

Olesja M Bondarenko

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1804998/olesja-m-bondarenko-publications-by-year.pdf>
Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

32 papers	2,300 citations	21 h-index	41 g-index
41 ext. papers	2,688 ext. citations	6 avg, IF	4.85 L-index

#	Paper	IF	Citations
32	Small-Molecule Inhibitors of the RNA M6A Demethylases FTO Potently Support the Survival of Dopamine Neurons. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	4
31	Neurotrophic Factors in Parkinson's Disease: Clinical Trials, Open Challenges and Nanoparticle-Mediated Delivery to the Brain. <i>Frontiers in Cellular Neuroscience</i> , 2021 , 15, 682597	6.1	7
30	Nanotoxicology and nanomedicine: The Yin and Yang of nano-bio interactions for the new decade. <i>Nano Today</i> , 2021 , 39, 101184	17.9	16
29	Surface carboxylation or PEGylation decreases CuO nanoparticles cytotoxicity to human cells in vitro without compromising their antibacterial properties. <i>Archives of Toxicology</i> , 2020 , 94, 1561-1573	5.8	5
28	Current challenges and coming opportunities in nanoparticle risk assessment. <i>Frontiers of Nanoscience</i> , 2020 , 16, 353-371	0.7	
27	Hazard evaluation of polystyrene nanoplastic with nine bioassays did not show particle-specific acute toxicity. <i>Science of the Total Environment</i> , 2020 , 707, 136073	10.2	52
26	Template for the description of cell-based toxicological test methods to allow evaluation and regulatory use of the data. <i>ALTEX: Alternatives To Animal Experimentation</i> , 2019 , 36, 682-699	4.3	22
25	Macrophage sensing of single-walled carbon nanotubes via Toll-like receptors. <i>Scientific Reports</i> , 2018 , 8, 1115	4.9	40
24	Ligand-Doped Copper Oxo-hydroxide Nanoparticles are Effective Antimicrobials. <i>Nanoscale Research Letters</i> , 2018 , 13, 111	5	4
23	Antimicrobial potency of differently coated 10 and 50 nm silver nanoparticles against clinically relevant bacteria <i>Escherichia coli</i> and <i>Staphylococcus aureus</i> . <i>Colloids and Surfaces B: Biointerfaces</i> , 2018 , 170, 401-410	6	41
22	Plasma membrane is the target of rapid antibacterial action of silver nanoparticles in and. <i>International Journal of Nanomedicine</i> , 2018 , 13, 6779-6790	7.3	56
21	Antimicrobial Activity of Polyoxometalate Ionic Liquids against Clinically Relevant Pathogens. <i>ChemPlusChem</i> , 2017 , 82, 867-871	2.8	27
20	Macrophage activation status determines the internalization of mesoporous silica particles of different sizes: Exploring the role of different pattern recognition receptors. <i>Biomaterials</i> , 2017 , 121, 28-40	15.6	43
19	Pan-European inter-laboratory studies on a panel of in vitro cytotoxicity and pro-inflammation assays for nanoparticles. <i>Archives of Toxicology</i> , 2017 , 91, 2315-2330	5.8	25
18	Antimicrobial activity of polyoxometalate ionic liquids (POM-ILs) against clinically relevant pathogens. <i>Toxicology Letters</i> , 2017 , 280, S193	4.4	2
17	Bacterial polysaccharide levan as stabilizing, non-toxic and functional coating material for microelement-nanoparticles. <i>Carbohydrate Polymers</i> , 2016 , 136, 710-20	10.3	44
16	Multilaboratory evaluation of 15 bioassays for (eco)toxicity screening and hazard ranking of engineered nanomaterials: FP7 project NANOVALID. <i>Nanotoxicology</i> , 2016 , 10, 1229-42	5.3	59

15	Enzymatic synthesis and ways of further treatment of fructooligosaccharides and polymeric levan for prebiotic efficiency studies. <i>New Biotechnology</i> , 2016 , 33, S122-S123	6.4	
14	Solubility-driven toxicity of CuO nanoparticles to Caco2 cells and Escherichia coli: Effect of sonication energy and test environment. <i>Toxicology in Vitro</i> , 2016 , 36, 172-179	3.6	17
13	Mechanisms of toxic action of Ag, ZnO and CuO nanoparticles to selected ecotoxicological test organisms and mammalian cells in vitro: a comparative review. <i>Nanotoxicology</i> , 2014 , 8 Suppl 1, 57-71	5.3	247
12	A 3-dimensional human embryonic stem cell (hESC)-derived model to detect developmental neurotoxicity of nanoparticles. <i>Archives of Toxicology</i> , 2013 , 87, 721-33	5.8	66
11	Toxicity of Ag, CuO and ZnO nanoparticles to selected environmentally relevant test organisms and mammalian cells in vitro: a critical review. <i>Archives of Toxicology</i> , 2013 , 87, 1181-200	5.8	827
10	Particle-cell contact enhances antibacterial activity of silver nanoparticles. <i>PLoS ONE</i> , 2013 , 8, e64060	3.7	175
9	Sub-toxic effects of CuO nanoparticles on bacteria: kinetics, role of Cu ions and possible mechanisms of action. <i>Environmental Pollution</i> , 2012 , 169, 81-9	9.3	157
8	Environmental hazard of oil shale combustion fly ash. <i>Journal of Hazardous Materials</i> , 2012 , 229-230, 192-200	12.8	25
7	Metal-Containing Nano-Antimicrobials: Differentiating the Impact of Solubilized Metals and Particles 2012 , 253-290		17
6	LuxCDABE--transformed constitutively bioluminescent Escherichia coli for toxicity screening: comparison with naturally luminous Vibrio fischeri. <i>Sensors</i> , 2011 , 11, 7865-78	3.8	43
5	The effect of composition of different ecotoxicological test media on free and bioavailable copper from CuSO4 and CuO nanoparticles: comparative evidence from a Cu-selective electrode and a Cu-biosensor. <i>Sensors</i> , 2011 , 11, 10502-21	3.8	43
4	Profiling of the reactive oxygen species-related ecotoxicity of CuO, ZnO, TiO2, silver and fullerene nanoparticles using a set of recombinant luminescent Escherichia coli strains: differentiating the impact of particles and solubilised metals. <i>Analytical and Bioanalytical Chemistry</i> , 2010 , 398, 701-16	4.4	150
3	Effects of rhamnolipids from Pseudomonas aeruginosa DS10-129 on luminescent bacteria: toxicity and modulation of cadmium bioavailability. <i>Microbial Ecology</i> , 2010 , 59, 588-600	4.4	32
2	Bioavailability of Cd, Zn and Hg in Soil to Nine Recombinant Luminescent Metal Sensor Bacteria. <i>Sensors</i> , 2008 , 8, 6899-6923	3.8	44
1	Bacterial plasma membrane is the main cellular target of silver nanoparticles in Escherichia coli and Pseudomonas aeruginosa		4
