405 peer-reviewed articles	23,221 peer-reviewed citations	7941 75 peer-reviewed h-index	627225 3.52 score
417 documents	28210 doc citations	6980 83 h-index	54461 citing authors

#	Article	IF	Citations
1	Dietary Fiber Intake and Risk of Advanced and Aggressive Forms of Prostate Cancer: A Pooled Analysis of 15 Prospective Cohort Studies. Journal of the Academy of Nutrition and Dietetics, 2025, 125, 11-23.e22.	1.4	6
2	Association between individual Warburg-related proteins and prognosis in colorectal cancer. Journal of Pathology: Clinical Research, 2025, 11, .	2.1	4
3	Healthy lifestyle and the risk of endometrial cancer. Cancer Epidemiology, 2025, 96, 102798.	1.6	0
4	Prognostic and Predictive Value of SARIFA-status Within Molecular Subgroups of Colorectal Cancer. American Journal of Surgical Pathology, 2025, 49, 956-969.	2.3	8
5	Alcohol intake and pancreatic cancer risk: An analysis from 30 prospective studies across Asia, Australia, Europe, and North America. PLoS Medicine, 2025, 22, e1004590.	4.6	27
6	Diabetes and the risk of bladder cancer subtypes in men and women: results from the Netherlands Cohort Study. European Journal of Epidemiology, 2024, 39, 379-391.	3.4	13
7	Hypertension and Risk of Endometrial Cancer: A Pooled Analysis in the Epidemiology of Endometrial Cancer Consortium (E2C2). Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 788-795.	0.6	20
8	The relationship between Stroma AReactive Invasion Front Areas (SARIFA), Warburg-subtype and survival: results from a large prospective series of colorectal cancer patients. Cancer & Metabolism, 2024, 12, .	3.2	13
9	The association between height and risk of lung cancer subtypes in men and women in the Netherlands Cohort Study. Cancer Epidemiology, 2024, 92, 102613.	1.6	0
10	Association between Long-term Energy Balance–Related Factors and Survival in Colorectal Cancer Overall and by Metabolic Warburg-Subtypes. Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 1356-1367.	0.6	1
11	Association between mutational subgroups, Warburg-subtypes, and survival in patients with colorectal cancer. Cancer Medicine, 2023, 12, 1137-1156.	2.0	12
12	The Role of Diet in Tinnitus Onset: A Hospital-Based Case-Control Study from Italy. Nutrients, 2023, 15, 621.	3.2	13
13	Association between adjuvant therapy and survival in colorectal cancer patients according to metabolic Warburg-subtypes. Journal of Cancer Research and Clinical Oncology, 2023, 149, 6271-6282.	1.8	4
14	The association of healthy lifestyle index score and the risk of renal cell cancer in the Netherlands cohort study. BMC Cancer, 2023, 23, .	2.1	13
15	Risk factors for cancer of unknown primary: a literature review. BMC Cancer, 2023, 23, .	2.1	12
16	The association of a combined healthy lifestyle with the risk of postmenopausal breast cancer subtypes in the Netherlands Cohort Study. European Journal of Epidemiology, 2023, 38, 629-641.	3.4	7
17	Cause of death and the autopsy rate in an elderly population. Virchows Archiv Fur Pathologische Anatomie Und Physiologie Und Fur Klinische Medizin, 2023, 483, 865-872.	1.9	21
18	Relationship between the Warburg effect in tumour cells and the tumour microenvironment in colorectal cancer patients: Results from a large multicentre study. Pathology Research and Practice, 2023, 247, 154518.	2.2	6

#	Article	IF	Citations
19	A Prospective Diet-Wide Association Study for Risk of Colorectal Cancer in EPIC. Clinical Gastroenterology and Hepatology, 2022, 20, 864-873.e13.	5.0	43
20	Use and Awareness of Heated Tobacco Products in Europe. Journal of Epidemiology, 2022, 32, 139-144.	0.2	66
