#	ARTICLE	IF	CITATIONS
1	Pleolobites (Decapoda: Brachyura) from the Paleogene of Africa revisited, with implications on taxonomy of fossil portunoid crabs. <i>Annales De Paleontologie</i> , 2022, 108, 102541.	0.5	0
2	Flexible conservatism in the skull modularity of convergently evolved myrmecophagous placental mammals. <i>Bmc Ecology and Evolution</i> , 2022, 22, .	1.6	6
3	Genetic structure in Orkney island mice: isolation promotes morphological diversification. <i>Heredity</i> , 2021, 126, 266-278.	2.6	6
4	New data on the Dyrosauridae (Crocodylomorpha) from the Paleocene of Togo. <i>Annales De Paleontologie</i> , 2021, 107, 102472.	0.5	1
5	First partial cranium of <i>Togocetus</i> from Kpogam (Togo) and the protocetid diversity in the Togolese phosphate basin. <i>Annales De Paleontologie</i> , 2021, 107, 102488.	0.5	3
6	Evolution Towards Fossoriality and Morphological Convergence in the Skull of Spalacidae and Bathyergidae (Rodentia). <i>Journal of Mammalian Evolution</i> , 2021, 28, 979-993.	1.8	6
7	The role and impact of Zootaxa in mammalogy in its first 20 years. <i>Zootaxa</i> , 2021, 4979, 7094.	0.5	2
8	3D model related to the publication: A fossil terrestrial fauna from Tobène (Senegal) provides a unique early Pliocene window in western Africa. <i>MorphoMuseum</i> , 2021, 7, e102.	0.2	1
9	A fossil terrestrial fauna from Tobène (Senegal) provides a unique early Pliocene window in western Africa. <i>Gondwana Research</i> , 2021, 99, 21-35.	6.0	4
10	New Middle Eocene proboscidean from Togo illuminates the early evolution of the elephantiform-like dental pattern. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20211439.	2.6	2
11	Size and shape regional differentiation during the development of the spine in the nine-banded armadillo (<i>Dasypus novemcinctus</i>). <i>Evolution & Development</i> , 2021, 23, 496-512.	2.0	2
12	3D models related to the publication: New middle Eocene proboscidean from Togo illuminates the early evolution of the elephantiform-like dental pattern.. <i>MorphoMuseum</i> , 2021, 7, e145.	0.2	0
13	From limb to fin: an Eocene protocetid forelimb from Senegal sheds new light on the early locomotor evolution of cetaceans. <i>Palaeontology</i> , 2020, 63, 51-66.	2.2	6
14	Filling a gap in the proboscidean fossil record: a new genus from the Lutetian of Senegal. <i>Journal of Paleontology</i> , 2020, 94, 580-588.	0.8	3
15	Ontogenetic and static allometry in the skull and cranial units of nine-banded armadillos (Cingulata:) <i>Tj ETQq1 1 0.784314 rgBT /Over</i> 673-698.	1.6	11
16	Developmental origins and homologies of the hyracoid dentition. <i>Evolution & Development</i> , 2020, 22, 323-335.	2.0	1
17	Contribution to the reappraisal of the mid Paleogene ichthyofauna of Western Africa with three new enigmatical elasmobranchs from Thanetian–Lutetian of Senegal. <i>Annales De Paleontologie</i> , 2020, 106, 102400.	0.5	2
18	Decoupled ontogeny of in vivo bite force and mandible morphology reveals effects of weaning and sexual maturation in mice. <i>Biological Journal of the Linnean Society</i> , 2020, 129, 558-569.	1.6	8

#	ARTICLE	IF	CITATIONS
19	Elasmobranchs from the upper Paleocene of Togo. <i>Geobios</i> , 2020, 58, 17-37.	1.4	6
20	Comparative masticatory myology in anteaters and its implications for interpreting morphological convergence in myrmecophagous placentals. <i>PeerJ</i> , 2020, 8, e9690.	2.0	9
