#	ARTICLE	IF	CITATIONS
1	Day-ahead short-term load probability density forecasting method with a decomposition-based quantile regression forest. <i>Applied Energy</i> , 2020, 262, 114396.	10.1	70
2	Dynamic programming with successive approximation and relaxation strategy for long-term joint power generation scheduling of large-scale hydropower station group. <i>Energy</i> , 2021, 222, 119960.	8.8	29
3	System dynamics model for the coevolution of coupled water supply–power generation–environment systems: Upper Yangtze river Basin, China. <i>Journal of Hydrology</i> , 2021, 593, 125892.	5.4	27
4	A hybrid wind speed forecasting model based on a decomposition method and an improved regularized extreme learning machine. <i>Energy Procedia</i> , 2019, 158, 217-222.	1.8	23
5	Long-term joint scheduling of hydropower station group in the upper reaches of the Yangtze River using partition parameter adaptation differential evolution. <i>Engineering Applications of Artificial Intelligence</i> , 2019, 81, 1-13.	8.1	21
6	Risk analysis of water supply-hydropower generation-environment nexus in the cascade reservoir operation. <i>Journal of Cleaner Production</i> , 2021, 283, 124239.	9.3	20
7	Long-Term Scheduling of Large-Scale Cascade Hydropower Stations Using Improved Differential Evolution Algorithm. <i>Water (Switzerland)</i> , 2018, 10, 383.	2.7	19
8	Integrated scheduling of hydro, thermal and wind power with spinning reserve. <i>Energy Procedia</i> , 2019, 158, 6302-6308.	1.8	18
9	Evaluating typical flood risks in Yangtze River Economic Belt: application of a flood risk mapping framework. <i>Natural Hazards</i> , 2018, 94, 1187-1210.	3.4	17
10	Multiobjective Reservoir Operation Optimization Using Improved Multiobjective Dynamic Programming Based on Reference Lines. <i>IEEE Access</i> , 2019, 7, 103473-103484.	4.2	17
11	Deriving Operating Rules of Hydropower Reservoirs Using Gaussian Process Regression. <i>IEEE Access</i> , 2019, 7, 158170-158182.	4.2	15
12	Study on guaranteed output constraints in the long term joint optimal scheduling for the hydropower station group. <i>Energy</i> , 2019, 185, 1210-1224.	8.8	13
13	A fast water level optimal control method based on two stage analysis for long term power generation scheduling of hydropower station. <i>Energy</i> , 2020, 210, 118531.	8.8	11
14	Hydrological Uncertainty Processor (HUP) with Estimation of the Marginal Distribution by a Gaussian Mixture Model. <i>Water Resources Management</i> , 2019, 33, 2975-2990.	3.9	10
15	Identifying Efficient Operating Rules for Hydropower Reservoirs Using System Dynamics Approach—A Case Study of Three Gorges Reservoir, China. <i>Water (Switzerland)</i> , 2019, 11, 2448.	2.7	10
16	Causal Inference of Optimal Control Water Level and Inflow in Reservoir Optimal Operation Using Fuzzy Cognitive Map. <i>Water (Switzerland)</i> , 2019, 11, 2147.	2.7	7
17	An Efficient Optimization Method for Long-term Power Generation Scheduling of Hydropower Station: Improved Dynamic Programming with a Relaxation Strategy. <i>Water Resources Management</i> , 2022, 36, 1481-1497.	3.9	4
18	Self-optimization system dynamics simulation of reservoir operating rules. <i>MATEC Web of Conferences</i> , 2018, 246, 01013.	0.2	3

#	ARTICLE	IF	CITATIONS
19	A construction method of water conservancy model library based on Microservice. IOP Conference Series: Materials Science and Engineering, 2020, 794, 012001.	0.6	1
20	A Hydrologic Uncertainty Processor Using Linear Derivation in the Normal Quantile Transform Space. Water Resources Management, 2020, 34, 3649-3665.	3.9	1
21	Optimization dispatch rule of the Three Gorges Reservoir considering ecological and power generation benefit. MATEC Web of Conferences, 2018, 246, 01075.	0.2	0
