#	ARTICLE	IF	CITATIONS
1	Evaluating the Needs of Families Raising Children With and Without Disabilities: Focus on Physical Activity. <i>International Journal of Disability Development and Education</i> , 2023, 70, 911-929.	0.6	1
2	Classroom Activity Breaks Improve On-Task Behavior and Physical Activity Levels Regardless of Time of Day. <i>Research Quarterly for Exercise and Sport</i> , 2023, 94, 331-343.	0.8	4
3	How far will you go before switching hands? Handedness on the long pegboard across the lifespan. <i>Developmental Psychobiology</i> , 2021, 63, 1109-1119.	0.9	1
4	Concurrent maturation of visuomotor skills and motion perception in typically developing children and adolescents. <i>Developmental Psychobiology</i> , 2020, 62, 353-367.	0.9	13
5	Social and motor skills of children and youth with autism from the perspectives of caregivers. <i>Advances in Autism</i> , 2020, 6, 259-275.	0.6	3
6	Cross-lateralisation in children with attention deficit/hyperactivity disorder and motor skill performance. <i>International Journal of Psychology</i> , 2020, 55, 973-982.	1.7	1
7	“Not a user-friendly system”: Mothers’ realities of raising children with Autism Spectrum Disorders. <i>Nursing and Palliative Care</i> , 2020, 5, .	0.2	0
8	Investigating the Efficacy of the Hand Selection Complexity Task Across the Lifespan. <i>Frontiers in Psychology</i> , 2019, 10, 1130.	1.1	4
9	Hand selection for role-differentiated bimanual manipulation in a beading task: An assessment of typically developing children. <i>Infant and Child Development</i> , 2019, 28, e2136.	0.9	8
10	Age-group differences in beginning-state comfort reveal an increase in motor planning capabilities. <i>International Journal of Behavioral Development</i> , 2019, 43, 563-568.	1.3	2
11	Scoping Review: Physical Activity and Social Functioning in Young People With Autism Spectrum Disorder. <i>Frontiers in Psychology</i> , 2019, 10, 120.	1.1	45
12	“Dance is something that anyone can do”: Creating dance programs for all abilities. <i>Research in Dance Education</i> , 2019, 20, 257-274.	0.6	4
13	Moving and Improving: Investigating Programming and Familial Influences on Physical Activity for Children with Autism Spectrum Disorder (ASD). <i>Physical Activity and Health</i> , 2019, 3, 45-56.	0.6	2
14	End-state comfort in two object manipulation tasks: Investigating how the movement context influences planning in children, young adults, and older adults. <i>Developmental Psychobiology</i> , 2018, 60, 317-323.	0.9	8
15	Sex differences in the end-state comfort effect in pre-adolescent children. <i>Human Movement Science</i> , 2018, 57, 244-250.	0.6	3
16	Object-Tool-Actor Interaction: Object Information Drives Intended Action. <i>Journal of Motor Behavior</i> , 2018, 50, 80-95.	0.5	0
17	End-State Comfort Across the Lifespan: A Cross-Sectional Investigation of How Movement Context Influences Motor Planning in an Overturned Glass Task. <i>Motor Control</i> , 2018, 22, 211-230.	0.3	9
18	Hand selection in a preferential reaching task: The effects of object location, orientation, and task intention in preadolescent children. <i>Brain and Behavior</i> , 2018, 8, e01025.	1.0	5

#	ARTICLE	IF	CITATIONS
19	Response to Commentary: Hand and Grasp Selection in a Preferential Reaching Task: The Effects of Object Location, Orientation, and Task Intention. <i>Frontiers in Psychology</i> , 2018, 9, 905.	1.1	1
20	Maturation of visuomotor coordination and motion-defined form perception in typically-developing children. <i>Journal of Vision</i> , 2018, 18, 779.	0.1	0
