#	ARTICLE	IF	CITATIONS
1	Impact of selection for birth weight variability on reproductive longevity: A mice model. <i>Journal of Animal Breeding and Genetics</i> , 2022, 139, 370-379.	0.8	7
2	Genetic parameters for canalization analysis of morphological traits in the Pura Raza Español horse. <i>Journal of Animal Breeding and Genetics</i> , 2021, 138, 482-490.	0.8	3
3	Polimorfismos de nucleótido simple (PNSs) del gen MC1R en alpacas negras y marrones. <i>Revista Peruana De Biología</i> , 2021, 28, e19742.	0.1	2
4	Genetic parameters for uniformity of harvest weight in Pacific white shrimp (<i>Litopenaeus vannamei</i>). <i>Genetics Selection Evolution</i> , 2021, 53, 26.	1.2	3
5	Breeding Strategies to Optimize Effective Population Size in Low Census Captive Populations: The Case of <i>Gazella cuvieri</i> . <i>Animals</i> , 2021, 11, 1559.	1.0	2
6	Colorimetry analysis of coat color and its relationship with fiber traits in alpacas. <i>Animal</i> , 2021, 15, 100219.	1.3	5
7	Impact of the event effect in genetic evaluation for ranking traits in horses. <i>Journal of Animal Breeding and Genetics</i> , 2021, , .	0.8	1
8	ssGBLUP Method Improves the Accuracy of Breeding Value Prediction in Huacaya Alpaca. <i>Animals</i> , 2021, 11, 3052.	1.0	10
9	Genetic (co)variance across age of fiber diameter and standard deviation in Huacaya alpacas, estimated by repeatability, multi-trait and random regression models. <i>Livestock Science</i> , 2020, 231, 103863.	0.6	2
10	Selection Response in a Divergent Selection Experiment for Birth Weight Variability in Mice Compared with a Control Line. <i>Animals</i> , 2020, 10, 920.	1.0	6
11	Combining Threshold, Thurstonian and Classical Linear Models in Horse Genetic Evaluations for Endurance Competitions. <i>Animals</i> , 2020, 10, 1075.	1.0	4
12	Challenging the selection for consistency in the rank of endurance competitions. <i>Genetics Selection Evolution</i> , 2020, 52, 20.	1.2	4
13	Calving date and its variability as a potential trait in the breeding objective to account for reproductive seasonality in alpacas. <i>Reproduction in Domestic Animals</i> , 2020, 55, 814-821.	0.6	2
14	Análisis del pedigr�en diez poblaciones mexicanas de ovinos. <i>Revista Mexicana De Ciencias Pecuarias</i> , 2020, 11, 1071-1086.	0.1	3
15	Effect of feed restriction on the environmental variability of birth weight in divergently selected lines of mice. <i>Genetics Selection Evolution</i> , 2019, 51, 27.	1.2	8
16	Genetic and phenotypic aspects of early reproductive performance in Raeini Cashmere goats. <i>Tropical Animal Health and Production</i> , 2019, 51, 2175-2180.	0.5	5
17	The Statistical Scale Effect as a Source of Positive Genetic Correlation Between Mean and Variability: A Simulation Study. <i>G3: Genes, Genomes, Genetics</i> , 2019, 9, 3001-3008.	0.8	9
18	Genetic parameters for medullated fiber and its relationship with other productive traits in alpacas. <i>Animal</i> , 2019, 13, 1358-1364.	1.3	13

#	ARTICLE	IF	CITATIONS
19	Variabilidad fenotípica del porcentaje de fibras meduladas en el vellón de alpaca Huacaya. Revista De Investigaciones Veterinarias Del Peru, 2019, 30, 699-708.	0.0	6
20	Heritability of individual fiber medullation in Peruvian alpacas. Small Ruminant Research, 2018, 165, 93-100.	0.6	15
21	Cross-validation analysis for genetic evaluation models for ranking in endurance horses. Animal, 2018, 12, 20-27.	1.3	12
22	Feed and reproductive efficiency differences between divergently selected lines for birthweight environmental variability in mice. Journal of Animal Breeding and Genetics, 2018, 135, 378-389.	0.8	6
23	Effect of the gestation and lactation on fiber diameter and its variability in Peruvian alpacas. Livestock Science, 2017, 198, 31-36.	0.6	10
24	Genetic parameters estimation for preweaning traits and their relationship with reproductive, productive and morphological traits in alpaca. Animal, 2017, 11, 746-754.	1.3	19
