citing authors

#	ARTICLE	IF	CITATIONS
1	Obesity as a premature aging phenotype â€” implications for sarcopenic obesity. <i>GeroScience</i> , 2022, 44, 1393-1405.	4.6	22
2	Aging is associated with glial senescence in the brainstem - implications for age-related sympathetic overactivity. <i>Aging</i> , 2021, 13, 13460-13473.	3.1	6
3	Senescenceâ€Associated Secretary Phenotype (SASP) factors downâ€regulate glutamate transporter expression in human brainstem astrocytes through a paracrine fashion. <i>FASEB Journal</i> , 2021, 35, .	0.5	0
4	Obesity-induced sympathoexcitation is associated with Nrf2 dysfunction in the rostral ventrolateral medulla. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2020, 318, R435-R444.	1.8	13
5	Non-invasive vagus nerve stimulation attenuates proinflammatory cytokines and augments antioxidant levels in the brainstem and forebrain regions of Dahl salt sensitive rats. <i>Scientific Reports</i> , 2020, 10, 17576.	3.3	10
6	Obesityâ€Induced Sympathoexcitation is Associated with Glial Senescence in the Brainstem. <i>FASEB Journal</i> , 2020, 34, 1-1.	0.5	0
7	Oxidative Stressâ€Induced Senescence Alters Glutamate Transporter Expression in Human Brainstem Astrocytes. <i>FASEB Journal</i> , 2020, 34, 1-1.	0.5	3
8	Ageâ€Related Sympathetic Dysregulation is Associated with Glial Senescence in the Brainstem. <i>FASEB Journal</i> , 2020, 34, 1-1.	0.5	0
9	Sympathetic nervous system as a target for aging and obesity-related cardiovascular diseases. <i>GeroScience</i> , 2019, 41, 13-24.	4.6	63
10	Abstract 135: Cellular Senescence in the Paraventricular Nucleus - Novel Implications for Obesity-Induced Sympathoexcitation. <i>Hypertension</i> , 2019, 74, .	2.7	1
11	Chronic estrogen affects TIDA neurons through IL-1 β and NO: effects of aging. <i>Journal of Endocrinology</i> , 2019, 240, 157-167.	2.6	3
12	Cellular Senescence in the Rostral Ventrolateral Medulla (RVLM) â€” Novel Implications for Obesityâ€Induced Sympathoexcitation. <i>FASEB Journal</i> , 2019, 33, 563.3.	0.5	2
13	Nrf2 Dysfunction in the RVLM is Associated with Obesityâ€Induced Sympathoexcitation. <i>FASEB Journal</i> , 2019, 33, .	0.5	0
14	Cellular Senescence in the Brainstem: Implications for Ageâ€Related Sympathetic Nervous System Dysregulation. <i>FASEB Journal</i> , 2019, 33, 561.5.	0.5	0
15	Chronic Estradiol exposure-harmful effects on behavior, cardiovascular and reproductive functions. <i>Reproduction</i> , 2018, 156, R169-R186.	2.6	5
16	Altered Differential Control of Sympathetic Outflow Following Sedentary Conditions: Role of Subregional Neuroplasticity in the RVLM. <i>Frontiers in Physiology</i> , 2016, 7, 290.	2.8	13
17	Rostrocaudal changes in the protein expression of NMDA receptor subunits within the rostral ventrolateral medulla of sedentary and active rats (875.12). <i>FASEB Journal</i> , 2014, 28, 875.12.	0.5	1
18	Gene expression of NMDA receptor subunits using laser capture microdissection in the rostral ventrolateral medulla (RVLM) of sedentary versus physically active rats.. <i>FASEB Journal</i> , 2013, 27, 1118.24.	0.5	0

#	ARTICLE	IF	CITATIONS
19	Differential pattern of splanchnic and lumbar sympathetic nerve activity to stimulation of rostral ventrolateral medulla in sedentary versus physically active rats. FASEB Journal, 2012, 26, 1091.57.	0.5	0
20	Chronic exposure to estradiol ¹⁷ (E2) causes hypertension in female rats: Role of IL ¹ and norepinephrine. FASEB Journal, 2010, 24, 809.9.	0.5	0
21	Resveratrol reverses estrogen-induced hypertension in female rats. FASEB Journal, 2009, 23, 933.1.	0.5	0
