#	ARTICLE	IF	CITATIONS
1	Cancer statistics in China, 2015. <i>Ca-A Cancer Journal for Clinicians</i> , 2016, 66, 115-132.	157.7	14,374
2	Changing cancer survival in China during 2003â€“15: a pooled analysis of 17 population-based cancer registries. <i>The Lancet Global Health</i> , 2018, 6, e555-e567.	2.9	907
3	Cancer survival in China, 2003â€“2005: A population-based study. <i>International Journal of Cancer</i> , 2015, 136, 1921-1930.	2.3	585
4	Remoteness of residence and survival from cancer in New South Wales. <i>Medical Journal of Australia</i> , 2004, 180, 618-622.	0.8	161
5	The spectrum of human immunodeficiency virus-associated cancers in a South African black population: Results from a caseâ€“control study, 1995â€“2004. <i>International Journal of Cancer</i> , 2008, 122, 2260-2265.	2.3	127
6	Prognosis for patients with thin cutaneous melanoma. <i>Cancer</i> , 2003, 98, 1223-1231.	2.0	121
7	Socioeconomic disparities in breast cancer survival: relation to stage at diagnosis, treatment and race. <i>BMC Cancer</i> , 2009, 9, 364.	1.1	109
8	Cancer deaths and cases attributable to lifestyle factors and infections in China, 2013. <i>Annals of Oncology</i> , 2017, 28, 2567-2574.	0.6	101
9	Assessing the impact of socio-economic status on cancer survival in New South Wales, Australia 1996â€“2001. <i>Cancer Causes and Control</i> , 2008, 19, 1383-1390.	0.8	94
10	Trends in Colon and Rectal Cancer Incidence in Australia from 1982 to 2014: Analysis of Data on Over 375,000 Cases. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2019, 28, 83-90.	1.1	81
11	Conditional survival of cancer patients: an Australian perspective. <i>BMC Cancer</i> , 2012, 12, 460.	1.1	65
12	Cancer survival in New South Wales, Australia: socioeconomic disparities remain despite overall improvements. <i>BMC Cancer</i> , 2016, 16, 48.	1.1	62
13	Geographic variation in prostate cancer survival in New South Wales. <i>Medical Journal of Australia</i> , 2014, 200, 586-590.	0.8	48
14	Changes in smoking prevalence among U.S. adults by state and region: Estimates from the Tobacco Use Supplement to the Current Population Survey, 1992-2007. <i>BMC Public Health</i> , 2011, 11, 512.	1.2	47
15	The relationship between anti-HPV-16 IgG seropositivity and cancer of the cervix, anogenital organs, oral cavity and pharynx, oesophagus and prostate in a black South African population. <i>Infectious Agents and Cancer</i> , 2007, 2, 6.	1.2	44
16	Trends in prognostic factors and survival from cutaneous melanoma in Yorkshire, UK and New South Wales, Australia between 1993 and 2003. <i>International Journal of Cancer</i> , 2008, 123, 861-866.	2.3	43
17	Lung cancer treatment is influenced by income, education, age and place of residence in a country with universal health coverage. <i>International Journal of Cancer</i> , 2016, 138, 1350-1360.	2.3	41
18	Estimating the proportion cured of cancer: Some practical advice for users. <i>Cancer Epidemiology</i> , 2013, 37, 836-842.	0.8	40

#	ARTICLE	IF	CITATIONS
19	Geographic Disparities in Prostate Cancer Outcomes - Review of International Patterns. <i>Asian Pacific Journal of Cancer Prevention</i> , 2015, 16, 1259-1275.	0.5	39
20	Cancer incidence and mortality in Australia from 2020 to 2044 and an exploratory analysis of the potential effect of treatment delays during the COVID-19 pandemic: a statistical modelling study. <i>Lancet Public Health</i> , The, 2022, 7, e537-e548.	4.7	38
21	Systematic review and meta-analysis of residential radon and lung cancer in never-smokers. <i>European Respiratory Review</i> , 2021, 30, 200230.	3.0	36
22	Trends in survival and excess risk of death after diagnosis of cancer in 1980-1996 in New South Wales, Australia. <i>International Journal of Cancer</i> , 2006, 119, 894-900.	2.3	33
23	A population-based study from New South Wales, Australia 1996-2001: Area variation in survival from colorectal cancer. <i>European Journal of Cancer</i> , 2005, 41, 2715-2721.	1.3	32
24	Temporal trends show improved breast cancer survival in Australia but widening urban-rural differences. <i>Breast</i> , 2015, 24, 524-527.	0.9	32
25	Utilizing national patient-register data to control for comorbidity in prognostic studies. <i>Clinical Epidemiology</i> , 2014, 6, 395.	1.5	28
26	Estimating Regional Variation in Cancer Survival: A Tool for Improving Cancer Care. <i>Cancer Causes and Control</i> , 2004, 15, 611-618.	0.8	26
27	Validity of using multiple imputation for "unknown" stage at diagnosis in population-based cancer registry data. <i>PLoS ONE</i> , 2017, 12, e0180033.	1.1	26
