#	ARTICLE	IF	CITATIONS
1	An evaluation of contaminated complete feed as a vehicle for porcine epidemic diarrhea virus infection of naïve pigs following consumption via natural feeding behavior: proof of concept. BMC Veterinary Research, 2014, 10, 176.	0.7	145
2	Survival of viral pathogens in animal feed ingredients under transboundary shipping models. PLoS ONE, 2018, 13, e0194509.	1.1	139
3	Modeling the transboundary risk of feed ingredients contaminated with porcine epidemic diarrhea virus. BMC Veterinary Research, 2016, 12, 51.	0.7	77
4	Detection of the Emerging Picornavirus Senecavirus A in Pigs, Mice, and Houseflies. Journal of Clinical Microbiology, 2016, 54, 1536-1545.	1.8	76
5	An evaluation of porcine epidemic diarrhea virus survival in individual feed ingredients in the presence or absence of a liquid antimicrobial. Porcine Health Management, 2015, 1, 9.	0.9	56
6	Half-Life of African Swine Fever Virus in Shipped Feed. Emerging Infectious Diseases, 2019, 25, 2261-2263.	2.0	56
7	An evaluation of a liquid antimicrobial (Sal CURBÂ®) for reducing the risk of porcine epidemic diarrhea virus infection of naïve pigs during consumption of contaminated feed. BMC Veterinary Research, 2014, 10, 220.	0.7	34
8	Stability of classical swine fever virus and pseudorabies virus in animal feed ingredients exposed to transpacific shipping conditions. Transboundary and Emerging Diseases, 2020, 67, 1623-1632.	1.3	28
9	Mitigating the risk of African swine fever virus in feed with antiviral chemical additives. Transboundary and Emerging Diseases, 2021, 68, 477-486.	1.3	26
10	Evaluation of the Long-Term Effect of Air Filtration on the Occurrence of New PRRSV Infections in Large Breeding Herds in Swine-Dense Regions. Viruses, 2012, 4, 654-662.	1.5	23
11	A randomized controlled trial to evaluate performance of pigs raised in antibiotic-free or conventional production systems following challenge with porcine reproductive and respiratory syndrome virus. PLoS ONE, 2018, 13, e0208430.	1.1	21
12	An evaluation of additives for mitigating the risk of virus-contaminated feed using an ice-block challenge model. Transboundary and Emerging Diseases, 2021, 68, 833-845.	1.3	21
13	The risk of viral transmission in feed: What do we know, what do we do?. Transboundary and Emerging Diseases, 2020, 67, 2365-2371.	1.3	18
14	Risks to animal health associated with imported feed ingredients. Journal of the American Veterinary Medical Association, 2019, 254, 790-791.	0.2	17
15	Stability of Senecavirus A in animal feed ingredients and infection following consumption of contaminated feed. Transboundary and Emerging Diseases, 2022, 69, 88-96.	1.3	15
16	Quantifying Individual Response to PRRSV Using Dynamic Indicators of Resilience Based on Activity. Frontiers in Veterinary Science, 2020, 7, 325.	0.9	14
17	Survival of swine pathogens in compost formed from preprocessed carcasses. Transboundary and Emerging Diseases, 2021, 68, 2239-2249.	1.3	12
18	Quantification of soybean-based feed ingredient entry from ASFV-positive countries to the United States by ocean freight shipping and associated seaports. Transboundary and Emerging Diseases, 2020, 68, 2603-2609.	1.3	10

#	ARTICLE	IF	CITATIONS
19	Evidence of viral survival in representative volumes of feed and feed ingredients during long-distance commercial transport across the continental United States. <i>Transboundary and Emerging Diseases</i> , 2022, 69, 149-156.	1.3	10
20	Monoglyceride reduces viability of porcine epidemic diarrhoea virus in feed and prevents disease transmission to post-weaned piglets. <i>Transboundary and Emerging Diseases</i> , 2022, 69, 121-127.	1.3	10
21	Feed: A new pathway for the domestic and transboundary spread of viral pathogens of veterinary significance. <i>Transboundary and Emerging Diseases</i> , 2022, 69, 1-3.	1.3	9
22	Use of a demonstration project to evaluate viral survival in feed: Proof of concept. <i>Transboundary and Emerging Diseases</i> , 2021, 68, 248-252.	1.3	8
23	The risk and mitigation of foot-and-mouth disease virus infection of pigs through consumption of contaminated feed. <i>Transboundary and Emerging Diseases</i> , 2021, , .	1.3	8
24	Evaluating the effect of temperature on viral survival in plant-based feed during storage. <i>Transboundary and Emerging Diseases</i> , 2022, 69, .	1.3	7
25	Evaluation of the Impact of Antimicrobial Use Protocols in Porcine Reproductive and Respiratory Syndrome Virus-Infected Swine on Phenotypic Antimicrobial Resistance Patterns. <i>Applied and Environmental Microbiology</i> , 2022, 88, AEM0097021.	1.4	4
26	Control Practices for Safeguarding Agricultural and Environmental Biosecurity Before Entry Points. <i>Health Information Systems and the Advancement of Medical Practice in Developing Countries</i> , 2022, , 76-119.	0.1	0
