

Thomas Nordlander

List of Publications by Citations

Source: <https://exaly.com/author-pdf/164854/thomas-nordlander-publications-by-citations.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
67	The GALAH Survey: second data release. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 478, 4513-4552	4.3	193
66	GaiaFGK benchmark stars: Metallicity. <i>Astronomy and Astrophysics</i> , 2014 , 564, A133	5.1	183
65	TheGaia-ESO Survey: The analysis of high-resolution UVES spectra of FGK-type stars. <i>Astronomy and Astrophysics</i> , 2014 , 570, A122	5.1	142
64	TheGaia-ESO Survey: radial metallicity gradients and age-metallicity relation of stars in the Milky Way disk. <i>Astronomy and Astrophysics</i> , 2014 , 565, A89	5.1	131
63	GaiaFGK benchmark stars: abundances of α and iron-peak elements. <i>Astronomy and Astrophysics</i> , 2015 , 582, A81	5.1	95
62	The GALAH+ survey: Third data release. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 150-201	4.3	70
61	Non-LTE aluminium abundances in late-type stars. <i>Astronomy and Astrophysics</i> , 2017 , 607, A75	5.1	63
60	The GALAH survey: An abundance, age, and kinematic inventory of the solar neighbourhood made with TGAS. <i>Astronomy and Astrophysics</i> , 2019 , 624, A19	5.1	61
59	3D NLTE analysis of the most iron-deficient star, SMSS0313-6708. <i>Astronomy and Astrophysics</i> , 2017 , 597, A6	5.1	58
58	A COMPARISON OF STELLAR ELEMENTAL ABUNDANCE TECHNIQUES AND MEASUREMENTS. <i>Astrophysical Journal, Supplement Series</i> , 2016 , 226, 4	8	49
57	ATOMIC DIFFUSION AND MIXING IN OLD STARS. III. ANALYSIS OF NGC 6397 STARS UNDER NEW CONSTRAINTS. <i>Astrophysical Journal</i> , 2012 , 753, 48	4.7	48
56	Discovery of a nearby 1700 km s ⁻¹ star ejected from the Milky Way by Sgr A*. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 2465-2480	4.3	47
55	TheGaia-ESO Survey: Sodium and aluminium abundances in giants and dwarfs. <i>Astronomy and Astrophysics</i> , 2016 , 589, A115	5.1	44
54	The K2-HERMES Survey: age and metallicity of the thick disc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 5335-5352	4.3	40
53	Effective temperature determinations of late-type stars based on 3D non-LTE Balmer line formation. <i>Astronomy and Astrophysics</i> , 2018 , 615, A139	5.1	36
52	The GALAH survey and Gaia DR2: Linking ridges, arches, and vertical waves in the kinematics of the Milky Way. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 489, 4962-4979	4.3	35
51	Atomic diffusion and mixing in old stars. <i>Astronomy and Astrophysics</i> , 2014 , 567, A72	5.1	33

50	The Gaia-ESO Survey: A globular cluster escapee in the Galactic halo. <i>Astronomy and Astrophysics</i> , 2015 , 575, L12	5.1	32
49	The GALAH survey: verifying abundance trends in the open cluster M67 using non-LTE modelling. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 481, 2666-2684	4.3	32
48	The lowest detected stellar Fe abundance: the halo star SMSS J160540.18-44323.1. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2019 , 488, L109-L113	4.3	30
47	SkyMapper stellar parameters for Galactic Archaeology on a grand-scale. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 ,	4.3	30
46	Accurate effective temperatures of the metal-poor benchmark stars HD 140283, HD 122563, and HD 103095 from CHARA interferometry. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2018 , 475, L81-L85	4.3	29
45	The SkyMapper DR1.1 search for extremely metal-poor stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 489, 5900-5918	4.3	28
44	The GALAH Survey: non-LTE departure coefficients for large spectroscopic surveys. <i>Astronomy and Astrophysics</i> , 2020 , 642, A62	5.1	25
43	The GALAH survey: tracing the Galactic disc with open clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 3279-3296	4.3	23
42	The GALAH survey and Gaia DR2: (non-)existence of five sparse high-latitude open clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 480, 5242-5259	4.3	21
41	Abundances of disk and bulge giants from high-resolution optical spectra. <i>Astronomy and Astrophysics</i> , 2017 , 598, A100	5.1	21
40	The GALAH survey: accurate radial velocities and library of observed stellar template spectra. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 481, 645-654	4.3	21
39	How Magnetic Activity Alters What We Learn from Stellar Spectra. <i>Astrophysical Journal</i> , 2020 , 895, 52	4.7	20
38	3D NLTE spectral line formation of lithium in late-type stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 500, 2159-2176	4.3	15
37	Exploring the Galaxy's halo and very metal-weak thick disc with SkyMapper and Gaia DR2. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 2539-2561	4.3	15
36	The GALAH survey: temporal chemical enrichment of the galactic disc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 2043-2056	4.3	15
35	A minimum dilution scenario for supernovae and consequences for extremely metal-poor stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 498, 3703-3712	4.3	14
34	The GALAH survey: a new constraint on cosmological lithium and Galactic lithium evolution from warm dwarf stars. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2020 , 497, L30-L34	4.3	13
33	The GALAH Survey: Chemically tagging the Fimbulthul stream to the globular cluster ω Centauri. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 3374-3384	4.3	13

