

Gangcheng Wu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1711271/gangcheng-wu-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

34
papers

424

#	Paper	IF	Citations
34	Effect of palm stearin on the physicochemical characterization and capsaicinoid digestion of Sichuan hotpot oil. <i>Food Chemistry</i> , 2022 , 371, 131167	8.5	2
33	Effect of moderate electric field on the quality, microstructure and oil absorption behavior of potato strips during deep-fat frying. <i>Journal of Food Engineering</i> , 2022 , 313, 110751	6	0
32	Relationship between the microstructure and physical properties of emulsifier based oleogels and cookies quality.. <i>Food Chemistry</i> , 2021 , 377, 131966	8.5	2
31	Influence of Prolonged Deep-Frying Using Various Oils on Volatile Compounds Formation of French Fries Using GCMS, GC-O, and Sensory Evaluation. <i>JAOCS, Journal of the American Oil Chemistsw Society</i> , 2021 , 98, 657-671	1.8	2
30	Preparation of crocin nanocomplex in order to increase its physical stability. <i>Food Hydrocolloids</i> , 2021 , 120, 106415	10.6	4
29	Identification and characterisation of bioactive compounds from the seed kernels and hulls of <i>Paeonia lactiflora</i> Pall by UPLC-QTOF-MS. <i>Food Research International</i> , 2021 , 139, 109916	7	5
28	Quality Characteristics and Antioxidant Activity during Fruit Ripening of Three Monovarietal Olive Oils Cultivated in China. <i>JAOCS, Journal of the American Oil Chemistsw Society</i> , 2021 , 98, 229-240	1.8	5
27	Chemical and volatile characteristics of olive oils extracted from four varieties grown in southwest of China. <i>Food Research International</i> , 2021 , 140, 109987	7	6
26	Roles of gelator type and gelation technology on texture and sensory properties of cookies prepared with oleogels. <i>Food Chemistry</i> , 2021 , 356, 129667	8.5	15
25	A Comparative Study of Physicochemical and Flavor Characteristics of Chicken Nuggets during Air Frying and Deep Frying. <i>JAOCS, Journal of the American Oil Chemistsw Society</i> , 2020 , 97, 901-913	1.8	2
24	Individual and combined effects of frying load and deteriorated polar compounds on the foaming of edible oil. <i>Food Research International</i> , 2020 , 134, 109206	7	3
23	Effect of multistage process on the quality, water and oil distribution and microstructure of French fries. <i>Food Research International</i> , 2020 , 137, 109229	7	11
22	Effect of different processing methods on physicochemical properties, chemical compositions and in vitro antioxidant activities of <i>Paeonia lactiflora</i> Pall seed oils. <i>Food Chemistry</i> , 2020 , 332, 127408	8.5	10
21	Structural characterization and antioxidant activity of condensed tannins fractionated from sorghum grain. <i>Journal of Cereal Science</i> , 2020 , 92, 102918	3.8	9
20	The soy protein isolate-Octacosanol-polysaccharides nanocomplex for enhanced physical stability in neutral conditions: Fabrication, characterization, thermal stability. <i>Food Chemistry</i> , 2020 , 322, 126638	8.5	12
19	Kinetic models to understand the coexistence of formation and decomposition of hydroperoxide during lipid oxidation. <i>Food Research International</i> , 2020 , 136, 109314	7	5
18	Effectiveness of the rapid test of polar compounds in frying oils as a function of environmental and compositional variables under restaurant conditions. <i>Food Chemistry</i> , 2020 , 312, 126041	8.5	6

17	Quality and Composition of Virgin Olive Oils from Indigenous and European Cultivars Grown in China. <i>JAOCS, Journal of the American Oil Chemists Society</i> , 2020 , 97, 341-353	1.8	9
16	Analysis of quality and microstructure of freshly potato strips fried with different oils. <i>LWT - Food Science and Technology</i> , 2020 , 133, 110038	5.4	7
15	Deep-fried flavor: characteristics, formation mechanisms, and influencing factors. <i>Critical Reviews in Food Science and Nutrition</i> , 2020 , 60, 1496-1514	11.5	30
14	Investigation the molecular degradation, starch-lipid complexes formation and pasting properties of wheat starch in instant noodles during deep-frying treatment. <i>Food Chemistry</i> , 2019 , 283, 287-293	8.5	26
13	The characterization and stability of the soy protein isolate/1-Octacosanol nanocomplex. <i>Food Chemistry</i> , 2019 , 297, 124766	8.5	12
12	Model prediction of color reversion of soybean oil and its quantitative relationship with oxidation under accelerated conditions. <i>LWT - Food Science and Technology</i> , 2019 , 111, 270-277	5.4	2
11	Comparative analysis of the oil absorption behavior and microstructural changes of fresh and pre-frozen potato strips during frying via MRL, SEM, and XRD. <i>Food Research International</i> , 2019 , 122, 295-302	7	24
10	Influence of fried food and oil type on the distribution of polar compounds in discarded oil during restaurant deep frying. <i>Food Chemistry</i> , 2019 , 272, 12-17	8.5	36
9	Identification and characterization of polyphenols in different varieties of <i>Camellia oleifera</i> seed cakes by UPLC-QTOF-MS. <i>Food Research International</i> , 2019 , 126, 108614	7	10
8	Rapid Measuring Flavor Quality Changes of Frying Rapeseed Oils using a Flash Gas Chromatography Electronic Nose. <i>European Journal of Lipid Science and Technology</i> , 2019 , 121, 1800260	3	12
7	Comparative study of chemical compositions and antioxidant capacities of oils obtained from two species of walnut: <i>Juglans regia</i> and <i>Juglans sigillata</i> . <i>Food Chemistry</i> , 2019 , 279, 279-287	8.5	44
6	Oxidation degree of soybean oil at induction time point under Rancimat test condition: Theoretical derivation and experimental observation. <i>Food Research International</i> , 2019 , 120, 756-762	7	17
5	Chemical Compositions of Walnut (<i>Juglans regia</i> L.) Oils from Different Cultivated Regions in China. <i>JAOCS, Journal of the American Oil Chemists Society</i> , 2018 , 95, 825-834	1.8	19
4	Comparison of Different Processing Methods of Iron Walnut Oils (<i>Juglans sigillata</i>): Lipid Yield, Lipid Compositions, Minor Components, and Antioxidant Capacity. <i>European Journal of Lipid Science and Technology</i> , 2018 , 120, 1800151	3	14
3	Determination of Key Active Components in Different Edible Oils Affecting Lipid Accumulation and Reactive Oxygen Species Production in HepG2 Cells. <i>Journal of Agricultural and Food Chemistry</i> , 2018 , 66, 11943-11956	5.7	13
2	Effect of frying conditions on fatty acid profile and total polar materials via viscosity. <i>Journal of Food Engineering</i> , 2015 , 166, 349-355	6	33
1	Influence of deep-frying using various commercial oils on acrylamide formation in French fries. <i>Food Additives and Contaminants - Part A Chemistry, Analysis, Control, Exposure and Risk Assessment</i> , 2015 , 32, 1083-8	3.2	15
