#	ARTICLE	IF	CITATIONS
1	Stratigraphic analysis applied on the recognition of the interface between marine and fluvial depositional systems. Journal of Coastal Research, 2014, 70, 687-692.	0.3	22
2	Sea-level rise and sediment budget controlling the evolution of a transgressive barrier in southern Brazil. Journal of South American Earth Sciences, 2013, 42, 27-38.	1.4	51
3	Aeolian Deposition and Barrier Stratigraphy of the Transition Region between a Regressive and a Transgressive Barrier: an example from Southern Brazil. Journal of Coastal Research, 2013, 65, 464-469.	0.3	11
4	Preservation potential of foredunes in the stratigraphic record. Journal of Coastal Research, 2013, 165, 1265-1270.	0.3	26
5	The Holocene Coastal Barriers of Rio Grande do Sul. Lecture Notes in Earth Sciences, 2009, , 53-91.	0.5	54
6	Morphology of the Itapeva to Tramandai transgressive dunefield barrier system and mid- to late Holocene sea level change. Earth Surface Processes and Landforms, 2007, 32, 407-414.	2.5	51
7	Sedimentary facies and stratigraphy of a last interglacial coastal barrier in south Brazil. Marine Geology, 2007, 244, 33-45.	2.1	65
8	Beach ridges, foredunes or transgressive dunefields? Definitions and an examination of the Torres to Tramandaí-barrier system, Southern Brazil. Anais Da Academia Brasileira De Ciencias, 2005, 77, 493-508.	0.8	106
9	A critical evaluation of coastal erosion in Rio Grande do Sul, Southern Brazil. Anais Da Academia Brasileira De Ciencias, 2004, 76, 611-623.	0.8	47
10	Barrier evolution and placer formation at Bujuru southern Brazil. Marine Geology, 2004, 203, 43-56.	2.1	66
11	Considerações Sobre o Ambiente Praial e a Deriva Litorânea de Sedimentos ao Longo do Litoral Norte do Rio Grande do Sul, Brasil. Pesquisas Em Geociencias, 1992, 19, 3.	0.1	32
