|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Frailty and other geriatric conditions for risk stratification of older patients with acute coronary syndrome. <i>American Heart Journal</i> , 2014, 168, 784-791.e2.                                                                                   | 1.2 | 145       |
| 2  | Prognostic Value of Strain by Tissue Tracking Cardiac Magnetic Resonance After ST-Segment Elevation Myocardial Infarction. <i>JACC: Cardiovascular Imaging</i> , 2018, 11, 1448-1457.                                                                   | 2.3 | 93        |
| 3  | Prognostic Value of Initial Left Ventricular Remodeling in Patients With Reperfused STEMI. <i>JACC: Cardiovascular Imaging</i> , 2019, 12, 2445-2456.                                                                                                   | 2.3 | 69        |
| 4  | CA125-Guided Diuretic Treatment Versus Usual Care in Patients With Acute Heart Failure and Renal Dysfunction. <i>American Journal of Medicine</i> , 2020, 133, 370-380.e4.                                                                              | 0.6 | 58        |
| 5  | Prognostic Value of Geriatric Conditions Beyond Age After Acute Coronary Syndrome. <i>Mayo Clinic Proceedings</i> , 2017, 92, 934-939.                                                                                                                  | 1.4 | 53        |
| 6  | Prediction of Reverse Remodeling at Cardiac MR Imaging Soon after First ST-Segment Elevation Myocardial Infarction: Results of a Large Prospective Registry. <i>Radiology</i> , 2016, 278, 54-63.                                                       | 3.6 | 49        |
| 7  | Usefulness of Clinical Data and Biomarkers for the Identification of Frailty After Acute Coronary Syndromes. <i>Canadian Journal of Cardiology</i> , 2015, 31, 1462-1468.                                                                               | 0.8 | 45        |
| 8  | Percutaneous coronary intervention and recurrent hospitalizations in elderly patients with non ST-segment acute coronary syndrome: The role of frailty. <i>International Journal of Cardiology</i> , 2017, 228, 456-458.                                | 0.8 | 41        |
| 9  | Effect of ischemic postconditioning on microvascular obstruction in reperfused myocardial infarction. Results of a randomized study in patients and of an experimental model in swine. <i>International Journal of Cardiology</i> , 2014, 175, 138-146. | 0.8 | 33        |
| 10 | Incidence, Outcomes, and Predictors of Ventricular Thrombus after Reperfused ST-Segment Elevation Myocardial Infarction by Using Sequential Cardiac MR Imaging. <i>Radiology</i> , 2017, 284, 372-380.                                                  | 3.6 | 32        |
| 11 | Comorbidity assessment for mortality risk stratification in elderly patients with acute coronary syndrome. <i>European Journal of Internal Medicine</i> , 2019, 62, 48-53.                                                                              | 1.0 | 24        |
| 12 | Acute Coronary Syndrome in the Older Patient. <i>Journal of Clinical Medicine</i> , 2021, 10, 4132.                                                                                                                                                     | 1.0 | 23        |
| 13 | Early serum creatinine changes and outcomes in patients admitted for acute heart failure: the cardio-renal syndrome revisited. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2017, 6, 430-440.                                             | 0.4 | 21        |
| 14 | Relation of Low Lymphocyte Count to Frailty and its Usefulness as a Prognostic Biomarker in Patients >65 Years of Age With Acute Coronary Syndrome. <i>American Journal of Cardiology</i> , 2020, 125, 1033-1038.                                       | 0.7 | 21        |
| 15 | Serum Heat Shock Protein 60 in Acute Heart Failure: A New Biomarker?. <i>Congestive Heart Failure</i> , 2013, 19, 6-10.                                                                                                                                 | 2.0 | 19        |
| 16 | CA125 but not NT-proBNP predicts the presence of a congestive intrarenal venous flow in patients with acute heart failure. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2021, 10, 475-483.                                                | 0.4 | 18        |
