|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Age-friendly neighbourhoods and physical activity of older Surinamese individuals in Rotterdam, the Netherlands. <i>PLoS ONE</i> , 2022, 17, e0261998.                                                                                                   | 2.5 | 6         |
| 2  | Age-friendly communities and well-being realization among older native and immigrant populations in the Netherlands: a theory-guided study protocol. <i>BMC Geriatrics</i> , 2022, 22, 273.                                                              | 2.7 | 4         |
| 3  | Behaviour change interventions to promote health and well-being among older migrants: A systematic review. <i>PLoS ONE</i> , 2022, 17, e0269778.                                                                                                         | 2.5 | 0         |
| 4  | A cross-sectional study investigating the relationships between self-management abilities, productive patient-professional interactions, and well-being of community-dwelling frail older people. <i>European Journal of Ageing</i> , 2021, 18, 427-437. | 2.8 | 2         |
| 5  | Positive and negative ageing perceptions account for health differences between older immigrant and native populations in the Netherlands. <i>BMC Geriatrics</i> , 2021, 21, 190.                                                                        | 2.7 | 3         |
| 6  | Associations of Social Cohesion and Socioeconomic Status with Health Behaviours among Middle-Aged and Older Chinese People. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4894.                                   | 2.6 | 7         |
| 7  | Easier Said Than Done: Healthcare Professionals'™ Barriers to the Provision of Patient-Centered Primary Care to Patients with Multimorbidity. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 6057.                 | 2.6 | 16        |
| 8  | The Significance of Person-centered Care for Satisfaction With Care and Well-being Among Informal Caregivers of Persons With Severe Intellectual Disability. <i>Journal of Policy and Practice in Intellectual Disabilities</i> , 2020, 17, 31-42.       | 2.7 | 9         |
| 9  | The Need for Co-Creation of Care with Multi-Morbidity Patients'™ A Longitudinal Perspective. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 3201.                                                                  | 2.6 | 5         |
| 10 | Self-management of patients with advanced cancer: A systematic review of experiences and attitudes. <i>Palliative Medicine</i> , 2020, 34, 160-178.                                                                                                      | 3.1 | 62        |
| 11 | Cost-effectiveness of a proactive, integrated primary care approach for community-dwelling frail older persons. <i>Cost Effectiveness and Resource Allocation</i> , 2019, 17, 14.                                                                        | 1.5 | 10        |
| 12 | Quality of primary care delivery and productive interactions among community-living frail older persons and their general practitioners and practice nurses. <i>BMC Health Services Research</i> , 2019, 19, 496.                                        | 2.2 | 9         |
| 13 | Acculturation is associated with older Turkish immigrants'™ self-management abilities. <i>BMC Public Health</i> , 2019, 19, 1228.                                                                                                                        | 2.9 | 7         |
| 14 | Influence of the organizational environment on challenging behaviour in people with intellectual disabilities: Professionals'™ views. <i>Journal of Applied Research in Intellectual Disabilities</i> , 2019, 32, 610-621.                               | 2.0 | 20        |
| 15 | Enabling and disabling behaviors in the social environment are associated with physical Activity of older people in the Netherlands. <i>BMC Public Health</i> , 2019, 19, 361.                                                                           | 2.9 | 8         |
| 16 | Views of professionals and volunteers in palliative care on patient-centred care: a Q-methodology study in the Netherlands. <i>BMC Palliative Care</i> , 2019, 18, 97.                                                                                   | 1.8 | 7         |
| 17 | The creation of age-friendly environments is especially important to frail older people. <i>Ageing and Society</i> , 2018, 38, 700-720.                                                                                                                  | 1.7 | 35        |
| 18 | The importance of person-centred care and co-creation of care for the well-being and job satisfaction of professionals working with people with intellectual disabilities. <i>Scandinavian Journal of Caring Sciences</i> , 2018, 32, 76-81.             | 2.1 | 38        |