21	Ancient Mitogenomes Reveal the Evolutionary History and Biogeography of Sloths. <i>Current Biology</i> , 2019, 29, 2031-2042.e6.	3.9	99
22	Morphometric models for estimating bite force in <i>Mus</i> and <i>Rattus</i> : mandible shape and size do better than lever-arm ratios. <i>Journal of Experimental Biology</i> , 2019, 222, .	1.7	8
23	Back to the wild: does feralization affect the mandible of non-commensal house mice (<i>Mus</i>)? <i>Journal of Experimental Biology</i> , 2019, 222, 1-13.	1.6	13
24	Evolutionary Tinkering of the Mandibular Canal Linked to Convergent Regression of Teeth in Placental Mammals. <i>Current Biology</i> , 2019, 29, 468-475.e3.	3.9	13
25	A dyrosaurid from the Paleocene of Senegal. <i>Journal of Paleontology</i> , 2019, 93, 343-358.	0.8	6
26	3D model related to the publication: From limb to fin: an Eocene protocetid forelimb from Senegal sheds new light on the early locomotor evolution of early cetaceans.. <i>MorphoMuseum</i> , 2019, 5, 4.	0.2	1
27	Skull Size and Biomechanics are Good Estimators of <i>In Vivo</i> Bite Force in Murid Rodents. <i>Anatomical Record</i> , 2018, 301, 256-266.	1.4	27
28	Phylogenetic and functional implications of the ear region anatomy of <i>Glossotherium robustum</i> (Xenarthra, Mylodontidae) from the Late Pleistocene of Argentina. <i>Die Naturwissenschaften</i> , 2018, 105, 28.	1.6	17
29	An Overview of Xenarthran Developmental Studies with a Focus on the Development of the Xenarthrous Vertebrae. <i>Journal of Mammalian Evolution</i> , 2018, 25, 507-523.	1.8	8
30	Evolving Teeth Within a Stable Masticatory Apparatus in Orkney Mice. <i>Evolutionary Biology</i> , 2018, 45, 405-424.	1.1	14
31	One skull to rule them all? Descriptive and comparative anatomy of the masticatory apparatus in five mouse species. <i>Journal of Morphology</i> , 2018, 279, 1234-1255.	1.2	6
32	Orientation of the lateral semicircular canal in <i>Xenarthra</i> and its links with head posture and phylogeny. <i>Journal of Morphology</i> , 2017, 278, 704-717.	1.2	24
33	Dental eruption and growth in Hyracoidea (Mammalia, Afrotheria). <i>Journal of Vertebrate Paleontology</i> , 2017, 37, e1317638.	1.0	12
34	The selachian fauna (sharks and rays) of the phosphate series of Ndendouri-Ouali Diala (Matam,) <i>Journal of African Earth Sciences</i> , 2017, 137, 1-10.	0.4	5
35	Convergent Traits in Mammals Associated with Divergent Behaviors: the Case of the Continuous Dental Replacement in Rock-Wallabies and African Mole-Rats. <i>Journal of Mammalian Evolution</i> , 2017, 24, 261-274.	1.8	5
36	Masticatory muscle architecture in a water rat from Australasia (Murinae, <i>Hydromys</i>) and its implication for the evolution of carnivory in rodents. <i>Journal of Anatomy</i> , 2017, 231, 380-397.	1.5	34

#	ARTICLE	IF	CITATIONS
37	The hidden anatomy of paranasal sinuses reveals biogeographically distinct morphotypes in the nine-banded armadillo (<i>Dasyus novemcinctus</i>). PeerJ, 2017, 5, e3593.	2.0	18
38	Beyond the carapace: skull shape variation and morphological systematics of long-nosed armadillos (genus <i>Dasyus</i>). PeerJ, 2017, 5, e3650.	2.0	15
39	3D models related to the publication: The hidden teeth of sloths: evolutionary vestiges and the development of a simplified dentition.. MorphoMuseum, 2017, 2, e1.	0.2	0
