#	ARTICLE	IF	CITATIONS
1	Retarded field model for fast polarization rotations caused by lightning events. Laser Physics Letters, 2021, 18, 115101.	1.4	4
2	200 Gb/s per Channel Unrepeated Transmission Over 520 km Terrestrial Fibers. IEEE Photonics Technology Letters, 2019, 31, 1799-1802.	2.5	2
3	Design principles for modern fibre-optic communication lines. Quantum Electronics, 2019, 49, 1149-1153.	1.0	3
4	Effect of a magnetic field on polarisation of light in an optical fibre with a random distribution of linear birefringence. Quantum Electronics, 2019, 49, 773-776.	1.0	5
5	Experimental investigation of nonlinear operation mode of a DP-QPSK 100G link with co-propagating-pump Raman amplification. Quantum Electronics, 2018, 48, 767-772.	1.0	2
6	Experimental study and numerical modelling of a 3 Å— 100G DP-QPSK superchannel. Quantum Electronics, 2017, 47, 767-772.	1.0	2
7	From the Revolution to the Evolution: The Change in the Character of Development of Fiber Optic Communications Technology “ And the Record Performance of 100 Gbit/s Systems as a Marker of this Change. , 2017, , .		1
8	A simple method of measuring the effective SRS coefficient in single-mode optical fibres and its applicability limits. Quantum Electronics, 2017, 47, 906-910.	1.0	1
9	Nonlinear distortions as nonlinear noise in coherent fibre-optic communication lines. Quantum Electronics, 2017, 47, 1135-1139.	1.0	7
10	Design of high-bit-rate coherent communication links. Quantum Electronics, 2016, 46, 1121-1128.	1.0	8
11	Correlation of nonlinear noises from different spans in 100 Gb/s multi-span fiber optic lines. Optics Communications, 2016, 381, 352-359.	2.1	5
12	Optical signal quality improvement due to nonlinear interaction between spectral channels. Quantum Electronics, 2016, 46, 924-929.	1.0	0
13	Dependence of the bit error rate on the signal power and length of a single-channel coherent single-span communication line (100 Gbit s ⁻¹) with polarisation division multiplexing. Quantum Electronics, 2015, 45, 69-74.	1.0	8
14	New method to obtain optimum performance for 100Gb/s multi-span fiber optic lines. Optics Communications, 2015, 355, 279-284.	2.1	10
15	Accumulation of nonlinear noise in coherent communication lines without dispersion compensation. Optics Communications, 2015, 349, 19-23.	2.1	9
16	Simple receiver with soft decision forward error correction for binary amplitude modulation. Quantum Electronics, 2015, 45, 585-589.	1.0	0