21	“This is. That was.” Examining a Family’s Lived Experiences After a Cancer Diagnosis. <i>Journal of Adult Development</i> , 2017, 24, 287-294.	0.8	1
22	“I Just Miss Her. I Just Need Her Here.” Life After a Mother’s Cancer. <i>Journal of Adult Development</i> , 2017, 24, 210-215.	0.8	1
23	The Relationship Between Secondary School Physical Education and Postsecondary Physical Activity. <i>Physical Educator: A Magazine for the Profession</i> , 2017, 74, 551-569.	0.0	2
24	Anticipatory Planning in Children with Autism Spectrum Disorder: An Assessment of Independent and Joint Action Tasks. <i>Frontiers in Integrative Neuroscience</i> , 2016, 10, 29.	1.0	19
25	Hand and Grasp Selection in a Preferential Reaching Task: The Effects of Object Location, Orientation, and Task Intention. <i>Frontiers in Psychology</i> , 2016, 7, 360.	1.1	16
26	How the mode of action affects evidence of planning and movement kinematics in aging: End-state comfort in older adults. <i>Developmental Psychobiology</i> , 2016, 58, 439-449.	0.9	13
27	Do Children Have the Same Capacity to Perceive Affordances as Adults? An Investigation of Tool Selection and Use. <i>Journal of Motor Learning and Development</i> , 2016, 4, 59-79.	0.2	4
28	Dance Interventions to Increase Physical Activity Among Youth: A Systematic Review. <i>Kinesiology Review</i> , 2016, 5, 170-188.	0.4	17
29	The influence of action execution on end-state comfort and underlying movement kinematics: An examination of right and left handed participants. <i>Acta Psychologica</i> , 2016, 164, 1-9.	0.7	9
30	The Tapley and Bryden test of performance differences between the hands: The original data, newer data, and the relation to pegboard and other tasks. <i>Laterality</i> , 2016, 21, 371-396.	0.5	29
31	The influence of M.ÂP.ÂBryden's work on lateralization of motor skill: Is the preferred hand selected for and better at tasks requiring a high degree of skill?. <i>Laterality</i> , 2016, 21, 312-328.	0.5	21
32	Using Bishop’s Card Reaching Task to Assess Hand Preference in 8- to 10-Year-Old Czech Children. <i>PLoS ONE</i> , 2016, 11, e0166337.	1.1	3
33	Dreams Do Come True: The Creation and Growth of a Recreational Dance Program for Children and Young Adults with Additional Needs. <i>Journal of Dance Education</i> , 2015, 15, 100-109.	0.2	9
34	Raising a Child With Special Needs. <i>Clinical Nurse Specialist</i> , 2015, 29, E8-E15.	0.3	10
35	The Influence of Parkinson’s Disease Motor Symptom Asymmetry on Hand Performance: An Examination of the Grooved Pegboard Task. <i>Parkinson's Disease</i> , 2015, 2015, 1-5.	0.6	4
36	Is strength of handedness reliable over repeated testing? An examination of typical development and autism spectrum disorder. <i>Frontiers in Psychology</i> , 2015, 6, 17.	1.1	24

#	ARTICLE	IF	CITATIONS
37	The effect of endpoint congruency on bimanual transport and rotation tasks. <i>Frontiers in Psychology</i> , 2015, 6, 92.	1.1	0
38	Dancing with Down syndrome: a phenomenological case study. <i>Research in Dance Education</i> , 2015, 16, 291-307.	0.6	16
39	The Link Between Cerebellar Dominance and Skilled Hand Performance in 8-10-Year-Old Right-Handed Children. <i>Journal of Motor Behavior</i> , 2015, 47, 386-396.	0.5	4
40	Hand preference, performance abilities, and hand selection in children. <i>Frontiers in Psychology</i> , 2014, 5, 82.	1.1	162
41	Does your dominant hand become less dominant with time? The effects of aging and task complexity on hand selection. <i>Developmental Psychobiology</i> , 2014, 56, 537-546.	0.9	19