21	Cohort Profile: The Ovarian Cancer Cohort Consortium (OC3). International Journal of Epidemiology, 2022, 51, e73-e86.	2.8	8
22	Expression of proteins associated with the Warburg-effect and survival in colorectal cancer. Journal of Pathology: Clinical Research, 2022, 8, 169-180.	2.1	30
23	Adherence to the World Cancer Research Fund and the American Institute for Cancer Research lifestyle recommendations for cancer prevention and Cancer of Unknown Primary risk. Clinical Nutrition, 2022, 41, 526-535.	3.5	7
24	Use of electronic cigarettes and heated tobacco products during the Covid-19 pandemic. Scientific Reports, 2022, 12, .	2.7	29
25	Energy balance-related factors in childhood and adolescence and risk of colorectal cancer expressing different levels of proteins involved in the Warburg-effect. International Journal of Cancer, 2022, 150, 1812-1824.	2.8	16
26	Family History and Risk of Bladder Cancer: An Analysis Accounting for First- and Second-degree Relatives. Cancer Prevention Research, 2022, 15, 319-326.	1.2	8
27	COVID-19 confinement impact on weight gain and physical activity in the older adult population: Data from the LOST in Lombardia study. Clinical Nutrition ESPEN, 2022, 48, 329-335.	0.4	21
28	Polymorphisms in the mTOR-PI3K-Akt pathway, energy balance-related exposures and colorectal cancer risk in the Netherlands Cohort Study. BioData Mining, 2022, 15, .	3.5	3
29	Dietary B group vitamin intake and the bladder cancer risk: a pooled analysis of prospective cohort studies. European Journal of Nutrition, 2022, 61, 2397-2416.	2.7	14
30	Energy Balance–Related Factors and Risk of Colorectal Cancer Expressing Different Levels of Proteins Involved in the Warburg Effect. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 633-646.	0.6	9
31	Dietary fats and their sources in association with the risk of bladder cancer: A pooled analysis of 11 prospective cohort studies. International Journal of Cancer, 2022, 151, 44-55.	2.8	20
32	Tea consumption and risk of bladder cancer in the Bladder Cancer Epidemiology and Nutritional Determinants (BLEND) Study: Pooled analysis of 12 international cohort studies. Clinical Nutrition, 2022, 41, 1122-1130.	3.5	27
33	Type 2 diabetes mellitus and cancer of unknown primary risk: results from the Netherlands Cohort Study. European Journal of Cancer Prevention, 2022, 31, 600-608.	1.3	4
34	Evaluation of a seven gene mutational profile as a prognostic factor in a population-based study of clear cell renal cell carcinoma. Scientific Reports, 2022, 12, .	2.7	6
35	Vegetable and fruit consumption and cancer of unknown primary risk: results from the Netherlands cohort study on diet and cancer. BMC Cancer, 2022, 22, .	2.1	3
36	The Impact of COVID-19 Confinement on Tinnitus and Hearing Loss in Older Adults: Data From the LOST in Lombardia Study. Frontiers in Neurology, 2022, 13, .	1.6	9

#	Article	IF	Citations
37	Energy balance-related factors and risk of colorectal cancer based on KRAS, PIK3CA, and BRAF mutations and MMR status. Journal of Cancer Research and Clinical Oncology, 2022, 148, 2723-2742.	1.8	3
38	Reproductive and external hormonal factors and the risk of renal cell cancer in the Netherlands Cohort Study. Cancer Epidemiology, 2022, 79, 102171.	1.6	8
39	Prevalence and Correlates of Overweight, Obesity and Physical Activity in Italian Children and Adolescents from Lombardy, Italy. Nutrients, 2022, 14, 2258.	3.2	18
