#	ARTICLE	IF	CITATIONS
1	A Systematic Review of Resilience Factors for Psychosocial Outcomes During the Transition to Adulthood Following Childhood Victimization. <i>Trauma, Violence, and Abuse</i> , 2023, 24, 946-965.	6.2	5
2	Adolescent depression beyond DSM definition: a network analysis. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 881-892.	4.7	13
3	Influence of stigma, sociodemographic and clinical characteristics on mental health-related service use and associated costs among young people in the United Kingdom. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 1363-1373.	4.7	6
4	Frontolimbic Network Topology Associated With Risk and Presence of Depression in Adolescents: A Study Using a Composite Risk Score in Brazil. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2023, 8, 426-435.	1.5	2
5	Psychological and contextual risk factors for first-onset depression among adolescents and young people around the globe: A systematic review and meta-analysis. <i>Microbial Biotechnology</i> , 2023, 17, 5-20.	1.7	6
6	A longitudinal twin study of victimization and loneliness from childhood to young adulthood. <i>Development and Psychopathology</i> , 2022, 34, 367-377.	2.3	32
7	Life events, depression and supportive relationships affect academic achievement in university students. <i>Journal of American College Health</i> , 2022, 70, 1931-1935.	1.5	6
8	This is what loneliness looks like: A mixed-methods study of loneliness in adolescence and young adulthood. <i>International Journal of Behavioral Development</i> , 2022, 46, 18-27.	2.4	12
9	The influence of comorbid depression and overweight status on peripheral inflammation and cortisol levels. <i>Psychological Medicine</i> , 2022, 52, 3289-3296.	4.5	15
10	Reward- and threat-related neural function associated with risk and presence of depression in adolescents: a study using a composite risk score in Brazil. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 579-590.	5.2	5
11	Cortisol Levels in Childhood Associated With Emergence of Attenuated Psychotic Symptoms in Early Adulthood. <i>Biological Psychiatry</i> , 2022, 91, 226-235.	1.3	11
12	Adolescents' thoughts and feelings about the local and global environment: a qualitative interview study. <i>Child and Adolescent Mental Health</i> , 2022, 27, 4-13.	3.5	12
13	Cortisol and development of depression in adolescence and young adulthood – a systematic review and meta-analysis. <i>Psychoneuroendocrinology</i> , 2022, 136, 105625.	2.7	39
14	Longitudinal associations between adolescents' individualised risk for depression and inflammation in a UK cohort study. <i>Brain, Behavior, and Immunity</i> , 2022, 101, 78-83.	4.1	11
15	Public health primary prevention implemented by clinical high-risk services for psychosis. <i>Translational Psychiatry</i> , 2022, 12, 43.	4.8	14
16	Impact on public attitudes of a mental health audio tour of the National Gallery in London. <i>Microbial Biotechnology</i> , 2022, 16, 1192-1201.	1.7	3
17	Choroid plexus enlargement is associated with neuroinflammation and reduction of blood brain barrier permeability in depression. <i>NeuroImage: Clinical</i> , 2022, 33, 102926.	2.7	36
18	Childhood Maltreatment, Educational Attainment, and IQ: Findings From a Multicentric Case-control Study of First-episode Psychosis (EU-GEI). <i>Schizophrenia Bulletin</i> , 2022, 48, 575-589.	4.3	9

#	ARTICLE	IF	CITATIONS
19	Could Anti-inflammatory Interventions Earlier in Development Confer Primary Prevention of Psychiatric Disorders?. <i>Harvard Review of Psychiatry</i> , 2022, 30, 4-7.	2.1	2
20	Detection of risk for future depression among adolescents: Stakeholder views of acceptability and feasibility in the United Kingdom. <i>Microbial Biotechnology</i> , 2022, , .	1.7	2
21	The experience of receiving a diagnosis of depression in adolescence: A pilot qualitative study in Brazil. <i>Clinical Child Psychology and Psychiatry</i> , 2022, 27, 598-612.	1.6	2
22	Physical activity and depressive symptoms among adolescents in a school-based sample. <i>Revista Brasileira De Psiquiatria</i> , 2022, 44, 313-316.	1.7	1