| #  | ARTICLE                                                                                                                                                                                                        | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Ageing perceptions matter for the well-being of elderly Turkish migrants, especially among the chronically ill. <i>BMC Geriatrics</i> , 2018, 18, 229.                                                         | 2.7 | 10        |
| 20 | The importance of health behaviours and especially broader self-management abilities for older Turkish immigrants. <i>European Journal of Public Health</i> , 2018, 28, 1087-1092.                             | 0.3 | 9         |
| 21 | How do older people achieve well-being? Validation of the Social Production Function Instrument for the level of well-beingâ€‘short (SPF-ILs). <i>Social Science and Medicine</i> , 2018, 211, 304-313.        | 3.8 | 16        |
| 22 | Evaluating an integrated primary care approach to improve well-being among frail community-living older people: A theory-guided study protocol. <i>BMC Geriatrics</i> , 2018, 18, 173.                         | 2.7 | 10        |
| 23 | Organisational environment and challenging behaviour in services for people with intellectual disabilities: A review of the literature. <i>Alter</i> , 2018, 12, 238-253.                                      | 0.9 | 9         |
| 24 | An integrated primary care approach for frail community-dwelling older persons: a step forward in improving the quality of care. <i>BMC Health Services Research</i> , 2018, 18, 28.                           | 2.2 | 20        |
| 25 | Age-Friendly Communities Matter for Older Peopleâ€™s Well-Being. <i>Journal of Happiness Studies</i> , 2018, 19, 2405-2420.                                                                                    | 3.2 | 48        |
| 26 | Self-management abilities and quality of life among frail community-dwelling individuals: the role of community nurses in the Netherlands. <i>Health and Social Care in the Community</i> , 2017, 25, 394-401. | 1.6 | 19        |
| 27 | A cross-sectional study investigating patient-centred care, co-creation of care, well-being and job satisfaction among nurses. <i>Journal of Nursing Management</i> , 2017, 25, 577-584.                       | 3.4 | 26        |
| 28 | Validation of the Aging Perceptions Questionnaire Short on a sample of community-dwelling Turkish elderly migrants. <i>Health and Quality of Life Outcomes</i> , 2017, 15, 42.                                 | 2.4 | 11        |
| 29 | Positive ageing perceptions among migrant Turkish and native Dutch older people: a matter of culture or resources?. <i>BMC Geriatrics</i> , 2017, 17, 159.                                                     | 2.7 | 14        |
| 30 | Effects of an integrated neighborhood approach on older peopleâ€™s (health-related) quality of life and well-being. <i>BMC Research Notes</i> , 2016, 9, 450.                                                  | 1.4 | 16        |
| 31 | The ideal neighbourhood for ageing in place as perceived by frail and non-frail community-dwelling older people. <i>Ageing and Society</i> , 2015, 35, 1771-1795.                                              | 1.7 | 73        |
| 32 | Healthcare professionalsâ€™ views on patient-centered care in hospitals. <i>BMC Health Services Research</i> , 2015, 15, 385.                                                                                  | 2.2 | 74        |
| 33 | The Health of Indiaâ€™s Elderly Population: A Comparative Assessment Using Subjective and Objective Health Outcomes. <i>Journal of Population Ageing</i> , 2015, 8, 245-259.                                   | 1.4 | 30        |
| 34 | Background characteristics, resources and volunteering among older adults (aged â‰¥70 years) in the community: A longitudinal study. <i>Geriatrics and Gerontology International</i> , 2015, 15, 1087-1095.    | 1.5 | 20        |
| 35 | Validation of the Dutch Aging Perceptions Questionnaire and development of a short version. <i>Health and Quality of Life Outcomes</i> , 2015, 13, 54.                                                         | 2.4 | 20        |
| 36 | The importance of productive patientâ€“professional interaction for the well-being of chronically ill patients. <i>Quality of Life Research</i> , 2015, 24, 897-903.                                           | 3.1 | 38        |

| #  | ARTICLE                                                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Social cohesion and belonging predict the well-being of community-dwelling older people. <i>BMC Geriatrics</i> , 2015, 15, 30.                                                                                                                              | 2.7 | 88        |
