87	Human face recognition ability is specific and highly heritable. *Proceedings of the National Academy of Sciences of the United States of America*, **2010**, 107, 5238-41	11.5	347
86	Is the Web as good as the lab? Comparable performance from Web and lab in cognitive/perceptual experiments. *Psychonomic Bulletin and Review*, **2012**, 19, 847-57	4.1	344
85	Number sense across the lifespan as revealed by a massive Internet-based sample. *Proceedings of the National Academy of Sciences of the United States of America*, **2012**, 109, 11116-20	11.5	325
84	When does cognitive functioning peak? The asynchronous rise and fall of different cognitive abilities across the life span. *Psychological Science*, **2015**, 26, 433-43	7.9	299
83	Family resemblance: ten family members with prosopagnosia and within-class object agnosia. *Cognitive Neuropsychology*, **2007**, 24, 419-30	2.3	271
82	Where cognitive development and aging meet: face learning ability peaks after age 30. *Cognition*, **2011**, 118, 201-10	3.5	247
81	Mentalizing about emotion and its relationship to empathy. *Social Cognitive and Affective Neuroscience*, **2008**, 3, 204-17	4	161
80	Neural activity during social signal perception correlates with self-reported empathy. *Brain Research*, **2010**, 1308, 100-13	3.7	138
79	Sustained Attention Across the Life Span in a Sample of 10,000: Dissociating Ability and Strategy. *Psychological Science*, **2015**, 26, 1497-510	7.9	115
78	Estimating treatment coverage for people with substance use disorders: an analysis of data from the World Mental Health Surveys. *World Psychiatry*, **2017**, 16, 299-307	14.4	98
77	Dispelling the Myth: Training in Education or Neuroscience Decreases but Does Not Eliminate Beliefs in Neuromyths. *Frontiers in Psychology*, **2017**, 8, 1314	3.4	84
76	Capturing specific abilities as a window into human individuality: the example of face recognition. *Cognitive Neuropsychology*, **2012**, 29, 360-92	2.3	79
75	A Short, Valid, and Flexible Web-Based Screener for Mild Cognitive Impairment. *Innovation in Aging*, **2020**, 4, 272-272	0.1	78
74	Amygdala response to facial expressions reflects emotional learning. *Journal of Neuroscience*, **2006**, 26, 8915-22	6.6	74
73	Social anhedonia is associated with neural abnormalities during face emotion processing. *NeuroImage*, **2011**, 58, 935-45	7.9	66
72	Childhood Adversity Is Associated with Adult Theory of Mind and Social Affiliation, but Not Face Processing. *PLoS ONE*, **2015**, 10, e0129612	3.7	65
71	Psychosis-proneness and the rubber hand illusion of body ownership. *Psychiatry Research*, **2013**, 207, 45-52	9.9	62

70	Individual Aesthetic Preferences for Faces Are Shaped Mostly by Environments, Not Genes. *Current Biology*, **2015**, 25, 2684-9	6.3	60
69	Face emotion recognition is related to individual differences in psychosis-proneness. *Psychological Medicine*, **2011**, 41, 937-47	6.9	52
68	Association between polygenic risk for schizophrenia, neurocognition and social cognition across development. *Translational Psychiatry*, **2016**, 6, e924	8.6	45
67	Digital neuropsychology: Challenges and opportunities at the intersection of science and software. *Clinical Neuropsychologist*, **2019**, 33, 271-286	4.4	43
66	A new selective developmental deficit: Impaired object recognition with normal face recognition. *Cortex*, **2011**, 47, 598-607	3.8	40
65	The AURORA Study: a longitudinal, multimodal library of brain biology and function after traumatic stress exposure. *Molecular Psychiatry*, **2020**, 25, 283-296	15.1	38
64	Clinically significant cognitive impairment in older adults with type 1 diabetes. *Journal of Diabetes and Its Complications*, **2019**, 33, 91-97	3.2	34
63	Risk factors for loneliness: The high relative importance of age versus other factors. *PLoS ONE*, **2020**, 15, e0229087	3.7	33
62	Face recognition ability matures late: evidence from individual differences in young adults. *Journal of Experimental Psychology: Human Perception and Performance*, **2013**, 39, 1212-7	2.6	33
61	Individual differences in trust evaluations are shaped mostly by environments, not genes. *Proceedings of the National Academy of Sciences of the United States of America*, **2020**, 117, 10218-10224	11.5	27
60	Emotion sensitivity across the lifespan: Mapping clinical risk periods to sensitivity to facial emotion intensity. *Journal of Experimental Psychology: General*, **2019**, 148, 1993-2005	4.7	26
59	Social cognition or social class and culture? On the interpretation of differences in social cognitive performance. *Psychological Medicine*, **2020**, 50, 133-145	6.9	23
58	Face recognition: a model specific ability. *Frontiers in Human Neuroscience*, **2014**, 8, 769	3.3	22