23	Handling missing data in rest-activity time series measured by actimetry. <i>Chronobiology International</i> , 2022, 39, 964-975.	2.0	5
24	Orexin-a elevation in antipsychotic-treated compared to drug-free patients with schizophrenia: A medication effect independent of metabolic syndrome. <i>Journal of the Formosan Medical Association</i> , 2022, 121, 2172-2181.	1.7	7
25	Youth depression and inflammation: Cross-sectional network analyses of C-Reactive protein, interleukin-6 and symptoms in a population-based sample. <i>Journal of Psychiatric Research</i> , 2022, 150, 197-201.	3.1	6
26	A myth-busting mental health tour of the National Gallery in London: facilitators and challenges to its development and evaluation. <i>Arts and Health</i> , 2022, , 1-15.	1.6	1
27	Editorial: The near ubiquity of comorbidity â€“ what are the implications for childrenâ€™s mental health research and practice?. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 505-506.	5.2	2
28	Reply to Kao & Gau â€“Comedications, underlying comorbidity status, and its influence on inflammatory status and depression riskâ€™. <i>Brain, Behavior, and Immunity</i> , 2022, 104, 220-221.	4.1	0
29	Sleep disturbances, circadian activity, and nocturnal light exposure characterize high risk for and current depression in adolescence. <i>Sleep</i> , 2022, 45, .	1.1	13
30	The Lancet Psychiatry Commission on intimate partner violence and mental health: advancing mental health services, research, and policy. <i>Lancet Psychiatry</i> , the, 2022, 9, 487-524.	7.4	65
31	The moderation effect of secure attachment on the relationship between positive events and wellbeing. <i>PsyCh Journal</i> , 2022, , .	1.1	1
32	Adolescent perspectives on depression as a disease of loneliness: a qualitative study with youth and other stakeholders in urban Nepal. <i>Child and Adolescent Psychiatry and Mental Health</i> , 2022, 16, .	2.5	3
33	Predicting the risk of depression among adolescents in Nepal using a model developed in Brazil: the IDEA Project. <i>European Child and Adolescent Psychiatry</i> , 2021, 30, 213-223.	4.7	22
34	Identifying Adolescents at Risk for Depression: A Prediction Score Performance in Cohorts Based in Different Continents. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2021, 60, 262-273.	0.5	43
35	Staff experience of delivering clinical care on acute psychiatric wards for service users who hear voices: a qualitative study. <i>Psychosis</i> , 2021, 13, 58-64.	0.8	7
36	Increased serum peripheral C-reactive protein is associated with reduced brain barriers permeability of TSPO radioligands in healthy volunteers and depressed patients: implications for inflammation and depression. <i>Brain, Behavior, and Immunity</i> , 2021, 91, 487-497.	4.1	42

#	ARTICLE	IF	CITATIONS
37	Identifying risk factors and detection strategies for adolescent depression in diverse global settings: A Delphi consensus study. <i>Journal of Affective Disorders</i> , 2021, 279, 66-74.	4.1	26
38	Are attenuated positive symptoms and cortisol levels associated?. <i>Schizophrenia Research</i> , 2021, 228, 621-623.	2.0	0
39	What can neuroimmunology teach us about the symptoms of long-COVID?. <i>Oxford Open Immunology</i> , 2021, 2, iqab004.	2.8	23
40	Augmentation therapy with minocycline in treatment-resistant depression patients with low-grade peripheral inflammation: results from a double-blind randomised clinical trial. <i>Neuropsychopharmacology</i> , 2021, 46, 939-948.	5.4	125
41	Externalizing the threat from within: A new direction for researching associations between suicide and psychotic experiences. <i>Development and Psychopathology</i> , 2021, , 1-11.	2.3	6
42	The Role of Peripheral Inflammation in Clinical Outcome and Brain Imaging Abnormalities in Psychosis: A Systematic Review. <i>Frontiers in Psychiatry</i> , 2021, 12, 612471.	2.6	19
43	Editorial: "The early bird catches the worm" – the need for even earlier intervention and targeted prevention for mental illnesses. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 369-371.	5.2	9