40	Ecomorphological analysis of the astragalo-calcaneal complex in rodents and inferences of locomotor behaviours in extinct rodent species. PeerJ, 2016, 4, e2393.	2.0	34
41	Vertebral bending mechanics and xenarthrous morphology in the nine-banded armadillo (<i>Dasyus</i>) Tj ETQq1 1 0,784314 rgBT /Overlo 1.7 22		
42	Do Developmental Constraints and High Integration Limit the Evolution of the Marsupial Oral Apparatus?. Integrative and Comparative Biology, 2016, 56, 404-415.	2.0	49
43	The hidden teeth of sloths: evolutionary vestiges and the development of a simplified dentition. Scientific Reports, 2016, 6, 27763.	3.3	29
44	The phylogenetic affinities of the extinct glyptodonts. Current Biology, 2016, 26, R155-R156.	3.9	83
45	Life in Burrows Channelled the Morphological Evolution of the Skull in Rodents: the Case of African Mole-Rats (Bathyergidae, Rodentia). Journal of Mammalian Evolution, 2016, 23, 175-189.	1.8	47
46	Morphological disparity of the postcranial skeleton in rodents and its implications for palaeobiological inferences: the case of the extinct Theridomyidae (Rodentia, Mammalia). , 2015, , 539-588.		11
47	A synopsis of rodent molecular phylogenetics, systematics and biogeography. , 2015, , 19-69.		25
48	Phylogeny and evolutionary history of hystricognathous rodents from the Old World during the Tertiary: new insights into the emergence of modern "œphiomorph" families. , 2015, , 87-138.		15
49	Grades and clades among rodents: the promise of geometric morphometrics. , 2015, , 277-299.		19
50	Functional morphology of rodent middle ears. , 2015, , 373-404.		12
51	The history of South American octodontoid rodents and its contribution to evolutionary generalisations. , 2015, , 139-163.		15
52	The oral apparatus of rodents: variations on the theme of a gnawing machine. , 2015, , 323-349.		21
53	Convergent evolution of molar topography in Muroidea (Rodentia, Mammalia): connections between chewing movements and crown morphology. , 2015, , 448-477.		6
54	Morphological diversity of the bony labyrinth (inner ear) in extant Xenarthrans and its relation to phylogeny. Journal of Mammalogy, 2015, 96, 658-672.	1.3	48

#	ARTICLE	IF	CITATIONS
55	3D fossil reconstruction related to the publication: Body shape and life style of the extinct rodent <i>Canariomys bravo</i> from Tenerife, Canary Islands.. <i>MorphoMuseum</i> , 2015, 1, e3.	0.2	2
56	3D model related to the publication: First record of the family Protocetidae in the Lutetian of Senegal (West Africa). <i>MorphoMuseum</i> , 2015, 1, e2.	0.2	0
57	3D model related to the publication: The inner ear of <i>Megatherium</i> and the evolution of the vestibular system in sloths.. <i>MorphoMuseum</i> , 2015, 1, e3.	0.2	0
58	3D model related to the publication: A pangolin (Manidae, Pholidota, Mammalia) from the French Quercy phosphorites (Pech du Fraysse, Saint-Projet, Tarn-et-Garonne, late Oligocene, MP 28). <i>MorphoMuseum</i> , 2015, 1, e1.	0.2	0
59	Patterns of Morphological Variation of Extant Sloth Skulls and their Implication for Future Conservation Efforts. <i>Anatomical Record</i> , 2014, 297, 979-1008.	1.4	27
60	Patterns of Morphological Variation of Extant Sloth Skulls and their Implication for Future Conservation Efforts. <i>Anatomical Record</i> , 2014, 297, C1-C1.	1.4	0
