#	ARTICLE	IF	CITATIONS
1	Do Social Networking Sites Influence Well-Being? The Extended Active-Passive Model. <i>Current Directions in Psychological Science</i> , 2022, 31, 62-68.	2.8	43
2	When do smartphones displace face-to-face interactions and what to do about it?. <i>Computers in Human Behavior</i> , 2021, 114, 106550.	5.1	34
3	Does Distanced Self-Talk Facilitate Emotion Regulation Across a Range of Emotionally Intense Experiences?. <i>Clinical Psychological Science</i> , 2021, 9, 68-78.	2.4	22
4	Social Media and Well-Being: Pitfalls, Progress, and Next Steps. <i>Trends in Cognitive Sciences</i> , 2021, 25, 55-66.	4.0	160
5	The impact of social network sites on mental health: distinguishing active from passive use. <i>World Psychiatry</i> , 2021, 20, 133-134.	4.8	38
6	Inflexibly sustained negative affect and rumination independently link default mode network efficiency to subclinical depressive symptoms. <i>Journal of Affective Disorders</i> , 2021, 293, 347-354.	2.0	10
7	Emotion Duration. , 2021, , 3-18.		3
8	Social comparison on social networking sites. <i>Current Opinion in Psychology</i> , 2020, 36, 32-37.	2.5	150
9	More than one strategy: A closer examination of the relationship between deep acting and key employee outcomes.. <i>Journal of Occupational Health Psychology</i> , 2020, 25, 32-45.	2.3	19
10	Two dimensions of problematic smartphone use mediate the relationship between fear of missing out and emotional well-being. <i>Cyberpsychology</i> , 2020, 14, .	0.7	16
11	Two dimensions of problematic smartphone use mediate the relationship between fear of missing out and emotional well-being. <i>Cyberpsychology</i> , 2020, 14, .	0.7	1
12	Sadness. , 2020, , 4537-4540.		0
13	Mood congruency effects are mediated by shifts in salience and central executive network efficiency. <i>Social Cognitive and Affective Neuroscience</i> , 2019, 14, 987-995.	1.5	4
14	Does counting emotion words on online social networks provide a window into people's subjective experience of emotion? A case study on Facebook.. <i>Emotion</i> , 2019, 19, 97-107.	1.5	29
15	Don't know responses to cognitive and affective risk perception measures: Exploring prevalence and socio-demographic moderators. <i>British Journal of Health Psychology</i> , 2018, 23, 407-419.	1.9	12
16	Registered Replication Report: Dijksterhuis and van Knippenberg (1998). <i>Perspectives on Psychological Science</i> , 2018, 13, 268-294.	5.2	46
17	Humiliated fury is not universal: the co-occurrence of anger and shame in the United States and Japan. <i>Cognition and Emotion</i> , 2018, 32, 1317-1328.	1.2	12
18	The relation between rumination and temporal features of emotion intensity. <i>Cognition and Emotion</i> , 2018, 32, 259-274.	1.2	15

#	ARTICLE	IF	CITATIONS
19	Depression severity moderates the relation between self-distancing and features of emotion unfolding. <i>Personality and Individual Differences</i> , 2018, 123, 119-124.	1.6	10
20	The impact of self-distancing on emotion explosiveness and accumulation: An fMRI study. <i>PLoS ONE</i> , 2018, 13, e0206889.	1.1	11
21	Different Aspects of the Neural Response to Socio-Emotional Events Are Related to Instability and Inertia of Emotional Experience in Daily Life: An fMRI-ESM Study. <i>Frontiers in Human Neuroscience</i> , 2018, 12, 501.	1.0	6
22	Do Social Network Sites Enhance or Undermine Subjective Well-Being? A Critical Review. <i>Social Issues and Policy Review</i> , 2017, 11, 274-302.	3.7	591
23	The neural basis of emotions varies over time: different regions go with onset- and offset-bound processes underlying emotion intensity. <i>Social Cognitive and Affective Neuroscience</i> , 2017, 12, 1261-1271.	1.5	28