44	Structural Covariance of Cortical Gyrfication at Illness Onset in Treatment Resistance: A Longitudinal Study of First-Episode Psychoses. <i>Schizophrenia Bulletin</i> , 2021, 47, 1729-1739.	4.3	16
45	Association of Air Pollution Exposure in Childhood and Adolescence With Psychopathology at the Transition to Adulthood. <i>JAMA Network Open</i> , 2021, 4, e217508.	5.9	28
46	Peripheral immune markers and antipsychotic non-response in psychosis. <i>Schizophrenia Research</i> , 2021, 230, 1-8.	2.0	29
47	Population vs Individual Prediction of Poor Health From Results of Adverse Childhood Experiences Screening. <i>JAMA Pediatrics</i> , 2021, 175, 385.	6.2	111
48	Mind the brain gap: The worldwide distribution of neuroimaging research on adolescent depression. <i>NeuroImage</i> , 2021, 231, 117865.	4.2	6
49	Reply to Drs Munkholm and Paludan-Müller's comment on our paper "Augmentation therapy with minocycline in treatment-resistant depression patients with low-grade peripheral inflammation: results from a double-blind randomised clinical trial". <i>Neuropsychopharmacology</i> , 2021, 46, 1552-1553.	5.4	0
50	Unravelling the contribution of complex trauma to psychopathology and cognitive deficits: a cohort study. <i>British Journal of Psychiatry</i> , 2021, 219, 448-455.	2.8	34
51	A systematic review of the association between biological markers and environmental stress risk factors for adolescent depression. <i>Journal of Psychiatric Research</i> , 2021, 138, 163-175.	3.1	27
52	The Identifying Depression Early in Adolescence Risk Stratified Cohort (IDEA-RiSCo): Rationale, Methods, and Baseline Characteristics. <i>Frontiers in Psychiatry</i> , 2021, 12, 697144.	2.6	16
53	Ketamine's effect on inflammation and kynurenine pathway in depression: A systematic review. <i>Journal of Psychopharmacology</i> , 2021, 35, 934-945.	4.0	39
54	Childhood exposure to ambient air pollution and predicting individual risk of depression onset in UK adolescents. <i>Journal of Psychiatric Research</i> , 2021, 138, 60-67.	3.1	24

#	ARTICLE	IF	CITATIONS
55	Psychopathology and cognitive deficits in young people exposed to complex trauma. <i>BJPsych Open</i> , 2021, 7, S36-S37.	0.7	0
56	Research priorities for neuroimmunology: identifying the key research questions to be addressed by 2030. <i>Wellcome Open Research</i> , 2021, 6, 194.	1.8	5
57	Sex hormones and immune system: A possible interplay in affective disorders? A systematic review. <i>Journal of Affective Disorders</i> , 2021, 290, 1-14.	4.1	16
58	A Modest Increase in 11C-PK11195-Positron Emission Tomography TSPO Binding in Depression Is Not Associated With Serum C-Reactive Protein or Body Mass Index. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 716-724.	1.5	10
59	Cortisol and inflammatory biomarker levels in youths with attention deficit hyperactivity disorder (ADHD): evidence from a systematic review with meta-analysis. <i>Translational Psychiatry</i> , 2021, 11, 430.	4.8	29
60	Early life air pollution exposure elevates general psychopathology risk at the transition to adulthood. <i>ISEE Conference Abstracts</i> , 2021, 2021, .	0.0	0
61	Association between air pollution exposure and mental health service use among individuals with first presentations of psychotic and mood disorders: retrospective cohort study. <i>British Journal of Psychiatry</i> , 2021, 219, 678-685.	2.8	40
62	Associations between childhood victimization, inflammatory biomarkers and psychotic phenomena in adolescence: A longitudinal cohort study. <i>Brain, Behavior, and Immunity</i> , 2021, 98, 74-85.	4.1	15
63	Social isolation as a core feature of adolescent depression: a qualitative study in Porto Alegre, Brazil. <i>International Journal of Qualitative Studies on Health and Well-being</i> , 2021, 16, 1978374.	1.6	15
64	DNA methylation signatures of adolescent victimization: analysis of a longitudinal monozygotic twin sample. <i>Epigenetics</i> , 2021, 16, 1169-1186.	2.7	14
65	Using quantitative MRI to study brain responses to immune challenge with interferon- γ . <i>Brain, Behavior, & Immunity - Health</i> , 2021, 18, 100376.	2.5	0