42	Dance/Movement Therapy as an Intervention for Children with Autism Spectrum Disorders. <i>American Journal of Dance Therapy</i> , 2014, 36, 209-228.	0.7	52
43	The Development of end-state comfort in a cup manipulation task. <i>Developmental Psychobiology</i> , 2014, 56, 407-420.	0.9	22
44	Direction of single obstacle circumvention in middle-aged children. <i>Gait and Posture</i> , 2014, 40, 113-117.	0.6	9
45	Handedness throughout the lifespan: cross-sectional view on sex differences as asymmetries change. <i>Frontiers in Psychology</i> , 2014, 5, 1556.	1.1	26
46	Motor skills in Czech children with attention-deficit/hyperactivity disorder and their neurotypical counterparts. <i>Research in Developmental Disabilities</i> , 2013, 34, 4142-4153.	1.2	32
47	Seeing the Glass Half Full. <i>Clinical Nurse Specialist</i> , 2012, 26, 48-56.	0.3	46
48	The Costs of Caring for a Child with an Autism Spectrum Disorder. <i>Issues in Comprehensive Pediatric Nursing</i> , 2012, 35, 45-69.	0.6	55
49	The Relationship Between the Grooved Pegboard Test and Clinical Motor Symptom Evaluation Across the Spectrum of Parkinson's Disease Severity. <i>Journal of Parkinson's Disease</i> , 2012, 2, 207-213.	1.5	8
50	An Examination of Handedness and Footedness in Children with High Functioning Autism and Asperger Syndrome. <i>Journal of Autism and Developmental Disorders</i> , 2012, 42, 2192-2201.	1.7	12
51	Physical Activity Policies and Legislation in Schools. <i>American Journal of Preventive Medicine</i> , 2012, 43, 643-649.	1.6	36
52	Hemispatial Effects for Left- and Right-handers on a Pointing Task. <i>International Journal of Psychological Studies</i> , 2012, 4, .	0.1	0
53	Influences of task complexity, object location, and object type on hand selection in reaching in left and right-handed children and adults. <i>Developmental Psychobiology</i> , 2011, 53, 47-58.	0.9	50
54	Can an observational method of assessing hand preference be used to predict language lateralisation?. <i>Laterality</i> , 2011, 16, 707-721.	0.5	5

#	ARTICLE	IF	CITATIONS
55	Under what conditions will right-handers use their left hand? The effects of object orientation, object location, arm position, and task complexity in preferential reaching. <i>Laterality</i> , 2011, 16, 722-736.	0.5	24
56	Preference and performance measures of handedness: The effect of task complexity. <i>Brain and Cognition</i> , 2008, 67, 11.	0.8	41
57	Physiological, Sensory, and Functional Measures in a Model of Wrist Muscle Injury and Recovery. <i>Physiotherapy Canada Physiotherapie Canada</i> , 2008, 60, 30-39.	0.3	3
58	Task demands affect manual asymmetries in pegboard performance. <i>Laterality</i> , 2007, 12, 364-377.	0.5	42
59	An Observational Method of Assessing Handedness in Children and Adults. <i>Developmental Neuropsychology</i> , 2007, 32, 825-846.	1.0	34
60	Examining gender differences in the health behaviors of Canadian university students. <i>Perspectives in Public Health</i> , 2007, 127, 38-44.	0.5	65
61	Coordination and concurrency in bimanual rotation tasks when moving away from and toward the body. <i>Experimental Brain Research</i> , 2007, 183, 541-556.	0.7	9
62	Reaching patterns across working space: The effects of handedness, task demands, and comfort levels. <i>Laterality</i> , 2006, 11, 465-492.	0.5	41
63	Using hand performance measures to predict handedness. <i>Laterality</i> , 2006, 11, 1-14.	0.5	92
64	Preferential reaching across regions of hemispace in adults and children. <i>Developmental Psychobiology</i> , 2006, 48, 121-132.	0.9	72
