#	ARTICLE	IF	CITATIONS
1	Psychobiological mechanisms underlying the social buffering of the hypothalamicâ€“pituitaryâ€“adrenocortical axis: A review of animal models and human studies across development.. <i>Psychological Bulletin</i> , 2014, 140, 256-282.	6.1	558
2	Associations between early life adversity and executive function in children adopted internationally from orphanages. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012, 109, 17208-17212.	7.1	187
3	Parent support is less effective in buffering cortisol stress reactivity for adolescents compared to children. <i>Developmental Science</i> , 2015, 18, 281-297.	2.4	185
4	The social buffering of the hypothalamicâ€“pituitaryâ€“adrenocortical axis in humans: Developmental and experiential determinants. <i>Social Neuroscience</i> , 2015, 10, 479-488.	1.3	152
5	Additive contributions of childhood adversity and recent stressors to inflammation at midlife: Findings from the MIDUS study.. <i>Developmental Psychology</i> , 2015, 51, 1630-1644.	1.6	114
6	Psychosocial functioning and the cortisol awakening response: Meta-analysis, P-curve analysis, and evaluation of the evidential value in existing studies. <i>Biological Psychology</i> , 2017, 129, 207-230.	2.2	71
7	Conceptualizing Puberty as a Window of Opportunity for Impacting Health and Wellâ€“Being Across the Life Span. <i>Journal of Research on Adolescence</i> , 2019, 29, 155-176.	3.7	64
8	Future Directions in the Study of Early-Life Stress and Physical and Emotional Health: Implications of the Neuroimmune Network Hypothesis. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2018, 47, 142-156.	3.4	62
9	Protective factors for youth confronting economic hardship: Current challenges and future avenues in resilience research.. <i>American Psychologist</i> , 2019, 74, 641-652.	4.2	51
10	Early-Life Socioeconomic Disadvantage and Metabolic Health Disparities. <i>Psychosomatic Medicine</i> , 2017, 79, 514-523.	2.0	34
11	Modeling the association between lifecourse socioeconomic disadvantage and systemic inflammation in healthy adults: The role of self-control.. <i>Health Psychology</i> , 2015, 34, 580-590.	1.6	31
12	Frontal brain asymmetry, childhood maltreatment, and low-grade inflammation at midlife. <i>Psychoneuroendocrinology</i> , 2017, 75, 152-163.	2.7	28
13	Longitudinal associations between attachment quality in infancy, C-reactive protein in early childhood, and BMI in middle childhood: preliminary evidence from a CPS-referred sample. <i>Attachment and Human Development</i> , 2019, 21, 5-22.	2.1	28
14	Anxious to see you: Neuroendocrine mechanisms of social vigilance and anxiety during adolescence. <i>European Journal of Neuroscience</i> , 2020, 52, 2516-2529.	2.6	24
15	Racial/ethnic disparities in cortisol diurnal patterns and affect in adolescence. <i>Development and Psychopathology</i> , 2018, 30, 1977-1993.	2.3	23
16	Autonomic nervous system activity predicts increasing serum cytokines in children. <i>Psychoneuroendocrinology</i> , 2020, 119, 104745.	2.7	18
17	Associations between peripheral inflammation and resting state functional connectivity in adolescents. <i>Brain, Behavior, and Immunity</i> , 2021, 95, 96-105.	4.1	18
18	Cognitiveâ€“affective strategies and cortisol stress reactivity in children and adolescents: Normative development and effects of early life stress. <i>Developmental Psychobiology</i> , 2019, 61, 999-1013.	1.6	17

#	ARTICLE	IF	CITATIONS
19	The Role of Childhood Executive Function in Explaining Income Disparities in Long-Term Academic Achievement. <i>Child Development</i> , 2020, 91, e1046-e1063.	3.0	17
20	Adiposity, inflammation, and working memory: Evidence for a vicious cycle. <i>Brain, Behavior, & Immunity - Health</i> , 2021, 13, 100202.	2.5	14
21	Parenting matters: Parents can reduce or amplify children's anxiety and cortisol responses to acute stress. <i>Development and Psychopathology</i> , 2020, 32, 1799-1809.	2.3	14
22	Heart rate variability and circulating inflammatory markers in midlife. <i>Brain, Behavior, & Immunity - Health</i> , 2021, 15, 100273.	2.5	11
23	A systematic review and meta-analysis of the association between parenting and child autonomic nervous system activity. <i>Neuroscience and Biobehavioral Reviews</i> , 2022, 139, 104734.	6.1	7
24	Childhood parental warmth and heart rate variability in midlife: Implications for health. <i>Personal Relationships</i> , 2020, 27, 506-525.	1.5	6
25	Children's altruism following acute stress: The role of autonomic nervous system activity and social support. <i>Developmental Science</i> , 2021, 24, e13099.	2.4	6
26	Caregiver subjective and physiological markers of stress and patient heart failure severity in family care dyads. <i>Psychoneuroendocrinology</i> , 2021, 133, 105399.	2.7	6
27	Threat vigilance and socioeconomic disparities in metabolic health. <i>Development and Psychopathology</i> , 2017, 29, 1721-1733.	2.3	5
28	Curvilinear associations between family income in early childhood and the cortisol awakening response in adolescence. <i>Psychoneuroendocrinology</i> , 2021, 129, 105237.	2.7	4
29	Respiratory Sinus Arrhythmia as a Physiological Resilience Marker for Children's Health. <i>Psychosomatic Medicine</i> , 2022, 84, 374-382.	2.0	3
30	The Development of Shyness from Late Childhood to Adolescence: A Longitudinal Study of Mexican-Origin Youth. <i>Social Psychological and Personality Science</i> , 2023, 14, 13-25.	3.9	0