66	Past-year intimate partner violence perpetration among people with and without depression: an individual participant data (IPD) meta-mediation analysis. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2021, , 1.	3.1	1
67	Exploring the role of immune pathways in the risk and development of depression in adolescence: Research protocol of the IDEA-FLAME study. <i>Brain, Behavior, & Immunity - Health</i> , 2021, 18, 100396.	2.5	1
68	P.0688 Investigating the biological mechanisms underlying the risk of developing adolescent depression in Brazil: the IDEA Project. <i>European Neuropsychopharmacology</i> , 2021, 53, S503-S504.	0.7	0
69	Mental Health and Functional Outcomes in Young Adulthood of Children With Psychotic Symptoms: A Longitudinal Cohort Study. <i>Schizophrenia Bulletin</i> , 2020, 46, 261-271.	4.3	29
70	Cytokine profile in first-episode psychosis, unaffected siblings and community-based controls: the effects of familial liability and childhood maltreatment. <i>Psychological Medicine</i> , 2020, 50, 1139-1147.	4.5	41
71	Using discordant twin methods to investigate an environmentally mediated pathway between social support and the reduced likelihood of adolescent psychotic experiences. <i>Psychological Medicine</i> , 2020, 50, 1898-1905.	4.5	9
72	Neuroimaging adolescents with depression in a middle-income country: feasibility of an fMRI protocol and preliminary results. <i>Revista Brasileira De Psiquiatria</i> , 2020, 42, 6-13.	1.7	4

#	ARTICLE	IF	CITATIONS
73	Borderline Symptoms at Age 12 Signal Risk for Poor Outcomes During the Transition to Adulthood: Findings From a Genetically Sensitive Longitudinal Cohort Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2020, 59, 1165-1177.e2.	0.5	41
74	Childhood bullying victimization, self-labelling, and help-seeking for mental health problems. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2020, 55, 81-88.	3.1	8
75	Association of Adverse Experiences and Exposure to Violence in Childhood and Adolescence With Inflammatory Burden in Young People. <i>JAMA Pediatrics</i> , 2020, 174, 38.	6.2	80
76	Developing an individualized risk calculator for psychopathology among young people victimized during childhood: A population-representative cohort study. <i>Journal of Affective Disorders</i> , 2020, 262, 90-98.	4.1	35
77	Effects of short-term cannabidiol treatment on response to social stress in subjects at clinical high risk of developing psychosis. <i>Psychopharmacology</i> , 2020, 237, 1121-1130.	3.1	60
78	Biological stress response in women at risk of postpartum psychosis: The role of life events and inflammation. <i>Psychoneuroendocrinology</i> , 2020, 113, 104558.	2.7	22
79	Can high-intensity interval training improve physical and mental health outcomes? A meta-review of 33 systematic reviews across the lifespan. <i>Journal of Sports Sciences</i> , 2020, 38, 430-469.	2.0	116
80	Can high intensity interval training improve health outcomes among people with mental illness? A systematic review and preliminary meta-analysis of intervention studies across a range of mental illnesses. <i>Journal of Affective Disorders</i> , 2020, 263, 629-660.	4.1	28
81	Childhood trauma, HPA axis activity and antidepressant response in patients with depression. <i>Brain, Behavior, and Immunity</i> , 2020, 87, 229-237.	4.1	70
82	Peripheral Blood Cellâ€“Stratified Subgroups of Inflamed Depression. <i>Biological Psychiatry</i> , 2020, 88, 185-196.	1.3	89
83	S186. THE EFFECTS OF CHILDHOOD TRAUMA ON HIPPOCAMPAL VOLUME IN FIRST EPISODE PSYCHOSIS: DOES CORTISOL PLAY A ROLE?. <i>Schizophrenia Bulletin</i> , 2020, 46, S109-S109.	4.3	0
84	Predicting the risk of future depression among school-attending adolescents in Nigeria using a model developed in Brazil.. <i>Psychiatry Research</i> , 2020, 294, 113511.	3.3	17
85	Threatening Life Events and Difficulties and Psychotic Disorder. <i>Schizophrenia Bulletin</i> , 2020, 46, 814-822.	4.3	13
86	Patterns of Reliability: Assessing the Reproducibility and Integrity of DNA Methylation Measurement. <i>Patterns</i> , 2020, 1, 100014.	5.9	78