| 38 | The importance of older patients's experiences with care delivery for their quality of life after hospitalization. <i>BMC Health Services Research</i> , 2015, 15, 311.                                                                                     | 2.2 | 21        |
| 39 | Exploring views on what is important for patient-centred care in end-stage renal disease using Q methodology. <i>BMC Nephrology</i> , 2015, 16, 74.                                                                                                         | 1.8 | 22        |
| 40 | The role of team climate in improving the quality of chronic care delivery: a longitudinal study among professionals working with chronically ill adolescents in transitional care programmes. <i>BMJ Open</i> , 2014, 4, e005369.                          | 1.9 | 24        |
| 41 | Neighborhood attributes security and solidarity promote the well-being of community-dwelling older people in the Netherlands. <i>Geriatrics and Gerontology International</i> , 2014, 14, 681-688.                                                          | 1.5 | 21        |
| 42 | Relational coordination between community health nurses and other professionals in delivering care to community-dwelling frail people. <i>Journal of Nursing Management</i> , 2014, 22, 170-176.                                                            | 3.4 | 28        |
| 43 | The importance of relational coordination for integrated care delivery to older patients in the hospital. <i>Journal of Nursing Management</i> , 2014, 22, 248-256.                                                                                         | 3.4 | 35        |
| 44 | The relationship between healthy behaviors and health outcomes among older adults in Russia. <i>BMC Public Health</i> , 2014, 14, 1183.                                                                                                                     | 2.9 | 25        |
| 45 | Comparing Education, Employment, Social Support and Well-being among Youth with Disabilities and Their Peers in South Africa. <i>Applied Research in Quality of Life</i> , 2014, 9, 517-524.                                                                | 2.4 | 12        |
| 46 | The Effects of Social and Physical Functioning and Self-Management Abilities on Well-Being Among Patients with Cardiovascular Diseases, Chronic Obstructive Pulmonary Disease, and Diabetes. <i>Applied Research in Quality of Life</i> , 2014, 9, 113-121. | 2.4 | 9         |
| 47 | Development and Validation of the Older Patient Assessment of Chronic Illness Care (O-PACIC) Scale After Hospitalization. <i>Social Indicators Research</i> , 2014, 116, 959-969.                                                                           | 2.7 | 7         |
| 48 | Situational awareness, relational coordination and integrated care delivery to hospitalized elderly in The Netherlands: a comparison between hospitals. <i>BMC Geriatrics</i> , 2014, 14, 3.                                                                | 2.7 | 18        |
| 49 | Labor Productivity, Perceived Effectiveness, and Sustainability of Innovative Projects. <i>Journal for Healthcare Quality: Official Publication of the National Association for Healthcare Quality</i> , 2014, 36, 14-24.                                   | 0.7 | 1         |
| 50 | Self-management abilities and frailty are important for healthy aging among community-dwelling older people; a cross-sectional study. <i>BMC Geriatrics</i> , 2014, 14, 28.                                                                                 | 2.7 | 37        |
| 51 | The role of disease management programs in the health behavior of chronically ill patients. <i>Patient Education and Counseling</i> , 2014, 95, 137-142.                                                                                                    | 2.2 | 23        |
| 52 | Social cohesion as perceived by community-dwelling older people: the role of individual and neighbourhood characteristics. <i>International Journal of Ageing and Later Life</i> , 2014, 8, 9-31.                                                           | 0.9 | 14        |
| 53 | The influence of organizational characteristics on employee solidarity in the long-term care sector. <i>Journal of Advanced Nursing</i> , 2013, 69, 526-534.                                                                                                | 3.3 | 22        |
| 54 | The Relationships between Quality of Life, Satisfaction with Care and Self-Efficacy as Perceived by Adolescents with Diabetes: A Questionnaire Survey. <i>Child Indicators Research</i> , 2013, 6, 593-604.                                                 | 2.3 | 2         |
