Society of America, 2010, 100, 3097-3129.	1.1	27
66	Late Quaternary slip rate gradient defined using high-resolution topography and <sup>10</sup> Be dating of offset landforms on the southern San Jacinto Fault zone, California. Journal of Geophysical Research, 2010, 115, .	3.3	56
67	Chapter 6 Paleoseismology of Strike-Slip Tectonic Environments. International Geophysics, 2009, 95, 421-496.	0.6	11
68	Palaeoseismology of the Vilariça Segment of the Manteigas-Bragança Fault in northeastern Portugal. Geological Society Special Publication, 2009, 316, 237-258.	0.8	28
69	Palaeoseismology of the North Anatolian Fault near the Marmara Sea: implications for fault segmentation and seismic hazard. Geological Society Special Publication, 2009, 316, 31-54.	0.8	38
70	Chemical and Physical Characteristics of Pulverized Tejon Lookout Granite Adjacent to the San Andreas and Garlock Faults: Implications for Earthquake Physics. Pure and Applied Geophysics, 2009, 166, 1725-1746.	0.8	72
71	Characterization of Damage in Sandstones along the Mojave Section of the San Andreas Fault: Implications for the Shallow Extent of Damage Generation. Pure and Applied Geophysics, 2009, 166, 1747-1773.	0.8	38
72	Application of high resolution DEM data to detect rock damage from geomorphic signals along the central San Jacinto Fault. Geomorphology, 2009, 113, 82-96.	1.1	52

#	ARTICLE	IF	CITATIONS
73	Quaternary rift flank uplift of the Peninsular Ranges in Baja and southern California by removal of mantle lithosphere. <i>Tectonics</i> , 2009, 28, .	1.3	20
74	Triggered and Primary Surface Ruptures along the Camp Rock Fault, Eastern California Shear Zone. <i>Bulletin of the Seismological Society of America</i> , 2009, 99, 2704-2720.	1.1	5
75	Characterization of Damage in Sandstones along the Mojave Section of the San Andreas Fault: Implications for the Shallow Extent of Damage Generation. , 2009, , 1747-1773.		1
76	Chemical and Physical Characteristics of Pulverized Tejon Lookout Granite Adjacent to the San Andreas and Garlock Faults: Implications for Earthquake Physics. , 2009, , 1725-1746.		1
77	A critical evaluation of tsunami records reported for the Levant Coast from the second millennium BCE to the present. <i>Israel Journal of Earth Sciences</i> , 2009, 58, 327-354.	0.3	19
78	Geological and geomorphologic asymmetry across the rupture zones of the 1943 and 1944 earthquakes on the North Anatolian Fault: possible signals for preferred earthquake propagation direction. <i>Geophysical Journal International</i> , 2008, 173, 483-504.	1.0	88
79	Southern California Earthquake Center Geologic Vertical Motion Database. <i>Geochemistry, Geophysics, Geosystems</i> , 2008, 9, .	1.0	8
80	Community Fault Model (CFM) for Southern California. <i>Bulletin of the Seismological Society of America</i> , 2007, 97, 1793-1802.	1.1	188
81	High localization of primary slip zones in large earthquakes from paleoseismic trenches: Observations and implications for earthquake physics. <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	73
82	Paleoseismic evidence of great surface rupture earthquakes along the Indian Himalaya. <i>Journal of Geophysical Research</i> , 2006, 111, n/a-n/a.	3.3	245
83	Field imaging spectroscopy: A new methodology to assist the description, interpretation, and archiving of paleoseismological information from faulted exposures. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	9
84	Pulverized rocks in the Mojave section of the San Andreas Fault Zone. <i>Earth and Planetary Science Letters</i> , 2006, 245, 642-654.	1.8	202
85	Recent and Long-Term Behavior of the Brawley Fault Zone, Imperial Valley, California: An Escalation in Slip Rate?. <i>Bulletin of the Seismological Society of America</i> , 2006, 96, 2304-2328.	1.1	17
86	Geological Observations of Damage Asymmetry in the Structure of the San Jacinto, San Andreas and Punchbowl Faults in Southern California: A Possible Indicator for Preferred Rupture Propagation Direction. <i>Pure and Applied Geophysics</i> , 2006, 163, 301-349.	0.8	173
