#	ARTICLE	IF	CITATIONS
1	Dual Character of Reactive Oxygen, Nitrogen, and Halogen Species: Endogenous Sources, Interconversions and Neutralization. <i>Biochemistry (Moscow)</i> , 2020, 85, 56-78.	1.5	20
2	Quantitative Determination of Arbutin in <i>Malus sylvestris</i> Leaves by High-Performance Liquid Chromatography. <i>Moscow University Chemistry Bulletin</i> , 2019, 74, 42-45.	0.6	6
3	Modification of the Quantitative Method of Flavonoid Determination in the Goldenrod <i>Canadensis</i> ( <i>Solidago Canadensis</i> ) Herb. <i>Moscow University Chemistry Bulletin</i> , 2019, 74, 38-41.	0.6	3
4	Study of chemical composition of <i>Asparagus racemosus</i> roots. <i>Moscow University Chemistry Bulletin</i> , 2017, 72, 192-195.	0.6	3
5	Determination of content of magnetic fillers in drug forms. <i>Moscow University Chemistry Bulletin</i> , 2015, 70, 87-91.	0.6	0
6	Study of the effectiveness of Pimento extract in oral health and developing a method of detection of marker substances. <i>Moscow University Chemistry Bulletin</i> , 2015, 70, 257-259.	0.6	2
7	An algorithm for selecting marker substances in gas chromatographic analysis of medicinal-plant raw materials. <i>Moscow University Chemistry Bulletin</i> , 2014, 69, 163-167.	0.6	0
8	Application of gas-liquid chromatography for standardization of herbal raw materials and herbal drugs. <i>Russian Journal of General Chemistry</i> , 2012, 82, 595-601.	0.8	2
9	The composition of the plants'™ extracts included in the herbal mixtures used to treat the parodontal disease. <i>Moscow University Chemistry Bulletin</i> , 2011, 66, 125-128.	0.6	1
10	Combination of two chromatographic methods in the study of the chemical composition of officinal herbs. <i>Moscow University Chemistry Bulletin</i> , 2011, 66, 326-330.	0.6	2
11	Study of a composition of officinal herb mixtures using gas-liquid chromatography with mass-spectrometric detection. <i>Moscow University Chemistry Bulletin</i> , 2010, 65, 106-113.	0.6	4
12	The possibility of using specific markers of certain types of medicinal plant raw material for the analysis of multicomponent plant teas and phytoteas. <i>Moscow University Chemistry Bulletin</i> , 2009, 64, 104-106.	0.6	1
13	Study of the component composition of a mixture of officinal herbs. <i>Moscow University Chemistry Bulletin</i> , 2009, 64, 168-171.	0.6	2
14	Standardization of officinal herb mixture by gas-liquid chromatography. <i>Moscow University Chemistry Bulletin</i> , 2009, 64, 224-226.	0.6	3
15	Empirical calculation of fatty acid and glycerol composition in evaluating drug quality. <i>Moscow University Chemistry Bulletin</i> , 2008, 63, 172-175.	0.6	0
16	Title is missing!. <i>Pharmaceutical Chemistry Journal</i> , 2002, 36, 385-388.	0.8	2
17	Fumarate Ions in Mafusol Infusion Solution Determined by Ion-Exclusion Chromatography. <i>Pharmaceutical Chemistry Journal</i> , 2002, 36, 567-568.	0.8	0