32	r-Process elements from magnetorotational hypernovae. <i>Nature</i> , 2021 , 595, 223-226	50.4	13
31	Fundamental relations for the velocity dispersion of stars in the Milky Way. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 1761-1776	4.3	12
30	The GALAH survey: co-orbiting stars and chemical tagging. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 482, 5302-5315	4.3	12
29	Fundamental stellar parameters of benchmark stars from CHARA interferometry. <i>Astronomy and Astrophysics</i> , 2020 , 640, A25	5.1	11
28	The GALAH Survey: lithium-strong KM dwarfs. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 484, 4591-4600	4.3	10
27	The GALAH survey: effective temperature calibration from the InfraRed Flux Method in the Gaia system. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 2684-2696	4.3	10
26	Keck HIRES spectroscopy of SkyMapper commissioning survey candidate extremely metal-poor stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 485, 5153-5167	4.3	9
25	The destruction of an Oort Cloud in a rich stellar cluster. <i>Astronomy and Astrophysics</i> , 2017 , 603, A112	5.1	8
24	Milky Way Tomography with the SkyMapper Southern Survey. II. Photometric Recalibration of SMSS DR2. <i>Astrophysical Journal</i> , 2021 , 907, 68	4.7	8
23	NLTE Radiative Transfer in Cool Stars. <i>GeoPlanet: Earth and Planetary Sciences</i> , 2014 , 169-185	0.1	5
22	The GALAH Survey: using galactic archaeology to refine our knowledge of TESS target stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 504, 4968-4989	4.3	5
21	High-resolution spectroscopic follow-up of the most metal-poor candidates from SkyMapper DR1.1. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 4102-4119	4.3	5
20	The GALAH survey: a catalogue of carbon-enhanced stars and CEMP candidates. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 483, 3196-3212	4.3	5
19	On the AGB stars of M 4: a robust disagreement between spectroscopic observations and theory. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 481, 373-395	4.3	5
18	The GALAH survey: accreted stars also inhabit the Spite plateau. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 43-54	4.3	4
17	A Data-driven Model of Nucleosynthesis with Chemical Tagging in a Lower-dimensional Latent Space. <i>Astrophysical Journal</i> , 2019 , 887, 73	4.7	4
16	The LUMBA UVES stellar parameter pipeline. <i>Astronomy and Astrophysics</i> , 2019 , 629, A74	5.1	4
15	The GALAH Survey: chemical tagging and chrono-chemodynamics of accreted halo stars with GALAH+ DR3 and Gaia eDR3. <i>Monthly Notices of the Royal Astronomical Society</i> , 2022 , 510, 2407-2436	4.3	4

14	The GALAH survey: unresolved triple Sun-like stars discovered by the Gaia mission. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 487, 2474-2490	4-3	3
13	The GALAH survey: characterization of emission-line stars with spectral modelling using autoencoders. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 500, 4849-4865	4-3	3
12	Characterization of 92 southern TESS candidate planet hosts and a new photometric [Fe/H] relation for cool dwarfs. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 504, 5788-5805	4-3	3
11	The GALAH survey: Chemical homogeneity of the Orion complex. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 4232-4250	4-3	3
10	The GALAH survey: velocity fluctuations in the Milky Way using Red Clump giants. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 482, 4215-4232	4-3	3
9	Dynamics of passing-stars-perturbed binary star systems. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 486, 4773-4780	4-3	2
8	The GALAH Survey: No Chemical Evidence of an Extragalactic Origin for the Nyx Stream. <i>Astrophysical Journal Letters</i> , 2021 , 912, L30	7-9	2
7	The K2 Galactic Archaeology Program Data Release 3: Age-abundance Patterns in C108 and C1018. <i>Astrophysical Journal</i> , 2022 , 926, 191	4-7	2
6	A test field for Gaia. <i>Astronomy and Astrophysics</i> , 2017 , 597, A10	5-1	1
5	The relationship between photometric and spectroscopic oscillation amplitudes from 3D stellar atmosphere simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 13-27	4-3	1
4	A spectroscopically confirmed Gaia-selected sample of 318 new young stars within ~200 pc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 938-952	4-3	1
3	Atomic diffusion and mixing in old stars. <i>Astronomy and Astrophysics</i> , 2021 , 652, A75	5-1	1
2	Chemical Properties of the Local Disk and Halo. II. Abundances of 3745 M Dwarfs and Subdwarfs from Improved Model Fitting of Low-resolution Spectra. <i>Astrophysical Journal</i> , 2022 , 927, 122	4-7	0
1	The GALAH Survey: A New Sample of Extremely Metal-poor Stars Using a Machine-learning Classification Algorithm. <i>Astrophysical Journal</i> , 2022 , 930, 47	4-7	0