57	Gender Differences in Sustained Attentional Control Relate to Gender Inequality across Countries. *PLoS ONE*, **2016**, 11, e0165100	3.7	21
56	Digital devices and continuous telemetry: opportunities for aligning psychiatry and neuroscience. *Neuropsychopharmacology*, **2018**, 43, 2499-2503	8.7	20
55	Normal gaze discrimination and adaptation in seven prosopagnosics. *Neuropsychologia*, **2009**, 47, 2029-36	3.2	20
54	Emotion sensitivity and self-reported symptoms of generalized anxiety disorder across the lifespan: A population-based sample approach. *Brain and Behavior*, **2019**, 9, e01282	3.4	19
53	Epidemiological Dimensions of Social Anhedonia. *Clinical Psychological Science*, **2018**, 6, 735-743	6	18

#	Reference		
52	Self-reported face recognition is highly valid, but alone is not highly discriminative of prosopagnosia-level performance on objective assessments. *Behavior Research Methods*, **2019**, 51, 1102-1116	6.1	15
51	The network structure of schizotypal personality traits in a population-based sample. *Schizophrenia Research*, **2019**, 208, 258-267	3.6	12
50	Sensitivity to stimulus similarity is associated with greater sustained attention ability. *Attention, Perception, and Psychophysics*, **2018**, 80, 1390-1408	2	9
49	Digital Cognitive Assessment: Results from the TestMyBrain NIMH Research Domain Criteria (RDoC) Field Test Battery Report		9
48	Socio-demographic and trauma-related predictors of depression within eight weeks of motor vehicle collision in the AURORA study. *Psychological Medicine*, **2020**, 1-14	6.9	9
47	Social anhedonia, social networks, and psychotic-like experiences: A test of social deafferentation. *Psychiatry Research*, **2020**, 284, 112682	9.9	8
46	Construct validity, ecological validity and acceptance of self-administered online neuropsychological assessment in adults. *Clinical Neuropsychologist*, **2021**, 35, 148-164	4.4	8
45	Response to Thomas: Is human face recognition ability entirely genetic?. *Proceedings of the National Academy of Sciences of the United States of America*, **2010**, 107, E101-E101	11.5	7
44	Gender Differences in Familiar Face Recognition and the Influence of Sociocultural Gender Inequality. *Scientific Reports*, **2019**, 9, 17884	4.9	7
43	Prognostic neuroimaging biomarkers of trauma-related psychopathology: resting-state fMRI shortly after trauma predicts future PTSD and depression symptoms in the AURORA study. *Neuropsychopharmacology*, **2021**, 46, 1263-1271	8.7	7
42	Global/local processing style: Explaining the relationship between trait anxiety and binge eating. *International Journal of Eating Disorders*, **2017**, 50, 1264-1272	6.3	6
41	Heterogeneous Indicators of Cognitive Performance and Performance Variability Across the Lifespan. *Frontiers in Aging Neuroscience*, **2020**, 12, 62	5.3	6
40	Technology meets tradition: a hybrid model for implementing digital tools in neuropsychology. *International Review of Psychiatry*, **2021**, 33, 382-393	3.6	6
39	Socio-demographic and trauma-related predictors of PTSD within 8 weeks of a motor vehicle collision in the AURORA study. *Molecular Psychiatry*, **2021**, 26, 3108-3121	15.1	6
38	Toward dynamic phenotypes and the scalable measurement of human behavior. *Neuropsychopharmacology*, **2021**, 46, 209-216	8.7	6
37	Prior sleep problems and adverse post-traumatic neuropsychiatric sequelae of motor vehicle collision in the AURORA study. *Sleep*, **2021**, 44,	1.1	6
36	Childhood Adversity and Dimensional Variations in Adult Sustained Attention. *Frontiers in Psychology*, **2020**, 11, 691	3.4	5
35	Brain-Based Biotypes of Psychiatric Vulnerability in the Acute Aftermath of Trauma. *American Journal of Psychiatry*, **2021**, 178, 1037-1049	11.9	5

#	Reference	IF	Cites
34	Weak dorsolateral prefrontal response to social criticism predicts worsened mood and symptoms following social conflict in people at familial risk for schizophrenia. *NeuroImage: Clinical*, **2018**, 18, 40-50	5.3	4
33	Use of Geosocial Networking Applications Is Associated With Compulsive Sexual Behavior Disorder in an Online Sample. *Journal of Sexual Medicine*, **2020**, 17, 1574-1578	1.1	4
32	Exposure to early childhood maltreatment and its effect over time on social cognition. *Development and Psychopathology*, **2020**, 1-11	4.3	4
31	Cognitive test scores vary with choice of personal digital device. *Behavior Research Methods*, **2021**, 53, 2544-2557	6.1	4
30	How generalizable is the inverse relationship between social class and emotion perception?. *PLoS ONE*, **2018**, 13, e0205949	3.7	4
29	The role of intraindividual cognitive variability in posttraumatic stress syndromes and cognitive aging: a literature search and proposed research agenda. *International Psychogeriatrics*, **2021**, 33, 677-687	3.4	3