40	Diet-wide association study of 92 foods and nutrients and lung cancer risk in the European Prospective Investigation into Cancer and Nutrition study and the Netherlands Cohort Study. International Journal of Cancer, 2022, 151, 1935-1946.	2.8	24
41	Global Prevalence and Incidence of Tinnitus. JAMA Neurology, 2022, 79, 888.	12.1	533
42	The impact of a healthy lifestyle on the risk of esophageal and gastric cancer subtypes. European Journal of Epidemiology, 2022, 37, 931-945.	3.4	42
43	Energy balance-related factors in childhood and adolescence and risk of colorectal cancer based on KRAS, PIK3CA, and BRAF mutations and MMR status. Molecular Carcinogenesis, 2022, 61, 1099-1115.	2.1	3
44	Exposure to secondhand aerosol of electronic cigarettes in indoor settings in 12 European countries: data from the TackSHS survey. Tobacco Control, 2021, 30, 49-56.	1.8	34
45	Etiologic heterogeneity of clear-cell and papillary renal cell carcinoma in the Netherlands Cohort Study. International Journal of Cancer, 2021, 148, 67-76.	2.8	22
46	Adherence to the Mediterranean Diet and Overall Cancer Incidence: The Netherlands Cohort Study. Journal of the Academy of Nutrition and Dietetics, 2021, 121, 242-252.	1.4	15
47	Loneliness in Later Life and Reaching Longevity: Findings From the Longitudinal Aging Study Amsterdam. Journals of Gerontology - Series B Psychological Sciences and Social Sciences, 2021, 76, 415-424.	1.8	14
48	Alcohol consumption, cigarette smoking and cancer of unknown primary risk: Results from the Netherlands Cohort Study. International Journal of Cancer, 2021, 148, 1586-1597.	2.8	23
49	Pregnancy outcomes and risk of endometrial cancer: A pooled analysis of individual participant data in the Epidemiology of Endometrial Cancer Consortium. International Journal of Cancer, 2021, 148, 2068-2078.	2.8	25
50	The Role of Novel (Tobacco) Products on Tobacco Control in Italy. International Journal of Environmental Research and Public Health, 2021, 18, 1895.	2.0	37
51	Vegetable intake and the risk of bladder cancer in the BLadder Cancer Epidemiology and Nutritional Determinants (BLEND) international study. BMC Medicine, 2021, 19, .	4.4	29
52	The association between meat and fish consumption and bladder cancer risk: a pooled analysis of 11 cohort studies. European Journal of Epidemiology, 2021, 36, 781-792.	3.4	22
53	Dairy foods, calcium, and risk of breast cancer overall and for subtypes defined by estrogen receptor status: a pooled analysis of 21 cohort studies. American Journal of Clinical Nutrition, 2021, 114, 450-461.	3.2	35
54	Meat consumption and cancer of unknown primary (CUP) risk: results from The Netherlands cohort study on diet and cancer. European Journal of Nutrition, 2021, 60, 4579-4593.	2.7	7

#	Article	IF	Citations
55	Validity and Reproducibility of Immunohistochemical Scoring by Trained Non-Pathologists on Tissue Microarrays. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 1867-1874.	0.6	13
56	Family history of cancer in first degree relatives and risk of cancer of unknown primary. European Journal of Cancer Care, 2021, 30, .	0.5	3
57	Parental lifespan and the likelihood of reaching the age of 90 years in the Netherlands Cohort Study. Geriatrics and Gerontology International, 2021, 21, 215-221.	1.2	7
58	Empirical Investigation of Genomic Clusters Associated with Height and the Risk of Postmenopausal Breast and Colorectal Cancer in the Netherlands Cohort Study. American Journal of Epidemiology, 2021, , .	2.4	0
59	Nut and peanut butter intake are not directly associated with the risk of endometrial or ovarian cancer: Results from a Dutch prospective cohort study. Clinical Nutrition, 2020, 39, 2202-2210.	3.5	6
