| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | A simple method for the extraction and identification of light density microplastics from soil. Science of the Total Environment, 2018, 616-617, 1056-1065.  | 3.9 | 325       |
| 2  | Soil degradation: a problem threatening the sustainable development of agriculture in Northeast<br>China. Plant, Soil and Environment, 2010, 56, 87-97.  | 1.0 | 254       |
| 3  | Microplastics in the environment: A review of analytical methods, distribution, and biological effects. TrAC - Trends in Analytical Chemistry, 2019, 111, 62-72.   | 5.8 | 251       |
| 4  | Leaching of microplastics by preferential flow in earthworm (Lumbricus terrestris) burrows.<br>Environmental Chemistry, 2019, 16, 31.  | 0.7 | 116       |
| 5  | Soil erosion control practices in Northeast China: A mini-review. Soil and Tillage Research, 2011, 117, 44-48.   | 2.6 | 110       |
| 6  | Non-biodegradable microplastics in soils: A brief review and challenge. Journal of Hazardous<br>Materials, 2021, 409, 124525.  | 6.5 | 110       |
| 7  | Distribution of low-density microplastics in the mollisol farmlands of northeast China. Science of the Total Environment, 2020, 708, 135091.   | 3.9 | 103       |
| 8  | Influence of topography and land management on soil nutrients variability in Northeast China.<br>Nutrient Cycling in Agroecosystems, 2011, 89, 427-438.  | 1.1 | 84        |
| 9  | Simultaneous nitrification and denitrification by EPSs in aerobic granular sludge enhanced nitrogen removal of ammonium-nitrogen-rich wastewater. Bioresource Technology, 2016, 202, 101-106.                          | 4.8 | 79        |
| 10 | Comparing interpolation methods to predict soil total phosphorus in the Mollisol area of Northeast<br>China. Catena, 2019, 174, 59-72.   | 2.2 | 66        |
| 11 | Spatial distribution of soil nutrient at depth in black soil of Northeast China: a case study of soil<br>available phosphorus and total phosphorus. Journal of Soils and Sediments, 2014, 14, 1775-1789.               | 1.5 | 56        |
| 12 | Differentiating the early impacts of topsoil removal and soil amendments on crop<br>performance/productivity of corn and soybean in eroded farmland of Chinese Mollisols. Field Crops<br>Research, 2009, 111, 276-283. | 2.3 | 48        |
| 13 | Fertilization accelerates the decomposition of microplastics in mollisols. Science of the Total Environment, 2020, 722, 137950.  | 3.9 | 39        |
| 14 | Spatial Heterogeneity of Soil C:N Ratio in a Mollisol Watershed of Northeast China. Land Degradation<br>and Development, 2016, 27, 295-304.  | 1.8 | 35        |
| 15 | Spatial heterogeneity of soil organic matter and soil total nitrogen in a Mollisol watershed of<br>Northeast China. Environmental Earth Sciences, 2014, 72, 275-288.   | 1.3 | 29        |
| 16 | Spatial distribution of soil nutrient at depth in black soil of Northeast China: a case study of soil<br>available potassium. Nutrient Cycling in Agroecosystems, 2013, 95, 319-331.                                   | 1.1 | 24        |
| 17 | Soil Loss, Crop Growth, and Economic Margins under Different Management Systems on a Sloping<br>Field in the Black Soil Area of Northeast China. Agroecology and Sustainable Food Systems, 2011, 35,<br>293-311.       | 0.9 | 23        |
| 18 | Spatiotemporal Heterogeneity of Soil Available Nitrogen During Crop Growth Stages on Mollisol<br>Slopes of Northeast China. Land Degradation and Development, 2017, 28, 856-869.                                       | 1.8 | 23        |

SHAOLIANG ZHANG

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Quantitative studies of gully slope erosion and soil physiochemical properties during freeze-thaw cycling in a Mollisol region. Science of the Total Environment, 2020, 707, 136191.             | 3.9 | 23        |
| 20 | Soil nutrient variance by slope position in a Mollisol farmland area of Northeast China. Chinese<br>Geographical Science, 2016, 26, 508-517.   | 1.2 | 18        |
| 21 | Responses of soil total phosphorus to freeze and thaw cycles in a Mollisol watershed. Geoderma, 2020, 376, 114571.   | 2.3 | 17        |
| 22 | Influence of Straw Amendment on Soil Physicochemical Properties and Crop Yield on a Consecutive<br>Mollisol Slope in Northeastern China. Water (Switzerland), 2018, 10, 559.                     | 1.2 | 16        |
| 23 | Freeze-thaw cycles changes soil nitrogen in a Mollisol sloping field in Northeast China. Nutrient<br>Cycling in Agroecosystems, 2020, 116, 345-364.  | 1.1 | 12        |
| 24 | Effects of freeze-thaw cycles on the spatial distribution of soil total nitrogen using a geographically weighted regression kriging method. Science of the Total Environment, 2021, 763, 142993. | 3.9 | 11        |
| 25 | Key factors influencing on vegetation restoration in the gullies of the Mollisols. Journal of Environmental Management, 2021, 299, 113704.   | 3.8 | 8         |
| 26 | Key factors determining soil organic carbon changes after freeze-thaw cycles in a watershed located in northeast China. Science of the Total Environment, 2022, 828, 154525.                     | 3.9 | 8         |
| 27 | Heterogeneity of soil nutrients in ecosystems: a review of methodology, variability and impact<br>factors. Journal of Environmental & Earth Sciences, 2019, 1, .                                 | 0.4 | 1         |
| 28 | Topography and Land Management Change the Heterogeneity of Soil Available Nitrogen in a Mollisol<br>Watershed of Northeastern China. Eurasian Soil Science, 2022, 55, 200-211.                   | 0.5 | 1         |
| 29 | An Integrative Database System of Agro-Ecology for the Black Soil Region of China. Data Science<br>Journal, 2007, 6, S867-S878.  | 0.6 | 0         |
| 30 | Crops Change the Morphology, Abundance, and Mass of Microplastics in Mollisols of Northeast<br>China. Frontiers in Microbiology, 2022, 13, 733804.   | 1.5 | 0         |