61	Timing of cranial suture closure in placental mammals: Phylogenetic patterns, intraspecific variation, and comparison with marsupials. <i>Journal of Morphology</i> , 2014, 275, 125-140.	1.2	40
62	Ossification sequence and genetic patterning in the mouse axial skeleton. <i>Journal of Experimental Zoology Part B: Molecular and Developmental Evolution</i> , 2014, 322, 631-642.	1.3	13
63	First record of the family Protocetidae in the Lutetian of Senegal (West Africa). <i>Palaeovertebrata</i> , 2014, 38, .	0.8	12
64	The inner ear of <i>Megatherium</i> and the evolution of the vestibular system in sloths. <i>Journal of Anatomy</i> , 2013, 223, 557-567.	1.5	40
65	PATTERNS OF OSSIFICATION IN SOUTHERN VERSUS NORTHERN PLACENTAL MAMMALS. <i>Evolution; International Journal of Organic Evolution</i> , 2013, 67, 1994-2010.	2.3	29
66	Development and embryonic staging in non-model organisms: the case of an afrotherian mammal. <i>Journal of Anatomy</i> , 2013, 222, 2-18.	1.5	45
67	Skeletal development in the African elephant and ossification timing in placental mammals. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2012, 279, 2188-2195.	2.6	17
68	High morphological variation of vestibular system accompanies slow and infrequent locomotion in three-toed sloths. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2012, 279, 3932-3939.	2.6	88
69	First prorastomid sirenian from Senegal (Western Africa) and the Old World origin of sea cows. <i>Journal of Vertebrate Paleontology</i> , 2012, 32, 1218-1222.	1.0	25
70	A glimpse on the pattern of rodent diversification: a phylogenetic approach. <i>BMC Evolutionary Biology</i> , 2012, 12, 88.	3.2	390
71	Body shape and life style of the extinct rodent <i>Canariomys bravo</i> (Mammalia, Murinae) from Tenerife, Canary Islands (Spain). <i>Comptes Rendus - Palevol</i> , 2012, 11, 485-494.	0.2	14
72	Patterns of covariation in the masticatory apparatus of hystricognathous rodents: Implications for evolution and diversification. <i>Journal of Morphology</i> , 2012, 273, 1319-1337.	1.2	95

#	ARTICLE	IF	CITATIONS
73	Oldest cingulate skulls provide congruence between morphological and molecular scenarios of armadillo evolution. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2011, 278, 2791-2797.	2.6	55
74	Zegdomyidae (Rodentia, Mammalia), stem anomaluroid rodents from the Early to Middle Eocene of Algeria (Gour Lazib, Western Sahara): new dental evidence. <i>Journal of Systematic Palaeontology</i> , 2011, 9, 563-588.	1.5	38
75	Variability and constraint in the mammalian vertebral column. <i>Journal of Evolutionary Biology</i> , 2011, 24, 1080-1090.	1.7	81
76	Skeletal ossification and sequence heterochrony in xenarthran evolution. <i>Evolution & Development</i> , 2011, 13, 460-476.	2.0	38
77	Hystricognathy vs Sciurognathy in the Rodent Jaw: A New Morphometric Assessment of Hystricognathy Applied to the Living Fossil <i>Laonastes (Diatomyidae)</i> . <i>PLoS ONE</i> , 2011, 6, e18698.	2.5	62
78	BIOMECHANICAL CHANGES AND REMODELING OF THE MASTICATORY APPARATUS DURING MAMMALIAN EVOLUTION: THE CASE OF THE ISSIODOROMYINAE (RODENTIA). <i>Palaios</i> , 2010, 25, 6-13.	1.3	10
79	Skeletal development in sloths and the evolution of mammalian vertebral patterning. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010, 107, 18903-18908.	7.1	113
