#	ARTICLE	IF	CITATIONS
1	The biological functions of IL-17 in different clinical expressions of Helicobacter pylori-infection. Microbial Pathogenesis, 2015, 81, 33-38.	2.9	65
2	Comparative Immune Response in Children and Adults with <i>H. pylori</i> Infection. Journal of Immunology Research, 2015, 2015, 1-6.	2.2	56
3	Downregulated regulatory T cell function is associated with increased peptic ulcer in Helicobacter pylori-infection. Microbial Pathogenesis, 2017, 110, 165-175.	2.9	49
4	Virulence factors of Helicobacter pylori vacA increase markedly gastric mucosal TGF- β 1 mRNA expression in gastritis patients. Microbial Pathogenesis, 2014, 67-68, 1-7.	2.9	47
5	Role of Regulatory T-cells in Different Clinical Expressions of Helicobacter pylori Infection. Archives of Medical Research, 2016, 47, 245-254.	3.3	44
6	Frequency of virulence factors in Helicobacter pylori-infected patients with gastritis. Microbial Pathogenesis, 2015, 80, 67-72.	2.9	43
7	Up-regulated Th17 cell function is associated with increased peptic ulcer disease in Helicobacter pylori -infection. Infection, Genetics and Evolution, 2018, 60, 117-125.	2.3	40
8	Design of a multi-epitope vaccine against cervical cancer using immunoinformatics approaches. Scientific Reports, 2021, 11, 12397.	3.3	31
9	Clinical relevance of Helicobacter pylori virulence factors in Iranian patients with gastrointestinal diseases. Microbial Pathogenesis, 2016, 100, 154-162.	2.9	28
10	Update of spectrum c.35delG and c.23+1G>A mutations on the <i>GJB2</i> gene in individuals with autosomal recessive nonsyndromic hearing loss. Annals of Human Genetics, 2019, 83, 1-10.	0.8	28
11	Associations of a TLR4 single-nucleotide polymorphism with <i>H. pylori</i> associated gastric diseases in Iranian patients. Clinics and Research in Hepatology and Gastroenterology, 2014, 38, 366-371.	1.5	26
12	Mutations in GJB2 as Major Causes of Autosomal Recessive Non-Syndromic Hearing Loss: First Report of c.299-300delAT Mutation in Kurdish Population of Iran. Journal of Audiology and Otology, 2019, 23, 20-26.	0.8	26
13	Association of the virulence factors of Helicobacter pylori and gastric mucosal interleukin-17/23 mRNA expression in dyspeptic patients. EXCLI Journal, 2013, 12, 5-14.	0.7	26
14	The role of Th1 and Th17 cells in glomerulonephritis. Journal of Nephropathology, 2015, 4, 32-7.	0.2	23
15	Clinical immunology Mucosal interleukin-21 mRNA expression level is high in patients with Helicobacter pylori and is associated with the severity of gastritis. Central-European Journal of Immunology, 2015, 1, 61-67.	1.2	22
16	Designing a novel multi-epitope vaccine against Ebola virus using reverse vaccinology approach. Scientific Reports, 2022, 12, 7757.	3.3	19
17	Altered Th17 Cytokine Expression in <i>Helicobacter pylori</i> Patients with TLR4 (D299G) Polymorphism. Immunological Investigations, 2016, 45, 161-171.	2.0	17
18	Correlation Between Mucosal IL-6 mRNA Expression Level and Virulence Factors of Helicobacter pylori in Iranian Adult Patients With Chronic Gastritis. Jundishapur Journal of Microbiology, 2015, 8, e21701.	0.5	16

#	ARTICLE	IF	CITATIONS
19	Exploring SARS-COV-2 structural proteins to design a multi-epitope vaccine using immunoinformatics approach: An in silico study. <i>Computers in Biology and Medicine</i> , 2021, 133, 104390.	7.0	15
20	GJB2-related hearing loss in central Iran: Review of the spectrum and frequency of gene mutations. <i>Annals of Human Genetics</i> , 2020, 84, 107-113.	0.8	14
21	A novel variant of SLC26A4 and first report of the c.716T>A variant in Iranian pedigrees with non-syndromic sensorineural hearing loss. <i>American Journal of Otolaryngology - Head and Neck Medicine and Surgery</i> , 2018, 39, 719-725.	1.3	11
22	Genetics of Hearing Loss in North Iran Population: An Update of Spectrum and Frequency of GJB2 Mutations. <i>Journal of Audiology and Otology</i> , 2019, 23, 175-180.	0.8	7
23	Genetics of hereditary hearing loss in east Iran population: A systematic review of GJB2 mutations. <i>Intractable and Rare Diseases Research</i> , 2019, 8, 172-178.	0.9	3
24	Screening of 10 DFNB Loci Causing Autosomal Recessive Non-Syndromic Hearing Loss in Two Iranian Populations Negative for Mutations. <i>Iranian Journal of Public Health</i> , 2019, 48, 1704-1713.	0.5	3
25	Frequency of virulence-associated genotypes of <i>Helicobacter pylori</i> and their correlation with clinical outcome and histological parameters in infected patients. <i>Heliyon</i> , 2021, 7, e07610.	3.2	2
26	The correlation of long non-coding RNAs IFNG-AS1 and ZEB2-AS1 with IFN- γ and ZEB-2 expression in PBMCs and clinical features of patients with coronary artery disease. <i>Molecular Biology Reports</i> , 2022, 49, 3389-3399.	2.3	2
27	From genes polymorphisms to mucosal expression of cytokines: evaluating IL-23/IL-17 axis in adult patients with gastritis. <i>African Health Sciences</i> , 2020, 20, 1452-1462.	0.7	1
28	An update on autosomal recessive hearing loss and loci involved in it. <i>Indian Journal of Otology</i> , 2022, 28, 6.	0.2	0
