#	ARTICLE	IF	CITATIONS
1	Effects of the Informed Health Choices primary school intervention on the ability of children in Uganda to assess the reliability of claims about treatment effects: a cluster-randomised controlled trial. <i>Lancet, The</i> , 2017, 390, 374-388.	6.3	72
2	Key concepts that people need to understand to assess claims about treatment effects. <i>Journal of Evidence-Based Medicine</i> , 2015, 8, 112-125.	2.4	53
3	Key Concepts for Informed Health Choices: a framework for helping people learn how to assess treatment claims and make informed choices. <i>BMJ Evidence-Based Medicine</i> , 2018, 23, 29-33.	1.7	48
4	Measuring ability to assess claims about treatment effects: the development of the "Claim Evaluation Tools"™. <i>BMJ Open</i> , 2017, 7, e013184.	0.8	35
5	Effects of the Informed Health Choices podcast on the ability of parents of primary school children in Uganda to assess claims about treatment effects: a randomised controlled trial. <i>Lancet, The</i> , 2017, 390, 389-398.	6.3	33
6	Informed health choices intervention to teach primary school children in low-income countries to assess claims about treatment effects: process evaluation. <i>BMJ Open</i> , 2019, 9, e030787.	0.8	31
7	Interventions and assessment tools addressing key concepts people need to know to appraise claims about treatment effects: a systematic mapping review. <i>Systematic Reviews</i> , 2016, 5, 215.	2.5	26
8	Measuring ability to assess claims about treatment effects: a latent trait analysis of items from the "Claim Evaluation Tools"™ database using Rasch modelling. <i>BMJ Open</i> , 2017, 7, e013185.	0.8	24
9	Effects of the Informed Health Choices primary school intervention on the ability of children in Uganda to assess the reliability of claims about treatment effects, 1-year follow-up: a cluster-randomised trial. <i>Trials</i> , 2020, 21, 27.	0.7	24
10	Effects of the Informed Health Choices podcast on the ability of parents of primary school children in Uganda to assess the trustworthiness of claims about treatment effects: one-year follow up of a randomised trial. <i>Trials</i> , 2020, 21, 187.	0.7	22
11	Development of the informed health choices resources in four countries to teach primary school children to assess claims about treatment effects: a qualitative study employing a user-centred approach. <i>Pilot and Feasibility Studies</i> , 2020, 6, 18.	0.5	18
12	Development of mass media resources to improve the ability of parents of primary school children in Uganda to assess the trustworthiness of claims about the effects of treatments: a human-centred design approach. <i>Pilot and Feasibility Studies</i> , 2019, 5, 155.	0.5	15
13	Teaching critical thinking about health using digital technology in lower secondary schools in Rwanda: A qualitative context analysis. <i>PLoS ONE</i> , 2021, 16, e0248773.	1.1	14
14	Teaching children in low-income countries to assess claims about treatment effects: prioritization of key concepts. <i>Journal of Evidence-Based Medicine</i> , 2015, 8, 173-180.	2.4	12
15	Learning to think critically about health using digital technology in Ugandan lower secondary schools: A contextual analysis. <i>PLoS ONE</i> , 2022, 17, e0260367.	1.1	12
16	Priority setting for resources to improve the understanding of information about claims of treatment effects in the mass media. <i>Journal of Evidence-Based Medicine</i> , 2015, 8, 84-90.	2.4	11
17	Can an educational podcast improve the ability of parents of primary school children to assess the reliability of claims made about the benefits and harms of treatments: study protocol for a randomised controlled trial. <i>Trials</i> , 2017, 18, 31.	0.7	9
18	Protocol for assessing stakeholder engagement in the development and evaluation of the Informed Health Choices resources teaching secondary school students to think critically about health claims and choices. <i>PLoS ONE</i> , 2020, 15, e0239985.	1.1	8