87	Do AKT1, COMT and FAAH influence reports of acute cannabis intoxication experiences in patients with first episode psychosis, controls and young adult cannabis users?. <i>Translational Psychiatry</i> , 2020, 10, 143.	4.8	11
88	Whole-blood expression of inflammasome- and glucocorticoid-related mRNAs correctly separates treatment-resistant depressed patients from drug-free and responsive patients in the BIODP study. <i>Translational Psychiatry</i> , 2020, 10, 232.	4.8	62
89	Detection of risk for depression among adolescents in diverse global settings: protocol for the IDEA qualitative study in Brazil, Nepal, Nigeria and the UK. <i>BMJ Open</i> , 2020, 10, e034335.	1.9	11
90	Predicting onset of early- and late-treatment resistance in first-episode schizophrenia patients using advanced shrinkage statistical methods in a small sample. <i>Psychiatry Research</i> , 2020, 294, 113527.	3.3	11

#	ARTICLE	IF	CITATIONS
91	Childhood maltreatment and poor functional outcomes at the transition to adulthood: a comparison of prospective informant- and retrospective self-reports of maltreatment. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2020, 56, 1161-1173.	3.1	15
92	Threat, hostility and violence in childhood and later psychotic disorder: population-based caseâ€“control study. <i>British Journal of Psychiatry</i> , 2020, 217, 575-582.	2.8	30
93	Understanding practitionersâ€™ and young peopleâ€™s views of a risk calculator for future psychopathology and poor functioning in young people victimised during childhood. <i>Journal of Mental Health</i> , 2020, , 1-18.	1.9	3
94	Association of Neighborhood Disadvantage in Childhood With DNA Methylation in Young Adulthood. <i>JAMA Network Open</i> , 2020, 3, e206095.	5.9	54
95	Integrating stem cell-based experiments in clinical research. <i>European Psychiatry</i> , 2020, 63, e62.	0.2	5
96	Identifying psychological pathways to polyvictimization: evidence from a longitudinal cohort study of twins from the UK. <i>Journal of Experimental Criminology</i> , 2020, 16, 431-461.	2.9	14
97	PET imaging shows no changes in TSPO brain density after IFN- γ immune challenge in healthy human volunteers. <i>Translational Psychiatry</i> , 2020, 10, 89.	4.8	40
98	Visual memory and psychotic symptoms in youth. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 231-241.	1.3	1
99	Adolescentsâ€™ perceptions of family social status correlate with health and life chances: A twin difference longitudinal cohort study. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 23323-23328.	7.1	43
100	Associations between ADHD and emotional problems from childhood to young adulthood: a longitudinal genetically sensitive study. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 1234-1242.	5.2	22
101	Cortisol Responses to Naturally Occurring Psychosocial Stressors Across the Psychosis Spectrum: A Systematic Review and Meta-Analysis. <i>Frontiers in Psychiatry</i> , 2020, 11, 513.	2.6	12
102	Childhood adversity and psychosis: a systematic review of bio-psycho-social mediators and moderators. <i>Psychological Medicine</i> , 2020, 50, 1761-1782.	4.5	56
103	The influence of risk factors on the onset and outcome of psychosis: What we learned from the GAP study. <i>Schizophrenia Research</i> , 2020, 225, 63-68.	2.0	24
104	A comparison between self-report and interviewer-rated retrospective reports of childhood abuse among individuals with first-episode psychosis and population-based controls. <i>Journal of Psychiatric Research</i> , 2020, 123, 145-150.	3.1	27
105	Baseline high levels of complement component 4 predict worse clinical outcome at 1-year follow-up in first-episode psychosis. <i>Brain, Behavior, and Immunity</i> , 2020, 88, 913-915.	4.1	25
106	Cortisol, inflammatory biomarkers and neurotrophins in children and adolescents with attention deficit hyperactivity disorder (ADHD) in Taiwan. <i>Brain, Behavior, and Immunity</i> , 2020, 88, 105-113.	4.1	56
107	Differential effect of interferon-alpha treatment on AEA and 2-AG levels. <i>Brain, Behavior, and Immunity</i> , 2020, 90, 248-258.	4.1	7
