#	ARTICLE	IF	CITATIONS
1	Inferring the ancientness of the Mirambel woodland from soil charcoal: A local exception to the regional pattern of the Millevaches plateau (Limousin, Massif Central, France). <i>Quaternary International</i> , 2022, 636, 196-208.	1.5	3
2	Holocene woodland history of the Sierra de Ayllón (central Spain). <i>Vegetation History and Archaeobotany</i> , 2021, 30, 331-346.	2.1	3
3	The onset of islandscapes in the Balearic Islands: A study-case of Addaia (northern Minorca, Spain). <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 2018, 498, 9-23.	2.3	29
4	Holocene treeline history of a high-mountain landscape inferred from soil charcoal: The case of Sierra de Gredos (Iberian Central System, SW Europe). <i>Quaternary International</i> , 2017, 457, 85-98.	1.5	17
5	A taxonomic tool for identifying needle remains of south-western European <i>Pinus</i> species of the Late Quaternary. <i>Botanical Journal of the Linnean Society</i> , 2014, 175, 282-298.	1.6	6
6	Species selection for reforestations: what happens with historic local extinctions and habitat protection zones? A case study in the Cantabrian Range. <i>European Journal of Forest Research</i> , 2013, 132, 107-120.	2.5	7
7	Negative responses of highland pines to anthropogenic activities in inland Spain: a palaeoecological perspective. <i>Vegetation History and Archaeobotany</i> , 2012, 21, 397-412.	2.1	22
8	Patterns of extinction and persistence of Arctotertiary flora in Iberia during the Quaternary. <i>Review of Palaeobotany and Palynology</i> , 2010, 162, 416-426.	1.5	70
9	Taxonomic differences between <i>Pinus sylvestris</i> and <i>P. uncinata</i> revealed in the stomata and cuticle characters for use in the study of fossil material. <i>Review of Palaeobotany and Palynology</i> , 2009, 155, 61-68.	1.5	26
10	Anthracological evidence suggests naturalness of <i>Pinus pinaster</i> in inland southwestern Iberia. <i>Plant Ecology</i> , 2009, 200, 155-160.	1.6	14
11	The value of leaf cuticle characteristics in the identification and classification of Iberian Mediterranean members of the genus <i>Pinus</i> . <i>Botanical Journal of the Linnean Society</i> , 2009, 161, 436-448.	1.6	16
12	The Late Holocene extinction of <i>Pinus sylvestris</i> in the western Cantabrian Range (Spain). <i>Journal of Biogeography</i> , 2008, 35, 1840-1850.	3.0	28