60	Grain and dietary fiber intake and bladder cancer risk: a pooled analysis of prospective cohort studies. American Journal of Clinical Nutrition, 2020, 112, 1252-1266.	3.2	39
61	Pan-cancer image-based detection of clinically actionable genetic alterations. Nature Cancer, 2020, 1, 789-799.	15.2	626
62	Ovarian Cancer Risk Factor Associations by Primary Anatomic Site: The Ovarian Cancer Cohort Consortium. Cancer Epidemiology Biomarkers and Prevention, 2020, 29, 2010-2018.	0.6	9
63	Nut and peanut butter intake and the risk of colorectal cancer and its anatomical and molecular subtypes: the Netherlands Cohort Study. Carcinogenesis, 2020, 41, 1368-1384.	2.2	9
64	Anthropometry, physical activity and cancer of unknown primary (CUP) risk: Results from the Netherlands cohort study. Cancer Epidemiology, 2020, 69, 101836.	1.6	6
65	Adherence to a Western dietary pattern and risk of bladder cancer: A pooled analysis of 13 cohort studies of the Bladder Cancer Epidemiology and Nutritional Determinants international study. International Journal of Cancer, 2020, 147, 3394-3403.	2.8	25
66	Alcohol consumption in later life and reaching longevity: the Netherlands Cohort Study. Age and Ageing, 2020, 49, 395-402.	1.2	23
67	Clinical-Grade Detection of Microsatellite Instability in Colorectal Tumors by Deep Learning. Gastroenterology, 2020, 159, 1406-1416.e11.	0.9	353
68	The Risk of Ovarian Cancer Increases with an Increase in the Lifetime Number of Ovulatory Cycles: An Analysis from the Ovarian Cancer Cohort Consortium (OC3). Cancer Research, 2020, 80, 1210-1218.	2.6	58
69	Investigation of sirtuin 1 polymorphisms in relation to the risk of colorectal cancer by molecular subtype. Scientific Reports, 2020, 10, .	2.7	8
70	Nutrient-wide association study of 92 foods and nutrients and breast cancer risk. Breast Cancer Research, 2020, 22, .	3.4	42
71	Reproductive and Hormonal Factors and Risk of Ovarian Cancer by Tumor Dominance: Results from the Ovarian Cancer Cohort Consortium (OC3). Cancer Epidemiology Biomarkers and Prevention, 2020, 29, 200-207.	0.6	16
72	Coffee consumption and risk of bladder cancer: a pooled analysis of 501,604 participants from 12 cohort studies in the BLadder Cancer Epidemiology and Nutritional Determinants (BLEND) international study. European Journal of Epidemiology, 2020, 35, 523-535.	3.4	24

#	Article	IF	Citations
73	Germline polymorphisms in the Von Hippel-Lindau and Hypoxia-inducible factor 1-alpha genes, gene-environment and gene-gene interactions and renal cell cancer. Scientific Reports, 2020, 10, .	2.7	9
74	Electronic cigarette use among Italian smokers: patterns, settings, and adverse events. Tumori, 2020, 106, 229-240.	1.1	9
75	Fruit consumption and the risk of bladder cancer: A pooled analysis by the Bladder Cancer Epidemiology and Nutritional Determinants Study. International Journal of Cancer, 2020, 147, 2091-2100.	2.8	17
76	Body size and weight change over adulthood and risk of breast cancer by menopausal and hormone receptor status: a pooled analysis of 20 prospective cohort studies. European Journal of Epidemiology, 2020, 36, 37-55.	3.4	59
77	Smoking and Colorectal Cancer Risk, Overall and by Molecular Subtypes: A Meta-Analysis. American Journal of Gastroenterology, 2020, 115, 1940-1949.	0.7	208
78	Analgesic Use and Ovarian Cancer Risk: An Analysis in the Ovarian Cancer Cohort Consortium. Journal of the National Cancer Institute, 2019, 111, 137-145.	3.2	60