108	Treatment-resistant depression and peripheral C-reactive protein. <i>British Journal of Psychiatry</i> , 2019, 214, 11-19.	2.8	241

#	ARTICLE	IF	CITATIONS
109	Cortisol awakening response is decreased in patients with first-episode psychosis and increased in healthy controls with a history of severe childhood abuse. <i>Schizophrenia Research</i> , 2019, 205, 38-44.	2.0	17
110	Associations Between Non-neurological Autoimmune Disorders and Psychosis: A Meta-analysis. <i>Biological Psychiatry</i> , 2019, 85, 35-48.	1.3	99
111	Development, implementation and evaluation of <i>Altered States of Consciousness</i> : an immersive art exhibition designed to increase public awareness of psychotic experiences. <i>Arts and Health</i> , 2019, 11, 104-122.	1.6	7
112	Lead Exposure as a Confounding Factor in the Association of Air Pollution Exposure and Psychotic Experiences – Reply. <i>JAMA Psychiatry</i> , 2019, 76, 1096.	11.0	1
113	From early adversities to immune activation in psychiatric disorders: the role of the sympathetic nervous system. <i>Clinical and Experimental Immunology</i> , 2019, 197, 319-328.	2.6	34
114	Protocol for a systematic review of the development of depression among adolescents and young adults: psychological, biological, and contextual perspectives around the world. <i>Systematic Reviews</i> , 2019, 8, 179.	5.3	13
115	T1. ABNORMAL CORTISOL LEVELS DURING THE DAY AND CORTISOL AWAKENING RESPONSE IN WOMEN AT RISK OF POSTPARTUM PSYCHOSIS: THE ROLE OF STRESSFUL LIFE EVENTS AND INFLAMMATION. <i>Schizophrenia Bulletin</i> , 2019, 45, S204-S204.	4.3	0
116	Baseline cortisol and the efficacy of antigluocorticoid treatment in mood disorders: A meta-analysis. <i>Psychoneuroendocrinology</i> , 2019, 110, 104420.	2.7	25
117	Development of an individualized risk calculator for poor functioning in young people victimized during childhood: A longitudinal cohort study. <i>Child Abuse and Neglect</i> , 2019, 98, 104188.	2.6	9
118	Differential gene expression analysis in blood of first episode psychosis patients. <i>Schizophrenia Research</i> , 2019, 209, 88-97.	2.0	27
119	The role of circulatory systemic environment in predicting interferon-alpha-induced depression: The neurogenic process as a potential mechanism. <i>Brain, Behavior, and Immunity</i> , 2019, 81, 220-227.	4.1	14
120	Markers of central inflammation in major depressive disorder: A systematic review and meta-analysis of studies examining cerebrospinal fluid, positron emission tomography and post-mortem brain tissue. <i>Brain, Behavior, and Immunity</i> , 2019, 81, 24-40.	4.1	326
121	Residential neighborhood greenery and children's cognitive development. <i>Social Science and Medicine</i> , 2019, 230, 271-279.	3.8	37
122	Characteristics of severe life events, attachment style, and depression – Using a new online approach. <i>British Journal of Clinical Psychology</i> , 2019, 58, 427-439.	3.5	9
123	Early-Life Adversity, Systemic Inflammation and Comorbid Physical and Psychiatric Illnesses of Adult Life. <i>Current Topics in Behavioral Neurosciences</i> , 2019, 44, 207-225.	1.7	31
124	Association of Air Pollution Exposure With Psychotic Experiences During Adolescence. <i>JAMA Psychiatry</i> , 2019, 76, 614.	11.0	128
125	Identifying depression early in adolescence. <i>The Lancet Child and Adolescent Health</i> , 2019, 3, 211-213.	5.6	50
126	Loneliness and Neighborhood Characteristics: A Multi-Informant, Nationally Representative Study of Young Adults. <i>Psychological Science</i> , 2019, 30, 765-775.	3.3	37

#	ARTICLE	IF	CITATIONS
127	The epidemiology of trauma and post-traumatic stress disorder in a representative cohort of young people in England and Wales. <i>Lancet Psychiatry</i> , 2019, 6, 247-256.	7.4	256
128	Longitudinal investigation of DNA methylation changes preceding adolescent psychotic experiences. <i>Translational Psychiatry</i> , 2019, 9, 69.	4.8	13
129	Inflammation in cancer and depression: a starring role for the kynurenine pathway. <i>Psychopharmacology</i> , 2019, 236, 2997-3011.	3.1	59