25	Designing an early selection morphological linear traits index for dressage in the Pura Raza Española horse. Animal, 2017, 11, 948-957.	1.3	29
26	The influence of natural selection in breeding programs: A simulation study. Livestock Science, 2017, 204, 98-103.	0.6	4
27	Modulating birth weight heritability in mice. Journal of Animal Science, 2017, 95, 531-537.	0.2	16
28	Equivalent effective population size mating as a useful tool in the genetic management of the Ibicenco rabbit breed (Conill Pages d'Eivissa). Czech Journal of Animal Science, 2016, 61, 108-116.	0.5	11
29	Crossbreed genetic performance study in the eventing horse competition. Animal Production Science, 2016, 56, 1454.	0.6	3
30	Response to selection while maximizing genetic variance in small populations. Genetics Selection Evolution, 2016, 48, 69.	1.2	17
31	Correlated genetic trends for production and welfare traits in a mouse population divergently selected for birth weight environmental variability. Animal, 2016, 10, 1770-1777.	1.3	19
32	Genetic control of the environmental variance for birth weight in seven generations of a divergent selection experiment in mice. Journal of Animal Breeding and Genetics, 2016, 133, 227-237.	0.8	30
33			

#	ARTICLE	IF	CITATIONS
37	Weighting fibre and morphological traits in a genetic index for an alpaca breeding programme. <i>Animal</i> , 2014, 8, 360-369.	1.3	18
38	Modelling genetic evaluation for dressage in Pura Raza Española horses with focus on the rider effect. <i>Journal of Animal Breeding and Genetics</i> , 2014, 131, 395-402.	0.8	25
39	Association of microsatellite markers with fiber diameter trait in Peruvian alpacas (<i>Vicugna pacos</i>). <i>Livestock Science</i> , 2014, 161, 6-16.	0.6	16
40	Pedigree analysis of Iran-Black sheep and inbreeding effects on growth and reproduction traits. <i>Small Ruminant Research</i> , 2014, 116, 14-20.	0.6	40
41	Assessment of population structure depending on breeding objectives in Spanish Arabian horse by genealogical and molecular information. <i>Livestock Science</i> , 2014, 168, 9-16.	0.6	5
42	Estimates of direct and indirect effects for early juvenile survival in captive populations maintained for conservation purposes: the case of Cuvier's gazelle. <i>Ecology and Evolution</i> , 2014, 4, 4117-4129.	0.8	8
43	Estimation of genetic parameters for morphological and functional traits in a Menorca horse population. <i>Spanish Journal of Agricultural Research</i> , 2014, 12, 125.	0.3	12
44	Genetic variability characterization of the moroccan houbara bustard (<i>Chlamydotis undulata</i>) Tj ETQq0 0 0 rgBT/Overlock_10 Tf 50 4	0.5	3
45	Genetic diversity in Kermani sheep assessed from pedigree analysis. <i>Small Ruminant Research</i> , 2013, 114, 202-205.	0.6	14
46	Genetic parameters for birthweight environmental variability in mice. <i>Journal of Animal Breeding and Genetics</i> , 2013, 130, 404-414.	0.8	14
47	Association between body and udder morphological traits and dairy performance in Spanish Assaf sheep. <i>Archives Animal Breeding</i> , 2013, 56, 430-442.	0.5	10
48	Pedigree analysis and inbreeding depression on growth traits in Brazilian Marchigiana and Bonsmara breeds1. <i>Journal of Animal Science</i> , 2012, 90, 99-108.	0.2	37
49	Correlated genetic trend in the environmental variability of weight traits in mice. <i>Livestock Science</i> , 2012, 148, 189-195.	0.6	9
50	Cytoplasmic line effects for birth weight and preweaning growth traits in the Asturiana de los Valles beef cattle breed. <i>Livestock Science</i> , 2012, 143, 177-183.	0.6	7
51	Estimation of effective population size from the rate of coancestry in pedigreed populations. <i>Journal of Animal Breeding and Genetics</i> , 2011, 128, 56-63.	0.8	109
52	Restricting inbreeding while maintaining selection response for weight gain in <i>Mus musculus</i> . <i>Journal of Animal Breeding and Genetics</i> , 2011, 128, 276-283.	0.8	5
53	Multivariate characterisation of morphological traits in Assaf (Assaf.E) sheep. <i>Small Ruminant Research</i> , 2011, 100, 122-130.	0.6	29