24	The temporal deployment of emotion regulation strategies during negative emotional episodes.. <i>Emotion</i> , 2017, 17, 450-458.	1.5	52
25	Emotion dynamics. <i>Current Opinion in Psychology</i> , 2017, 17, 22-26.	2.5	153
26	LES MÃ%DIAS SOCIAUX ET LE BONHEURÃ: LE CAS DE FACEBOOK. <i>Revue QuÃ©bÃ©coise De Psychologie</i> , 2017, 38, 167-182.	0.0	0
27	Being present: Focusing on the present predicts improvements in life satisfaction but not happiness.. <i>Emotion</i> , 2017, 17, 1047-1051.	1.5	30
28	When perceptions defy reality: The relationships between depression and actual and perceived Facebook social support. <i>Journal of Affective Disorders</i> , 2016, 200, 37-44.	2.0	79
29	KSC-N: Clustering of Hierarchical Time Profile Data. <i>Psychometrika</i> , 2016, 81, 411-433.	1.2	8
30	Sadness. , 2016, , 1-4.		1
31	A new approach for modeling generalization gradients: a case for hierarchical models. <i>Frontiers in Psychology</i> , 2015, 6, 652.	1.1	23
32	Passive Facebook usage undermines affective well-being: Experimental and longitudinal evidence.. <i>Journal of Experimental Psychology: General</i> , 2015, 144, 480-488.	1.5	629
33	Determinants of Emotion Duration and Underlying Psychological and Neural Mechanisms. <i>Emotion Review</i> , 2015, 7, 330-335.	2.1	86
34	Variability in anger intensity profiles: Structure and predictive basis. <i>Cognition and Emotion</i> , 2015, 29, 168-177.	1.2	22
35	Looking at Emotion Regulation Through the Window of Emotion Dynamics. <i>Psychological Inquiry</i> , 2015, 26, 72-79.	0.4	90
36	Which emotions last longest and why: The role of event importance and rumination. <i>Motivation and Emotion</i> , 2015, 39, 119-127.	0.8	97

#	ARTICLE	IF	CITATIONS
37	Intensity and Duration of Negative Emotions: Comparing the Role of Appraisals and Regulation Strategies. PLoS ONE, 2014, 9, e92410.	1.1	43
38	To share, or not to share? Examining the emotional consequences of social sharing in the case of anger and sadness.. Emotion, 2014, 14, 1062-1071.	1.5	27
39	Measuring the duration of emotional experience: the influence of actual duration and response format. Quality and Quantity, 2013, 47, 2557-2567.	2.0	7
40	The Relationship Between Arousal and the Remembered Duration of Positive Events. Applied Cognitive Psychology, 2013, 27, 493-496.	0.9	8
41	Interference resolution moderates the impact of rumination and reappraisal on affective experiences in daily life. Cognition and Emotion, 2013, 27, 492-501.	1.2	45
42	The Relation between Appraised Mismatch and the Duration of Negative Emotions: Evidence for Universality. European Journal of Personality, 2013, 27, 481-494.	1.9	19
43	The relation between social sharing and the duration of emotional experience. Cognition and Emotion, 2013, 27, 1023-1041.	1.2	16
44	The regulation of negative and positive affect in daily life.. Emotion, 2013, 13, 926-939.	1.5	331
45	Facebook Use Predicts Declines in Subjective Well-Being in Young Adults. PLoS ONE, 2013, 8, e69841.	1.1	960
46	Determinants of the shape of emotion intensity profiles. Cognition and Emotion, 2012, 26, 1486-1495.	1.2	26
47	The relationship between self-distancing and the duration of negative and positive emotional experiences in daily life.. Emotion, 2012, 12, 1248-1263.	1.5	95
48	The relationship between extraversion, neuroticism and aspects of trait affect. Personality and Individual Differences, 2012, 52, 664-669.	1.6	56
49	The relation between event processing and the duration of emotional experience.. Emotion, 2011, 11, 20-28.	1.5	128
50	Intensity profiles of emotional experience over time. Cognition and Emotion, 2009, 23, 1427-1443.	1.2	57
51	Predicting the duration of emotional experience: Two experience sampling studies.. Emotion, 2009, 9, 83-91.	1.5	220
