

# Urszula Krasuska

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/1616135/urszula-krasuska-publications-by-year.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

31  
papers

641  
citations

15

#	Paper	IF	Citations
31	NO and metabolic reprogramming under phytotoxicity stress <b>2022</b> , 297-318		
30	Cold stratification-induced dormancy removal in apple ( <i>Malus domestica</i> Borkh.) seeds is accompanied by an increased glutathione pool in embryonic axes. <i>Journal of Plant Physiology</i> , <b>2022</b> , 274, 153736	3.6	2
29	ROS Metabolism Perturbation as an Element of Mode of Action of Allelochemicals. <i>Antioxidants</i> , <b>2021</b> , 10,	7.1	4
28	Toxicity of -Tyrosine.. <i>Plants</i> , <b>2021</b> , 10,	4.5	2
27	Carbonylation of proteins-an element of plant ageing. <i>Planta</i> , <b>2020</b> , 252, 12	4.7	15
26	Canavanine Increases the Content of Phenolic Compounds in Tomato (L.) Roots. <i>Plants</i> , <b>2020</b> , 9,	4.5	2
25	Effect of Nitrogen Reactive Compounds on Aging in Seed. <i>Frontiers in Plant Science</i> , <b>2020</b> , 11, 1011	6.2	4
24	Dormancy removal by cold stratification increases glutathione and S-nitrosoglutathione content in apple seeds. <i>Plant Physiology and Biochemistry</i> , <b>2019</b> , 138, 112-120	5.4	7
23	Canavanine-Induced Decrease in Nitric Oxide Synthesis Alters Activity of Antioxidant System but Does Not Impact S-Nitrosoglutathione Catabolism in Tomato Roots. <i>Frontiers in Plant Science</i> , <b>2019</b> , 10, 1077	6.2	6
22	Destabilization of ROS metabolism in tomato roots as a phytotoxic effect of meta-tyrosine. <i>Plant Physiology and Biochemistry</i> , <b>2018</b> , 123, 369-377	5.4	9
21	Nitric oxide-polyamines cross-talk during dormancy release and germination of apple embryos. <i>Nitric Oxide - Biology and Chemistry</i> , <b>2017</b> , 68, 38-50	5	16
20	meta-Tyrosine induces modification of reactive nitrogen species level, protein nitration and nitrosoglutathione reductase in tomato roots. <i>Nitric Oxide - Biology and Chemistry</i> , <b>2017</b> , 68, 56-67	5	13
19	l-Canavanine: How does a simple non-protein amino acid inhibit cellular function in a diverse living system?. <i>Phytochemistry Reviews</i> , <b>2017</b> , 16, 1269-1282	7.7	11
18	Modification of the endogenous NO level influences apple embryos dormancy by alterations of nitrated and biotinylated protein patterns. <i>Planta</i> , <b>2016</b> , 244, 877-91	4.7	15
17	Toxicity of canavanine in tomato ( <i>Solanum lycopersicum</i> L.) roots is due to alterations in RNS, ROS and auxin levels. <i>Plant Physiology and Biochemistry</i> , <b>2016</b> , 103, 84-95	5.4	21
16	Loss of Gravitropism in Farnesene-Treated Arabidopsis Is Due to Microtubule Malformations Related to Hormonal and ROS Unbalance. <i>PLoS ONE</i> , <b>2016</b> , 11, e0160202	3.7	37
15	Canavanine Alters ROS/RNS Level and Leads to Post-translational Modification of Proteins in Roots of Tomato Seedlings. <i>Frontiers in Plant Science</i> , <b>2016</b> , 7, 840	6.2	10

14	ROS/NOS/Phytohormones Network in Root Response Strategy <b>2015</b> , 321-339		2
13	Switch from heterotrophy to autotrophy of apple cotyledons depends on NO signal. <i>Planta</i> , <b>2015</b> , 242, 1221-36	4-7	7
12	Allelopathic Compounds as Oxidative Stress Agents: Yes or NO. <i>Signaling and Communication in Plants</i> , <b>2015</b> , 155-176	1	9
11	Nitrosative Door In Seed Dormancy Alleviation and Germination. <i>Signaling and Communication in Plants</i> , <b>2015</b> , 215-237	1	2
10	Dormancy alleviation by NO or HCN leading to decline of protein carbonylation levels in apple ( <i>Malus domestica</i> Borkh.) embryos. <i>Journal of Plant Physiology</i> , <b>2014</b> , 171, 1132-41	3.6	21
9	Polyamines and Nitric Oxide Link in Regulation of Dormancy Removal and Germination of Apple ( <i>Malus domestica</i> Borkh.) Embryos. <i>Journal of Plant Growth Regulation</i> , <b>2014</b> , 33, 590-601	4-7	22
8	Citral induces auxin and ethylene-mediated malformations and arrests cell division in <i>Arabidopsis thaliana</i> roots. <i>Journal of Chemical Ecology</i> , <b>2013</b> , 39, 271-82	2-7	53
7	Dormancy removal of apple seeds by cold stratification is associated with fluctuation in H <sub>2</sub> O <sub>2</sub> , NO production and protein carbonylation level. <i>Journal of Plant Physiology</i> , <b>2013</b> , 170, 480-8	3.6	42
6	Allelochemicals as Bioherbicides [Present and Perspectives <b>2013</b> ,		46
5	Nitric oxide and hydrogen cyanide as regulating factors of enzymatic antioxidant system in germinating apple embryos. <i>Acta Physiologiae Plantarum</i> , <b>2012</b> , 34, 683-692	2.6	34
4	The beneficial effect of small toxic molecules on dormancy alleviation and germination of apple embryos is due to NO formation. <i>Planta</i> , <b>2010</b> , 232, 999-1005	4-7	29
3	Dormancy removal in apple embryos by nitric oxide or cyanide involves modifications in ethylene biosynthetic pathway. <i>Planta</i> , <b>2010</b> , 232, 1397-407	4-7	63
2	Nitric oxide, hydrogen cyanide and ethylene are required in the control of germination and undisturbed development of young apple seedlings. <i>Plant Growth Regulation</i> , <b>2010</b> , 61, 75-84	3.2	61
1	Breaking the apple embryo dormancy by nitric oxide involves the stimulation of ethylene production. <i>Planta</i> , <b>2007</b> , 225, 1051-7	4-7	76