79	Adherence to the Mediterranean Diet and Risks of Prostate and Bladder Cancer in the Netherlands Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2019, 28, 1480-1488.	0.6	14
80	Diabetes in relation to Barrett's esophagus and adenocarcinomas of the esophagus: A pooled study from the International Barrett's and Esophageal Adenocarcinoma Consortium. Cancer, 2019, 125, 4210-4223.	2.7	17
81	Total nut, tree nut, peanut, and peanut butter intake and the risk of prostate cancer in the Netherlands Cohort Study. Prostate Cancer and Prostatic Diseases, 2019, 22, 467-474.	3.1	10
82	Body size, non-occupational physical activity and the chance of reaching longevity in men and women: findings from the Netherlands Cohort Study. Journal of Epidemiology and Community Health, 2019, 73, 239-249.	1.6	15
83	Red meat, processed meat, and other dietary protein sources and risk of overall and cause-specific mortality in The Netherlands Cohort Study. European Journal of Epidemiology, 2019, 34, 351-369.	3.4	88
84	Female reproductive factors and the likelihood of reaching the age of 90 years. The Netherlands Cohort Study. Maturitas, 2019, 125, 70-80.	2.2	10
85	Diabetes mellitus, genetic variants in the insulin-like growth factor pathway and colorectal cancer risk. International Journal of Cancer, 2019, 145, 1774-1781.	2.8	22
86	Mediterranean diet adherence and risk of esophageal and gastric cancer subtypes in the Netherlands Cohort Study. Gastric Cancer, 2019, 22, 663-674.	3.0	38
87	Mediterranean diet adherence and risk of pancreatic cancer: A pooled analysis of two Dutch cohorts. International Journal of Cancer, 2019, 144, 1550-1560.	2.8	31
88	Ovarian cancer risk factors by tumor aggressiveness: An analysis from the Ovarian Cancer Cohort Consortium. International Journal of Cancer, 2019, 145, 58-69.	2.8	40
89	Nut and peanut butter consumption and the risk of lung cancer and its subtypes: A prospective cohort study. Lung Cancer, 2019, 128, 57-66.	1.8	16
90	Associations of adult-attained height and early life energy restriction with postmenopausal breast cancer risk according to estrogen and progesterone receptor status. International Journal of Cancer, 2019, 144, 1844-1857.	2.8	8

#	Article	IF	Citations
91	An inverse association between the Mediterranean diet and bladder cancer risk: a pooled analysis of 13 cohort studies. European Journal of Nutrition, 2019, 59, 287-296.	2.7	54
92	Intake of milk and other dairy products and the risk of bladder cancer: a pooled analysis of 13 cohort studies. European Journal of Clinical Nutrition, 2019, 74, 28-35.	1.7	25
93	Mediterranean diet adherence and risk of colorectal cancer: the prospective Netherlands Cohort Study. European Journal of Epidemiology, 2019, 35, 25-35.	3.4	33
94	A nutrient-wide association study for risk of prostate cancer in the European Prospective Investigation into Cancer and Nutrition and the Netherlands Cohort Study. European Journal of Nutrition, 2019, 59, 2929-2937.	2.7	14
95	Prediagnostic body size and risk of amyotrophic lateral sclerosis death in 10 studies. Amyotrophic Lateral Sclerosis and Frontotemporal Degeneration, 2018, 19, 396-406.	1.7	28
96	Coffee or Tea? A prospective cohort study on the associations of coffee and tea intake with overall and cause-specific mortality in men versus women. European Journal of Epidemiology, 2018, 33, 183-200.	3.4	42
97	Total Nut, Tree Nut, Peanut, and Peanut Butter Consumption and the Risk of Pancreatic Cancer in the Netherlands Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2018, 27, 274-284.	0.6	21
