#	ARTICLE	IF	CITATIONS
1	Differences Between Intact and Ovariectomized Hemiparkinsonian Rats in Response to L-DOPA, Melatonin, and L-DOPA/Melatonin Coadministration on Motor Behavior and Cytological Alterations. , 2018, , .		0
2	The presence of perforated synapses in the striatum after dopamine depletion, is this a sign of maladaptive brain plasticity?. Microscopy (Oxford, England), 2014, 63, 427-435.	0.7	4
3	The combination of oral L-DOPA/rimonabant for effective dyskinesia treatment and cytological preservation in a rat model of Parkinson's disease and L-DOPA-induced dyskinesia. Behavioural Pharmacology, 2013, 24, 640-652.	0.8	12
4	Effect of Chronic L-Dopa or Melatonin Treatments after Dopamine Deafferentation in Rats: Dyskinesia, Motor Performance, and Cytological Analysis. ISRN Neurology, 2012, 2012, 1-16.	1.5	14
5	Manganese mixture inhalation is a reliable Parkinson disease model in rats. NeuroToxicology, 2012, 33, 1346-1355.	1.4	36
6	Manganese Inhalation as a Parkinson Disease Model. Parkinson's Disease, 2011, 2011, 1-14.	0.6	14
7	L-DOPA treatment reverses the motor alterations induced by manganese exposure as a Parkinson disease experimental model. Neuroscience Letters, 2010, 471, 79-82.	1.0	20
8	Time course changes of the striatum neuropil after unilateral dopamine depletion and the usefulness of the contralateral striatum as a control structure. Neurological Research, 2008, 30, 1068-1074.	0.6	4
9	Bromocriptine treatment in a murine parkinson's model: Ultrastructural evaluation after dopaminergic deafferentation. International Journal of Neuroscience, 2005, 115, 851-859.	0.8	9
10	Effects of Graft Placement Site on the Survival of Adrenal Medulla Transplants into the Brain and Its Relation with the Recovery of Motor Function. Archives of Medical Research, 2000, 31, 551-557.	1.5	3