65	Handedness and health: An examination of the association between different handedness classifications and health disorders. <i>Laterality</i> , 2005, 10, 429-440.	0.5	55
66	Unimanual performance across the age span. <i>Brain and Cognition</i> , 2005, 57, 26-29.	0.8	37
67	The performance of left-handed participants on a preferential reaching test. <i>Brain and Cognition</i> , 2005, 57, 143-145.	0.8	27
68	A new method of administering the Grooved Pegboard Test: Performance as a function of handedness and sex. <i>Brain and Cognition</i> , 2005, 58, 258-268.	0.8	137
69	Preference and performance measures of handedness. <i>Brain and Cognition</i> , 2004, 55, 283-285.	0.8	67
70	The effects of skill demands and object position on the distribution of preferred hand reaches. <i>Brain and Cognition</i> , 2004, 55, 349-351.	0.8	49
71	Development of handedness: Comparison of questionnaire and performance-based measures of preference. <i>Brain and Cognition</i> , 2003, 53, 149-151.	0.8	64
72	Hand differences in pegboard performance through development. <i>Brain and Cognition</i> , 2003, 53, 315-317.	0.8	52

#	ARTICLE	IF	CITATIONS
73	Ultrasound Treatment and Recovery from Eccentric-Exercise-Induced Muscle Damage. <i>Journal of Sport Rehabilitation</i> , 2002, 11, 305-314.	0.4	4
74	Inter- and intra-observer reliability of calculating cumulative lumbar spine loads. <i>Ergonomics</i> , 2002, 45, 788-797.	1.1	21
75	Finger length and distal finger extent patterns in humans. <i>American Journal of Physical Anthropology</i> , 2002, 117, 209-217.	2.1	158
76	Hand preference in simultaneous unimanual tasks: a preliminary examination. <i>Brain and Cognition</i> , 2002, 48, 284-7.	0.8	1
77	Pushing the limits of task difficulty for the right and left hands in manual aiming. <i>Brain and Cognition</i> , 2002, 48, 287-91.	0.8	3
78	Knowledge of the risks and benefits associated with oral contraception in a university-aged sample of users and non-users. <i>Contraception</i> , 2001, 63, 223-227.	0.8	28
79	Preliminary examination of oral contraceptive use among university-aged females. <i>Contraception</i> , 2001, 63, 229-233.	0.8	26
80	Can I twist your arm? The influence of target orientation on the magnitude of the right-hand advantage. <i>Laterality</i> , 2001, 6, 141-147.	0.5	0
81	Can I twist your arm? The influence of target orientation on the magnitude of the right-hand advantage. <i>Laterality</i> , 2001, 6, 141-147.	0.5	1
82	A Performance Measure of the Degree of Hand Preference. <i>Brain and Cognition</i> , 2000, 44, 402-414.	0.8	145
83	A developmental analysis of the relationship between hand preference and performance: II. A performance-based method of measuring hand preference in children. <i>Brain and Cognition</i> , 2000, 43, 60-4.	0.8	26
84	A developmental analysis of the relationship between hand preference and performance: I. Preferential reaching into hemispace. <i>Brain and Cognition</i> , 2000, 43, 370-4.	0.8	19
85	Posture and target location effects on manual preference. <i>Brain and Cognition</i> , 2000, 43, 421-5.	0.8	2
86	Spatial Task Demands Affect the Extent of Manual Asymmetries. <i>Laterality</i> , 1999, 4, 27-37.	0.5	27
87	An examination of colour-contingent pattern aftereffects. <i>Spatial Vision</i> , 1994, 8, 77-94.	1.4	49
88	Physical Activity in Individuals with Autism Spectrum Disorders (ASD): A Review. , 0, , .		13
89	Physioacoustic therapy: placebo effect on recovery from exercise-induced muscle damage. <i>Acta Kinesiologiae Universitatis Tartuensis</i> , 0, 13, 117.	0.5	2