| 17 | Inhomogeneity of collagen organization within the fibrotic scar after myocardial infarction: results in a swine model and in human samples. <i>Journal of Anatomy</i> , 2016, 228, 47-58.                                                               | 0.9 | 17        |
| 18 | Growth differentiation factor 15 and geriatric conditions in acute coronary syndrome. <i>International Journal of Cardiology</i> , 2019, 290, 15-20.                                                                                                    | 0.8 | 16        |

| #  | ARTICLE                                                                                                                                                                                                                        | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Randomized Comparison of Exercise Intervention Versus Usual Care in Older Adult Patients with Frailty After Acute Myocardial Infarction. <i>American Journal of Medicine</i> , 2021, 134, 383-390.e2.                          | 0.6 | 14        |
| 20 | Microvascular obstruction in the right ventricle in reperfused anterior myocardial infarction. Macroscopic and pathologic evidence in a swine model. <i>Thrombosis Research</i> , 2013, 132, 592-598.                          | 0.8 | 9         |
| 21 | A Multidisciplinary Assessment of Remote Myocardial Fibrosis After Reperfused Myocardial Infarction in Swine and Patients. <i>Journal of Cardiovascular Translational Research</i> , 2016, 9, 321-333.                         | 1.1 | 9         |
| 22 | Soluble ST2 and Diuretic Efficiency in Acute Heart Failure and Concomitant Renal Dysfunction. <i>Journal of Cardiac Failure</i> , 2021, 27, 427-434.                                                                           | 0.7 | 9         |
| 23 | Direct Oral Anticoagulants versus Warfarin in Octogenarians with Nonvalvular Atrial Fibrillation: A Systematic Review and Meta-Analysis. <i>Journal of Clinical Medicine</i> , 2021, 10, 5268.                                 | 1.0 | 9         |
| 24 | Guideliner use for the percutaneous treatment of right coronary artery arising from the left circumflex (L-type single coronary artery). <i>International Journal of Cardiology</i> , 2015, 185, 2-3.                          | 0.8 | 8         |
| 25 | Invasive strategy in elderly patients with acute coronary syndrome in 2018: close to the truth?. <i>Journal of Geriatric Cardiology</i> , 2019, 16, 114-120.                                                                   | 0.2 | 7         |
| 26 | Risk score for early risk prediction by cardiac magnetic resonance after acute myocardial infarction. <i>International Journal of Cardiology</i> , 2022, 349, 150-154.                                                         | 0.8 | 7         |
| 27 | Infective Endocarditis in the Elderly: Challenges and Strategies. <i>Journal of Cardiovascular Development and Disease</i> , 2022, 9, 192.                                                                                     | 0.8 | 7         |
| 28 | Programmed death-1 (PD-1): A novel mechanism for understanding the acute immune deregulation in ST-segment elevation myocardial infarction. <i>International Journal of Cardiology</i> , 2014, 177, 8-10.                      | 0.8 | 6         |
| 29 | Intracoronary Infusion of Thioflavin-S to Study Microvascular Obstruction in a Model of Myocardial Infarction. <i>Revista Espanola De Cardiologia (English Ed )</i> , 2015, 68, 928-934.                                       | 0.4 | 6         |
| 30 | Frailty Tools for Assessment of Long-term Prognosis After Acute Coronary Syndrome. <i>Mayo Clinic Proceedings Innovations, Quality &amp; Outcomes</i> , 2020, 4, 642-648.                                                      | 1.2 | 6         |
| 31 | Diuretic Strategies in Acute Heart Failure and Renal Dysfunction: Conventional vs Carbohydrate Antigen 125-guided Strategy. <i>Clinical Trial Design. Revista Espanola De Cardiologia (English Ed )</i> , 2017, 70, 1067-1073. | 0.4 | 5         |
| 32 | Early Spot Urinary Sodium and Diuretic Efficiency in Acute Heart Failure and Concomitant Renal Dysfunction. <i>CardioRenal Medicine</i> , 2020, 10, 362-372.                                                                   | 0.7 | 5         |