54	Computing effective population size from molecular data: The case of three rare Spanish ruminant populations. <i>Livestock Science</i> , 2011, 138, 202-206.	0.6	14

#	ARTICLE	IF	CITATIONS
55	Influence of foreign breeds on the genetic structure of the Spanish Sport Horse population. <i>Livestock Science</i> , 2011, 142, 70-79.	0.6	26
56	Genetic parameters for growth of fiber diameter in alpacas ¹ . <i>Journal of Animal Science</i> , 2011, 89, 2310-2315.	0.2	18
57	Producing alpaca fibre for the textile industry. , 2011, , 35-40.		0
58	Pedigree estimation of the (sub) population contribution to the total gene diversity: the horse coat colour case. <i>Animal</i> , 2010, 4, 867-875.	1.3	15
59	Genetic parameters and relationships between fibre and type traits in two breeds of Peruvian alpacas. <i>Small Ruminant Research</i> , 2010, 88, 6-11.	0.6	29
60	Multiple paternal origins of domestic cattle revealed by Y-specific interspersed multilocus microsatellites. <i>Heredity</i> , 2010, 105, 511-519.	1.2	50
61	Genetic relationships among calving ease, gestation length, and calf survival to weaning in the Asturiana de los Valles beef cattle breed ¹ . <i>Journal of Animal Science</i> , 2010, 88, 96-101.	0.2	39
62	Analysis of the existence of major genes affecting alpaca fiber traits ¹ . <i>Journal of Animal Science</i> , 2010, 88, 3783-3788.	0.2	16
63	Assessment of inbreeding depression in a Guzerat dairy herd: Effects of individual increase in inbreeding coefficients on production and reproduction. <i>Journal of Dairy Science</i> , 2010, 93, 4902-4912.	1.4	29
64	Quantifying diversity losses due to selection for scrapie resistance in three endangered Spanish sheep breeds using microsatellite information. <i>Preventive Veterinary Medicine</i> , 2009, 91, 172-178.	0.7	14
65	Genealogical analyses in open populations: the case of three Arab-derived Spanish horse breeds. <i>Journal of Animal Breeding and Genetics</i> , 2009, 126, 335-347.	0.8	30
66	Improving the estimation of realized effective population sizes in farm animals. <i>Journal of Animal Breeding and Genetics</i> , 2009, 126, 327-332.	0.8	173
67	Assessment of inbreeding depression for body measurements in Spanish Purebred (Andalusian) horses. <i>Livestock Science</i> , 2009, 122, 149-155.	0.6	54
68	Genetic characterisation of Burkina Faso goats using microsatellite polymorphism. <i>Livestock Science</i> , 2009, 123, 322-328.	0.6	37
69	Genetic analysis of six production traits in Peruvian alpacas. <i>Livestock Science</i> , 2009, 123, 193-197.	0.6	28
70	Size and shape analysis of morphofunctional traits in the Spanish Arab horse. <i>Livestock Science</i> , 2009, 125, 43-49.	0.6	42
71	Application of individual increase in inbreeding to estimate realized effective sizes from real pedigrees. <i>Journal of Animal Breeding and Genetics</i> , 2008, 125, 301-310.	0.8	86
72	Individual increase in inbreeding allows estimating effective sizes from pedigrees. <i>Genetics Selection Evolution</i> , 2008, 40, 359-78.	1.2	139

#	ARTICLE	IF	CITATIONS
73	Genetic relationships between Spanish Assaf (Assaf.E) and Spanish native dairy sheep breeds. <i>Small Ruminant Research</i> , 2008, 80, 39-44.	0.6	31
74	Population history and genetic variability in the Spanish Arab Horse assessed via pedigree analysis. <i>Livestock Science</i> , 2008, 113, 24-33.	0.6	60
75	Relationship between genealogical and microsatellite information characterizing losses of genetic variability: Empirical evidence from the rare Xalda sheep breed. <i>Livestock Science</i> , 2008, 115, 80-88.	0.6	38
76	Altered lymphocyte homeostasis after oral prion infection in mouse. <i>Veterinary Immunology and Immunopathology</i> , 2008, 122, 204-215.	0.5	1
77	Genetic parameters related to environmental variability of weight traits in a selection experiment for weight gain in mice; signs of correlated canalised response. <i>Genetics Selection Evolution</i> , 2008, 40, 279-293.	1.2	30