98	Alcohol intake, ADH1B and ADH1C genotypes, and the risk of colorectal cancer by sex and subsite in the Netherlands Cohort Study. Carcinogenesis, 2018, 39, 375-388.	2.2	20
99	The Role of Genetic Variants in the Association between Dietary Acrylamide and Advanced Prostate Cancer in the Netherlands Cohort Study on Diet and Cancer. Nutrition and Cancer, 2018, 70, 620-631.	1.8	7
100	Coffee Drinking and the Risk of Endometrial Cancer: An Updated Meta-Analysis of Observational Studies. Nutrition and Cancer, 2018, 70, 513-528.	1.8	29
101	Tree nut, peanut, and peanut butter consumption and the risk of gastric and esophageal cancer subtypes: the Netherlands Cohort Study. Gastric Cancer, 2018, 21, 900-912.	3.0	18
102	Sirtuin 1 genetic variation, energy balance and colorectal cancer risk by sex and subsite in the Netherlands Cohort Study. Scientific Reports, 2018, 8, .	2.7	7
103	Alcohol drinking,ADH1BandADH1Cgenotypes and the risk of postmenopausal breast cancer by hormone receptor status: the Netherlands Cohort Study on diet and cancer. Carcinogenesis, 2018, 39, 1342-1351.	2.2	8
104	Sex-specific associations between smoking habits and reaching longevity: Netherlands Cohort Study. Geriatrics and Gerontology International, 2018, 18, 1249-1258.	1.2	12
105	Kidney stones and the risk of renal cell carcinoma and upper tract urothelial carcinoma: the Netherlands Cohort Study. British Journal of Cancer, 2018, 120, 368-374.	4.1	75
106	Interaction between dietary acrylamide intake and genetic variants for estrogen receptor-positive breast cancer risk. European Journal of Nutrition, 2018, 58, 1033-1045.	2.7	14
107	Introducing the fit-criteria assessment plot – A visualisation tool to assist class enumeration in group-based trajectory modelling. Statistical Methods in Medical Research, 2017, 26, 2424-2436.	1.4	79
108	A prospective cohort study on dietary acrylamide intake and the risk for cutaneous malignant melanoma. European Journal of Cancer Prevention, 2017, 26, 528-531.	1.3	13

#	Article	IF	Citations
109	A systematic SNP selection approach to identify mechanisms underlying disease aetiology: linking height to post-menopausal breast and colorectal cancer risk. Scientific Reports, 2017, 7, .	2.7	11
110	Mediterranean diet adherence and risk of postmenopausal breast cancer: results of a cohort study and meta-analysis. International Journal of Cancer, 2017, 140, 2220-2231.	2.8	211
111	Interactions between dietary acrylamide intake and genes for ovarian cancer risk. European Journal of Epidemiology, 2017, 32, 431-441.	3.4	36
112	A Pooled Analysis of 15 Prospective Cohort Studies on the Association between Fruit, Vegetable, and Mature Bean Consumption and Risk of Prostate Cancer. Cancer Epidemiology Biomarkers and Prevention, 2017, 26, 1276-1287.	0.6	31
113	Intake of meat and fish and risk of head–neck cancer subtypes in the Netherlands Cohort Study. Cancer Causes and Control, 2017, 28, 647-656.	1.2	17
114	Occupational exposure and amyotrophic lateral sclerosis in a prospective cohort. Occupational and Environmental Medicine, 2017, 74, 578-585.	1.7	53
115	Nuclear inclusion bodies of mutant and wild-type p53 in cancer: a hallmark of p53 inactivation and proteostasis remodelling by p53 aggregation. Journal of Pathology, 2017, 242, 24-38.	3.2	70
116	Association between Cigar or Pipe Smoking and Cancer Risk in Men: A Pooled Analysis of Five Cohort Studies. Cancer Prevention Research, 2017, 10, 704-709.	1.2	31
117	A possible dual effect of cigarette smoking on the risk of postmenopausal breast cancer. European Journal of Epidemiology, 2017, 32, 683-690.	3.4	22