28	Estimating prevalence of distant metastatic breast cancer: a means of filling a data gap. <i>Cancer Causes and Control</i> , 2012, 23, 1625-1634.	0.8	24
29	Increased risk of suicide in New South Wales men with prostate cancer: Analysis of linked population-wide data. <i>PLoS ONE</i> , 2018, 13, e0198679.	1.1	24
30	Evaluating Prognostic Factors for Sex Differences in Lung Cancer Survival: Findings From a Large Australian Cohort. <i>Journal of Thoracic Oncology</i> , 2022, 17, 688-699.	0.5	24
31	Lung cancer mortality in Australia: Projected outcomes to 2040. <i>Lung Cancer</i> , 2018, 125, 68-76.	0.9	21
32	Statistical projection methods for lung cancer incidence and mortality: a systematic review. <i>BMJ Open</i> , 2019, 9, e028497.	0.8	21
33	Cancer incidence and mortality in people aged less than 75 years: Changes in Australia over the period 1987-2007. <i>Cancer Epidemiology</i> , 2013, 37, 780-787.	0.8	20
34	A population-based study of progression to metastatic prostate cancer in Australia. <i>Cancer Epidemiology</i> , 2015, 39, 617-622.	0.8	20
35	Characteristics of cases with unknown stage prostate cancer in a population-based cancer registry. <i>Cancer Epidemiology</i> , 2013, 37, 813-819.	0.8	18
36	A population-based study of breast cancer prevalence in Australia: predicting the future health care needs of women living with breast cancer. <i>BMC Cancer</i> , 2014, 14, 936.	1.1	18

#	ARTICLE	IF	CITATIONS
37	Impact of geographic area level on measuring socioeconomic disparities in cancer survival in New South Wales, Australia: A period analysis. <i>Cancer Epidemiology</i> , 2016, 43, 56-62.	0.8	18
38	Lung cancer mortality in Australia in the twenty-first century: How many lives can be saved with effective tobacco control?. <i>Lung Cancer</i> , 2019, 130, 208-215.	0.9	16
39	Misclassification of colorectal cancer stage and area variation in survival. <i>International Journal of Cancer</i> , 2008, 122, 398-402.	2.3	15
40	Improved survival for non-Hodgkin lymphoma patients in New South Wales, Australia. <i>BMC Cancer</i> , 2010, 10, 231.	1.1	14
41	Temporal Trends in Geographical Variation in Breast Cancer Mortality in China, 1973â€“2005: An Analysis of Nationwide Surveys on Cause of Death. <i>International Journal of Environmental Research and Public Health</i> , 2016, 13, 963.	1.2	14
42	>Socioeconomic correlates of mortality differentials by Local Government Area in rural northern New South Wales, 1981-1995. <i>Australian and New Zealand Journal of Public Health</i> , 2000, 24, 365-369.	0.8	13
43	Cancer burden in China: a Bayesian approach. <i>BMC Cancer</i> , 2013, 13, 458.	1.1	13
44	Contrasting temporal trends in lung cancer incidence by socioeconomic status among women in New South Wales, Australia, 1985â€“2009. <i>Lung Cancer</i> , 2017, 108, 55-61.	0.9	12
45	Temporal Trends in Population-Level Cure of Cancer: The Australian Context. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2020, 29, 625-635.	1.1	12
46	Prostate cancer prevalence in New South Wales Australia: A population-based study. <i>Cancer Epidemiology</i> , 2015, 39, 29-36.	0.8	11
47	Comparison of cancer survival in UK and Australia: rates are higher in Australia for three major sites. <i>British Journal of Cancer</i> , 2004, 91, 1663-1665.	2.9	10
48	Projecting prevalence by stage of care for prostate cancer and estimating future health service needs: protocol for a modelling study. <i>BMJ Open</i> , 2011, 1, e000104-e000104.	0.8	10
49	Projections of cancer prevalence by phase of care: a potential tool for planning future health service needs. <i>Journal of Cancer Survivorship</i> , 2013, 7, 641-651.	1.5	10
50	The relationship between basal and squamous cell skin cancer and smoking related cancers. <i>BMC Research Notes</i> , 2011, 4, 556.	0.6	9
51	Spatial and temporal patterns of nasopharyngeal carcinoma mortality in China, 1973â€“2005. <i>Cancer Letters</i> , 2017, 401, 33-38.	3.2	9
52	Cancer-related hospitalisations and â€˜unknownâ€™ stage prostate cancer: a population-based record linkage study. <i>BMJ Open</i> , 2017, 7, e014259.	0.8	9
53	Patterns of prostateâ€“specific antigen testing by remoteness of residence and socioâ€“economic status: An Australian populationâ€“based study. <i>Australian Journal of Rural Health</i> , 2019, 27, 216-223.	0.7	9
54	Temporal trends in loss of life expectancy after a cancer diagnosis among the Australian population. <i>Cancer Epidemiology</i> , 2020, 65, 101686.	0.8	9