78	Genetic variability in the endangered AsturcÃ³n pony assessed using genealogical and molecular information. <i>Livestock Science</i> , 2007, 107, 162-169.	0.6	36
79	Genetic diversity loss due to selection for scrapie resistance in the rare Spanish Xalda sheep breed. <i>Livestock Science</i> , 2007, 111, 204-212.	0.6	16
80	Inbreeding Depression on Female Fertility and Calving Ease in Spanish Dairy Cattle. <i>Journal of Dairy Science</i> , 2007, 90, 5744-5752.	1.4	118
81	Genetic relationships among calving ease, calving interval, birth weight, and weaning weight in the Asturiana de los Valles beef cattle breed ¹ . <i>Journal of Animal Science</i> , 2007, 85, 69-75.	0.2	39
82	Genetic parameters affecting 180-days standardised milk yield, test-day milk yield and lactation length in Spanish Assaf (Assaf.E) dairy sheep. <i>Small Ruminant Research</i> , 2007, 70, 233-238.	0.6	24
83	Genetic parameters for canalisation analysis of litter size and litter weight traits at birth in mice. <i>Genetics Selection Evolution</i> , 2006, 38, 445-62.	1.2	60
84	Pedigree information reveals moderate to high levels of inbreeding and a weak population structure in the endangered Catalanian donkey breed. <i>Journal of Animal Breeding and Genetics</i> , 2005, 122, 378-386.	0.8	51
85	A note on ENDOG: a computer program for analysing pedigree information. <i>Journal of Animal Breeding and Genetics</i> , 2005, 122, 172-176.	0.8	394
86	Genetic analysis of days open in beef cattle. <i>Livestock Science</i> , 2005, 93, 283-289.	1.2	26
87	Pedigree analysis in the Andalusian horse: population structure, genetic variability and influence of the Carthusian strain. <i>Livestock Science</i> , 2005, 95, 57-66.	1.2	121
88	Testing the usefulness of the molecular coancestry information to assess genetic relationships in livestock using a set of Spanish sheep breeds ¹ . <i>Journal of Animal Science</i> , 2005, 83, 737-744.	0.2	45
89	The Origins of Iberian Horses Assessed via Mitochondrial DNA. <i>Journal of Heredity</i> , 2005, 96, 663-669.	1.0	52
90	MolKin v2.0: A Computer Program for Genetic Analysis of Populations Using Molecular Coancestry Information. <i>Journal of Heredity</i> , 2005, 96, 718-721.	1.0	166

#	ARTICLE	IF	CITATIONS
91	Genetic relationships and admixture among sheep breeds from Northern Spain assessed using microsatellites1. <i>Journal of Animal Science</i> , 2004, 82, 2246-2252.	0.2	75
92	Genetic analysis of calf survival at different preweaning ages in beef cattle. <i>Livestock Science</i> , 2003, 83, 13-20.	1.2	30
93	Using pedigree information to monitor genetic variability of endangered populations: the Xalda sheep breed of Asturias as an example. <i>Journal of Animal Breeding and Genetics</i> , 2003, 120, 95-105.	0.8	136
94	Factors affecting actual weaning weight, preweaning average daily gain and relative growth rate in Asturiana de los Valles beef cattle breed. <i>Archives Animal Breeding</i> , 2003, 46, 235-243.	0.5	17
95	Genetic relationships between calving date, calving interval, age at first calving and type traits in beef cattle. <i>Livestock Science</i> , 2002, 78, 215-222.	1.2	66
96	Estimation of genetic parameters of type traits in Asturiana de los Valles beef cattle breed. <i>Journal of Animal Breeding and Genetics</i> , 2002, 119, 93-100.	0.8	34
97	Testing a continuous variation in preweaning expression of muscular hypertrophy in beef cattle using field data. <i>Archives Animal Breeding</i> , 2002, 45, 139-149.	0.5	3
98	Direct and correlated selection response for litter size and litter weight at birth in the first parity in mice. <i>Livestock Science</i> , 1998, 53, 217-223.	1.2	9
99	Estimation of direct and maternal genetic parameters for preweaning traits in the Asturiana de los Valles beef cattle breed through animal and sire models. <i>Journal of Animal Breeding and Genetics</i> , 1997, 114, 261-266.	0.8	29
100	Comparison of two models for estimation of variance components in a sample of Spanish Holstein Friesians. <i>Journal of Animal Breeding and Genetics</i> , 1994, 111, 169-174.	0.8	3