| 33 | Antithrombotic Therapy in Elderly Patients with Acute Coronary Syndromes. <i>Journal of Clinical Medicine</i> , 2022, 11, 3008.                                                                                                | 1.0 | 5         |
| 34 | Role of antiangiogenic VEGF-A165b in angiogenesis and systolic function after reperfused myocardial infarction. <i>Revista Espanola De Cardiologia (English Ed )</i> , 2021, 74, 131-139.                                      | 0.4 | 4         |
| 35 | Longitudinal strain in remote non-infarcted myocardium by tissue tracking CMR: characterization, dynamics, structural and prognostic implications. <i>International Journal of Cardiovascular Imaging</i> , 2021, 37, 241-253. | 0.7 | 4         |
| 36 | The impact of sex and physical performance on long-term mortality in older patients with myocardial infarction. <i>BMC Medicine</i> , 2022, 20, 15.                                                                            | 2.3 | 4         |

| #  | ARTICLE                                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Prognostic Value of Myocardial Ischemia and Necrosis in Depressed Left Ventricular Function: a Multicenter Stress Cardiac Magnetic Resonance Registry. <i>Revista Espanola De Cardiologia (English Ed)</i> Tj ETQq1 1 @.784314 8gBT /Over       | 0.7 | 0         |
| 38 | Combining Disability and Frailty in an Integrated Scale for Prognostic Assessment After Acute Coronary Syndrome. <i>Revista Espanola De Cardiologia (English Ed)</i> , 2019, 72, 430-431.                                                       | 0.4 | 3         |
| 39 | Sex-differential effect of frailty on long-term mortality in elderly patients after an acute coronary syndrome. <i>International Journal of Cardiology</i> , 2020, 302, 30-33.                                                                  | 0.8 | 3         |
| 40 | Evaluation of the Use of Dual Antiplatelet Therapy beyond the First Year after Acute Coronary Syndrome. <i>Journal of Clinical Medicine</i> , 2022, 11, 1680.                                                                                   | 1.0 | 3         |
| 41 | Long-Term Prognostic Value of Cognitive Impairment on Top of Frailty in Older Adults after Acute Coronary Syndrome. <i>Journal of Clinical Medicine</i> , 2021, 10, 444.                                                                        | 1.0 | 2         |
| 42 | Differential Effect of Glycosylated Hemoglobin Value and Antidiabetic Treatment on the Risk of 30-day Readmission Following a Hospitalization for Acute Heart Failure. <i>Revista Espanola De Cardiologia (English Ed)</i> , 2015, 68, 852-860. | 0.4 | 1         |
| 43 | Stress cardiac magnetic resonance for mortality prediction and decision-making: registry of 2496 elderly patients with chronic coronary syndrome. <i>Revista Espanola De Cardiologia (English Ed)</i> , 2021, 75, 223-223.                      | 0.4 | 1         |
| 44 | Long-term outcome of patients with NSTEMI and nonobstructive coronary arteries by different angiographic subtypes. <i>Revista Espanola De Cardiologia (English Ed)</i> , 2021, 74, 919-926.                                                     | 0.4 | 1         |
| 45 | Tendencias actuales en el tratamiento antitrombÃ³tico. <i>REC: CardioClinics</i> , 2022, 57, 123-129.                                                                                                                                           | 0.1 | 1         |
| 46 | Long-term Prognostic Value of a Comprehensive Assessment of Cardiac Magnetic Resonance Indexes After an ST-segment Elevation Myocardial Infarction. <i>Revista Espanola De Cardiologia (English Ed)</i> , 2013, 66, 613-622.                    | 0.4 | 0         |
| 47 | Postconditioning or preconditioning, which should be promoted for protecting from ischemic reperfusion injury? Response to letter IJC-D-14-02875. <i>International Journal of Cardiology</i> , 2014, 176, 1383-1384.                            | 0.8 | 0         |
| 48 | Upregulation of an antiangiogenic VEGFA165b isoform in patients with acute myocardial infarction. <i>Proceedings for Annual Meeting of the Japanese Pharmacological Society</i> , 2018, WCP2018, PO1-2-5.                                       | 0.0 | 0         |
| 49 | 80 The impact of sex and physical performance on long-term mortality in older patients with myocardial infarction. <i>European Heart Journal Supplements</i> , 2021, 23, .                                                                      | 0.0 | 0         |