87	Late Holocene activity of the Dead Sea Transform revealed in 3D palaeoseismic trenches on the Jordan Gorge segment. <i>Earth and Planetary Science Letters</i> , 2005, 234, 189-205.	1.8	100
88	Ground-penetrating radar investigations along the North Anatolian fault near Izmit, Turkey: Constraints on the right-lateral movement and slip history. <i>Geology</i> , 2004, 32, 85.	2.0	26
89	Calibrated, late Quaternary age indices using clast rubification and soil development on alluvial surfaces in Pilot Knob Valley, Mojave Desert, southeastern California. <i>Quaternary Research</i> , 2003, 60, 377-393.	1.0	12
90	Irregular recurrence of paleoearthquakes along the central Garlock fault near El Paso Peaks, California. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	75

#	ARTICLE	IF	CITATIONS
91	The Surface Rupture and Slip Distribution of the 17 August 1999 Izmit Earthquake (M 7.4), North Anatolian Fault. <i>Bulletin of the Seismological Society of America</i> , 2002, 92, 43-60.	1.1	281
92	Primary Surface Rupture Associated with the Mw 7.1 16 October 1999 Hector Mine Earthquake, San Bernardino County, California. <i>Bulletin of the Seismological Society of America</i> , 2002, 92, 1171-1191.	1.1	136
93	A Northward-propagating Earthquake Sequence in Coastal Southern California?. <i>Seismological Research Letters</i> , 2002, 73, 461-469.	0.8	11
94	Geometry, Slip Distribution, and Kinematics of Surface Rupture on the Sakarya Fault Segment during the 17 August 1999 Izmit, Turkey, Earthquake. <i>Bulletin of the Seismological Society of America</i> , 2002, 92, 107-125.	1.1	48
95	Lateral Offsets on Surveyed Cultural Features Resulting from the 1999 Izmit and Duzce Earthquakes, Turkey. <i>Bulletin of the Seismological Society of America</i> , 2002, 92, 79-94.	1.1	148
96	Surface Rupture and Slip Distribution along the Karadere Segment of the 17 August 1999 Izmit and the Western Section of the 12 November 1999 Duzce, Turkey, Earthquakes. <i>Bulletin of the Seismological Society of America</i> , 2002, 92, 67-78.	1.1	45
97	The last interglacial period on the Pacific Coast of North America: Timing and paleoclimate. <i>Bulletin of the Geological Society of America</i> , 2002, 114, 569-592.	1.6	71
98	Eight Days in Bhuj: Field Report Bearing on Surface Rupture and Genesis of the 26 January 2001 Earthquake in India. <i>Seismological Research Letters</i> , 2001, 72, 514-524.	0.8	43
99	Title is missing!. <i>Journal of Seismology</i> , 2001, 5, 433-448.	0.6	79
100	Paleoseismologic Evidence for a Very Large (Mw >7), Post-A.D. 1660 Surface Rupture on the Eastern San Cayetano Fault, Ventura County, California: Was This the Elusive Source of the Damaging 21 December 1812 Earthquake?. <i>Bulletin of the Seismological Society of America</i> , 2001, 91, 1417-1432.	1.1	23
101	Earthquake Recurrence and Rupture Dynamics of Himalayan Frontal Thrust, India. <i>Science</i> , 2001, 294, 2328-2331.	6.0	188
102	Paleoseismology of the Johnson Valley, Kickapoo, and Homestead Valley Faults: Clustering of Earthquakes in the Eastern California Shear Zone. <i>Bulletin of the Seismological Society of America</i> , 2000, 90, 1200-1236.	1.1	198
103	Title is missing!. <i>Bulletin of the Geological Society of America</i> , 2000, 112, 1559.	1.6	41
104	Active parasitic folds on the Elysian Park anticline: Implications for seismic hazard in central Los Angeles, California. <i>Bulletin of the Geological Society of America</i> , 2000, 112, 693-707.	1.6	37
105	The Relationship of Foundation Deformation to Surface and Near-Surface Faulting Resulting from the 1992 Landers Earthquake. <i>Earthquake Spectra</i> , 1999, 15, 121-144.	1.6	12
106	Escape tectonics in the Los Angeles metropolitan region and implications for seismic risk. <i>Nature</i> , 1998, 394, 356-360.	13.7	68
107	Evidence for Large Earthquakes in Metropolitan Los Angeles. , 1998, 281, 398-402.		40
108	Active tectonics at Wheeler Ridge, southern San Joaquin Valley, California. <i>Bulletin of the Geological Society of America</i> , 1998, 110, 298-310.	1.6	93

#	ARTICLE	IF	CITATIONS
109	Crusader castle torn apart by earthquake at dawn, 20 May 1202. <i>Geology</i> , 1998, 26, 303.	2.0	130