80	Masticatory muscle architecture in the gundi <i>Ctenodactylus vali</i> (Mammalia, Rodentia). <i>Mammalia</i> , 2010, 74, 153-162.	0.7	19
81	Body Shape and Life Style of the Extinct Balearic Dormouse <i>Hypnomys</i> (Rodentia, Gliridae): New Evidence from the Study of Associated Skeletons. <i>PLoS ONE</i> , 2010, 5, e15817.	2.5	19
82	Mandible Morphometrics, Dental Microwear Pattern, and Paleobiology of the Extinct Balearic Dormouse <i>Hypnomys morpheus</i> . <i>Acta Palaeontologica Polonica</i> , 2009, 54, 181-194.	0.4	29
83	Anthropoid versus strepsirhine status of the African Eocene primates <i>Algeripithecus</i> and <i>Azibius</i> : craniodental evidence. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2009, 276, 4087-4094.	2.6	93
84	Mandible shape and dwarfism in squirrels (Mammalia, Rodentia): interaction of allometry and adaptation. <i>Die Naturwissenschaften</i> , 2009, 96, 725-730.	1.6	19
85	Masticatory muscle architecture in the Laotian rock rat <i>Laonastes aenigmamus</i> (Mammalia). <i>Tj ETQq1 1 0.784314 rgBT/Overlo</i>	1.5	29
86	New material of <i>Anancus kenyensis</i> (proboscidea, mammalia) from Toros-Menalla (Late Miocene, Chad): Contribution to the systematics of African anancines. <i>Journal of African Earth Sciences</i> , 2009, 53, 171-176.	2.0	18
87	Evolution of the zygomaseteric construction in Rodentia, as revealed by a geometric morphometric analysis of the mandible of <i>Graphiurus</i> (Rodentia, Gliridae). <i>Zoological Journal of the Linnean Society</i> , 2008, 154, 807-821.	2.3	28
88	Variabilit� dentaire et cr�nienne de <i>Numidotherium koholense</i> (Mammalia, Proboscidea) de l�ne d�El Kohol, Alg�rie. <i>Geobios</i> , 2008, 41, 515-531.	1.4	11
89	Phylogeny, adaptation and mandible shape in Sciuridae (Rodentia, Mammalia). <i>Mammalia</i> , 2008, 72, .	0.7	26
90	A Late Jurassic sauropod tracksite from Southern Jura (France). <i>Comptes Rendus - Palevol</i> , 2006, 5, 705-709.	0.2	10

#	ARTICLE	IF	CITATIONS
91	The muscles of mastication in rodents and the function of the medial pterygoid. , 0 , 350-372.		20
92	Rodentia: a model order?. , 0 , 1-18.		2
93	Emerging perspectives on some Paleogene sciurognath rodents in Laurasia: the fossil record and its interpretation. , 0 , 70-86.		5
94	Advances in integrative taxonomy and evolution of African murid rodents: how morphological trees hide the molecular forest. , 0 , 186-220.		5
95	Themes and variation in sciurid evolution. , 0 , 221-245.		3
96	Marmot evolution and global change in the past 10 million years. , 0 , 246-276.		7
97	The great variety of dental structures and dynamics in rodents: new insights into their ecological diversity. , 0 , 424-447.		12
98	Developmental mechanisms in the evolution of phenotypic traits in rodent teeth. , 0 , 478-509.		11
99	Diversity and evolution of femoral variation in Ctenohystrica. , 0 , 510-538.		17
100	Skull shape variation in extant pangolins (Pholidota: Manidae): allometric patterns and systematic implications. Zoological Journal of the Linnean Society, 0 , .	2.3	1
101	The new Algerian locality of Bir el Ater 3: validity of Libycosaurus algeriensis (Mammalia,) Tj ETQq1 1 0.784314 rgBT/Overlock 10 Tf 5	0.8	3
102	A pangolin (Manidae, Pholidota, Mammalia) from the French Quercy phosphorites (Pech du Fraysse,) Tj ETQq0 0 0 rgBT/Overlock 10 Tf 5	0.8	2