#	ARTICLE	IF	CITATIONS
55	Widening socioeconomic disparity in lung cancer incidence among men in New South Wales, Australia, 1987–2011. <i>Chinese Journal of Cancer Research: Official Journal of China Anti-Cancer Association, Beijing Institute for Cancer Research</i> , 2017, 29, 395-401.	0.7	9
56	Cancer Incidence in Migrants in Australia: Patterns of Three Infection-Related Cancers. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2022, 31, 1394-1401.	1.1	8
57	Temporal trends in net and crude probability of death from cancer and other causes in the Australian population, 1984–2013. <i>Cancer Epidemiology</i> , 2019, 62, 101568.	0.8	7
58	Phase of care prevalence for prostate cancer in New South Wales, Australia: A population-based modelling study. <i>PLoS ONE</i> , 2017, 12, e0171013.	1.1	7
59	Lung cancer prevalence in New South Wales (Australia): Analysis of past trends and projection of future estimates. <i>Cancer Epidemiology</i> , 2015, 39, 534-538.	0.8	6
60	RE: Cancer incidence and mortality in China, 2013 by Chen et al.. <i>Cancer Letters</i> , 2017, 401, 72-73.	3.2	6
61	Cancer burden and control in Australia: lessons learnt and challenges remaining. <i>Annals of Cancer Epidemiology</i> , 0, 2, 3-3.	1.8	6
62	Crude probability of death for cancer patients by spread of disease in New South Wales, Australia 1985 to 2014. <i>Cancer Medicine</i> , 2021, 10, 3524-3532.	1.3	5
63	Socioeconomic disparities in colorectal cancer survival: contributions of prognostic factors in a large Australian cohort. <i>Journal of Cancer Research and Clinical Oncology</i> , 2022, 148, 2971-2984.	1.2	5
64	Trends in colon and rectal cancer mortality in Australia from 1972 to 2015 and associated projections to 2040. <i>Scientific Reports</i> , 2022, 12, 3994.	1.6	5
65	Colorectal cancer metastatic disease progression in Australia: A population-based analysis. <i>Cancer Epidemiology</i> , 2017, 49, 92-100.	0.8	4
66	Combating diabetes in China: a long-term perspective is needed. <i>Lancet Public Health</i> , The, 2018, 3, e154-e155.	4.7	4
67	Cancer prevention: When knowledge of cancer prevention is not enough. <i>Cancer</i> , 2020, 126, 4451-4454.	2.0	4
68	Quantifying the Number of Cancer Deaths Avoided Due to Improvements in Cancer Survival since the 1980s in the Australian Population, 1985–2014. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2020, 29, 1825-1831.	1.1	4
69	Quantifying the absolute number of cancer deaths that would be avoided if cancers were diagnosed prior to progressing to distant metastasis, New South Wales, Australia 1985–2014. <i>International Journal of Cancer</i> , 2022, , .	2.3	4
70	Contributions of prognostic factors to socioeconomic disparities in cancer survival: protocol for analysis of a cohort with linked data. <i>BMJ Open</i> , 2019, 9, e030248.	0.8	3
71	Evaluating risk factors for lung cancer among never-smoking individuals using two Australian studies. <i>Journal of Cancer Research and Clinical Oncology</i> , 2022, 148, 2827-2840.	1.2	3
72	How Well Have Projected Lung Cancer Rates Predicted the Actual Observed Rates?. <i>Asian Pacific Journal of Cancer Prevention</i> , 2021, 22, 437-445.	0.5	1

#	ARTICLE	IF	CITATIONS
73	Patterns of care of nonsmall cell lung cancer patients in China and implications for survival. Journal of Cancer Research and Therapeutics, 2018, 14, 410.	0.3	1
74	Changes in prostate cancer incidence, mortality and survival in relation to prostate specific antigen testing in New South Wales, Australia. Cancer Epidemiology, 2022, 78, 102159.	0.8	1
75	Family history, obesity, urological factors and diabetic medications and their associations with risk of prostate cancer diagnosis in a large prospective study. British Journal of Cancer, 2022, 127, 735-746.	2.9	1
76	Response to Barraclough et al. on "Degree of spread artefact in the NSW Central Cancer Registry". Australian and New Zealand Journal of Public Health, 2009, 33, 95-96.	0.8	0
77	Re: The relationship between patient and tumor characteristics, patterns of breast cancer care, and 5-year survival among elderly women with incident breast cancer. Breast Cancer Res Treat. Sep 2018;171(2):477-488. Breast Cancer Research and Treatment, 2019, 174, 807-807.	1.1	0
78	656 Risk factors for lung cancer in never-smokers in Australia. International Journal of Epidemiology, 2021, 50, .	0.9	0
79	Projections of smoking-related cancer mortality in Australia to 2044. Journal of Epidemiology and Community Health, 2022, 76, 792-799.	2.0	0