118	A Four-Gene Promoter Methylation Marker Panel Consisting of GREM1, NEURL, LAD1, and NEFH Predicts Survival of Clear Cell Renal Cell Cancer Patients. Clinical Cancer Research, 2017, 23, 2006-2018.	4.5	56
119	Energy restriction at young age, genetic variants in the insulin-like growth factor pathway and colorectal cancer risk in the Netherlands Cohort Study. International Journal of Cancer, 2017, 140, 272-284.	2.8	5
120	Lifestyle, Diet, and Colorectal Cancer Risk According to (Epi)genetic Instability: Current Evidence and Future Directions of Molecular Pathological Epidemiology. Current Colorectal Cancer Reports, 2017, 13, 455-469.	0.0	106
121	Tree nut, peanut, and peanut butter intake and risk of postmenopausal breast cancer: The Netherlands Cohort Study. Cancer Causes and Control, 2017, 29, 63-75.	1.2	22
122	A Systematic Literature Review and Meta-Regression Analysis on Early-Life Energy Restriction and Cancer Risk in Humans. PLoS ONE, 2016, 11, e0158003.	1.5	17
123	Associations between unprocessed red and processed meat, poultry, seafood and egg intake and the risk of prostate cancer: A pooled analysis of 15 prospective cohort studies. International Journal of Cancer, 2016, 138, 2368-2382.	2.8	72
124	Modeling how substitution of sedentary behavior with standing or physical activity is associated with health-related quality of life in colorectal cancer survivors. Cancer Causes and Control, 2016, 27, 513-525.	1.2	42
125	Toenail selenium status and risk of subtypes of head-neck cancer: The Netherlands Cohort Study. European Journal of Cancer, 2016, 60, 83-92.	2.8	21
126	Alcohol and Dietary Folate Intake and Promoter CpG Island Methylation in Clear-Cell Renal Cell Cancer. Nutrition and Cancer, 2016, 68, 1097-1107.	1.8	10

#	Article	IF	Citations
127	Potential role of gene-environment interactions in ion transport mechanisms in the etiology of renal cell cancer. Scientific Reports, 2016, 6, .	2.7	10
128	The influence of single nucleotide polymorphisms on the association between dietary acrylamide intake and endometrial cancer risk. Scientific Reports, 2016, 6, .	2.7	29
129	Diabetes mellitus type 2 and subsite-specific colorectal cancer risk in men and women: results from the Netherlands Cohort Study on diet and cancer. European Journal of Gastroenterology and Hepatology, 2016, 28, 896-903.	1.1	36
130	Anthropometric Factors and Thyroid Cancer Risk by Histological Subtype: Pooled Analysis of 22 Prospective Studies. Thyroid, 2016, 26, 306-318.	3.0	183
131	Vegetarianism, low meat consumption and the risk of lung, postmenopausal breast and prostate cancer in a population-based cohort study. European Journal of Clinical Nutrition, 2016, 70, 723-729.	1.7	26
132	Nutrient-wide association study of 57 foods/nutrients and epithelial ovarian cancer in the European Prospective Investigation into Cancer and Nutrition study and the Netherlands Cohort Study. American Journal of Clinical Nutrition, 2016, 103, 161-167.	3.2	31
133	Alcohol consumption and breast cancer risk by estrogen receptor status: in a pooled analysis of 20 studies. International Journal of Epidemiology, 2016, 45, 916-928.	2.8	130
134	Vegetarianism, low meat consumption and the risk of colorectal cancer in a population based cohort study. Scientific Reports, 2015, 5, .	2.7	54
135	Genetic Variants in the Insulin-like Growth Factor Pathway and Colorectal Cancer Risk in the Netherlands Cohort Study. Scientific Reports, 2015, 5, .	2.7	18
136	Body mass index and risk of subtypes of head-neck cancer: the Netherlands Cohort Study. Scientific Reports, 2015, 5, .	2.7	29