28	Common social cognitive impairments do not mean common causes: A commentary on Cotter et al. (2018). *Neuroscience and Biobehavioral Reviews*, **2018**, 92, 150-151	9	3
27	Multiple object tracking predicts math potential. *Journal of Vision*, **2016**, 16, 421	0.4	3
26	Reply to Cook and Over: Social learning and evolutionary mechanisms are not mutually exclusive. *Proceedings of the National Academy of Sciences of the United States of America*, **2020**, 117, 16114-16115	11.5	3
25	Depression severity is associated with impaired facial emotion processing in a large international sample. *Journal of Affective Disorders*, **2020**, 275, 175-179	6.6	3
24	How do we measure attention? Using factor analysis to establish construct validity of neuropsychological tests. *Cognitive Research: Principles and Implications*, **2021**, 6, 51	2.7	3
23	Comparability of social anhedonia across epidemiological dimensions: A multinational study of measurement invariance of the Revised Social Anhedonia Scale. *Psychological Assessment*, **2021**, 33, 171-179	5.3	3
22	Development and Validation of a Model to Predict Posttraumatic Stress Disorder and Major Depression After a Motor Vehicle Collision. *JAMA Psychiatry*, **2021**, 78, 1228-1237	14.5	3
21	A prospective examination of sex differences in posttraumatic autonomic functioning. *Neurobiology of Stress*, **2021**, 15, 100384	7.6	3
20	Classification and Prediction of Post-Trauma Outcomes Related to PTSD Using Circadian Rhythm Changes Measured via Wrist-Worn Research Watch in a Large Longitudinal Cohort. *IEEE Journal of Biomedical and Health Informatics*, **2021**, 25, 2866-2876	7.2	2
19	Thalamic volume and fear extinction interact to predict acute posttraumatic stress severity. *Journal of Psychiatric Research*, **2021**, 141, 325-332	5.2	2
18	Higher integration scores are associated with facial emotion perception differences in dissociative identity disorder. *Journal of Psychiatric Research*, **2020**, 123, 164-170	5.2	1
17	Neurocognition after motor vehicle collision and adverse post-traumatic neuropsychiatric sequelae within 8 weeks: Initial findings from the AURORA study. *Journal of Affective Disorders*, **2022**, 298, 57-67	6.6	1

16	Prior histories of posttraumatic stress disorder and major depression and their onset and course in the three months after a motor vehicle collision in the AURORA study. *Depression and Anxiety*, **2021** ,	8.4	1
15	Simulation and social behavior: an fMRI study of neural processing during simulation in individuals with and without risk for psychosis. *Social Cognitive and Affective Neuroscience*, **2020**, 15, 165-174	4	1
14	Variable rather than extreme slow reaction times distinguish brain states during sustained attention. *Scientific Reports*, **2021**, 11, 14883	4.9	1
13	The TestMyBrain Digital Neuropsychology Toolkit: Development and Psychometric Characteristics.. *Journal of Clinical and Experimental Neuropsychology*, **2021**, 1-10	2.1	0
12	How do we measure attention? Visual cognition meets neuropsychology. *Journal of Vision*, **2020**, 20, 537	0.4	
11	Toward a Science of Effect Size Perception: the Case of Introductory Psychology Textbooks. *Journal of Vision*, **2020**, 20, 1185	0.4	
10	Where do cognitive limitations come from and why do we care? The divergent cases of visual working memory storage and approximate number sense acuity. *Journal of Vision*, **2017**, 17, 857	0.4	
9	Serum oxytocin levels are elevated in body dysmorphic disorder and related to severity of psychopathology. *Psychoneuroendocrinology*, **2020**, 113, 104541	5	
8	Human talent and career development: Distinct cognitive profiles of STEM versus non-STEM professionals and college majors. *Journal of Vision*, **2021**, 21, 2393	0.4	
7	Generalized Anxiety Disorder Symptoms are Higher Among Same- and Both-Sex Attracted Individuals in a Large, International Sample. *Sexuality Research and Social Policy*,1	2.1	
6	Web-Based Assessment of Visuospatial Processing Speed Across the Lifespan. *Journal of Vision*, **2021**, 21, 2768	0.4	
5	Risk factors for loneliness: The high relative importance of age versus other factors **2020**, 15, e0229087		
4	Risk factors for loneliness: The high relative importance of age versus other factors **2020**, 15, e0229087		
3	Risk factors for loneliness: The high relative importance of age versus other factors **2020**, 15, e0229087		
2	Risk factors for loneliness: The high relative importance of age versus other factors **2020**, 15, e0229087		
1	Evaluating the Reliability and Validity of the Famous Faces Doppelgangers Test, a Novel Measure of Familiar Face Recognition.. *Assessment*, **2022**, 10731911221087746	3.7