110	Active tectonics, paleoseismology, and seismic hazards of the Hollywood fault, northern Los Angeles basin, California. <i>Bulletin of the Geological Society of America</i> , 1997, 109, 1595-1616.	1.6	37
111	A 300- to 550-year history of slip on the Imperial fault near the U.S.-Mexico border: Missing slip at the Imperial fault bottleneck. <i>Journal of Geophysical Research</i> , 1996, 101, 5987-5997.	3.3	26
112	Style and rate of Holocene slip, Palos Verdes fault, southern California. <i>Journal of Geophysical Research</i> , 1996, 101, 8317-8334.	3.3	48
113	Timing and slip for prehistoric earthquakes on the Superstition Mountain Fault, Imperial Valley, southern California. <i>Journal of Geophysical Research</i> , 1996, 101, 5977-5985.	3.3	25
114	Chapter 6 Paleoseismology of strike-slip tectonic environments. <i>International Geophysics</i> , 1996, 62, 271-329.	0.6	21
115	Quaternary soils and dust deposition in southern Nevada and California. <i>Bulletin of the Geological Society of America</i> , 1995, 107, 1003-1022.	1.6	159
116	Late quaternary activity of the Laguna Salada fault in northern Baja California, Mexico. <i>Bulletin of the Geological Society of America</i> , 1995, 107, 8.	1.6	55
117	Prospects for Larger or More Frequent Earthquakes in the Los Angeles Metropolitan Region. <i>Science</i> , 1995, 267, 199-205.	6.0	151
118	Holocene activity of the Rose Canyon fault zone in San Diego, California. <i>Journal of Geophysical Research</i> , 1995, 100, 24121-24132.	3.3	48
119	Correlation and age estimates of soils developed in marine terraces across the San Simeon fault zone, central California. <i>Special Paper of the Geological Society of America</i> , 1994, , 151-166.	0.5	7
120	Uranium-Series Ages of Marine Terrace Corals from the Pacific Coast of North America and Implications for Last-Interglacial Sea Level History. <i>Quaternary Research</i> , 1994, 42, 72-87.	1.0	85
121	Late quaternary uplift rates of marine terraces on the Pacific coast of North America, southern Oregon to Baja California sur. <i>Quaternary International</i> , 1992, 15-16, 121-133.	0.7	73
122	AGES AND DEFORMATION OF MARINE TERRACES BETWEEN POINT CONCEPTION AND GAVIOTA, WESTERN TRANSVERSE RANGES, CALIFORNIA. , 1992, , 333-341.		16
123	CHRONOLOGY AND DEFORMATION OF QUATERNARY MARINE SHORELINES, SAN DIEGO COUNTY, CALIFORNIA. , 1992, , 377-382.		22
124	Dynamic Pedogenesis: New Views on Some Key Soil Concepts, and a Model for Interpreting Quaternary Soils. <i>Quaternary Research</i> , 1990, 33, 306-319.	1.0	131
125	Late Quaternary rate of slip along the San Jacinto Fault Zone near Anza, southern California. <i>Journal of Geophysical Research</i> , 1990, 95, 8593-8605.	3.3	103
126	Past and Possible Future Earthquakes of Significance to the San Diego Region. <i>Earthquake Spectra</i> , 1989, 5, 299-335.	1.6	20

#	ARTICLE	IF	CITATIONS
127	Evidence for prehistoric earthquakes on the Superstition Hills fault from offset geomorphic features. Bulletin of the Seismological Society of America, 1989, 79, 342-361.	1.1	32
128	Neotectonics of the San Cayetano fault, Transverse Ranges, California. Bulletin of the Geological Society of America, 1988, 100, 500-513.	1.6	49
129	Quaternary rate of folding of the Ventura Avenue anticline, western Transverse Ranges, southern California. Bulletin of the Geological Society of America, 1988, 100, 850-858.	1.6	116
130	Chronology and rates of faulting of Ventura River terraces, California. Bulletin of the Geological Society of America, 1984, 95, 1466.	1.6	132
131	Tectonic Geomorphology, Quaternary Chronology, and Paleoseismicity. , 1984, , 203-239.		25
132	Active fault hazard in southern California: Ground rupture versus seismic shaking. Bulletin of the Geological Society of America, 1981, 92, 189.	1.6	23
133	Holocene Faulting and Earthquake Recurrence along the Northern Agua Tibia "Earthquake Valley Fault Zone and Implications for Slip Distribution in Southern California. Bulletin of the Seismological Society of America, 0, , .	1.1	0
134	Sedimentary response of a structural estuary to Holocene coseismic subsidence. Bulletin of the Geological Society of America, 0, , .	1.6	0
